Description

ANIMA Funds Plc (the “Company”) is an open ended umbrella investment company with variable capital and segregated liability between sub-funds (each a “Fund”, collectively the “Funds”) incorporated with limited liability in Ireland under the Companies Act, 2014 with registration number 308009 and authorised under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”) and subject to the Central Bank (Supervision & Enforcement) Act 2013 (Section 48(1) (Undertakings for Collective Investment in Transferable Securities)) Regulations 2019 (the “Central Bank UCITS Regulations”).

The Company is structured as an umbrella investment company in that different Funds may be established with the prior approval of the Central Bank. In addition, each Fund may issue more than one Share Class. The Shares of each class issued by a Fund will rank pari passu with each other in all respects except as to all or any of the following:

- currency of denomination of the class;
- hedging strategies;
- dividend policy;
- the level of fees and expenses to be charged; and
- the minimum subscription and minimum holding applicable.

The assets of each Fund will be separate from one another and will be invested in accordance with the investment objectives and policies applicable to each such Fund.

The Funds in existence during the financial year were as follows:

Categories of Funds

The Funds are detailed below under three headings as per the Prospectus: Markets Funds, Strategies Funds and Solution Funds.

- Markets Funds: means a traditional bond or equity type Fund, which seeks to achieve its objective through investment in transferable securities and financial derivative instruments.
- Strategies Funds: means a Fund, the policy of which has been formulated with a view to following a particular trading or investment strategy.
- Solution Funds: means a Fund, the policy of which has been formulated with a view to providing investment solutions over a specific timeframe.

Segregated Liability

The Company is structured as an open-ended umbrella investment company with segregated liability between its Funds. While the provisions of the Companies Act 2014, as amended provide for segregated liability between Funds, these provisions have not been tested in foreign courts, in particular in satisfying local creditors' claims. Accordingly it is not free from doubt that the assets of any Fund of the Company may not be exposed to the liabilities of other Funds.

Investment Objectives

Please refer to the Prospectus for each Fund's investment objectives and policies.

Manager

The Company has appointed ANIMA SGR S.p.A. as manager of the Company (the "Manager") pursuant to the Management Agreement. Under the terms of the Management Agreement the Manager is responsible, subject to the overall supervision and control of the Directors, for the management, investment management and administration of the Company's affairs, and the distribution of Shares.

ANIMA SGR S.p.A. is regulated as a funds management company by Bank of Italy and is a 100% direct subsidiary of ANIMA Holding S.p.A.. Ordinary shares of ANIMA Holding S.p.A. are listed on the MTA (Mercato Telematico Azionario) of the Italian Stock Exchange.

Net Asset Value

The Net Asset Value of a Fund is determined by valuing the assets of each relevant Fund (including income accrued but not collected) and deducting the liabilities of each relevant Fund (including a provision for duties and charges, accrued expenses and fees and other liabilities). The Net Asset Value of a class is determined by calculating that portion of the Net Asset Value of the relevant Fund attributable to the relevant class subject to adjustment to take account of assets and/or liabilities attributable to the Class. The Net Asset Value of a Fund is expressed in the base currency of the Fund. The base currency of each Fund may vary as a result of the primary economic environment in which it operates.

The Net Asset Value per Share is calculated by dividing the Net Asset Value of the relevant Fund or Class by the total number of Shares in issue in the Fund or Class at the relevant Valuation Point rounded to four decimal places.

Issue and Redemption of Shares**Issue of Shares**

Applications for Shares should be made to the Administrator or to the Distributor for onward transmission to the Administrator. Applications received by the Administrator or by the Distributor prior to the Dealing Deadline for any Dealing Day are dealt with on that Dealing Day. Any applications received after the Dealing Deadline will be dealt with on the following Dealing Day unless the Directors in their absolute discretion determine otherwise provided that the application is received before the Valuation Point. Minimum Subscription amounts are disclosed in the Fund or Class Information Card in the Prospectus.

Redemption of Shares

Applications for the redemption of Shares are made to the Administrator or to the Distributor for onward transmission to the Administrator. Requests for redemptions received prior to the Dealing Deadline for any Dealing Day are dealt with on that Dealing Day. Any requests for redemptions received after the Dealing Deadline for a Dealing Day will be dealt with on the next Dealing Day unless the Directors in their absolute discretion determine otherwise provided that the application is received before the Valuation Point. Redemption requests will only be accepted where cleared Funds and completed documents are in place for original subscriptions. There is no minimum redemption transaction size for any Class of Share in any Fund. Shareholders should note that if a redemption request would, if processed, leave the Shareholder holding Shares having a Net Asset Value of less than the Minimum Holding, the Directors may, in their discretion, redeem the whole of the Shareholder's holding. The redemption price per Share shall be the Net Asset Value per Share less applicable duties and charges.

Published Information

The Net Asset Value per Share is made available at the registered office of the Administrator during normal business hours and at the following website www.animasgr.it/en not later than the third Business Day following the relevant Valuation Point. The Prospectus also allows for publication in such other places as may be determined by the Directors from time to time. The Directors of the Company have approved the daily publication of the Net Asset Value per Share in "Il Sole-24 Ore" (Italian daily newspaper).

The Directors submit their report together with the audited financial statements of the Company for the financial year ended 31 December 2023.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' report and the financial statements in accordance with Irish law. Irish law requires the Directors to prepare financial statements for each financial year that gives a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and of the profit or loss of the Company for the financial year. Under that law the Directors have prepared the financial statements in accordance with International Financial Reporting Standards and Irish law.

Under Irish law, the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and the profit or loss of the Company for the financial year.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in question, subject to any material departures from those standards being disclosed and explained in the notes to the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping proper books of account that disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 2014, as amended.

The Directors confirm that they believe that they have complied with the above requirements in preparing the financial statements.

The Directors are responsible for the maintenance and integrity of the corporate and financial information relating to the Company which may be included on the Manager's website. Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

In carrying out the above requirements the Company has appointed ANIMA SGR S.p.A. as Manager of the Company (the "Manager") and the Manager has appointed State Street Fund Services (Ireland) Limited to act as administrator (the "Administrator") of the Company. The Directors believe that they have complied with the requirements of the Companies Act, 2014, as amended, with regard to accounting records by employing an experienced administrator with appropriate expertise and by providing adequate resources to the financial function. The accounting records of the Company are maintained by the Administrator at 78 Sir John Rogerson's Quay, Dublin 2, Ireland.

The Directors are also responsible for safeguarding the assets of the Company. In this regard they have appointed State Street Custodial Services (Ireland) Limited (the "Depositary") as depositary to the Company pursuant to the terms of a depositary agreement. The Directors have a responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities.

Compliance statement

The Directors acknowledge that they are responsible for securing compliance by the Company with its Relevant Obligations as defined with the Companies Act 2014 (the "Relevant Obligations"). The Directors confirm that they have drawn up and adopted a compliance policy statement setting out the Company's policies that, in the Directors' opinion, are appropriate to the Company in respect of its compliance with its Relevant Obligations.

The Directors further confirm the Company has put into place appropriate arrangements or structures that are, in the Directors' opinion, designed to secure material compliance with its Relevant Obligations and that measures have been taken throughout the financial year to which this Report relates to meet and satisfy the Company's compliance with the Relevant Obligations.

Relevant audit information

The Directors have taken all the steps that they ought to have taken as Directors in order to make themselves aware of any relevant audit information and to ensure that the Company's Statutory Auditors are aware of this information.

Audit Committee

The Company has not established a separate Audit Committee as the Directors operate as a unitary Board whilst considering such related matters. The Directors believe that the Company's straightforward structure together with the delegation of responsibilities to the Manager does not warrant such a function. This is reviewed by the Board annually.

Transactions with Connected Persons

Regulation 43(1) of the Central Bank UCITS Regulations "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the unit-holders of the UCITS".

As required under Central Bank UCITS Regulation 81(4), the Manager, as responsible person of the Company, is satisfied that there are arrangements in place, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected persons that were entered into during the period to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

Employees

There were no persons employed by the Company during the financial year.

Review of performance of the business, principal activities and future developments of the business

A detailed performance review of the business, the Funds' principal activities and future developments is included in the Manager's Report for each Fund.

Principal risks and uncertainties

Under Companies Act 2014, as amended, the Company is required to give a description of the principal risks and uncertainties which it faces. Investment in the Company carries with it a degree of risk, including, but not limited to, the risks referred to below and in Notes 2 and 3 of these Financial Statements. Information about the financial risk management objectives and policies of the Company is also discussed in Notes 2 and 3.

The principal risks and uncertainties facing the Company include Market risk, Credit risk and Liquidity risk. These risks should not be regarded as a complete and comprehensive statement of all potential risks and uncertainties. The Prospectus issued by the Company discloses a variety of other risks and uncertainties which investors should consider before investing. Other risks may arise of which the Board is not aware or which it deems immaterial.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risks: currency risk, interest rate risk and other price risk. Market risks are referred to in Note 3 of these Financial Statements.

Credit risk is the risk that the issuer or the counterparty of a financial instrument will be unable to pay amounts in full when they fall due. Credit risk comprises two types of risks: issuer risk and counterparty risk.

All securities, cash at bank balances are held by the Depository, State Street Custodial Services (Ireland) Limited. Bankruptcy or insolvency of the Depository, State Street Custodial Services (Ireland) Limited, may cause the Company's rights with respect to cash and securities held by these entities to be delayed and the Company would be treated as a general creditor of that entity in respect of its cash balances. Periodic monitoring and an annual review are performed on the Depository by an outsourcing monitoring team of the Manager. This review may include as appropriate an assessment of the Depository's liquidity position, income streams, asset quality and credit ratings. Credit risk is referred to in Note 3 of these Financial Statements.

Liquidity risk is the risk that the Funds will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial assets. Delivery obligations may arise from: account payable (i.e. investment management fees, depository fees, etc.), financial derivative instruments, cash redemptions of redeemable participating shares. Liquidity risks are referred to in Note 3 of these Financial Statements.

Going Concern

The Directors have made an assessment of the Company's ability to continue as a going concern and are satisfied that the Company will continue in business for the foreseeable future. Notwithstanding the challenging global financial environment, the management is not aware of any material uncertainties that may cast doubt upon the Company's ability to continue as a going concern. Therefore the financial statements continue to be prepared on a going concern basis. The Directors consider that the financial statements taken as a whole are fair, balanced and understandable.

Accordingly, having assessed its principal risks, the Directors of the Company believe that the Company is well placed to manage its risks successfully and it is thus appropriate to prepare the financial statements on a going concern basis. The Company does not have a fixed life. The Directors of the Company consider that the financial statements taken as a whole are fair, balanced and understandable and they provide the information necessary for the shareholder to assess the Company's position, performance, business model and strategy.

The Directors of the Company do not believe that there is any material uncertainty that casts any doubts on the Company's ability to continue as a going concern.

Results and distributions

The results and distributions for the financial year are set out in the Statement of Comprehensive Income for each Fund.

Distribution Policy

The Articles of Association of the Company empower the Directors to declare dividends in respect of any Shares in the following Funds out of the net income, realised gains or capital standing to the credit account of the Fund:

*Please refer to Note 22 to the financial statements for details of Fund launches, Fund mergers and Fund terminations during the financial year.

The above details are in summary form only and must be read in conjunction with the detailed information contained within the Prospectus of the Funds.

Significant events during the financial year

Significant events during the financial year are disclosed in Note 22 to the financial statements.

Significant events after the financial year end

Significant events after the financial year end are disclosed in Note 23 of the financial statements.

Corporate Governance Code

The Irish Funds association ("IF") in association with the Central Bank has published a corporate governance code (the "IF Code") that may be adopted on a voluntary basis by Irish authorised collective investment schemes. The Company adheres to the IF Code.

Directors

The name and nationality of persons who were Directors at any time during the financial year ended 31 December 2023 are set out below. All Directors are non-executive directors.

Andrew Bates, Chairman (Irish)
 Pierluigi Giverso (Italian)
 Rory Mason (Irish - Independent Director)
 Agostino Ricucci (Italian)
 Davide Sosio (Italian)

Directors' and Secretary's interests

None of the Directors or the Company Secretary hold or held any beneficial interest in the shares of the Company during the financial year.

Other than as disclosed in Note 17, no Directors had at any time during the financial year or at the financial year end, a material interest in any contract of significance, in relation to the business of the Company.

Independent Auditors

Deloitte Ireland LLP, Independent Auditors, have signified their willingness to continue in office in accordance with section 383(2) of the Companies Act 2014.

On behalf of the Board of Directors:

Director

16 April 2024

Director

Markets

Inflationary pressure, commodity and energy price fluctuations, the restrictive measures adopted by the central banks, geopolitical tensions, the global growth outlook and some risks of financial instability were the main sources of uncertainty for financial markets in 2023. Counter inflationary measures implemented by the Fed and the ECB, along with expectations of possible monetary policy reviews have generated varying pressures on both government yields and equity markets. Negative spill-over risks for growth have fueled intermittent aversion towards risky asset classes.

On a year-to-year basis, the MSCI World Local global equity index performed well, posting just over +21% in local currency terms at the end of 2023. A positive start to the year and then a partial drop in value in February and March was followed by a period of growth that peaked at the end of July. In the second half of the summer and in early autumn, the index recorded sideways and declining trends, with the rise in rates, some disappointing quarterly reports, geopolitical risks and the rise in oil prices leading to all-round weakness. The correction halted at the end of October, resulting in a noticeable stock market recovery that continued until December, due in part also to confidence in the end of the rate hike cycle and the declines in oil and the US Dollar. Equity indices recorded positive returns in excess of +25% in the USA, +11% in Europe, +15% in the Eurozone, +27% in Italy, about +3% in the UK, around +25% in Japan and around +7% in Emerging Markets, while the downturn in the Chinese stock market kept the BRICS index in negative territory (-0.8%). The best performing sectors globally included technology (Artificial Intelligence), communications and consumer discretionary; the worst performers were energy, utilities and consumer staples. After a mid-March peak, equity volatility (VIX, V2X Index) shifted sideways and declined, albeit with some rebounds in May and over the summer. Following the noticeable autumn rebound (from mid-September though to October), volatility fell back below the 100-, 200- and 500-day moving averages in early November, settling at the year's lows.

Bond indices showed positive trends in local currency, for global government bonds (whose index, on a year-to-year 2023 basis, recorded gains of about +3.9%), corporate bonds (about +8% for Investment Grade, about +12% for High Yield) and emerging government bonds in hard currency (about +12%). Yield trends moved upwards until the end of October before falling back sharply and closing 2023 with largely flat variations in the US and negative movements in the Eurozone. With the easing of restrictive policies, investors' confidence has begun to emerge even in the first half of 2024, despite calls for caution from the Fed and the ECB. This outlook has contributed to a flattening of yields, particularly on shorter maturities. At the end of 2023, 2- and 10-year Bunds were close to 2.4 % and 2.0 %, while 2- and 10-year Treasuries stood at around 4.25 % and 3.88 %. BTP 10-year yields hit 3.69%, while the BTP-Bund spread closed the year at 166 basis points. The various government issues recorded variable performances at around 9% for Italian government bonds, about 6.7% for the Eurozone index, about 5.1% for the German index, 3.8% for the US index, and about 0.4% for the Japanese index. Bond volatility (MOVE Index) peaked in March then moved sideways and declined, albeit with some rebounds in May and during the summer. After a noticeable resurgence in early autumn (until October), volatility at year-end was below the 100-, 200- and 500-day moving averages.

The Euro-Dollar exchange rate at the end of 2023 stood at 1.1039, representing a +3.12% gain from the beginning of the year. Changing expectations of US monetary policy affected the Dollar, which experienced alternating phases of strength and weakness. The currency strengthened in the third quarter, and, thanks to expectations of an easing of US restrictive policy, gained some strength in the final quarter of the year. The Yen, which has long been penalised by the Bank of Japan's accommodative approach and the widening rate differential with western currencies, partially appreciated from mid-November in view of the possible normalisation of the existing ultra-expansive monetary policy.

The price of gold hit new highs in December, reaching USD 2,062.98 - a year-on-year 2023 growth of just over +13%. Commodities experienced alternating phases of recovery and weakening: the indices recorded marked declines of between -5% and -12%, depending on the baskets considered. Brent and WTI stood at USD 77.04 and USD 71.65 per barrel respectively at year-end (with year-on-year declines of around -10%).

Natural gas declined, and industrial metals experienced overall weakness.

Macroeconomic scenario

In 2023, global growth proved resilient despite some slowdowns. The services sector remained buoyant in the major developed economies, while demand held up better than expected, especially in the US. Overall inflation fell slightly on both sides of the Atlantic, although core services remained subject to robust and persistent pressure. Monetary policy institutions maintained their restrictive stances except for China and Japan. However, the Fed's adoption of a more data-dependent approach slowed down the pace of the hikes: it raised rates by 25 basis points in February, March, May and July but left them unchanged at its meetings in June, September, November and December. The reference rate stands in the 5.25%-5.5% range, the highest level for 22 years. The December FOMC was surprisingly dovish in outlook: it signaled a cut to the median FOMC dot of -75 basis points in 2024, but fell short of ruling out upward adjustments. The ECB hiked rates by 50 basis points in February and March, and 25 in May, June, July and September, raising the deposit rate to 4% and the main lending rate to 4.5% (the highest level ever), discontinuing reinvestments under the APP from July. This highlighted the adoption of a data-dependent approach, like the Fed. As of today, the Governing Council considers that key interest rates have reached levels that, if maintained for long enough, will bring inflation back to target rates. The Bank of England raised the bank rate to 5.25%, with hikes of 50 basis points in February and June, and 25 in March, May and early August. The Swiss National Bank set its policy rate at 1.75%. The Bank of Japan maintained its accommodative monetary policy, continuing its support for the economy and capping upward pressure on rates. The People's Bank of China confirmed an expansionary approach in view of a still muted inflation outlook.

The US economy gave out positive signs, teetering between demand resilience and sporadic losses of momentum (in the first part of 2023). The continued strong domestic demand for consumption and investment, proved to be the main driver of growth. The labour market remained very robust: in November, unemployment was down at 3.7%, despite the increase in the labour force. The creation of new jobs and wage levels were healthy, while consumer confidence gained traction. The composite PMI stood just above the expansion threshold, supported by services, while manufacturing continued to shrink. Following a period of stickiness and persistence, consumer price indicators stabilised after some drops in core prices. The decline in asset prices has eased off more than expected and underlying disinflation has levelled out to a more gradual and less widespread pace than at the beginning of the summer. Inflation was characterised by fluctuating, uncertain trends. The headline figure slowed down to 3.1% in November and the core figure was stable at +4%, with the services components remaining strong. Growing debt and a high budget deficit led the US Treasury to increase Treasury issues.

In the Eurozone, the slowdown in growth brought the economy to the brink of stagnation. Demand slowed, while private consumption formed a pocket of resilience. The real estate sector was hit by rising rates on loans, while industrial output plunged. Price pressures remained high during the year, but the most recent data showed signs of overall consumer inflation stabilising and then slowing down. Core service inflation, which was initially stickier, also fell significantly. Output price indicators, after feeling the effects of the temporary recovery in oil prices, declined again after the summer. The labour market remains fairly robust. Cyclical indicators (PMI) are in the recessionary quadrant, consistent with stagnating growth and the prospects of a slight downturn. Consumer confidence is decidedly negative. Financial conditions look widely restrictive.

In China, growth momentum has gradually stalled. Cyclical indicators were expansive in both composite and services segments. Retail sales offered no significant support, while consumption stabilised at the beginning of the fourth quarter. Industrial output recovered more than expected. However, trade remains weak, with exports contracting and real estate still struggling. There is no notable inflationary pressure and the authorities have announced stimulus measures, but these are on the whole slow and fragmented.

The geopolitical crisis in Ukraine shows no signs of letting up, and on top of this the war in the Middle East broke out after the Hamas attack on 7 October 2023, which was followed by Israel's military retaliation in the Gaza Strip. In addition to the severe social and humanitarian impacts on Gaza, fears of terrorist actions and a widening of the conflict have grown worldwide.

COP28 in Dubai in December approved the Global Stocktake, with a list of actions to reduce greenhouse gas emissions by ramping up the use of renewable energy.

Outlook

Macroeconomic data suggests that in early 2024 the major economies may experience a cyclical slowdown in growth, inflation and monetary policy of differing intensities in different areas. The United States continues to show dynamism and resilience, while the Eurozone shows signs of a possible downturn in activity by the first quarter. Lastly China's growth is unlikely to exceed its sustainable growth ceiling.

In the US, retail sales, gains in the goods and services sectors, new orders, corporate balance sheets, investment, solid consumer data, real income, extensive household savings, and labour market solidity all suggest that the pace of spending is holding up in the short term. Growth expansion is expected to slow down evenly in the coming quarters and the economy could avoid recession at least until the third quarter of 2024.

The Eurozone growth outlook points to a gradual slowdown, with even a possible short, shallow recession by early 2024. Investment is negative-leaning but the sequential pattern suggests that purchasing managers' indices may be close to a low. The tightening of monetary and lending conditions will weigh on domestic demand, with a dampening effect on business. Fiscal policy could turn from stimulus to constraint: the reactivation of the Maastricht criteria will herald the end of large-scale, out-of-control spending, even without a return to draconian austerity. Going forward, consumption trends appear less dazzling than in the USA, with little support coming from exports. As for the services sector, it could lose momentum faster than expected. The Italian economy could find itself gradually deteriorating. The EU is forecasting a complex outlook for Italy's public finance, especially as regards the deficit/GDP ratio, the budget deficit and public debt.

In China, both growth prospects and industrial production are in line with potential and point away from a re-acceleration: 2024 could be a year of transition. The authorities are expected to launch new fiscal and monetary stimuli, but the delays and the limited effectiveness of the responses are unlikely to create real turning points. Given that foreign trade will likely contribute less and less to GDP, and taking into account the real estate sector's critical status, growth could move towards a positive but progressively more moderate sequential pace in the coming quarters.

In the United States, there may be several bumps on the road to disinflation, with a slow price adjustment process countered by robust domestic demand and wages posing an upside risk. The US inflation forecast indicates a trend towards gradually decreasing sequential levels.

In the Eurozone, overall inflation looks set to continue its decline in the coming months, faster than in the US. Core inflation is expected to ease off moderately, driven primarily by goods but with some pressure in the services sector. A sharper-than-expected fall in activity could drive disinflationary momentum, while higher-than-expected wages could support service prices.

On both sides of the Atlantic, monetary policy has imposed stringent financial conditions to curb inflation, which is still above target levels. However, the end-of-year meetings of both Central Banks seem to have confirmed the end of their upward cycles. Looking ahead, the consequences of higher rates and tighter credit conditions should slow the economy, wages and inflation and should see the Fed and ECB changing course. Nonetheless, calls for caution remain, given that the battle against inflation cannot yet be considered over. After repeatedly pushing the data-dependent approach, Powell gave accommodative signals at the last FOMC in 2023. However, if inflation falls more slowly than expected, the Fed may cut less than markets anticipate. Conversely, if inflation and/or growth weaken more than expected, there could be a more pronounced easing.

The ECB will find itself facing a worsening macro environment. The likelihood of further rate hikes has faded: monetary policy is already deemed fit to pursue the inflation target of 2% in 2025. In December, Christine Lagarde did not comment on how long rates will remain at current levels, let alone on the likelihood of any cuts. However, in an interview at the Davos Economic Forum she hinted at a possible cut by the summer. Curtailing APP reinvestments will have a substantial impact on financial conditions, especially in a year of hefty increases in the net supply of government bonds. It is unlikely that the ECB will succeed in removing the PEPP reinvestment programme. Lower-than-predicted levels of growth and inflation could allow for a more accommodative stance on rates and it is not impossible that the ECB could surprise markets and investors by acting as early as the first half of 2024.

The People's Bank of China is expected to maintain an expansionary approach geared to support lending to businesses and consumers – and also to stimulate and shore up the economy – while also keeping the Renminbi stable. It is therefore conceivable that rates will remain unchanged or be marginally revised downwards.

Global equity markets continue to be influenced by highly variable news on the macroeconomic framework, fundamentals, financial conditions, liquidity flows, and geopolitical tensions, with elections in Europe and the US adding to the list later in 2024. These factors combine to make up an uncertain outlook and with it the possibility of outbreaks of volatility; such a scenario would make an overall neutral approach to equities advisable. With the Central Banks' aggressive actions creating an increasingly weakened environment (the braking factor arising from ever tighter financial conditions), no particular difficulties are currently emerging as regards corporate margins and profitability prospects. The expected cyclical slowdown in the developed markets could happen late, with less intensity than expected, and be already partly factored into prices. There could also be a similar effect on expectations of possible future rate cuts, which could ease the effects of the central banks' restrictive actions. So, for the time being there are no discernible catalysing factors capable of creating a clear directional shift in the stock markets, and this rules out the possibility of a marked cut in rates in the very short term. The expansion or contraction of the economic cycle, diverging growth trends – downwards in any case – combined with episodic supporting or antagonising factors, will continue to necessitate tactical changes in exposure, careful timing of actions and prudent allocation decisions.

As regards government bonds and duration, we believe that government yields have reached attractive levels and can continue to bring value. In the medium-term, it will be interesting to see by how much the expected inflation "landing level" and the concurrent rates level differ. Since it's unlikely that high rates will not have an effect on growth and inflation, both the Fed and the ECB may consider it wise to adopt less aggressive positions, in acknowledgement of the need to pursue stability of financial conditions alongside price stability. The current factorisation of rate cuts in the short or very short term could prove excessive if there is no marked macroeconomic deterioration – which is currently not expected (especially in the US). These considerations steer us towards favouring an overall neutral approach on the government bond segment and avoiding the purchase of yields that might incorporate rate expectations at odds with the macroeconomic environment.

As regards BTPs, the growth outlook and deteriorating sustainability of public finance accounts could affect valuations and volatility. The discontinuation of APP reinvestments, the growth outlook, tighter financing conditions, fiscal policy, future needs, and excessive debt all advocate a cautious and neutral approach. But on the other hand, very attractive nominal rates, the existence of an EU safety net, an operational PEPP (albeit on a reduced scale), the distribution of debt and the potential expressed by domestic retail investors continue to add value to Italian government issues. The importance of European funding makes government hostility unlikely, despite the ESM debate.

For corporate bonds, we suggest a good level of diversification, with a preference for high-quality issuers, to stem volatility and illiquidity. The Investment Grade segment continues to demonstrate better market access and asset manageability, partly due to steadier underlying demand, attractive yields along the subordination scale, and an active primary market. The issues planned for early 2024 are particularly attractive in terms of the risk and return profile. In the high yield segment, however, the risks presented by weaker and less creditworthy companies demand that attention be paid to debt refinancing, given the high issuance rates, with a consequent increase in the cost of debt itself, due to tighter lending conditions. Restrictive monetary policies have not yet had a noticeable effect on corporate default rates, but tense situations may yet emerge in the future.

The Euro/Dollar exchange rate remains subject to the choices of the Fed and the ECB; their aggressive approach should gradually lessen in the medium term due to the influence of growth and inflation trends. Consequently, there may be some residual volatility related to the publication of macroeconomic data.

As regards commodities, the outlook for a general slowdown in activity stands alongside the resilience of developed economies, amidst an uncertain environment caused by a precarious supply and demand balance and ongoing geopolitical tensions, which could affect provisioning and CIF (cost, insurance, and freight) prices.

ANIMA Active Selection

During 2023 the Fund achieved a positive absolute performance. The investment objective of the Fund is to generate stable long-term rates of return, and the Fund seeks to achieve this objective by investing its assets primarily in funds, which invest in a variety of markets across several strategies. The investment allocation in collective investment schemes is based on a proprietary model that provides a dynamic allocation between two portfolios, a medium to high volatility portfolio (Satellite portfolio) and a low to medium volatility portfolio (Core portfolio). The Satellite portfolio has a global asset allocation. The objective of the Core portfolio is to limit the total volatility of the Fund, through the selection of collective investment schemes which invest across fixed income and/or flexible/absolute return strategies. The Fund started the year with an allocation to the Satellite portfolio at around 38%; then, with the equity volatility that started to gradually decrease, following the indication of the proprietary quantitative allocation model, the weight of the Satellite portfolio was gradually increased. In particular, the Satellite was first increased to around 60% in the first part of the year; then, in the second semester the Satellite was further increased until reaching 75% of the NAV at the end of the year. The Core, for both the first and second semester, was represented mainly by long only fixed income funds, and the exposure to flexible bond and flexible equity funds was maintained relatively low for all the year; also the weight of cash and money market funds was maintained very low during all of 2023. At the end of December, the Satellite portfolio was at around 75% and the Core at around 25%. The Fund's positive return during the year was attributable mainly to the positive contribution of the Satellite portfolio, and in particular to Global, US and European equity funds within this portfolio, but also the Core portfolio generated a positive contribution.

The Fund will continue to aim at achieving its investment objectives by investing in two different components, Core and Satellite portfolio, following the indication of the proprietary allocation model. Within the two components, the strategy will continue to focus on both active management of asset allocation and active fund selection of managers; in particular, the Satellite will continue to maintain a significant geographic diversification and style diversification of the underlying managers, and Core will continue to focus on both fixed income and, to a lesser extent, flexible funds. In the foreseeable future the Satellite allocation will continue to be managed considering both the target generated by the proprietary allocation model and discretionary considerations regarding equity volatility and general market conditions, whereas the Core portfolio will continue to maintain a relatively high allocation to developed markets sovereign bond funds, considering the still attractive level of developed market yields and the diversification benefits they can provide.

ANIMA Asia/Pacific Equity

An overall positive year for Pacific Rim equity markets, albeit more moderately than the general strength of developed country equity markets, with the exception of Japan. Among the largest contributors in terms of resilience, Japan and Australia outperformed other components of Pacific region. The overall performance of the Asian region was decidedly below average. China recorded a significant underperformance, mainly due to the worsening problems in the real estate market and the gradual exit of foreign investors from the country generated by ongoing geopolitical tensions with the USA. During 2023, the portfolio maintained a slightly lower equity exposure than the benchmark. In the first quarter, China and Hong Kong were preferred to Japan and Australia, where equity exposure favoured financial and commodities sectors. With the release of the first corporate results in Japan at the beginning of April, and in view of the reform launched by the Japanese stock exchange and the growing interest in this market (the only one with a still decidedly expansive monetary policy), exposure to Japanese stocks was shifted to overweight, while China was reduced, favouring export-exposed sectors (industrials, technology and discretionary consumption) to the detriment of pharmaceuticals, basic consumer goods and commodities. Similarly, Australia returned to neutral. Yen exposure was retained always slightly underweight vs benchmark. The Fund closed the period with a positive absolute performance, but negative in relative terms.

During 2024, markets do not expect any structural changes in expansionary monetary policies in Japan, otherwise rate cuts are expected to begin in Australia and other developed economies. We also expect more expansionary monetary and fiscal measures than the current ones in China and a positive continuation of TSE reform in Japan. It will also be a very challenging year

ANIMA Asia/Pacific Equity (continued)

due to the impact that US national election may have. These developments, potentially a source of volatility for the financial markets and currencies involved, will have to be monitored against the backdrop of uncertainties over US monetary policy, the evolution of conflicts in the Middle East and persistent geopolitical tensions between China and the USA.

ANIMA Bond Dollar

The management of the Fund relies on a quantitative investment process based on a risk budget with constraint of tracking error. During the year, on average, the Fund had a bond exposure equal to 95% of the portfolio, mainly allocated to US Treasuries. During the year, the Fund duration was aligned with the one of the benchmark: at the end of December, it was 6.1 years. The Fund's gross performance at the end of the year was positive in absolute terms, but negative in relative terms to the Benchmark.

The Fund will follow a management style characterized by a limited level of Tracking Error compared to the reference Benchmark.

ANIMA Bond Flex

During 2023, the Fund's performance was positive. The Fund started the year with a cautious duration stance (around 1.5 years), showing a more favorable attitude towards U.S. Treasuries compared to those in the Eurozone. This preference was driven by the perception of increased confusion in the ECB's reaction function and a less favorable balance between demand and supply of government bonds in the Eurozone. The prudent approach reflected the opinion that the market was overly optimistic in pricing in a change in monetary policy, especially the start of an interest rate cut cycle. In the face of growth and inflation data beating expectations, central bank leaders reiterated their determination to pursue restrictive monetary policies to bring inflation back to target. During the early months of the year, the Fund adjusted its yield exposure, progressively increasing duration, initially focusing on the U.S. component and later in the Euro Area. The first quarter witnessed significant events, such as the failure of some regional banks in the United States and the rescue of Credit Suisse, which again altered the financial market landscape. This raised concerns about the stability of the financial system after a phase of rapid and aggressive interest rate hikes. Once these fears were overcome, yields stabilized, indicating a cyclical slowdown without significant impacts on inflation, which remained on an ambiguous path. In the context of range bound interest rates, investors began to adapt to a landscape of slower but still surprisingly resilient growth and inflation. Active management of the portfolio's duration was maintained between 3 and 4.30 years. Starting from the summer months, investors began to digest a scenario of prolonged high-interest rates. Despite slowing down, growth and inflation continued to surprise with their resilience, particularly in the United States, where the economy seemed to have successfully absorbed the impact of the series of rate hikes. Markets started considering a scenario of moderate but sustainable economic slowdown that could withstand the impact of high yields. The substantial liquidity injected into the system in recent years, a very expansive fiscal policy, coupled with consumer spending capacity and a resilient job market, contributed to mitigating the effects of restrictive monetary policy. In this context, we maintained a constructive approach with a duration around 4 years mainly for valuation reasons: given the levels reached by yields, there were no indicators suggesting further increases capable of eroding the potential income from coupons. Despite a disappointing start to the year for the bond market, especially in the United States, November and December marked a record performance. The accommodative shift by the Fed and statements from the ECB explicitly stating the end of monetary tightening fueled the yield decline, reaching historically extreme proportions, also due to investors' light positioning. The Fund's performance benefited from the generalized bond market rally. In the last trading sessions of the year, we tactically took profit by reducing the duration from 4 to 3 years, considering the speed and extent of the movement. Overall, currency bets remained limited as no particularly strong and enduring trends were identified that justified significant exposures different from the Euro.

2024 is expected to mark a turning point in monetary policy: the end of monetary tightening and the initiation of an interest rate cutting cycle (in the United States, Eurozone, and the UK). The effect of central bankers' cautious approach is expected to persist, favoring the performance of the bond market. In this context, the goal will be to identify interesting entry points to add interest rate risk to the portfolio. The intensity of the bets will be calibrated based on the consistency of market levels with the current macroeconomic scenario.

The objective of each Fund is to seek to provide a positive investment return linked to an exposure to a dynamically managed basket of equity and fixed income indices, while aiming to protect the Fund's NAV per Share at a specific determined percentage of the initial offer price at the maturity date. Each Fund can pay specific defined coupons and it aims to achieve its investment objectives by direct investment in debt instruments, by entering in an Interest Return Swap and by exposure to the Actively Managed Portfolio and achieving the protection element. During 2023, each Fund reported a net absolute positive performance.

The management of each Fund is linked to a buy and hold strategy for the whole portfolio.

ANIMA Thematic X

The objective of the Fund is to seek to provide a positive investment return linked to an exposure to a dynamically managed basket of equity and fixed income indices, while aiming to protect the Fund's NAV per Share at a specific determined percentage of the initial offer price at the maturity date. The Fund can pay specific defined coupons and it aims to achieve its investment objectives by direct investment in debt instruments, by entering in an Interest Return Swap and by exposure to the Actively Managed Portfolio and achieving the protection element. Since inception, the Fund, which is currently invested in money market instruments, reported a net absolute positive performance.

The management of the Fund is linked to a buy and hold strategy for the whole portfolio.

ANIMA Credit Opportunities

The Fund delivered a positive performance in 2023. The year has been characterized by positive developments in the credit world. The phase of risk premium compression, which began in October 2022, continued in the early months of 2023, driven by improved growth prospects following the resolution of the energy crisis in Europe and the reopening process in China. However, in March, a significant setback occurred following the failure of Silicon Valley Bank and the crisis at Credit Suisse. In this context, the spread compared to government securities in the High Yield (HY) sector experienced a sudden widening over a week, followed by a rapid recovery and stabilization, with a rally for the last two months of 2023, thanks to the sharp decrease in government rates. The fourth quarter of 2023 was primarily influenced by a significant repricing of interest rates, which resulted in a preference for riskier assets, such as equity and credit. At a sectoral level, a widespread movement emerged, encompassing sectors previously penalized throughout the year, as seen in the real estate sector. In the context of a rate cut, real estate is anticipated to benefit in 2024. The sub-investment grade bond sector has experienced a progressive narrowing of spreads. Specifically, we have seen the Crossover index decrease from 474 to 310 basis points. The portfolio continues to allocate its holdings mainly in the BB and BBB rating sectors. The financial sector represents an important part of the portfolio. This is exposed to a lower risk of default but still offering an interesting return. National champions and systemic issuers are preferred. The Fund has a sufficient liquidity buffer (invested in short-term government bonds) to exploit any market opportunities. Specifically, the Fund had a very prudent approach, as the portfolio is mainly composed of Investment Grade bonds. However, the level of High Yield bonds (mainly BB) has been upgraded to about 30% of the total portfolio, together with increasing the credit duration to 2.3 years. As far as currencies are concerned, almost all the issues are denominated in Euro and any Fund exposure to currency risk was hedged throughout the year.

During 2024 volatility could increase, and the risks of downward earnings revisions and weakening credit metrics should not be underestimated. On a sectoral level, preferences include financials (with their capital strength and interest margins supporting bonds) and consumer-related securities, with caution and selectivity, still benefiting from high discretionary spending and retail sales. Telecommunications, that is undergoing a secular consolidation process and a progressive increase in capex, forcing many companies to divest assets to maintain competitive levels, and real estate, where central banks' pivotal moment may favor the entire sector's recovery, will be subject to careful analysis. Regarding the chemical sector, the destocking phase is believed to be over, and, although it may take longer than expected, a second restocking phase may occur, probably from the second half of the year. Finally, the automotive sector as a whole remains relatively expensive and subject to various headwinds, including slowing sales of electric vehicles and competition from Chinese cars entering the European market from the next year. A separate discussion applies to auto parts, which will still be supported, at least for the first part of the next year.

ANIMA Defensive

During 2023 the Fund achieved a positive absolute performance. The Fund's investment objective is to seek issuers with medium term capital growth and to deliver protection at Minimum Target NAV over the life of the Fund. The Fund aims to achieve its investment objectives by investing in two different components being, an actively managed portfolio of UCITS Collective Investment Schemes, including both Equity and Bond funds (the Satellite Portfolio) and Money Market Instruments and a portfolio of UCITS Collective Investment Schemes investing in Money Market Instruments (Core Portfolio). The Fund, because of the drawdown of 2022 and the capital protection mechanism embedded in the Fund strategy, started 2023 completely invested in the Core Portfolio, represented by money market funds and Italian Treasury bills of different maturities. In the first nine months of the year the Fund just slightly recovered the drawdown of 2022, therefore for a significant part of the year the Fund continued to be invested just in the Core Portfolio, but since October, when the recovery from the 2022 drawdown became more significant, also Satellite investments started to be added to the portfolio. In particular, at the end of December the Fund was invested mainly in money market instruments and money market funds, but it had an allocation also to long only equity and bond funds, representing overall around 25% of the NAV. The positive performance of the year was completely generated by the positive performance of money market funds and money market instruments in both the first and second semester.

In the short term the Fund, in line with its mandate, will continue to be invested mainly in the Core Portfolio (Money Market Instruments and a portfolio of UCITS Collective Investment Schemes investing in Money Market Instruments), but if the recovery from the drawdown of 2022 will continue as in 2023, the Fund will further increase the allocation in the Satellite Portfolio, in particular through directional equity and bond funds.

ANIMA Emerging Markets Equity

In 2023, the emerging markets as a whole, although significantly underperforming the main developed markets, recorded a positive result. The contribution of the Latin American area was decisive, in particular of Brazil and of Mexico. The overall result in the Asian area was decidedly lower than average. China recorded a significant underperformance, mainly due to the worsening of the real estate market problems and the progressive exit of foreign investors from the country. On the contrary, Taiwan and Korea registered good results thanks to the recovery of their respective technological sectors. India too overperformed thanks to political stability and the continued strength of domestic demand. The divergences among countries in the CEEMEA area were also accentuated. The main Eastern European markets, especially Hungary, Poland and Greece all recorded strong results, instead tensions in the Middle East, uncertainties about American monetary policy and the weakness of the main raw materials, had a negative impact on the results of the Persian Gulf markets, Turkey and South Africa. During 2023, the Fund maintained an equity exposure that was, on average, lower than that of the benchmark. Since the end of October equity level has returned to neutral. At a geographical level, a constant overweight was maintained in the Asian area, in particular in the Chinese market, in India and Korea: the overweight in China was closed in November, with an increase in India, Korea and Brazil. Despite significant underweights in Turkey, UAE and Kuwait, a constant overweight was maintained in Saudi Arabia and, since October, also in Poland. As regards the Latin American area, from the almost neutral positioning at the beginning of the year, we moved to an overweight in Brazil compared to an underweight in Mexico. At a sector level, the Fund maintained a constant overweight in the Durable Goods and Basic Consumption sectors and a constant underweight in the Financials, Industrials and Raw Materials. The Energy and Technology sectors, neutral at the beginning of the year, have been overweight since the second quarter. The Fund closed the period with a positive absolute performance, while the relative performance was negative. The Fund has been penalized by the consistent overexposure to China and by stock picking in some markets.

During 2024, markets expect the start of expansionary monetary policies in several emerging markets (India, Mexico and Indonesia) and further rate cuts in Brazil and some Eastern European countries, as well as monetary and fiscal measures more expansive than the current ones in China. It will also be a very challenging year from a political point of view: in addition to the USA, national elections are scheduled in India, Indonesia, Taiwan, South Africa and Mexico. These developments, potentially a source of volatility for the financial markets and the currencies involved, will have to be monitored in the face of uncertainties about American monetary policy, the evolution of conflicts in the Middle East and the persistent geopolitical tensions between China and the USA.

ANIMA Euro Equity

In 2023 Euro zone equity index increased by 15.6%. After a year of negative performance, the base case investors had in mind entering 2023 was that there would be an economic recession, but growth has been far better and inflation much lower than feared, and consequently equity markets raised with cyclicals outperforming. The year started with a nice rebound led by China reopening and lower energy prices in Europe. During the second week of March, the collapse of three US regional banks, the distressed sale of Credit Suisse and the sharp volatility of some bank Credit Default Swap spreads coincided with a surge in volatility in equity markets: Euro Stoxx Index at first declined by more than 6% but recovered completely after the financial authorities' support. Eurozone shares posted gains in the second quarter with the advance led by the financials and IT sectors. Underperforming sectors included energy and communication services. The IT sector was boosted by semiconductor stocks. This came in the wake of higher-than-expected sales projections from some US chipmakers, which helped demonstrate the growth potential stemming from AI. Eurozone shares fell in the third quarter amid worries over the negative effects of interest rate rises on economic growth. However, data released at the very end of the period showed eurozone inflation slowed to a two-year low and investors became more optimistic about the potential for rate cuts into 2024. Growing excitement that central banks will cut interest rates sooner in 2024 than previously expected, resulted in a nice rally with European indexes raising to double digits. In 2023 cyclicals have outperformed defensive name: industrials, semiconductors and constructions have raised by more than 20% while Telecom and Consumer staples have underperformed, the market and healthcare companies have declined. Anima Euro Equity appreciated in absolute terms, but it underperformed its benchmark because of its defensive composition. The overweight position in the healthcare sector was the main reason of the underperform.

In 2024 we will keep a cautious positioning and a defensive portfolio. Cyclical names have a high profitability compared to their history and we see the risk of a reduction towards historical levels. On the opposite, defensive names have low valuation and could improve their margins in an environment characterized by lower inflation.

ANIMA Euro Government Bond

During 2023 the Fund achieved a positive performance, lower than the benchmark. The Fund started the year with an average duration underweight of 1 year compared to the benchmark: in our view, in fact, the market had started off by underestimating the persistence of inflation and consequently the number of hikes needed by central banks to keep it under control. This position was held until the ten-year German yield reached levels around 2.30% and was then gradually turned into an overweight of about 6 months at the beginning of March, when the first concerns about the health of some US regional banks and Credit Suisse arose. The overweight was then maintained for almost the whole year but was managed dynamically (in a range between 4 months and 1 year). A large contribution to the performance has also come from curve positioning, overweighing different areas of the curve according to the macro scenario. The Fund returned to a neutral duration positioning in November, when particularly good data on inflation and very "dovish" comments from the Federal Reserve Governor caused short-term yields to fall by almost 100 basis

ANIMA Euro Government Bond (continued)

points in just a few weeks, painting a new monetary policy scenario more consistent with the inflation and growth trajectories seen so far. Currently, the positioning on Italy is neutral, while the underweight on Germany and the other Core countries is at the lowest level of the year given the strong spread tightening seen in recent weeks. In terms of curve positioning, we prefer intermediate maturities (5-10 years).

In the coming months, the focus will remain on the inflation path and, consequently, on the policies that central banks will implement to meet their 2% target. Our long-term approach remains constructive, but we are ready to implement tactical underweight positions in case the market becomes too optimistic about how quickly inflation will decrease. Indeed, we are aware that the central banks' focus is on services inflation, which in the US is still running above its pre-pandemic average. Our curve positioning will probably remain unchanged over the coming weeks, as well as our neutral positioning on Italy, although any sudden movement in spread can be exploited to temporarily increase or decrease exposure.

ANIMA Europe Equity

During 2023 the Fund reported a positive absolute performance, but negative in relative terms. The Fund began the year with a total underweight exposure of approximately -5% compared to the reference benchmark. Over the months of January and February, we increased investments, bringing the exposure to almost neutrality compared to the benchmark (-1%). During this period, we increased exposure in the technology sector (especially in semiconductors) and media, while partially reducing exposure in the banking and materials sectors. In March, taking advantage of favorable valuations, we increased exposure in the telecommunications, consumer staples, and banking sectors, while partially reducing exposure in the technology sector and themes related to the Chinese reopening. From April, due to the deterioration of macroeconomic data and a less positive earnings season for cyclical sectors, we began to take profits and reduce exposure, especially in the industrial sector. Additionally, considering the weakness of the Dollar and the approaching pricing review of drugs in the United States, we also reduced exposure in the healthcare sector, especially in pharmaceuticals. While maintaining a more defensive approach compared to the benchmark, in June, we brought the portfolio's Beta more in line with that of the benchmark, significantly increasing exposure in the energy and materials sectors, with further reductions in healthcare and essential consumer goods sectors. Overall, the Fund concluded the semester with an underweight of approximately 6% compared to the benchmark. We maintained this allocation throughout the third quarter and for most of October when, following inflation data and economic indicators increasingly indicative of a soft landing for the economy, the decision was made to bring the investment level more in line with the benchmark through new investments in more cyclical companies (chemicals, industrials, and semiconductors) exposed to an improvement in general global economic conditions. Following the investment choices made, the Fund achieved a positive absolute return but below the benchmark due to both lower exposure and sectoral allocation, and to a lesser extent, stock picking. Specifically, stock picking in the healthcare, financial, and discretionary goods sectors are the segments that contributed most negatively, while stock picking in non-discretionary goods, materials, and telecommunications contributed positively.

The investment outlook of the management team remains to maintain a preference for stocks of companies characterized by a high revenue and cash flow growth profile and a solid balance sheet, especially in light of rising interest rates and credit spreads. In this market context, where there are no strong themes and there is still a lot of uncertainty from a macroeconomic perspective, we believe that stock picking can be the main driver of performance in the coming months. For this reason, in recent months, we have taken steps to reduce sectoral deviations from the benchmark, and the Fund now has a more neutral approach between cyclical and defensive sectors compared to the first half of 2023. From a factor perspective, we continue to prefer the defensive growth style.

ANIMA Europe Selection

During 2023 the Fund reported a positive absolute performance, but negative in relative terms. During the first quarter we reduced the underweight of the Fund from -10.5% at the end of December to -7.5%. From a sector point of view, we increased the exposure to technology and consumer discretionary, while we partially took profit in the banking sector. In February, we increased the allocation to defensive sectors, in particular telecommunications and consumer staples. After the collapse of Silicon Valley Bank in the US and the rescue of Credit Suisse by UBS, renewed fears of a global banking crisis caused a sharp sell-off in the stock market in the first half of March. As a result, the exposure to the banking sector was further reduced among cyclicals, while the exposure to the pharmaceutical sector was increased among defensives.

In the second quarter, we maintained an underweight of about 11.5%. From a sector allocation perspective, we increased the beta of the portfolio through banks, consumer discretionary and technology. On the other hand, the long exposure to staples and telecom was cut and the short exposure in industrials was reduced. The third quarter has seen rising geopolitical tensions, deteriorating macroeconomic data and hawkish messages from central banks. We maintained an underweight of about 13% on average, but it was increased from -10% at the beginning of the quarter to around -15% at the end of September. From a sector allocation perspective, we reduced the beta of the portfolio by increasing the relative weight of defensive sectors, in particular telecom and healthcare, while among cyclicals we maintained a preference for banks, insurance and energy. During the last quarter of the year, the underweight was -7% on average, but it was increased from -15% at the beginning of the quarter to around neutrality at the end of December. From a sector allocation perspective, we increased exposure to the growth sectors (through technology and utilities) and cyclicals (through real estate, consumer discretionary and insurance), while we reduced exposure to healthcare, consumer staples and energy sectors. Furthermore, exposure to Small & Mid-cap companies was increased.

ANIMA Europe Selection (continued)

As a result of the investment choices made, the Fund obtained a positive absolute return, but a negative relative return, mainly due to sector allocation (in particular in industrials, healthcare and utilities). Stock picking contributed positively, in particular in technology, healthcare and financials.

We believe that the rally that began in the fourth quarter of 2023 can extend into 2024 as fundamentals are broadly supportive of a soft landing as inflation is softening according to expectations and the prospect of rate cuts throughout the year can continue to provide positive asymmetry to equities. However, we expect that the first half of the year could be characterized by episodes of high volatility and we do not rule out a potential correction in the stock market either if macroeconomic data weaken or if tensions in the Middle East lead to an international conflict. Considering the uncertain economic outlook, we believe that stock picking will be the main driver of the performance of the Fund, hence we maintain a preference towards companies characterized by an attractive growth profile of revenues and FCF and with a solid balance sheet. From a sector allocation perspective, the team currently maintains a preference for sectors that will continue to benefit from the peak rates narrative and towards Small & Mid-cap companies.

ANIMA Global Bond

The management of the Fund relies on a quantitative investment process based on a risk budget with constraint of tracking error. During the year, on average, the Fund had a bond exposure equal to 95% of the portfolio, fully allocated to government securities. The portfolio was country neutral relative to the benchmark: at the end of December, the fixed income component was mainly allocated in USA (42%) and Japan (20%). During the year, the Fund duration was aligned with the one of the benchmark: at the end of December, it was 7.2 years. The Fund performance during the year was negative in absolute and relative terms.

The Fund will follow a management style characterized by a limited level of Tracking Error compared to the reference Benchmark.

ANIMA Global Equity Value

During 2023 the Fund recorded a positive net performance, but it was lower compared to its benchmark. The underperformance can be attributed to the following factors: sector allocation and stock picking in Europe; stock picking in Japan; holding a long position in Yen averaging during the course of the year around 4% of the NAV; underweight in equities in the first part of the year. The positive contribution from stock picking in the USA was offset by a relatively defensive sector allocation.

We began the year with an underweight of about -5% in the equity component, which was then reduced from the second half of the year, and by the fourth quarter, it was brought to a neutral position relative to the benchmark. The Fund was particularly disadvantaged by the equity underweight and a rather cautious stance, favoring defensive sectors. In the second half of the year, the equity exposure was increased across different geographical areas, moving closer to neutrality with respect to the US market and maintaining a slight overweight in Europe and Japan. The defensive sector allocation and stock picking in Europe penalized the Fund; in fact, during the first semester and much of the third, we had a rather cautious setup, with overweights in consumer staples and healthcare sectors, against significant underweights in the banking and automotive sectors, which continued to perform well over the course of 2023. In Japan, stock picking was negative as the Fund was positioned for a strong Yen scenario due to a possible change in monetary policy by the Bank of Japan, which instead maintained a dovish approach. From October, we increased exposure to the industrial and technology sectors in various geographical areas, within which stock picking was positive over the year. Noteworthy is also the excellent stock picking in the communication services sector in the USA and Japan, especially in the gaming and internet advertising segments.

Over the year, we made investments in the bond component, implementing purchases of European government bonds with a maturity of less than one year for the purpose of investing liquidity (on average about 3% of the NAV). In the derivatives component, we maintained positions in futures on S&P500 and Hang Seng to dynamically and quickly adjust the level of investment in both the USA and Hong Kong (investment in futures was on average around 3.5% of the NAV).

After the strong upward movement of the markets in the last months of 2023, we intend to approach 2024 with a more selective attitude in stock selection: the market has embraced the "soft landing" scenario of the economy, and the valuations of various sectors leave little room for potential "disappointments" in earnings growth. The focus will therefore be on the selection of idiosyncratic stories and on stocks exposed to investment themes that will generate interest over the year, such as the introduction of artificial intelligence in various devices (e.g., PCs and smartphones) and the continuous improvement of governance in Japan. We also see opportunities in various companies directly or indirectly exposed to the Chinese economy (especially Hong Kong and Japanese companies), which in the last year have been particularly penalized by investors and which, both in terms of valuations and earnings growth, seem to already discount a rather negative scenario.

ANIMA Global Macro

During 2023 the Fund delivered a net positive performance. The investment activity followed the quantitative methods developed by the team. The Fund started 2023 with an equity exposure of 15%, increased to 19% in February, reduced to a minimum of 8% in March. From there, it has been progressively incremented up to 17%, semester end value. Equity exposure was subsequently increased, reaching 30% in December. Moreover, duration corresponded at 5.8 years at the beginning of the year and was reduced to 2.7 years in March. Then, it was increased to a maximum of 5.7 in May. In the final part of the semester there was a little reduction to 4.7 years. Duration was subsequently increased, reaching 7.4 years in December. Commodity exposure, which

ANIMA Global Macro (continued)

started the year at 7% of NAV, varied between a maximum of 9% in February and a minimum of 3% in March. The Fund concluded the semester with a commodity exposure of about 5%. Commodity exposure was subsequently increased, reaching 9% in December. Finally, FX exposure (against EUR) started the year at 12% of NAV and was decreased to a minimum of -6% in April (short USD and JPY) and concluded the semester at that level. FX exposure against Euro reached 9% in December (long USD). The portfolio strategies also used a derivative component in order to optimize the geographical exposure and to optimize the management of the Fund when more efficient than cash. The FX strategy was implemented through forward exposure.

The Fund will continue to adopt the investment strategies provided by the quantitative models internally developed.

ANIMA Global Selection

During 2023 the Fund achieved a positive performance in absolute terms and lower than the reference benchmark. On average, the equity investment was kept underweight, moving in a range between 95% and 90% having started the year at 95%, with a gradual reduction until it reached 90% during the month of May only to then rise again to 92% at the end of June. During the summer the positive trend of the stock markets was interrupted, due to the continuous rise in interest rates and the weakness of the technology sector which in the first six months of the year, thanks to large capitalization companies, had recovered a large part of the losses of 2022. The equity investment was positioned at 90% and then began a gradual accumulation again during the most volatile months of the year between August and October. In the last two months of the year the investment returned just above the 95% threshold. The approach was to always maintain a balance between cyclical, 'growth' and defensive sectors. The technology and telecommunications services sectors were always kept overweight even when profits were taken on some stocks with particularly rich valuations between April and July. The industrial sector, on the other hand, has always been underweight due to the uncertain macroeconomic situation with global PMIs constantly below 50 points and orders contracting after reaching record levels during the pandemic. The financial sector moved to underweight from a position of neutrality after mid-March when a liquidity crisis forced the US regulator to close three banks and the Swiss regulator orchestrated the bailout of Credit Suisse, resulting in an across-the-board cut of profit estimates due to the higher cost of deposits and 'funding'. The oil sector has been accumulated on weakness while remaining in the period around neutrality, with a particular focus on the natural gas industry. Among the defensive sectors, basic consumption was kept overweight with a rotation between food producers and beverage producers and supermarkets, which showed a good ability to increase final sales prices. In the second half of the year, an overweight was implemented in the pharmaceutical sector, which in the meantime has become attractive from a valuation point of view and also to reduce portfolio volatility. At a geographical level, in the first quarter the preference went to the European area which benefited from a better macro framework, while in the second and fourth quarters the geographic overweight shifted to the United States. The Fund maintained a more marked overweight on Chinese companies in the first months of the period compared to the final part of the year. From July the weight of technology was reduced by increasing the weight of value/cyclical sectors such as financial and oil. The same approach was also followed in August by increasing the weight of the American area and in September by further increasing the weight of financials and reducing the weight of raw materials and the consumer staples sectors, in the latter case as a response to the possible consequences arising by the expansion of anti-obesity therapies. From October onwards the Fund accumulated positions mainly in US and technology sector, to a lesser extent by increasing exposure to pharma, and pragmatically by reducing and then increasing financials as a result of the increased likelihood of a 'soft landing' scenario.

We expect positive returns from stock markets albeit lower than in 2023 and a good performance of cyclical sectors. The concentration of returns in a few securities and a few sectors may not recur as it did in 2023. All geographies, except Australia, as well as most sectors are expected to see positive earnings growth in 2024, which should support broader participation in investment opportunities globally. The bullish trend in share prices over the past year, having brought the multiples back to high levels and the positioning and sentiment indicators also at high levels, leads to favoring a balanced approach, also taking into account the geopolitical risks well known to the market. In this context we believe that any corrections could represent a good buying opportunity.

ANIMA High Yield Bond

The performance achieved by the Fund for 2023, is positive in absolute terms and lower than the benchmark parameter in relative terms. 2023 has been characterized by positive developments in the credit world. The phase of risk premium compression, which began in October 2022, continued in the early months of 2023, driven by improved growth prospects following the resolution of the energy crisis in Europe and the reopening process in China. However, in March, a significant setback occurred following the failure of Silicon Valley Bank and the crisis at Credit Suisse. In this context, the spread compared to government securities in the High Yield (HY) sector experienced a sudden widening over a week, followed by a rapid recovery and stabilization for the rest of the year, and a rally for the last two months of 2023, thanks to the sharp decrease in government rates. The fourth quarter of 2023 was primarily influenced by a significant repricing of interest rates, which resulted in a preference for riskier assets, such as equity and credit. At a sectoral level, a widespread movement emerged, encompassing sectors previously penalized throughout the year, as seen in the real estate sector. In the context of a rate cut, real estate is anticipated to benefit in 2024, prompting an initiation of incrementation of our position in the short end of the curve. High-yield issuers, overall, successfully navigated the central banks' tightening cycle, leveraging the strong health of their balance sheets. Liquidity and solvency metrics, such as ICR and leverage ratio, remain in the upper range of pre-pandemic years. The pandemic represented a unique event in authorities' reactions, with fiscal policy playing a crucial role through direct assistance to companies — a dynamic that is unlikely to be

ANIMA High Yield Bond (continued)

repeated in the near future. Years of accommodative interest rates, unconventional macroeconomic policies, macroprudential policies, and direct fiscal measures strengthened issuers' balance sheets, resulting in a minimal increase in default rates despite recent challenges (geopolitical instability, inflation, crises of regional US banks and Credit Suisse in Europe, Chinese real estate crisis, extremely restrictive monetary policies).

It is essential to highlight the active role played by sponsors through LBOs, M&A, and capital injections. The Crossover spread decreased from approximately 470 basis points at the beginning of the year to 310 points by the end of 2023. The Single B segment saw the most significant contraction (-140 points), followed by the BB segment (-100 points), and AT1 (-100 points in December but overall, -30 points since the sharp widening in March). The only relevant exception is the lower-quality segment of speculative debt; CCC issuances (whose spread widened by 20 points YTD) faced significant penalties between September and October when the idea of prolonged elevated official rates intensified concerns for financially weaker companies. The Fund's strategy is prudent, both in terms of invested portfolio and rating breakdown. The Fund is in line with the benchmark in terms of investment portfolio with good liquidity and aligns with the benchmark in terms of rating breakdown. At the sectoral level, we have employed various strategies. Specifically, the portfolio sought to adapt to this scenario by maintaining a framework characterized by low volatility and contained risk, never surpassing the benchmark investment level set at 90%. The sole sector in clear overweight is that of financial instruments, chosen for the compelling yields offered at an equivalent rating. We maintain a constructive approach towards Additional Tier 1 securities, albeit with a still modest allocation, as the offered yield significantly exceeds the average high-yield benchmarks. Additionally, as a precautionary measure, we maintain a slight underweight position in the building materials & construction sectors. Currently, in terms of rating and duration, the Fund is in line with the benchmark.

In 2024, there will be a greater sensitivity to alpha and credit duration. The approach will continue to be constructive but cautious, focusing mainly on success stories or rising stars regarding credit duration, and on refinancing and deleveraging stories for alpha. On a sectoral level, preferences include financials (with their capital strength and interest margins supporting bonds) and consumer-related securities, with caution and selectivity, still benefiting from high discretionary spending and retail sales. Telecommunications, that is undergoing a secular consolidation process and a progressive increase in capex, forcing many companies to divest assets to maintain competitive levels, and real estate, where central banks' pivotal moment may favor the entire sector's recovery, will be subject to careful analysis. Regarding the chemical sector, the destocking phase is believed to be over, and, although it may take longer than expected, a second restocking phase may occur, probably from the second half of the year. Finally, the automotive sector as a whole remains relatively expensive and subject to various headwinds, including slowing sales of electric vehicles and competition from Chinese cars entering the European market from the next year. A separate discussion applies to auto parts, which will still be supported, at least for the first part of the next year. During 2024 volatility could increase, and the risks of downward earnings revisions and weakening credit metrics should not be underestimated. However, any periods of weakness could present significant buying opportunities, in a scenario where the high carry allows for absorbing even substantial capital losses, with an average maturity yield exceeding 6%.

ANIMA Hybrid Bond

During the fiscal year 2023, the Fund exhibited an absolute and relative positive performance. This performance was primarily attributed to the favorable portfolio carry and a narrowing of spreads. At the outset of the year, the Fund maintained a marginal underweight position in corporate hybrids. However, following the Credit Suisse bailout in March, the Fund strategically procured bonds to mitigate this underweight exposure. Subsequent to this move, the Fund opportunistically divested certain securities to capitalize on gains. In the latter half of the year, between August and September, the Fund augmented its positions. Yet, in response to the market rally in November, driven by inflation data that fell below expectations, the Fund opted to realize profits and diminish its overall asset commitment. Consequently, by year-end, the Fund's exposure stood at approximately 80%, representing a 10% underweight relative to the benchmark.

Throughout this period, the Fund adopted a barbell strategy in asset allocation, emphasizing high-yield bonds over investment-grade bonds while maintaining a prudent underweighting by at least 5%. Our cautious stance is predicated on the observation that spreads to senior tranches have contracted, coupled with deteriorating macroeconomic fundamentals, signaling potential vulnerabilities in the ensuing months. Consequently, the Fund's liquidity position at the close of the year was approximately 19%.

In terms of sectoral preferences, utilities constitute an overweight allocation of 2% relative to the benchmark. Conversely, consumer cyclicals, communications, and energy sectors have been underweighted by 3%, 1.8%, and 2.3%, respectively. The Fund's allocation strategy is grounded in a bottom-up approach, concentrating on companies perceived as undervalued. High-yield bonds constitute approximately 30% of the portfolio, with the balance allocated to investment-grade bonds. Consequently, the Fund's beta slightly surpasses that of the benchmark.

Additionally, to manage exchange rate risk, the Fund judiciously utilized derivative instruments, predominantly forwards, during this period, eschewing other derivative instruments.

In the credit market, risk premium compression has been evident across all rating levels, and at these levels, spreads do not seem to offer much value. Furthermore, there is a significant risk of air pockets occurring, especially considering the widespread overweight position in the investment-grade sector. For these reasons, a cautious approach will be adopted in the first months of 2024. However, we expect to use the cash available if the market should be hit by a recessionary scenario.

ANIMA International Bond

During the 2023, the Fund achieved a positive performance in absolute terms but lower than the benchmark. The Fund was penalized by the increase in government bond yields worldwide, although it maintained a lower exposure in terms of duration for part of the first half of the year. The first semester was characterized by strong inflationary pressures, and a hawkish stance of monetary policy, trying to avoid a second-round effect on inflation, and the worsening of geopolitical tensions in Eastern Europe. The increase in risk aversion was accompanied by an increased volatility on all asset classes. Regarding the composition of the portfolio, during the first part of the semester we maintained an underweight in US and German fixed-rate securities. Moreover, we maintained a neutral exposure to the foreign currencies, with a slight underweight to the US Dollar. In the second part of the year, on the other hand, we preferred to increase the portfolio duration due to a growing economic uncertainty.

In the 2024, the outlook remains uncertain, due to the negative impact of the restrictive monetary policy, and due to the fears about a high inflation growth. In this context, the Fund remains with the same duration versus the benchmark and neutral to the US Dollar.

ANIMA Italian Bond

During 2023 the Fund achieved a positive performance, lower than the benchmark. The Fund started the year with an average duration underweight of 8 months: in our view, in fact, the market had started off by underestimating the persistence of inflation and consequently the number of hikes needed by central banks to keep it under control. This position was held until the ten-year Italian yield reached levels around 4.30% and was then gradually turned into an overweight of about 6 months at the beginning of March, when the first concerns about the health of some US regional banks and Credit Suisse arose. The overweight was then maintained for almost the whole year but was managed dynamically (in a range between 4 and 9 months). A large contribution to the performance has also come from curve positioning, overweighing different areas of the curve according to the macro scenario. The Fund returned to a neutral duration positioning in November, when particularly good data on inflation and very "dovish" comments from the Federal Reserve Governor caused short-term yields to fall by almost 100 basis points in just a few weeks, painting a new monetary policy scenario more consistent with the inflation and growth trajectories seen so far. The positioning on Italy has been kept neutral from March onwards, given the uncertainty surrounding the country. If on the one hand, indeed, the spread was supported by strong demand by Italian retail investors, on the other hand there are several doubts about possible delays in recovery fund reforms, on the impact of the conclusion of securities purchase plans by the ECB and finally on public finance health, with public debt struggling to decrease in the coming years. These uncertainties on Italy led us to prefer investing other countries (France and Spain, but also European Union) bonds and German futures contract to build the overweight position we had until November. Finally, as far as curve positioning is concerned, we are preferring intermediate maturities (5-10 years).

In the coming months, the focus will remain on the inflation path and, consequently, on the policies that central banks will implement to meet their 2% target. Our long-term approach remains constructive, but we are ready to implement tactical underweight positions in case the market becomes too optimistic about how quickly inflation will decrease. Indeed, we are aware that the central banks' focus is on services inflation, which in the US is still running above its pre-pandemic average. Our curve positioning will probably remain unchanged in the near term, as well as our neutral positioning on Italy, although any sudden movement in spread can be exploited to temporarily increase or decrease exposure.

ANIMA Italian Small Mid Cap Equity

In 2023, the Fund reported a positive absolute performance above the reference benchmark. The management team has adopted a cautious approach since February, in line with a more challenging scenario because of the regional bank crisis in USA as well as the Credit Suisse bailout by the Swiss central bank and UBS. At the sector level, the Fund has kept a significant overweight in financials, especially banks, until March when, at the time of the banking crisis, it has been decided to partially reduce the exposure but still maintaining an overweight position. In May, following the earning season, some profit taking has been pursued on several stocks in financials. Since the summer the exposure has been increased again given the perception that the contribution of the net interest income could be still significant on earnings. On the other hand, the situation for industrials is quite different since an underweight position has been kept during all the year on the idea that inflation will drive on the upside wages with a negative impact on margins. Discretionary stocks were also underweighted considering that inflationary pressures could affect consumption. However, within the sector, a preference has been maintained for luxury stocks which are exposed to an almost inelastic demand and are beneficiaries of Chinese reopening. At portfolio level, it has been tried to maintain an extremely cautious approach on all those companies that have a high level of debt since the significant rise in interest rates could make very expensive the debt refinancing. It is believed that highly leveraged financial structures in a context of zero interest rates may no longer be affordable in this new macro environment, pushing to recapitalization needs.

Year 2024 is poised to be a year of very slow economic growth, characterized by several general elections that could have significant impact on financial markets. In Italy, the recent decision to postpone approval of the ESM and the reintroduction of the Stability Pact, raise the specter of potential friction with the EU. In consideration of the high level of uncertainty we prefer to keep a cautious positioning.

ANIMA Italy

In 2023, the Fund reported a positive absolute performance above the reference benchmark. The management team has adopted a cautious approach since February, in line with a more challenging scenario because of the regional bank crisis in USA as well as the Credit Suisse bailout by the Swiss central bank and UBS. At the sector level, the Fund has kept a significant overweight in financials, especially banks, until March when, at the time of the banking crisis, it has been decided to partially reduce the exposure but still maintaining an overweight position. In Italy, the recent decision to postpone approval of the ESM and the reintroduction of the Stability Pact, raise the specter of potential friction with the EU. In consideration of the high level of uncertainty we prefer to keep a cautious positioning.

ANIMA Liquidity

During 2023 the Fund achieved a positive performance, lower than the benchmark. The Fund started the year with a duration underweight compared to the benchmark: in our view, in fact, the market had started off by underestimating the persistence of inflation and consequently the number of hikes needed by central banks to keep it under control. This position was held until March, when the first concerns about the health of some US regional banks and Credit Suisse arose. Subsequently, as soon as things seemed to have stabilized, we took the opportunity to restore the underweight, convinced that the market had started pricing again an overly optimistic inflation and pessimistic growth scenario. Starting from mid-year, with the 2-year German yield returning above 3%, we started increasing again our duration exposure until being overweight relative to the benchmark at the end of September. The market had in fact started pricing a scenario in which the 4% ECB deposit rate would have been kept stable for over 1 year, despite global inflation already being on a downward trajectory and European growth being close to zero. The Fund returned firstly neutral and then slightly underweight duration in November, when particularly good data on inflation and very "dovish" comments from the Federal Reserve Governor caused short-term yields to fall by almost 100 basis points in just a few weeks. In terms of geographical exposure, the strategic imprinting has always been to favor peripheral bonds (Italy and Spain) or semi-core countries (France and Belgium) rather than core countries (Germany in particular). However, the strong volatility that has characterized the last few months has also made it possible to exploit various more tactical opportunities, such as, for example, on Austrian securities which had periodically reached yields similar to Italian bills. Also, in the last months of 2023, the exposure to peripheral securities has tactically been reduced due to their yields becoming much less attractive given the strong demand (and limited supply) they received.

In the coming months, the focus will remain on the inflation path and, consequently, on the policies that central banks will implement to meet their 2% target. Our long-term approach remains constructive, but we are ready to implement tactical underweight positions in case the market becomes too optimistic about how quickly inflation will decrease. Indeed, we are aware that the central banks' focus is on services inflation, which in the US is still running above its pre-pandemic average. However, we will continue to maximize the Fund's return profile and seize tactical opportunities as they arise.

ANIMA Medium Term Bond

The management of the Fund relies on a quantitative investment process based on a risk budget with constraint of tracking error. During the year, on average, the Fund had a bond exposure equal to 95% of the portfolio, fully allocated to government securities. The portfolio was country neutral relative to the benchmark: at the end of December, the fixed income component was mainly allocated in France (23%), Italy (20%), Germany (18%) and Spain (14%). During the year, the Fund duration was aligned with the one of the benchmark: at the end of December, it was 7. The Fund absolute performance was positive in 2023, while it was negative in relative terms.

The Fund will follow a management style characterized by a limited level of Tracking Error compared to the reference Benchmark.

ANIMA Megatrend People Fund

During 2023, the Fund achieved a positive return in absolute terms, lower than the reference benchmark. The equity allocation was kept underweight relative to the reference benchmark in a range between 93% and 98%. At a sector level, positive performances were recorded in the communication, technology and financial services sectors, both in terms of allocation and picking. The absence of the energy sector in the portfolio contributed positively to the Fund's performance, while the structural overweight of the healthcare sector during the year returned a negative contribution. We remind you that the Fund's strategy is focused on identifying companies that have a high exposure to investment themes linked to global demographic transformations, therefore, the energy sector has never been present in the portfolio. Return dispersion has been the key theme of 2023, both at a

ANIMA Megatrend People Fund (continued)

sector and geographic level. The United States economy surprised positively, while the European and Chinese economies, contrary to expectations, disappointed expectations. The themes that drove performance for much of the year were artificial intelligence and anti-obesity drugs. In November and December the market began to price in a greater probability of a soft landing confirmed by the Fed's comment in mid-December. The rally of the final months of 2023 has seen the participation of a growing number of companies, especially in less held areas of the market. At the beginning of the year, exposure (direct and indirect) to China was increased. The change in strategy is attributable to the reopening after two years of zero Covid policy, in addition to attractive valuations and medium-term growth prospects linked to the rapid expansion of the middle class, increased domestic consumption and investments in strategic sectors. However, we have seen a slowdown in growth since March. Despite the fiscal and monetary support, the effects on the real estate market (a sector that affects 50% of household wealth) were not evident. Future new stimulus package should be able to bring the credit cycle back into a growth trend. In the technology and communications services sectors, starting at the end of February, we increased exposure to companies benefiting from the theme related to generative artificial intelligence, the fastest and most pervasive technological change ever experienced. The theme of AI was certainly among the most represented within the portfolio until the end of the year. In the healthcare sector, the issues of obesity and Alzheimer's, the most widespread form of senile dementia, have dominated, where new solutions have proven revolutionary for the treatment of the pathology. The growth potential of these innovative drugs is very high. One topic that we believe deserves attention is climate change and the far-reaching repercussions it could have for health, food security, water management and the environment. Our attention has focused on companies that are able to provide solutions for food security, water security, and that are able to increase climate resilience linked to the negative effects resulting from climate change.

Over the next few months we expect volatility to remain high and therefore we favor a diversified portfolio and continue to focus on identifying companies operating in sectors that will benefit from long-term structural trends linked to demographic evolution. For this reason given the thematic nature of the portfolio (demographic), there will be an overweight on some sectors exposed to secular trends, such as technology (digitalization), telecommunications and healthcare, with a particular focus on companies that offer the best prospects for earnings growth, cash flow generation and solid balance sheets.

ANIMA Opportunities 2027

The Fund achieved an absolute performance in 2023. 2023 has been characterised by positive developments in the credit world. The phase of risk premium compression, which began in October 2022, continued in the early months of 2023, driven by improved growth prospects following the resolution of the energy crisis in Europe and the reopening process in China. However, in March, a significant setback occurred following the failure of Silicon Valley Bank and the crisis at Credit Suisse. In this context, the spread compared to government securities in the High Yield (HY) sector experienced a sudden widening over a week, followed by a rapid recovery and stabilization for the rest of the year, and a rally for the last two months of 2023, thanks to the sharp decrease in government rates. The fourth quarter of 2023 was primarily influenced by a significant repricing of interest rates, which resulted in a preference for riskier assets, such as equity and credit. At a sectoral level, a widespread movement emerged, encompassing sectors previously penalized throughout the year, as seen in the real estate sector. In the context of a rate cut, real estate is anticipated to benefit in 2024.

The sub-investment grade bond sector has experienced a progressive narrowing of spreads. Specifically, we have seen the Crossover index decrease from 474 to 310 basis points. The portfolio continues to allocate its holdings mainly in the BB and single B rating sectors. The financial sector represents an important part of the portfolio. The duration of the portfolio is closely aligned with the objective of the mandate. The Fund has a sufficient liquidity buffer to exploit any market opportunities. Specifically, the Fund had a very prudent approach. Particularly, it has been decided to abstain from exposure to the stock market due to the attractive returns that high-yield (HY) instruments have offered and continue to offer. Furthermore, investments have been made throughout the entire duration of the Fund, with a projected maturity target set for 2027. As of end of 2023, the portfolio is 95% invested. As far as currencies are concerned, almost all the issues are denominated in Euro and the Fund's exposure to currency risk was hedged throughout the year.

During 2024 volatility could increase, and the risks of downward earnings revisions and weakening credit metrics should not be underestimated. On a sectoral level, preferences include financials (with their capital strength and interest margins supporting bonds) and consumer-related securities, with caution and selectivity, still benefiting from high discretionary spending and retail sales. Telecommunications, that is undergoing a secular consolidation process and a progressive increase in capex, forcing many companies to divest assets to maintain competitive levels, and real estate, where central banks' pivotal moment may favor the entire sector's recovery, will be subject to careful analysis. Regarding the chemical sector, the destocking phase is believed to be over, and, although it may take longer than expected, a second restocking phase may occur, probably from the second half of the year. Finally, the automotive sector remains relatively expensive and subject to various headwinds, including slowing sales of electric vehicles and competition from Chinese cars entering the European market from the next year. A separate discussion applies to auto parts, which will still be supported, at least for the first part of 2024. Furthermore, given the anticipated slight reduction in earnings and potential increases in geopolitical tension, we believe that there may be an opportunity to invest a small part of the portfolio in the equity market in 2024.

ANIMA Orizzonte Consumi 2023

The objective of the Fund is to seek to provide Shareholders with Dividends on the Dividend Payment Dates and to provide Shareholders with capital appreciation at the Maturity Date, while trying to limit downside in adverse market conditions. After the maturity date, the objective of the Fund will be to provide liquidity and current income, to the extent of preservation of capital. The

ANIMA Orizzonte Consumi 2023 (continued)

Fund will seek to achieve its investment objectives by investing in different components: debt instruments, Interest Rate Swaps and Equity Swaps. The Fund can pay specific defined coupons. During 2023 the Fund, which reached its maturity date and is currently invested in money market instruments, had an overall positive performance.

The management of the Fund is linked to a buy and hold strategy for the whole portfolio.

ANIMA Selection Conservative

During 2023 the Fund achieved a positive absolute performance. Anima Selection Conservative's objective is to seek medium to long-term capital appreciation, with medium volatility. The Fund seeks to achieve its objective by investing through Multi-Manager, Multi-Strategy and Multi-Asset Class approaches. The Fund invests in a diversified portfolio of Collective Investment Schemes which invest on global and/or regional basis across market neutral, event driven, global macro and flexible/absolute return strategies. The Fund started 2023 with an allocation to flexible equity funds of 30%, around 45% of the NAV was allocated to flexible bond funds and around 20% to multi-asset strategies; the rest of the portfolio, around 4%, was maintained in cash. The allocation to multi-assets funds was increased in the first semester through strategies with a significant long exposure to sovereign bonds, therefore the duration of the Fund increased accordingly. In the second semester the allocation was maintained relatively stable, with few specific changes; in particular, within the flexible equity funds, the allocation to the three long short equity managers in portfolio were maintained almost unchanged. Within flexible bond strategies, a new fixed income "unconstrained" manager was added with a weight of around 5%; regarding the multi-asset strategies allocation, the allocation to the different managers slightly changed in the last part of the year, increasing the allocation towards equity-focused strategies, but the overall weight of the multi-asset strategies was maintained stable just slightly above 20%. At the end of December the Fund had an allocation to flexible equity funds at around 31%, an allocation to flexible bond funds at around 46% and an allocation to multi-asset funds at around 23%; the rest of the portfolio, just around 1%, was maintained in cash. All strategies within the Fund portfolio, multi-asset, flexible bond and flexible equity strategies, generated a positive contribution in 2023, with flexible bond strategies generated the biggest contribution.

The Fund will continue to aim achieving its investment objectives by investing in a portfolio of absolute funds employing different type of styles and strategies. In the foreseeable future the Fund allocation will continue to be well-diversified in term of type of strategies and managers style, but the weight of the flexible bond funds will continue to be maintained relatively high, considering the opportunities in the fixed income markets that can be exploited by flexible active managers. The flexible equity funds allocation will be maintained stable at around 30%; multi-assets strategies allocation will be more tactical managed both in term of overall allocation and type of strategies within it.

ANIMA Selection Moderate

In the 2023 the Fund achieved a positive absolute performance. Anima Selection Moderate's objective is to seek medium to long-term capital appreciation, with medium volatility. The Fund seeks to achieve its objective by investing through Multi-Manager, Multi-Strategy and Multi-Asset Class approaches. The Fund invests in a diversified portfolio of Collective Investment Schemes which invest on global and/or regional basis across long only and/or flexible return strategies. The Fund started 2023 with an allocation to equity funds at around 25%, an allocation to fixed income funds above 40% and around 22% in flexible funds; the rest of the portfolio was maintained in cash. During the first semester the allocation to fixed income funds was increased and the duration was increased accordingly, due to a positive view on government bonds; instead, the flexible equity funds and equity components were decreased therefore reducing the equity sensitivity of the portfolio. In the second semester, in particular during the last part of the year, the equity allocation was increased up to 35%, and both fixed income and flexible funds allocation was slightly decreased. The Fund's positive return of the year was attributable mainly to the positive returns generated by equity funds and fixed income funds; also the contribution of flexible funds was overall positive.

The Fund will continue to aim achieving its investment objectives by investing in a portfolio of direction and flexible funds, employing different type of style and strategies. In the foreseeable future the Fund allocation will favor a balanced approach and allocation between equity funds and bond funds instead, instead flexible strategies allocation in the short term will continue to represent a relatively low part of the portfolio. Nevertheless, flexible strategies can be increased during the year if market conditions will start to favor absolute strategies in place of more directional strategies.

ANIMA Short Term Bond

During 2023, the Fund reported a positive absolute performance, but negative in relative terms. The management of the Fund relies on a quantitative investment process based on a risk budget with constraint of tracking error. During the year, on average, the Fund had a bond exposure equal to 95% of the portfolio, fully allocated to government securities. The portfolio was country neutral relative to the benchmark: at the end of December, the fixed income component was mainly allocated in France (24%), Italy (23%), Germany (18%) and Spain (14%). During the year, the Fund duration was aligned with the one of the benchmark: at the end of December, it was 1.8.

The Fund will follow a management style characterized by a limited level of Tracking Error compared to the reference Benchmark.

ANIMA Short Term Corporate Bond

In the fiscal year 2023, the Fund delivered a positive absolute and relative performance. This achievement was predominantly attributed to the advantageous portfolio carry and a contraction in spreads. Commencing the year with an overall duration shorter than the benchmark, the Fund's beta, however, slightly exceeded that of the benchmark. Over the initial semester, the Fund progressively extended its duration, aligning with the benchmark at the period's conclusion (1.4 years). In the latter half of the year, the Fund divested a portion of the duration acquired in the preceding months. As of year-end, the Fund allocated 83% of its assets to corporate bonds and 13.5% to Italian government BTPs and bond proxies. Specifically, the financial sector experienced a 4.5% overweight, while consumer cyclicals (-7%) and industrials (-4.25%) represented the most substantial underweights. Real estate, albeit to a lesser extent, was also among the sectors exhibiting underweighting. However, a slight overweight was observed in the insurance and oil & gas sectors, respectively. Beyond sectoral allocation, active management extended to capital structure selection, evident in the Fund's notable overweighting of subordinated debt in both financial and non-financial bonds. Notably, the Fund strategically favored high-yield bonds in the short-term segment of the yield curve, where the likelihood of repayment is deemed relatively high. Concluding the year, the overall portfolio duration stood at 1 year, approximately 0.6 years shorter than the benchmark. This strategic positioning underscores the Fund's distinctive approach to optimizing performance in a dynamic market environment.

In the coming months, our main focus will be on monitoring inflation trends, particularly in the services sector, and the subsequent policies that central banks will adopt. While we believe that we are at the end of the European Central Bank's interest rate hike cycle, we also acknowledge that short-term securities may still experience periods of high volatility due to unexpected macroeconomic data. However, we will remain committed to maximizing the Fund's returns and taking advantage of tactical opportunities as they arise. In the credit market, risk premium compression has been evident across all rating levels, and at these levels, spreads do not seem to offer much value. Furthermore, there is a significant risk in volatility spikes, especially considering the widespread overweight position in the investment-grade sector. For these reasons, a cautious approach is preferred.

ANIMA Smart Volatility Emerging Markets

During 2023 the Fund reported a positive absolute performance. The Fund follows a quantitative approach, using a proprietary risk management strategy to determine equity exposure to Emerging Markets. Market volatility fell sharply during the first semester of the year. As a result, equity net exposure rose from 45% in January to 72% at the end of June. In the following months market volatility has been relatively quiet and allocation to risky asset ranged between 60% and 75%, closing the year at 71%. Overall, the exposure to Emerging Markets has been on average 65%.

The Fund will follow indications provided by the proprietary quantitative model.

ANIMA Smart Volatility Global

During 2023 the Fund reported a positive absolute performance. The Fund follows a quantitative approach, using a proprietary risk management strategy to determine equity exposure to Global Stock Market. Market volatility fell sharply during the first semester of the year. As a result, equity net exposure rose from 33% in January to 70% at the end of June. In the following months the market has seen both turmoil and recovery scenarios; allocation to risky assets ranged between 40% and 75% and at the end of December was around 65%. Overall, the exposure to Global Equity Markets has been on average 60%.

The Fund will follow indications provided by the proprietary quantitative model.

ANIMA Smart Volatility USA

During 2023 the Fund reported a positive absolute performance. The Fund follows a quantitative approach, using a proprietary risk management strategy to determine equity exposure to U.S. Stock Market. Market volatility fell sharply during the first semester of the year. As a result, equity net exposure rose from 33% in January to 70% at the end of June. In the following months the market has seen both turmoil and recovery scenarios; allocation to risky assets ranged between 40% and 85% and at the end of December was around 75%. Overall, the exposure to U.S. Market has been on average 62%.

The Fund will follow indications provided by the proprietary quantitative model.

ANIMA Solution EM

During 2023 the Fund achieved a positive absolute performance. The Fund will aim to achieve its investment objective by investing in two different components, Core and Satellite portfolio, following the indication of the proprietary allocation model. Within the two components, the strategy will continue to focus on both active management of asset allocation and active fund selection of managers; in particular the Satellite will continue to focus on Emerging Market equity funds and a significant style diversification of the underlying managers, and Core will continue to focus on both fixed income directional and fixed income flexible funds. The Fund started the year with an exposure to the Satellite portfolio of around 18%; then, with the equity volatility that started to gradually decrease also within the Emerging markets, following the indication of the proprietary quantitative allocation model, the weight of the Satellite portfolio was gradually increased, up to around 32% at end of June. During the second semester the emerging market equity volatility remained overall stable, and also the Satellite was maintained pretty stable

ANIMA Solution EM (continued)

in this phase, always between 25% and 30%. The Core, both the first and second semester, was represented mainly by long only fixed income funds, and the exposure to flexible bond funds was maintained relatively low for all the year; also the weight of cash and money market funds was maintained low during 2023, on average around 5%.

In the foreseeable future the Satellite allocation, due to a neutral view on Emerging markets equity, will be maintained on average in line with the target generated by the indication of the proprietary allocation model, whereas the Core portfolio will continue to be concentrated on long only fixed income funds, mainly European credit Investment Grade and sovereign bond funds.

ANIMA Star High Potential Europe

The net performance of the Class I of the Fund has been slightly positive. Net equity exposure was gradually increased from 2.5% at the end of December to approximately 15% at the end of January, through the reduction of the Dynamic Hedging Book and the covering of some short positions. From a sector point of view, we increased the exposure to technology and consumer discretionary, while we partially took profit in the banking sector. In February, net equity exposure was increased to around 20% on average mainly through defensive sectors, in particular telecommunications and consumer staples. After the collapse of Silicon Valley Bank in the US and the rescue of Credit Suisse by UBS, renewed fears of a global banking crisis caused a sharp sell-off in the stock market in the first half of March. The management team promptly cut net equity exposure to around 13.5% at the end of March, the exposure to the banking sector was further reduced among cyclicals, while exposure to the pharmaceutical sector was increased among defensives. In the second quarter, net equity exposure was increased to approximately 18% at the end of June. From a sector allocation perspective, we increased the beta of the portfolio through banks, consumer discretionary and technology. On the other hand, the long exposure to staples and telecom was cut and the short exposure in industrials was reduced. Moreover, during the second quarter the new thematic "Artificial Intelligence winners" was introduced. The third quarter has seen rising geopolitical tensions, deteriorating macroeconomic data and hawkish messages from central banks. Net equity exposure was around 14% on average, but it was reduced from 20% at the beginning of the quarter to 5% at the end of September. From a sector allocation perspective, we reduced the beta of the portfolio by increasing the relative weight of defensive sectors, in particular telecom and healthcare, while among cyclicals we maintained a preference for banks, insurance and energy. During the fourth quarter, the average net equity exposure was approximately 20%, but it was increased from c. 5% at the beginning of October to c. 35% at the end of December. From a sector allocation perspective, we increased exposure to the growth sectors (through technology and utilities) and cyclicals (through real estate, consumer discretionary and insurance), while we reduced exposure to healthcare, consumer staples and energy sectors. Furthermore, exposure to Small & Mid-cap companies was increased. Allocation to energy and financial sectors contributed positively, while sector allocation to technology, industrials and consumer discretionary contributed negatively. Stock picking contributed positively, in particular in technology and, to a lesser extent, in financials and telecom sectors.

We believe that the rally that began in the fourth quarter of 2023 can extend into 2024 as fundamentals are broadly supportive of a soft landing as disinflation is tracking and the prospect of rate cuts throughout the year can continue to provide positive asymmetry to equities. However, we expect that the first half of the year could be characterized by episodes of high volatility and we do not rule out a potential correction in the stock market either if macroeconomic data weaken or if tensions in the Middle East lead to an international conflict. Considering the uncertain economic outlook, we believe that stock picking will be the main driver of the performance of the Fund, hence we maintain a preference towards companies characterized by an attractive growth profile of revenues and FCF and with a solid balance sheet. From a sector allocation perspective, the team currently maintains a preference for sectors that will continue to benefit from the peak rates narrative and towards Small&Mid-cap.

ANIMA Star High Potential Italy

The Fund delivered a positive absolute return in 2023. The first half of 2023 was characterized by a vigorous risk-on attitude, with all major Global Equity benchmarks growing double digit. The introduction of the first free generative-AI chatbox, ChatGPT, and its subsequent acquisition by Microsoft created a strong hype around all the stocks directly exposed to the growth in the Artificial Intelligence market. Many economists justified this exuberance with the fact that a broad-based adoption of AI will lead to consistent labor productivity gains and, hence, good for overall corporate margins. The Fund started the year with a 5% net equity exposure, but due to cautious investor positioning and positive macro data surprises, we increased the exposure by approximately 5% in January and February, reaching +10%. During this period, we significantly boosted our exposure to the technology sector, especially in semiconductors, while reducing exposure to the banking sector due to peaking net interest margins. In March, capitalizing on low valuations, we initiated new positions in the Telecoms and Healthcare sectors, while taking profits on some tech trades and the China re-opening stocks. From April onward, prompted by deteriorating macro data and lackluster Q1 earnings in cyclical sectors, we took profits in capital goods investments. We also seized the opportunity to book profits in the healthcare sector, primarily in pharma, considering the weakening USD and an upcoming pricing review. Despite maintaining a defensive allocation, in June, we increased the portfolio Beta, aligning it more closely with the benchmark, mainly by boosting holdings in the energy sector and further profit-taking in healthcare and consumer staples. Overall, the Fund closed the first half of 2023 with a +10% net equity exposure. The second half of 2023 was characterized by an initial risk-off phase lasting throughout the third quarter, mainly due to three factors: 1) the relentless rise in global yields, with the 10year Italian yield climbing 70bps over the period; 2) the simultaneous abandonment of the expansive monetary policy of Yield curve control in Japan, which further reduced liquidity globally, and 3) the worsening of the Chinese real estate crisis with the failure of Country Garden, the country's largest developer. Putting all together, it has meant a strong outperformance of financials across the Italian market, while segments like luxury and industrials underperformed. The fourth quarter, however, turned out to be very positive, despite a turbulent start linked to the escalation of the geopolitical situation in the Middle East and the ongoing rise in interest

ANIMA Star High Potential Italy (continued)

rates. The trigger was once again evidence of a strong ongoing disinflation, with a generally strong performance of the economy and employment levels. All these factors led to a shift in focus towards a policy pivot by the Federal Reserve and a sudden repricing of future interest rate cuts in 2024. This supported all risk assets and pushed global stock indices to historic highs. The Fund started the second semester with a net exposure of approximately +10%, later reduced to about +3% during the month of August. We maintained this allocation throughout the third quarter and for much of October when, following inflation data and economic indicators increasingly indicative of a soft landing for the economy, the decision was made to bring the net investment level back to +35% through new investments in more cyclical companies (industrials and semiconductors) exposed to an improvement in general global economic conditions, as well as a reduction in allocation to index hedges. As a result of the investment choices made, the Fund achieved a positive absolute return. Specifically, stock picking in the essential goods, financial, and telecommunications sectors are the segments that contributed positively to the Fund's performance. The sectoral allocation detracted from the overall portfolio performance.

The management team's investment outlook remains focused on maintaining a preference for stocks of companies characterized by a high revenue and cash flow growth profile and a solid balance sheet, especially in light of rising interest rates and credit spreads. For this reason, in recent months, we have taken steps to reduce the number of positions and increase the average weight per position, while maintaining a flexible approach and a relatively low gross exposure. From a factor perspective, we continue to prefer the defensive growth style.

ANIMA Systematic U.S. Corporate

The Fund delivered a positive absolute and relative performance in 2023. The Manager uses a quantitatively driven approach for asset selection and portfolio construction. The signals consist of, but not limited to, cross-sectional relative value of different securities, credit sentiment (credit return momentum of the bonds) and roll-down potential (using internally developed fair value credit spread curves for different sectors and ratings) to identify undervalued securities. The portfolio construction consists of an internally created algorithm which allow us to implement the signals while following risk constraints such as for instance Sector exposure or ticker exposure. The Fund was launched on the 26th of June. As of January the exposure of the Fund consists of 88% exposure to Corporate Bonds, 21% to CDS (Index) and 21% Treasury Futures. The portfolio, country-wise, is overweight US and underweight EM. Sector-wise the portfolio is overweight Automotive, Energy, Utilities and Capital Goods. The Fund duration is +0.15 above the one of the benchmark. The Fund absolute and relative performance at the end of year was positive, mostly due to alpha created by bond picking (Selection effect) in the Banking, Consumer Goods and Financial Services sector.

The Fund will follow an Active Systematic management style characterized by a controlled Tracking Error compared to the reference Benchmark tilting the positioning with Active Systematic signals.

ANIMA Trading Fund

For the year 2023 the Fund recorded a positive absolute performance for the majority of the investable Classes with the exception of Classic A Class which had a negative return of -0.54%. The recovery of the major stock markets in 2023 has been significant, with some sectors surprisingly leading this recovery. In particular, the technology and communications services sectors, the hardest hit in 2022, have shown remarkable resilience. The theme is mainly linked to generative artificial intelligence, the fastest and most pervasive technological change ever experienced. Return dispersion has been the key theme of 2023, both at a sector and geographic level. The themes that drove performance for much of the year were artificial intelligence and anti-obesity drugs. In the first half of the year, in a rather complex macro context, the Fund's strategy favored a prudent approach, maintaining an average net exposure of 30%. Starting from the end of October, the market began to discount a greater probability of a soft landing, especially after the latest meeting of the Federal Reserve which allowed the markets to discount rate cuts. In the last two months of 2023 we have witnessed a generalized rise, which has seen the participation of a growing number of companies, especially in the less held areas of the market. In this phase, we increased the net equity exposure to approximately 45%, it has been increased predominantly the exposure to US small caps and the technology and communications services sectors. The cautious positioning during the year penalized the overall performance due to the short positions in derivatives on stock indices not fully compensated by picking, also due to the concentration of returns in very few companies (the magnificent 7). At a sector level, the greatest contributions are attributable to stock selection in the technology and telecommunications services sectors, while negative contributions were recorded in the financial, consumer discretionary, healthcare and utilities sectors. The contribution of derivatives to hedge exchange rate risk and exposure to currencies other than the Euro was negative for the year (-144 basis points). The bond component contributed positively to the overall performance (+161 basis points). The bond exposure was maintained at a level above 40% of the NAV. The bond exposure consists of securities that mature by the end of 2024. With regards to the bond component, the investment consisted of Italian government bonds and to a lesser extent American government bonds. At the end of December 2023, the Fund had bond exposure of 40%, and a net equity exposure of around 40%. In particular, the geographical exposure is allocated to the USA (33%), China (4%) and the United Kingdom (2%). The main sectors in the portfolio are: Information Technology (9%), Healthcare (6%), and Communication Services (+4%). At the end of the year, an exposure to the American 10-year bond of approximately 2.5% of NAV was maintained through derivatives, compared to a maximum of 5% NAV achieved during the period.

We expect positive returns from stock markets albeit lower than in 2023 and a good performance of cyclical sectors. The concentration of returns in a few securities and a few sectors may not recur as it did in 2023. All geographies, except Australia, as well as most sectors are expected to see positive earnings growth in 2024, which should support broader participation in

ANIMA Trading Fund (continued)

investment opportunities globally. The bullish trend in share prices over the past year, having brought the multiples back to high levels and the positioning and sentiment indicators also at high levels, leads to favoring a balanced approach, also taking into account the geopolitical risks well known to the market. In this context we believe that any correction could represent a good buying opportunity.

ANIMA U.S. Equity

During 2023, Anima US Equity reported a positive absolute performance, but negative in relative terms. During the year, the economic scenario was quite complex and difficult to predict, so we continued to remain focused on interpreting the dynamics of stock market's multiples and corporate earnings, to achieve a good return while preserving the Fund's volatility. At the beginning of 2023, the market got off to a positive start, largely dragged along by the technology sector. We increased our exposure to the latter considerably, quickly bringing it overweight against the benchmark. Since that period, we have maintained the overweight on the technology sector throughout the year, supported by good profitability levels for the biggest companies which also continued to generate huge free-cash flow. In the first half of the year, one of the main factors supporting the strong growth seen in the technology sector was attributed to the Artificial Intelligence theme. This theme supported the sector's stock market multiples, and in the meantime the market continued to be polarized in terms of stock price returns, the performance of the index continued to be supported by only a few stocks, namely those with the largest market capitalization. The resilience of the index over the entire year was quite surprising despite fears regarding the possibility of recession, banking crisis, interest rate hikes (and breaks) and inflation. The sectors that contributed positively to the Fund's performance were industrials, technology, real estate, and utilities. The financial and energy sectors were those that contributed negatively to relative annual performance of the Fund. Starting the second half of the year, we began to increase the more cyclical part of the portfolio, specifically we took the energy and financial sectors to overweight as they were characterized by attractive relative valuations compared to the rest of the stock market. We took profit from the more defensive sectors such as health care and non-cyclical consumer sectors, which were still not shining on the earnings growth profile. The theme of the stock market in the latter part of the year turned out to be the increase in the market breadth, with other sectors, other than the technology, contributing to the performance of the index. The scenario that the market began to embrace became that of a slowdown in economic growth, and therefore all sectors that had been negatively affected by rising interest rates began to participate in the uptick of the stock market. In December we began to buy some companies belonging to the real estate sector, whose cash flow yields appear to be quite attractive compared to the rest of the market. The sectors where we hold our largest overweight remain the technology sector, the energy sector and the financial sector. The Fund's beta is about 1, and our preference remains towards the large-cap companies.

With regard to future prospects, we maintain a preference towards investing in companies that may have the potential to generate cash growth from operations above that of the market. Our focus continues to be on building positions in companies whose business models may prove resilient within a macroeconomic framework that remains quite challenging.

ANIMA Variable Rate Bond

In 2023, the Fund has reported a positive absolute performance. We have kept an average exposure of around 90% to Italian CCTs, increased at the end of the first semester given the attractive return offered by the asset class. The remaining part of the portfolio has been invested in BTPs, Cassa Depositi e Prestiti and cash.

In the coming months, the focus will remain on the inflation path and, consequently, on the policies that central banks will implement to meet their 2% target. Our long-term approach remains constructive on bonds and especially CCTs, given the still high level of yields offered and, at the same time, the good protection against any upward correction on interest rates after the remarkable decrease in recent months.

ANIMA Zephyr Global

In 2023 the Fund delivered a net positive performance. The investment activity followed the quantitative methods developed by the team. The Fund started the year with an equity exposure of 27%, which has been increased to 34% during the second quarter. A reduction has been deployed in the second half, with equity exposure ending the year at 31%. In the Fixed Income component, around 72% of the portfolio has been invested in Italian government debt, while the remaining part has been invested in other Eurozone government bonds, mainly from Germany, Spain and Austria. While in the semester, the Fund's duration has been gradually increased, both in Germany and Italy, mainly in the mid-long part of the curve, it has been kept stable during the summer period, and then increased again in October, when it was clear that a halt in the Central Banks hiking cycle was a done deal. The Fund closed 2023 with a duration of around 3.9 years.

In the Multi Asset component, the Fund will continue to adopt the investment strategies provided by the quantitative models internally developed.

ANIMA Zephyr Global Allocation

In 2023 the Fund delivered a net positive performance. The investment activity followed the quantitative methods developed by the team. The Fund started the year with an equity exposure of 13%, which has been increased to 29% during the second quarter. A reduction has been deployed in the second half, with equity exposure ending the year at 21%. In the Fixed Income component, around 71% of the portfolio has been invested in Italian government debt, while the remaining part has been invested in other

ANIMA Zephyr Global Allocation (continued)

Eurozone government bonds, mainly from Germany, Spain and Austria. While in the semester, the Fund's duration has been gradually increased, both in Germany and Italy, mainly in the mid-long part of the curve, it has been kept stable during the summer period, and then increased again in October, when it was clear that a halt in the Central Banks hiking cycle was a done deal. The Fund closed 2023 with a duration of around 3.9 years.

The Fund will continue to adopt the investment strategies provided by the quantitative models internally developed.

ANIMA Zephyr New

In 2023 the Fund delivered a net positive performance. The investment activity followed the quantitative methods developed by the team. The Fund started the year with an equity exposure of 11%, which has been increased to 14% during the second quarter. A further increase has been deployed in the second half, with equity exposure ending the year at 18%. In the Fixed Income component, around 72% of the portfolio has been invested in Italian government debt, while the remaining part has been invested in other Eurozone government bonds, mainly from Germany, Spain and Austria. While in the first semester, the Fund's duration has been gradually increased, both in Germany and Italy, mainly in the mid-long part of the curve, it has been kept stable during the summer period, and then increased again in October, when it was clear that a halt in the Central Banks hiking cycle was a done deal. The Fund closed 2023 with a duration of around 4.3 years.

The Fund will continue to adopt the investment strategies provided by the quantitative models internally developed.

ANIMA Zephyr Real Assets

In 2023 the Fund delivered a net positive performance. The investment activity followed the quantitative methods developed by the team. The Fund started the year with an overall risk (equity and commodity) exposure of 25%, which has been increased to 29% during the second quarter. A reduction has been deployed in the second half, ending the year at 25%. In the Fixed Income component, around 66% of the portfolio has been invested in Italian government debt, while the remaining part has been invested in other Eurozone government bonds, mainly from Germany, Spain and Austria. While in the first semester, the Fund's duration has been gradually increased, both in Germany and Italy, mainly in the mid-long part of the curve, it has been kept stable during the summer period, and then increased again in October, when it was clear that a halt in the Central Banks hiking cycle was a done deal. The Fund closed 2023 with a duration of around 4.4 years.

The Fund will continue to adopt the investment strategies provided by the quantitative models internally developed.

The Manager
ANIMA SGR S.p.A.
Milan, February 2024

We have enquired into the conduct of ANIMA Funds Plc ("the Company") for the financial year ended 31 December 2023, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company as a body, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ('the UCITS Regulations'), and under the Central Bank (Supervision Enforcement) Act 2013 (Section 48 (i)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that financial year in accordance with the provisions of the Company's constitution (the "Constitution") and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Constitution and the UCITS Regulations and (ii) otherwise in accordance with the Constitution and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the financial year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Constitution, the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019, ('the Central Bank UCITS Regulations'); and
- (ii) otherwise in accordance with the provisions of the Constitution, the UCITS Regulations and the Central Bank UCITS Regulations.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF ANIMA FUNDS PLC

Report on the audit of the financial statements

Opinion on the financial statements of ANIMA Funds plc ("the company")

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the company as at 31 December 2023 and of the profit for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework, the applicable Regulations and, in particular, with the requirements of the Companies Act 2014.

The financial statements we have audited comprise:

- the Statement of Comprehensive Income;
- the Statement of Financial Position;
- the Statement of Changes in Net Assets attributable to holders of Redeemable Participating Shares;
- the Statement of Cash Flows; and
- the related notes 1 to 27, including material accounting policy information as set out in note 1.

The relevant financial reporting framework that has been applied in their preparation is the Companies Act 2014 and International Financial Reporting Standards as adopted by the European Union ("IFRS") ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "Auditor's responsibilities for the audit of the financial statements" section of our report.

We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF ANIMA FUNDS PLC

Other information

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the Annual Report and Audited Financial Statements. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Statement of Directors' Responsibilities, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and otherwise comply with the Companies Act 2014, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: <https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements>. This description forms part of our auditor's report.

Report on other legal and regulatory requirements

Opinion on other matters prescribed by the Companies Act 2014

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.
- In our opinion the information given in the directors' report is consistent with the financial statements and the directors' report has been prepared in accordance with the Companies Act 2014.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF ANIMA FUNDS PLC

identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the Companies Act 2014 which require us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by law are not made.

Use of our report

This report is made solely to the company's shareholders, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

. This Fund was launched during the financial year ended 31 December 2022.

The accompanying notes form an integral part of the Financial Statements.

1. Material Accounting Policy Information

ANIMA Funds Plc (“the Company”) is an open ended umbrella investment company with variable capital and segregated liability between Funds incorporated with limited liability in Ireland under the Companies Act 2014 with registration number 308009 and registered office 78 Sir John Rogerson’s Quay, Dublin 2, Ireland.

a) Basis of preparation

These Financial Statements have been prepared on a going concern basis in accordance with International Financial Reporting Standards (“IFRS”) as adopted by the European Union (EU) and in accordance with the provisions of the Companies Act, 2014 and authorised by the Central Bank under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”) and under the Central Bank (Supervision & Enforcement) Act 2013 (Section 48(1) (Undertakings for Collective Investment in Transferable Securities)) Regulations 2019 (the “Central Bank UCITS Regulations”).

The material accounting policy information are set out below.

The preparation of Financial Statements in conformity with IFRS requires the use of certain critical estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the Financial Statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management’s best knowledge of the amount, event or actions, actual results ultimately may differ from those estimates.

International Financial Reporting Standards:**(i) New standards, amendments and interpretations issued and effective for the financial year beginning on or after 1 January 2023****Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2)**

The amendments require the disclosure of ‘material’ rather than ‘significant’ accounting policies. The amendments also provide guidance on the application of materiality to disclosure of accounting policies, assisting entities to provide useful, entity-specific accounting policy information disclosed in the financial statements. To support this amendment, the IASB also amended IFRS Practice Statement 2 “Making Materiality Judgements” to provide guidance on how to apply the concept of materiality to accounting policy disclosures. The amendment is not expected to have a significant impact on the Company’s financial position, performance or disclosures in its financial statements.

Definition of Accounting Estimates (Amendments to IAS 8)

The amendments to IAS 8 clarify the distinction between changes in accounting estimates, changes in accounting policies and the correction of errors. They also clarify how entities use measurement techniques and inputs to develop accounting estimates. The amendment is not expected to have a significant impact on the Company’s financial position, performance or disclosures in its financial statements.

International Tax Reform (Pillar Two Model Rules and Amendments to IAS 12)

The Organisation for Economic Co-operation and Development (OECD) released the Pillar Two model rules (the Global Anti-Base Erosion Proposal, or “GloBE”) to reform international corporate taxation. Enterprises within the scope of the rules are required to calculate their GloBE effective tax rate for each jurisdiction where they operate. They will be liable to pay a top-up tax for the difference between their GloBE effective tax rate per jurisdiction and the 15% minimum rate.

The amendments to IAS 12 provide a temporary relief from the requirement to recognise and disclose deferred taxes arising from enacted or substantively enacted tax law that implements the Pillar Two model rules, including tax law that implements qualified domestic minimum top-up taxes described in those rules. The amendments also require affected companies to disclose:

- the fact that they have applied the exception to recognising and disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes;
- their current tax expense related to the Pillar Two income taxes; and
- during the period between the legislation being enacted or substantially enacted and the legislation becoming effective, known or reasonably estimable information that would help users of financial statements to understand an entity’s exposure to Pillar Two income taxes arising from that legislation.

The amendment is not expected to have a significant impact on the Company’s financial position, performance or disclosures in its financial statements.

1. Material Accounting Policy Information (continued)**a) Basis of preparation (continued)****(i) New standards, amendments and interpretations issued and effective for the financial year beginning on or after 1 January 2023 (continued)**

There are no other new standards, amendments or interpretations issued and effective for the financial year beginning 1 January 2023 that have a significant impact on the Company's financial position, performance or disclosures in its financial statements.

(ii) New standards, amendments and interpretations issued but not effective for financial year beginning on or after 1 January 2023 and not early adopted

There are no new standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a significant impact on the Company.

b) Financial Instruments**(i) Classification**

IFRS 9 sets out the requirements for recognition and measurement of all financial assets and financial liabilities including derivative instruments. The Company has classified all financial instruments as financial assets or financial liabilities at fair value through profit or loss. These include equity instruments, bonds, futures contracts, exchange traded funds, forward currency contracts, equity swaps, portfolio swaps, interest rates swaps, coupon swaps and total return swaps. These assets are acquired principally for the purpose of generating a profit from short-term fluctuations in price. All derivatives and liabilities from short sales of financial instruments are classified as held for trading. The Company's policy is not to apply hedge accounting.

Financial instruments at fair value through profit or loss include Investment Funds. These financial instruments are measured on the basis that their fair value can be reliably measured and their performance has been evaluated on a fair value basis in accordance with the risk management and/or investment strategy as set out in the Company's offering document.

(ii) Recognition

All regular way purchases and sales of financial instruments are recognised on the trade date, which is the date that the Company commits to purchase or sell an asset. Regular way purchases or sales are purchases or sales of financial instruments that require delivery of assets within the period generally established by regulation or convention in the market place. Realised gains and losses on disposals of financial instruments are calculated using average cost method.

(iii) Derecognition

A financial asset (or, where applicable part of a financial asset or part of group of similar assets) is derecognised where;

- The rights to receive cash flows from the assets have been expired; or
- The Company transferred its rights to receive cash flows from assets or has assumed an obligation to pay the received cashflows in full without material delay to a third party under 'pass through' arrangements; or
- Either (a) the Company has transferred substantially all the risks and rewards of the assets, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the assets, but has transferred control of the asset.

When the Company has transferred its right to receive cash flows from an asset or has entered into a pass through arrangement and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Company's continuing involvement in the asset. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the right and obligations that the Company has retained.

The Company derecognises a financial liability when the obligation specified in the contract is discharged, cancelled or expires.

1. Material Accounting Policy Information (continued)**b) Financial Instruments (continued)****(iv) Initial Measurement**

Financial instruments categorised at fair value through profit or loss are recognised initially at fair value, with transaction costs for such instruments being recognised directly in the Statement of Comprehensive Income.

(v) Subsequent measurement

After initial measurement, the Company measures financial instruments which are classified as at fair value through profit or loss at their fair values. Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. The fair value of financial instruments is based on their quoted market price on a recognised exchange or sourced from a reputable broker/counterparty in the case of nonexchange traded instruments, at the Statement of Financial Position date without any deduction for estimated future selling costs. Financial assets and financial liabilities are priced at their last traded prices.

If a quoted market price is not available on a recognised stock exchange or from a broker/counterparty, the fair value of the financial instruments may be estimated by the Company using valuation techniques, including the use of recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cashflow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Where the Company has assets and liabilities with offsetting market risks, it uses mid-market prices as a basis for establishing fair values for the offsetting risk positions.

Investments in investment funds are recorded at the NAV per share as reported by the Administrator of such Funds at period end, as this is deemed by the Directors to approximate fair value for these investments.

If necessary, the Funds make adjustments to the NAV of various Investment funds based on their audited NAV versus dealing NAV to obtain the best estimates of fair value.

Subsequent changes in the fair value of financial instruments at fair value through profit or loss are recognised in the Statement of Comprehensive Income. Interest earned or incurred is accrued in interest income or expense, respectively, according to the terms of contract.

c) Offsetting Financial Instruments

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liability simultaneously. Refer to Note 3 for further details of the Funds where offsetting is applicable.

d) Cash and Cash Equivalents

Cash comprises current deposits with bank or Depositary and bank overdrafts. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value, and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

e) Income**(i) Bond income**

Income earned arising on fixed interest securities and liquidity instruments is recognised on an effective yield basis. Bond income on securities classified as financial assets at fair value through profit or loss are accounted for through the Statement of Comprehensive Income under net gains/(losses) on financial assets and liabilities at fair value through profit and loss.

(ii) Dividend income

Dividends, gross of withholding taxes, where applicable, are included as income when the security is declared to be ex-dividend. Withholding tax is recorded separately in the Statement of Comprehensive Income.

1. Material Accounting Policy Information (continued)**e) Income (continued)****(iii) Deposit interest**

Deposit interest is accounted for on an accrual basis.

(iv) Investment Fund income

Investment fund income is derived from the underlying funds distributions and accounted for when announced by the underlying funds.

(v) Securities Lending income

Securities lending income is accounted for on an accrual basis.

(vi) Swap income

Swap income is calculated on a discounted cash flow basis. It is released from the swap on a quarterly basis to meet the expenses of the Company.

f) Fees and Charges

In accordance with the Prospectus, investment management fees and management company fees, administration fees, Depository fees and other operating expenses are charged to the Statement of Comprehensive Income on an accrual basis.

g) Derivative Instruments

Changes in the value of the derivatives are recognised as gains and losses by marking to market on a daily basis to reflect the value of the derivative at the end of each day's trading. All listed derivatives are valued at official settlement price established each day on which they are traded. Non-listed derivative instruments are valued as per counterparty price. The Company's investment therein, representing unrealised gain or loss on such contracts, is included in the Statement of Comprehensive Income within the net gains/(losses) on financial assets and liabilities and on the Statement of Financial Position within financial assets at fair value through profit or loss and financial liabilities at fair value through profit or loss.

Typically, financial derivative instruments ("FDIs") serve as components of the Company's investment strategy and are utilised primarily to structure and economically hedge investments to enhance performance and reduce risk to the Company (the Company does not designate any FDIs as hedges for hedge accounting purposes as described under IFRS 9 Financial Instruments: Recognition and Measurement). The Company records its FDI activities on a mark to market basis. Fair values are determined using counterparty prices. For Over-The-Counter ("OTC") FDIs, the Company may enter into master netting agreements with its counterparties, therefore, assets represent the Company's unrealised gains, less unrealised losses for OTC FDI in which the Company has a master netting agreement. There is no netting in the Statement of Financial Position on any of the Funds. (Please refer to Note 3 for details).

h) Redeemable Participating Shares

Redeemable Participating Shares are redeemable at the Shareholder's option and are classified as financial liabilities. These shares can be put back to the Company on any Dealing Day for cash equal to a proportionate share of the Fund's net asset value.

i) Gains and Losses on Investments

Realised gains or losses on disposal of investments during the financial year and unrealised gains and losses on valuation of investments held at the financial year end are accounted for through the Statement of Comprehensive Income under net gains/(losses) on financial assets and liabilities at fair value through profit and loss.

j) Taxation

The Company is exempt from all forms of taxation in Ireland, including income, capital gains and withholding taxes. However, in some jurisdictions, investment income and capital gains are subject to withholding tax deducted at the source of the income. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of

1. Material Accounting Policy Information (continued)**j) Taxation (continued)**

the income and is not significant for the Company. The Company presents the withholding tax separately from the gross investment income in the Statement of Comprehensive Income. For the purpose of the Statement of Cash Flows, cash inflows from investments are presented net of withholding taxes, when applicable.

k) Foreign Exchange

The functional and presentation currency of the Company and each sub-fund is Euro. The Directors have determined that this reflects the Company's primary economic environment, as the majority of the Company's Net Assets Attributable to Holders of Redeemable Participating Shares are denominated in Euro.

Foreign exchange gains and losses on financial assets and financial liabilities at fair value through profit or loss are recognised together with other changes in the fair value. Net currency gains/(losses) as set out in Note 5, these include net foreign exchange gains and losses on monetary financial assets and liabilities other than those classified at fair value through profit or loss.

Assets and liabilities denominated in foreign currencies, other than the functional currency of the Company, have been translated at the rate of exchange ruling at 31 December 2023. Refer to Note 15 on pages 488 and 489 for further details. Transactions in foreign currencies are translated into Euro at the exchange rate ruling at the date of the transaction. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the result for the financial year.

l) Distributions to Holders of Redeemable Participating Shares

Distributions to Holders of Redeemable Participating Shares are recognised as financial costs in the Statement of Comprehensive Income when declared to Holders of Redeemable Participating Shares.

m) Collateral

The Company's assets may be pledged as collateral to, and be held by a counterparty and/or brokers for open futures and swap contracts. A Fund may also receive collateral in the form of cash or stock from counterparties for derivative contracts. This collateral is held ultimately for the benefit of the Company's trading counterparties, and therefore does not form part of the net assets of the relevant Fund.

n) Subscriber Shares

The Company's Subscriber Shares are classified as equity in accordance with the Company's Articles of Association. These shares do not participate in the profits of the Company.

o) Amounts due to/from broker

Amounts due from and amounts due to brokers represent cash held with brokers, for financial derivative contracts on the Statement of Financial Position date.

p) Options

Each Fund may purchase and sell (write) call and put options on securities, securities indices and foreign currencies traded on a national securities exchange or in an over-the-counter market.

When a Fund writes a call or a put option, a premium is received by the Fund. The premium is subsequently marked-to market to reflect the fair value of the option written, which is reported within financial assets or liabilities at fair value through profit or loss on the Statement of Financial Position for each relevant Fund. The difference between the premium amount and the fair value reported on the Statement of Financial Position gives rise to an unrealised gain (loss).

When a Fund purchases a call or a put option, a premium is paid by the Fund. The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is included in determining initial fair value of the securities or foreign currency purchased. Premiums paid on the purchase of options which expire unexercised are treated as realised losses. The option is subsequently marked to market to reflect the fair value of the option purchased, which is reported within financial assets at fair value through profit or loss on the Statement of Financial Position for each relevant Fund. The over-the-counter options are valued at close of business on the dealing day at the settlement price as provided by the counterparty/broker and the values are independently valued, at a minimum, weekly. The fair value of exchange

1. Material Accounting Policy Information (continued)**p) Options (continued)**

traded options are based upon their quoted daily settlement prices on the relevant exchange. In the event of it being impossible or incorrect to carry out a valuation of a specific investment in accordance with the valuation rules, or if such valuation is not representative of a security's fair market value, the Directors are entitled to use other generally recognised valuation methods in order to reach a proper valuation of that specific instrument, provided that such method of valuation has been approved by the Depositary.

If an option which a Fund has written either expires on its stipulated expiration date or a Fund enters into a closing purchase transaction, a Fund realises a gain (or loss, if the cost of a closing purchase transaction exceeds the premium received when the option was sold) without regard to any unrealised gain or loss on the underlying security, and the liability related to such option is extinguished. If a call option which a Fund has written is exercised, a Fund realises a capital gain or loss from the sale of the underlying security, and the proceeds from such sales are increased by the premium originally received. When a put option which a Fund has written is exercised, the amount of the premium originally received will reduce the cost of the security which a Fund purchases upon exercise of the option.

q) Futures Contracts

Initial margin deposits are made upon entering into futures contracts and are generally made in cash or cash equivalents. The fair value of futures contracts is based upon their current quoted daily settlement prices on the relevant exchange as of the Statement of Financial Position date under net gain/(losses) in the financial assets and liabilities at fair value through profit or loss. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time realised gains and losses are recognised. For each relevant Fund, gains or losses on open futures contracts are shown in the Schedule of Investments and as appropriate, on the Statement of Financial Position as financial assets or liabilities at fair value through profit or loss.

r) Forward and Spot Foreign Currency Exchange Contracts

The fair value of open forward foreign currency exchange contracts and open foreign currency exchange spot contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the Statement of Financial Position date. For each relevant Fund, gains or losses on open foreign currency exchange spot contracts are included in cash and cash equivalents in the Statement of Financial Position and gains or losses on open forward foreign currency exchange contracts are included in financial assets or liabilities at fair value through profit or loss, as appropriate, on the Statement of Financial Position and Schedule of Investments.

s) Unfunded Swaps

Realised gains or losses depend on the prices used to value the underlying financial instruments within the swaps at the swaps' settlement dates and are recorded as net realised gains or losses in the Statement of Comprehensive Income for each relevant Fund.

Unrealised gains or losses are fair valued for the amounts expected to be received or paid under the swap agreements if such amounts were terminated at the valuation date.

Unrealised gains or losses are recorded as investments held at fair value through profit or loss in the Statement of Financial Position and the resulting movements in the unrealised gains or losses are recorded as net gains or losses in financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income for each relevant Fund.

t) Funded Swaps

For funded swaps, there is a transfer of the notional amount on inception to the Approved Counterparties, the principal amounts will be returned on the maturity of the swap together with any mark to market value of the underlying index (equity, hedge fund, commodity or real estate).

Unrealised gains or losses are fair valued for the amounts expected to be received or paid under the swap agreements if such amounts were terminated at the valuation date.

Unrealised gains or losses are recorded as investments held at fair value through profit or loss in the Statement of Financial Position and the resulting movements in the unrealised gains or losses are recorded as net gains or losses in financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income for each relevant Fund.

1. Material Accounting Policy Information (continued)

u) Warrants

The valuation of the warrants depends on the level of trading. If the warrants are actively traded in the market then the market price is used. If the warrants are not actively traded in the market then either the intrinsic value of the warrant based on underlying equity price and warrant strike price or modified Black Scholes derived value, adjusted for liquidity/other risks deemed appropriate are used.

v) Total Return Swaps

A total return swap is an agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains. In total return swaps, the underlying asset, referred to as the reference asset, is usually a stock or fixed income index. This is owned by the party receiving the set rate payment. Total return swaps allow the party receiving the total return to gain exposure and benefit from a reference asset without actually having to own it. The fair value of these swaps is determined based on the mark to market valuation provided by the counterparty and validated by the Administrator. In determining the mark to market valuation, the counterparty makes assumptions that are based on market conditions existing on each Statement of Financial Position date and uses valuation techniques which include the use of comparable recent arm's length transactions, discounted cash flow techniques, option pricing models and other valuation techniques commonly used by market participants. Movements in the fair value of swaps are recorded as unrealised gains or losses when marked to market, and are recorded as a realised gain or loss when the position is closed.

2. Fair Value of Financial Instruments

IFRS 13 requires disclosures relating to fair value measurements using a three-level fair value hierarchy. The level within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement. Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability. The following table shows financial instruments recognised at fair value, categorised between those whose fair value is based on:

Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable; and

Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" requires significant judgement by the Company.

The Company considers observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Manager's perceived risk of that instrument.

The Company uses widely recognised valuation models for determining fair values of over-the-counter derivatives. The most frequently applied techniques include forward pricing and swap models using present value calculations. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates and interest rate curves. Where inputs in the models are market observable, such financial instruments are included within Level 2. For certain derivatives the valuation is carried out using counterparty prices.

The Company may invest in other Investment Funds from time to time. These investments are not quoted on an active market (with exception of exchange traded funds which are classified within Level 1) and which may be subject to restrictions such as lock up period, redemption gates and/or side pockets. Such investments are valued at the net asset value (NAV) per share published by the appointed third party administrator to those schemes. Such NAV's may be

2. Fair Value of Financial Instruments (continued)

adjusted where necessary, to reflect the effect of time passed since the calculation date, liquidity risk, limitations on redemptions and other factors. Depending on the fair value of the underlying Fund's assets and liabilities and on the adjustments needed to the NAV per share published by such scheme, the Company classifies the fair value of that investment as either Level 2 or Level 3.

Valuation Techniques

Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, Manager's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. The Manager uses prices and inputs that are current as of the measurement date, including periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many securities. This condition could cause a security to be reclassified to a higher level within the fair value hierarchy.

When fair values of listed equities as well as publicly traded derivatives at the reporting date are based on quoted market prices or binding dealer price quotations, without any deduction for transaction costs, the instruments are included within Level 1 of the hierarchy. When the Company has assets and liabilities with offsetting market risks, it uses last traded prices as a basis for establishing fair values for the off-setting risk positions.

The Company uses valuation models for determining fair values of OTC derivatives. For these financial instruments, inputs into models are market observable and are therefore included within Level 2. For certain derivatives the valuation is carried using counterparty prices.

On a day to day basis, counterparties provide the Administrator with mark to market valuations of their FDI. The Administrator will then compare these valuations against their own internal analysis, assessing the coherence of the variation against movements in market parameters. The Administrator was appointed by the Manager as the competent person to carry out such valuation reviews.

All structured products are valued using weighted average counterparty prices. Structured products refer to OTC FDI which include swaps and options held on Funds. The list of Funds' investments can be viewed in the Schedule of Investments.

There have been no transfers between Level 1 and Level 2 on any of the Funds during the current financial year end prior financial year under review.

2. Fair Value of Financial Instruments (continued)

Valuation Techniques (continued)

The following is a summary of the fair valuations according to the inputs as at 31 December 2023 in valuing the Funds assets and liabilities:

ANIMA Liquidity

2. Fair Value of Financial Instruments (continued)**Securities classified as Level 3****ANIMA Emerging Markets Equity**

The Fund holds 66,000 shares in Sound Global Ltd which provides water and wastewater treatment solutions in China. The shares are listed in the Hong Kong Stock Exchange. Trading was suspended for the first time on 5 February 2015, again on 16 March 2015 and also on 12 April 2016. Due to the merger with ANIMA SICAV during the financial year 2016, the Sound Global Ltd shares were transferred into the Fund at a value of EUR 24,051. No trading took place on the investment during the financial year. As at 31 December 2023 and 31 December 2022, the shares have a value of nil and are classified as Level 3 in the financial statements.

The Fund also holds 172 shares in the India Magnum Fund. This security has been delisted since 2004 where the Board of Directors of the India Magnum Fund (the "Fund") announced during the annual general meeting held on 30 March 2004, that the stockholders of the Fund have approved the voluntary liquidation of the Fund. Accordingly the Fund no longer required a listing and an application has been made for the Shares of the Fund to be removed from the Official List of the Irish Stock Exchange (source: www.investigate.co.uk). Due to the merger with ANIMA SICAV during the financial year 2016, the India Magnum Fund shares were transferred into the Fund at a fair value of nil. No trading took place on the investment during the financial year. The shares are considered to have no current value and have been classified as Level 3 in the financial statements.

The Fund also holds 9 shares in the LUKOIL PJSC ADR. This security has exposure to Russia and was suspended due to the sanctions on trading the assets held. These have been valued at nil as at 31 December 2023 and 31 December 2022.

The Fund also holds 45 shares in the MMC Norilsk Nickel PJSC ADR. This security has exposure to Russia and was suspended due to the sanctions on trading the assets held. These have been valued at nil as at 31 December 2023 and 31 December 2022.

ANIMA Star High Potential Europe

The Fund holds 50,000 shares in Squarestone Brasil Ltd, a company which provides real estate services, specialising in acquiring and developing shopping malls in Brazil. Squarestone Brasil Ltd is involved in construction of Golden Square shopping center in Sao Paulo. The current view on the Company suggests that repayment of ordinary shares issued by Squarestone Brasil Ltd is highly unlikely in view of the fact that, according to the information collected, the proceeds of the sale of the main assets of Squarestone Brasil Ltd are not sufficient to repay in full the privileged shares issued by Squarestone Brasil Ltd. The Squarestone Brasil shares are considered to have no current value and have been classified as Level 3 in the financial statements.

ANIMA Opportunities 2027

The Fund holds 38 shares in Codere New Topco SA. No trading took place on the investment during the financial year. These have been valued at nil as at 31 December 2023 and 31 December 2022.

The following table shows a reconciliation of all movements in the fair value of financial instruments categorised within Level 3 during the financial year ended 31 December 2023:

	ANIMA High Yield Bond EUR	ANIMA Opportunities 2027 EUR
Opening Balance Fair Value	-	-
Transfer from Level 1 to Level 3	-	-
Realised gains	3,272	-
Unrealised gains	-	-
Purchases	-	-
Sales	(3,272)	-
Closing Balance Fair Value	-	-

2. Fair Value of Financial Instruments (continued)**Securities classified as Level 3 (continued)**

The following table shows a reconciliation of all movements in the fair value of financial instruments categorised within Level 3 during the financial year ended 31 December 2022:

	ANIMA Asia/Pacific Equity EUR	ANIMA Emerging Markets Equity EUR
Opening Balance Fair Value	-	-
Transfer from Level 1 to Level 3	-	1,199,435
Realised gains/(losses)	493	(915,483)
Unrealised gains	-	66,568
Purchases	-	225,035
Sales	(493)	(575,555)
Closing Balance Fair Value	-	-

No Level 3 sensitivity analysis of assumptions used in determining the fair value have been included for these positions. These are immaterial to the Company at the financial years ended 31 December 2023 and 31 December 2022.

3. Financial Risk Management**Strategy in using Financial Derivative Instruments**

The Company trades in financial instruments, including FDIs, both traded and over-the-counter. The investment objectives of each Fund are detailed in the Prospectus.

During the financial year ended 31 December 2023, the following FDIs have been used in the Funds:

- futures on bonds;
- futures on equity indices;
- futures on equities;
- futures on commodity indices;
- over-the-counter currency forwards;
- over-the-counter currency options;
- options on equity indices;
- options on futures on bonds;
- interest rate swaps;
- total return swaps;
- swaps on bond coupons and principals; and
- swaps on baskets of indices or stocks

In relation to FDIs, the methodology used to determine the incremental exposure and leverage generated by each fund through the use of FDIs is the Global Exposure under the Commitment Approach as set out in the relevant UCITS Regulation (The Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019) and Guidance Notes issued by the Central Bank.

In pursuing its investment objectives, the Company is exposed to a variety of financial risks: market risk (including currency risk, interest rate risk, and other price risk), credit risk, liquidity risk and depositary risk, which could result in a reduction in the Company's net assets or a reduction of the profits available for distribution. The Company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company's financial performance.

The risks, and the Company's approach to the management of the risks, are described in the following sections.

Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risks: currency risk, interest rate risk and other price risk.

3. Financial Risk Management (continued)

Market Risk (continued)

(a) Currency risk

The Funds may invest in financial instruments and enter into transactions denominated in currencies other than their respective financial currency. Furthermore, the Funds may enter into financial derivative transactions on foreign currencies. Consequently, the Funds may be exposed to the risk that the exchange rate of its currency relative to other foreign currencies may change in a manner that has an adverse effect on Funds' net asset value.

(b) Interest rate risk

The Funds may invest in debt securities and enter into FDI transactions on debt securities or interest rates. Consequently, the Funds may be exposed to the risk that interest rates may change in a manner that has an adverse effect on the Funds' net asset values.

(c) Other price risk

The Funds may invest in equity securities and other funds. The Funds may also enter into FDI transactions on equity securities and financial indices including commodity indices. Consequently, the Funds may be exposed to the risk that the price of equity securities, financial indices or other funds may change (whether caused by factors specific to the instrument, to the issuer or to the whole market), in a manner that has an adverse effect on the Funds' net asset values.

In regards to the management of market risk, a distinction can be made depending on the Fund type.

(i) Market and Absolute Return Funds

For Market Funds (i.e. Funds which are specialised in a specific asset class and with a benchmark) and Absolute Return Funds* (i.e. Funds with an absolute return objective and an absolute risk limit), market risk is monitored firstly by the Manager of each Fund during the continuing process of implementation of the investment policy.

Market risk is also monitored daily by Risk Manager of the Manager.

For each Fund, a risk limit is established by the Board of Directors of the Company, taking into consideration the Fund's risk profile. The risk limit is expressed in term of tracking error for Market Funds and in terms of volatility for Absolute Return Funds. Such risk limit is monitored on a daily basis through a risk management system.

The risk management system used for monitoring market risk is called "Risk Manager" and is developed by the company, MSCI Inc. (from here on called RiskMetrics) to deliver a suite of fixed income, equity and currency risk models within an integrated solution. RiskMetrics is a risk management tool used to aggregate, manage and mitigate risks across asset classes. The risk management system did not change during the reporting period.

RiskMetrics is a widely understood software for risk management and is used by a number of primary asset managers worldwide. The system is used as application service provider ("ASP"), over the Internet. The provider maintains models and data, whilst the Risk Manager provides position and over-the-counter term and conditions data.

RiskMetrics is able to calculate a variety of risk indicators, both absolute and relative, using three methodologies: parametric, Monte Carlo simulation and historical simulation. For equities and investment funds, the actual time series of returns is used as risk factor, whilst for bonds both risk-free interest rate curves and spread curves are used. For options volatility surfaces are also used. The system is flexible in establishing the length of historical data series used, the frequency of data (up to daily) and their decay factor.

For each Fund, minimum and/or maximum level of exposure to the principal risk factors to which each Fund is exposed to are also established by the Board of Directors of the Manager, taking into consideration the Funds' risk profile. Such exposure limits are monitored on a daily basis of the Manager through the risk management proprietary systems.

*UCITS that are managed according to investment policies or strategies which envisage a variable allocation of the portfolio of the fund across asset classes, under the constraint of a predetermined risk limit, shall be considered as absolute return funds.

3. Financial Risk Management (continued)**Market Risk (continued)****(c) Other price risk (continued)****(ii) Total Return Funds**

For Total Return Funds (i.e. Funds with an absolute return objective but without an absolute risk limit, including Funds with a pre-determined time horizon and which are specialised in bonds which mature at about the same date as the time horizon but which may take additional exposure to other asset classes), market risk is managed firstly by the Manager during the initial portfolio construction process and during the continuing process of implementation of the investment policy.

Market risk is also monitored daily by Risk Manager of the Manager.

For each Fund, minimum and/or maximum level of exposure to the principal risk factors to which each Fund is exposed to are established by the Board of Directors of the Manager, taking into consideration the Funds' risk profile. Such exposure limits are monitored on a daily basis of the Manager through the risk management proprietary systems.

Credit risk

Credit risk is the risk that the issuer or the counterparty of a financial instrument will be unable to pay amounts in full when they fall due. Credit risk comprises two types of risks: issuer risk and counterparty risk.

All securities, cash at bank balances are held by the Depositary, State Street Custodial Services (Ireland) Limited. Bankruptcy or insolvency of the Depositary, may cause the Company's rights with respect to cash and securities held by these entities to be delayed and the Company would be treated as a general creditor of that entity in respect of its cash balances. Periodic monitoring and an annual review are performed on the Depositary by an outsourcing monitoring team of the Manager. This review may include as appropriate an assessment of the Depositary's liquidity position, income streams, asset quality and credit ratings.

Risk is managed by monitoring the credit quality and financial positions of the Fund.

(a) Issuer risk

The Funds may invest in debt securities and FDIs on debt securities. Consequently, the Funds may be exposed to the risk that the issuer of the debt securities may be unable to repay in full the periodic coupons and/or the principal.

(b) Counterparty risk

The Funds may enter into OTC FDIs, security lending and reverse repurchase agreement transactions. Consequently, the Funds may be exposed to the risk that the counterparty of those transactions may be unable to discharge in full any obligation or commitment that it has entered with the Funds.

Issuer risk is monitored by the Manager during the initial and continuing process of implementation of the investment policy. Issuer risk is monitored primarily through the use of the credit rating of one or more rating agencies (External Credit Assessment Institutions), but through the use of the internal credit rating attributed by the Manager according to an internal policy approved by the Board of Directors of the Manager. When a security is not compliant anymore with the risk profile of a Fund (i.e. due to the downgrade below the minimum external or internal rating requirement), the Manager will dispose of the holding, as soon as practical, considering the interest of the shareholders.

Counterparty risk is monitored by the Manager during the initial and continuing process of implementation of the investment policy. Counterparty risk is monitored primarily through the use of an internal counterparty rating attributed by the Manager according to an internal policy approved by the Board of Directors of the Manager. When a counterparty is not compliant anymore with the counterparty authorisation policy (i.e. due to the downgrade below the minimum internal rating requirement), the Manager will terminate the transaction, as soon as practical, considering the interest of the shareholders.

Counterparty risk related to OTC FDIs is also mitigated by the daily receipt of collateral, of adequate level, quality and diversification and with the application of appropriate haircuts, according to an internal policy approved by the Board of Directors of the Manager, in compliance with EMIR regulations. Counterparty risk related to security lending and reverse repo transactions is also mitigated by the daily receipt of collateral, of adequate level, quality and diversification and with the application of appropriate haircuts, according to an internal policy approved by the Board of Directors of the Manager.

3. Financial Risk Management (continued)**Credit risk (continued)****(b) Counterparty risk (continued)**

The below table discloses the Standard & Poor's long term debt ratings of the counterparties as at the financial year end and also it discloses the Counterparty Risk exposure across all the Funds within the Company as a percentage of the NAV:

As at 31 December 2023			As at 31 December 2022		
Bank of America	A+	0.00%	Bank of America	A+	0.01%
BNP Paribas	A+	0.16%	BNP Paribas	A+	0.07%
Credit Agricole	A+	0.00%	Credit Agricole	A+	0.04%
Deutsche Bank	A	0.00%	Deutsche Bank	A-	0.02%
Goldman Sachs	A+	0.41%	Goldman Sachs	A+	0.38%
JP Morgan	A+	0.25%	JP Morgan	A+	0.29%
Morgan Stanley	A+	0.13%	Morgan Stanley	A+	0.11%
MPS Capital Service	B+	3.04%	MPS Capital Service	B+	3.98%
Nomura International	BBB+	0.00%	Nomura International	BBB+	0.00%

Liquidity risk

Liquidity risk is the risk that the Funds will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial assets. Delivery obligation may arise from: accounts payable (i.e. investment management fees, depositary fees, etc.), FDIs, cash redemptions of redeemable participating shares.

The investment processes of the Manager are organised in a way whereby a liquidity profile for each Fund is identified taking into account all relevant factors: investment policy (i.e. instrument type in which the Fund is mainly invested), risk classification, diversification of shareholders, frequency of NAV price calculation, recent trend of subscription and redemption. According to that profile, a desired Fund's minimum liquidity level is defined. In making an investment decision, high priority is given to the liquidity of each eligible investment.

For each Fund, maximum levels of exposure to less liquid assets are established by the Board of Directors of the Manager, taking into consideration the Fund's risk profile. Such exposure limits are monitored on a daily basis of the Manager through the risk management proprietary systems.

The liquidity of equities is mainly estimated from volumes traded in regulated exchanges, whilst the liquidity of fixed income securities is mainly estimated using a variety of information (issuer type, amount outstanding, bid/ask spreads, credit rating, etc.). For FDIs, the liquidity of the underlying asset is used. For Underlying Investment Fund (UIF), the Manager carry out a specific due diligence process to ensure that the dealing profile of the target UIF meets the dealing and the liquidity requirements of the investing Fund.

Risk Monitoring

In addition to the risk monitoring performed by the Manager, other risk review activities are scheduled.

The risk and return of the Funds are also analysed by the Board of Directors of the Manager on a regular basis at periodic board meetings.

The Board of Directors of the Company supervises the Manager and is ultimately responsible for the risk management within the Company.

Exposure Analysis / Sensitivity Analysis

In this section, an exposure analysis is presented for each risk type to which the Fund is exposed at the reporting date and at the previous period reporting date. In addition to that, a sensitivity analysis is presented for each risk type of market risk to which the Fund is exposed at the report date and at previous period reporting date, showing how the net asset value of the Fund would have been affected by changes in the relevant risk variable that were reasonably possible.

A concentration analysis for each financial instrument type is also present in the Schedule of Investments section.

3. Financial Risk Management (continued)**Capital risk management**

The capital of the Company is represented by the net assets attributable to holders of redeemable shares. The amount of net asset attributable to holders of redeemable shares can change significantly on a daily/weekly basis, as the Company is subject to daily/weekly subscriptions and redemptions at the discretion of shareholders. The Fund's objective when managing capital is to safeguard the Fund's ability to continue as a going concern in order to provide returns for shareholders, provide benefits for other stakeholders and maintain a strong capital base to support the development of the investment activities of the Company.

(a) Currency risk

The tables below summarise the currency exposure as a percentage of the Funds' net asset value, which is calculated with the inclusion of currency forwards. The percentages below are net of the effect of forward foreign currency exchange ("FX") contracts.

. This Fund was launched during the financial year ended 31 December 2022.

Liquidity risk

The tables below summarise the liquidity risk exposure of the Funds in terms of assets and liabilities by maturity bucket. Balances due within six months equal their carrying amounts, as the impact of discounting is insignificant. The maturity groupings are based on the remaining period from the end of the reporting period to the contractual maturity date. Where the counterparty has a choice of when the payment required, the liability is allocated to the earliest timeframe in which the Fund could be required to pay.

11. Share Capital

Authorised

The Authorised Share Capital of the Company is EUR 40,000 divided into 40,000 Subscriber Shares of a par value of EUR1 each and 5 billion Participating Shares of no par value.

Exercise of Voting rights

The Company has appointed ANIMA SGR S.p.A. as Manager of the Company, pursuant to a Management Agreement, with effect from 1 January 2019. The Manager undertakes the responsibility for managing the assets and investments of each Fund within the Company and it is delegated by the Company to exercise such voting rights in the exclusive benefit of the Company. The Manager, taking into consideration the Company's portfolio under management, monitors corporate events and decides whether or not to exercise the right of voting and how to vote.

The Company makes sure that the voting rights, carried out by the delegates on its behalf, will only be exercised in the interest of the relevant sub-fund and its shareholders and defines the strategies to follow when conflicts of interest or potential conflicts of interest may arise. Details of the actions taken on the basis of those strategies are made available to shareholders free of charge and on their request.

Subscriber Shares

The Company has issued 40,000 Subscriber Shares as a quarter paid up and as they are not part of the Participating Shares of the Company, they do not form part of the Net Asset Value of the Company. Of these Subscriber Shares, 39,994 are held with ANIMA Alternative SGR S.p.A. and the remainder are held upon trust by nominees of ANIMA Alternative SGR S.p.A..

Redeemable Participating Shares

The Net Assets attributable to Redeemable Participating Shareholders of the Company are at all times equal to the Net Asset Value of the Company. The Participating Shares are in substance a liability of the Company to the Shareholders under IAS 32 and they can be redeemed at the option of the Shareholders. Every Shareholder or Holder of non-participating shares, present in person or by proxy, who votes on a show of hands shall be entitled to one vote. The rights attaching to the Shares issued in any Class or Fund may, whether or not the Company is being wound up, be varied or abrogated with the consent in writing of the Shareholders of three-quarters of the issued Shares or of that Class or Fund, or with the sanction of a resolution passed at a separate meeting of the Participating Shareholders of the Class by a majority of three-fourths of the votes cast at such a meeting of that Class or Fund.

Share Classes

The Company may create more than one class of Shares (each a "Class") in relation to each Fund. The Company is structured as an umbrella fund consisting of different Funds comprising one or more Share Classes. A separate portfolio of assets is not maintained for each Class. The investment objective and policies and other details in relation to each Fund are set out in the relevant Information Cards, which form part of the Prospectus. Within the maximum permitted limit the Manager's fees may differ between Funds and between Classes of the same Fund. The current fees charged by the Manager for each class are specified in the Class Information Cards or in the relevant Information Cards. Shares issued in a Fund or Class will be denominated in the base currency or in such other currency as may be specified in the Class Information Cards or in the relevant Information Cards.

In accordance with the objectives listed in the Directors' Report and in the risk management policies as discussed in Note 3, the Company strives to invest the subscriptions of redeemable participating shares in appropriate investments, while maintaining sufficient liquidity to meet Shareholder redemptions. Requests for redemptions received by the Administrator prior to the Dealing deadline for any Dealing Day will be dealt with on that Dealing Day.

13. Securities Lending

On 23 March 2016, a stock lending agency agreement was signed between the Company, Anima Asset Management Limited (the "Stock Lending Agent") and State Street Custodial Services (Ireland) Limited (the "Depository"). On the same date, a stock lending sub-agency agreement was signed between the Stock Lending Agent, the Depository, State Street GMBH London Branch (now Frankfurt Branch) (the "Stock Lending Sub-Agent") and State Street Bank and Trust Company. On the basis of economic agreements between the parties, the Company will receive 70% of the securities lending income and the remaining 30% will be received by the Stock Lending Agent and its Sub-Agent.

ANIMA Asset Management Limited merged into Anima Alternative SGR S.p.A. effective 1 January 2023. The terms and conditions under the stock lending agency agreement entered into by ANMA Asset Management Limited is transferred to Anima Alternative SGR S.p.A on the same date.

Transaction Costs

Transaction costs are defined as the incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value through profit or loss plus, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs relating to the brokers commission on the purchase and sale of a financial asset or financial liability, are included in its purchase and sale price. Transaction costs of the Depository are embedded in the Depository fees in the Statement of Comprehensive Income.

14. Fees (continued)**Transaction Costs (continued)**

Transaction costs amounted to EUR 11,614,955 (2022: EUR 12,257,895) and includes EUR 6,041,154 (2022: EUR 6,231,007) of commission fees and EUR 5,573,801 (2022: EUR 6,026,888) trade expense fees for the financial year ended 31 December 2023.

In addition to these fees, order routing fees amounting to EUR 1,401,239 (2022: EUR 1,124,931) were paid to ANIMA Alternative SGR S.p.A..

16. Efficient Portfolio Management

The Company may, on behalf of each Fund, employ (subject to the conditions and within the limits laid down by the Central Bank of Ireland (CBI)) techniques and instruments relating to transferable securities, provided that such techniques and instruments are used for efficient portfolio management purposes. The Company may also employ techniques and instruments intended to provide protection against exchange risks in the context of the management of its assets and liabilities or for the purposes of:

- (a) hedging
- (b) risk reduction or management
- (c) performance enhancement such as reduction of cost and/or generation of additional capital or income
- (d) management of interest, currency and/or exchange risks
- (e) management of securities prices
- (f) management of target Funds
- (g) achieving a foreign exchange exposure different from the underlying securities in order to neutralise active risk against the benchmark (currency overlay) and/or
- (h) seeking active foreign exchange exposure in order to enhance portfolio performance

The types of instruments which each Fund may use for these purposes are disclosed in Appendix V to the Prospectus. Each Fund may invest in FDIs. The FDIs used by each Fund during the reference period include futures, swaps, forward currency contracts and options. Please refer to the Schedule of Investments of these Funds on pages 500 to 804 to view details of these instruments including the instruments. The names of counterparties are also disclosed in the Schedule of Investments where applicable.

The Company may utilise securities lending agreements and reverse repurchase agreements for efficient portfolio management purposes.

16. Efficient Portfolio Management (continued)**Financial Derivative Instruments**

Typically, FDIs serve as components of the Company's investment strategy and are utilised primarily to structure and economically hedge investments to enhance performance and reduce risk to the Company (the Company does not designate any derivatives as hedges for hedge accounting purposes as described under IFRS 9 Financial Instruments: Measurement). The Company records its FDI activities on a mark to market basis. Fair values are determined using counterparty prices. For OTC FDIs, the Company may enter into master netting agreements with its counterparties, therefore, assets represent the Company's unrealised gains, less unrealised losses for OTC FDIs in which the Company has a master netting agreement. There is no netting taking place in the Statement of Financial Position on any of the Funds.

The primary difference in the risk associated with OTC FDIs and exchange-traded contracts is counterparty risk. The Company is exposed to counterparty risk from OTC FDIs when two conditions are present; (i) the OTC FDIs have unrealised gains, net of any collateral and (ii) the counterparty to the contracts defaults. The counterparty risk related to exchange-traded FDIs is minimal because the exchange ensures that these FDIs are always honoured. Changes in the value of the FDIs are recognised as gains and losses by marking to market on a daily basis to reflect the value of the FDI at the end of each day's trading. They are valued at the settlement price established each day on which they are traded, and the Company's investment therein, representing unrealised gain or loss on such contracts, is included in the Statement of Comprehensive Income within the Net gains/(losses) on financial assets and liabilities and on the Statement of Financial Position within financial assets at fair value through profit or loss and Financial liabilities at fair value through profit or loss.

17. Related Party Transactions

IAS 24 "Related Party Transactions" requires the disclosure of information relating to material transactions with parties who are deemed to be related to the reporting entity.

In the opinion of the Directors the following entities are required to be disclosed as related parties to the Company as at 31 December 2023:

Manager and Distributor	ANIMA SGR S.p.A.
Order Routing/Stock Lending Agent	Anima Alternative SGR S.p.A. (formerly ANIMA Asset Management Limited) (an associate company wholly owned by ANIMA Holding S.p.A. which is the parent Company of the Manager and Distributor)
Legal Advisor	Dillon Eustace

Fees earned and accrued during the financial year and prior financial year by the Manager are as follows:

	Financial Year ended 31 December 2023 EUR	Financial Year ended 31 December 2022 EUR
Fees earned during the financial year are as follows:		
Investment Management fees	47,580,434	48,866,020
Management Company fees	1,871,768	1,908,098

18. Auditor's Remuneration

The remuneration for all work carried out by the statutory audit firm in respect of the financial years under review was as follows:

	Year ended 31 December 2023 EUR	Year ended 31 December 2022 EUR
Statutory audit of the company financial statements	391,050	368,000
Tax Advisory Services	-	-
Other assurance services	-	-
Other non-audit services	-	-
	391,050	368,000

18. Auditor's Remuneration (continued)

The above amount reflects the audit fee (exclusive of VAT) agreed for the current financial statement year, however amounts disclosed in the Statement of Comprehensive Income and Note 6 are reflective of amounts accrued in the financial year.

19. Taxation

Under current Irish law and practice the Company qualifies as an investment undertaking under Section 739B of the Taxes Consolidation Act, 1997 and is not therefore chargeable to Irish tax on its relevant income or relevant gains. No stamp, transfer or registration tax is payable in Ireland on the issue, redemption or transfer of Shares in the Company. Distributions and interest on securities issued in countries other than Ireland may be subject to taxes including withholding taxes imposed by such countries. The Company may not be able to benefit from a reduction in the rate of withholding tax by virtue of the double taxation agreement in operation between Ireland and other countries. The Company may not, therefore, be able to reclaim withholding tax suffered by it in particular countries.

To the extent that a chargeable event arises in respect of a Shareholder, the Company may be required to deduct tax in connection with that chargeable event and pay the tax to the Irish Revenue Commissioners. A chargeable event can include dividend payments to Shareholders, appropriation, cancellation, redemption, repurchase or transfer of shares, or a deemed disposal of Shares every 8 years beginning from the date of acquisition of those Shares. Certain exemptions can apply. To the extent that Shareholders have appropriate tax declarations in place with the Company there may be no requirement to deduct tax.

20. Cross Investment between Funds

Under the Investment Funds, Companies and Miscellaneous Provisions Act 2005, the Company is permitted to engage in cross-investment between Funds within the umbrella structure.

Please refer to the Schedule of Investments of these Funds on pages 500 to 804 to view their holdings in the other Funds. The cross holdings are indicated with an asterisk on the applicable Funds' Schedule of Investments of these Funds. The cross holdings have the nominal amounts and fair value disclosed on the Schedules of Investments. No distributions were paid out of the cross holding during the current or prior periods. For the purpose of producing the financial statements these cross holdings were eliminated from the Company totals on the primary statements in order to prevent double counting.

The management and investment management fees were waived on the cross holding portion of the Funds. Please refer to the table below which details the amounts of the management fees waived in relation to the cross holdings.

ANIMA Thematic VI paid a dividend of EUR 0.1100 per share on 2 November 2023.

22. Significant events during the financial year (continued)**Other significant events during the financial year**

ANIMA Asset Management Limited merged into Anima Alternative SGR S.p.A. with effective date of 1 January 2023. Anima Alternative SGR S.p.A. is a company fully owned by ANIMA Holding S.p.A.

There have been no other significant events affecting the Company during the financial year.

23. Significant events after the financial year end**Dividends Paid**

ANIMA Thematic III paid a dividend of EUR 0.2205 per share on 25 January 2024.

ANIMA Thematic VII paid a dividend of EUR 0.2100 per share on 1 February 2024.

Other significant events after the financial year end

ANIMA Brightview 2024-I was totally redeemed on 3 January 2024.

ANIMA Solution EM was totally redeemed on 30 January 2024.

ANIMA Active Selection was totally redeemed on 7 February 2024.

ANIMA Orizzonte Consumi 2023 was automatically converted into ANIMA Liquidity – Class Silver on 21 February 2024.

ANIMA Star High Potential Italy was merged into ANIMA Star High Potential Europe on 26 March 2024.

ANIMA Thematic XIII was approved by CBI on 12 April 2024.

ANIMA Thematic XIV was approved by CBI on 12 April 2024.

There have been no other significant events affecting the Company since the financial year end.

24. Segregated Liability

The Company is structured as an open-ended umbrella investment company with segregated liability between its Funds. While the provisions of the Companies Act 2014 provide for segregated liability between Funds, these provisions have not been tested in foreign courts, in particular in satisfying local creditors' claims. Accordingly it is not free from doubt that the assets of any Fund of the Company may not be exposed to the liabilities of other Funds of the Company.

25. Off Statement of Financial Position risk

Securities sold short and options written represent obligations of the Company to deliver the specified security at the contracted price and thereby create a liability to repurchase the security in the market at prevailing prices. Accordingly, these securities may result in off Statement of Financial Position risk as the Company's satisfaction of the obligation may exceed the amount recognised in the Statement of Financial Position.

26. Prospectus Update

Please refer to the Company's website www.animafunds.ie to obtain a copy of the Company's most recent prospectus.

27. Approval of Financial Statements

The Financial Statements were approved by the Board of Directors on 16 April 2024.

The percentages in brackets show the equivalent sector holdings as at 31 December 2022.

Remuneration Policy of the Manager

The Manager has established, implements and maintains an appropriate remuneration policy which is consistent with and promotes sound and effective risk management and does not induce excessive risk-taking which is inconsistent with the risk profile of a Fund. This policy identifies staff members of the Manager involved in the management of each Fund whose professional activities have a material impact on the risk profile of the relevant Fund. The remuneration policy of the Manager shall provide that where it pays its staff performance related pay with respect to the management of any Fund, the following requirements will be applied:

- a) where remuneration relating to the management of the Fund(s) is performance related, the total amount of remuneration is based on a combination of the assessment of the performance of the individual and of the business unit or the relevant Fund(s) and of the overall results of the Manager, and when assessing individual performance, financial as well as non-financial criteria are taken into account;
- b) the assessment of performance is based on longer term performance and takes into account the outstanding risk associated with the performance. The assessment of performance may be set in a multi-year framework in order to ensure that the assessment process is based on longer term performance is spread over the business cycle of the Firm;
- c) the Manager maintains a fully flexible policy on variable remuneration, and variable remuneration may not be paid as a result of negative performance by the relevant individual, the relevant business unit or the Manager itself;
- d) payments related to the early termination of a contract reflect performance achieved over time and are designed in a way that does not reward failure;
- e) the assessment of performance-based components of remuneration takes into account outstanding risks associated with the performance.

The remuneration policy of the Manager describes how remuneration and benefits are determined, the persons responsible for awarding such remuneration and benefits and the controls in place to comply with the provisions of the UCITS Directive in relation to remuneration, further details of which are available on www.animasgr.it or, upon request, free of charge from the Manager.

Total remuneration, broken down into the fixed and variable component, accrued for the year 2023, the number of beneficiaries.

5. Type, Quality and Currency of Collateral received in respect of each SFT as at 31 December 2023**Securities lending activities**

There were no securities lending activities as at 31 December 2023.

Total return swaps

All TRS positions are collateralised using cash denominated in Euros, the base currency of the Company.

The actual collateral pledged/received for the Company's TRS positions is not separately identifiable.

The Company's collateral management process is to pledge or receive collateral to each relevant counterparty based on the total net exposure to that counterparty which includes exposures from other FDIs such as forward currency contracts. The total collateral pledged/received as at the reporting date is disclosed in Note 17.

6. Re-investment of Collateral received in respect of each SFT

There was no re-hypothecation of collateral received in respect of securities lending activities during the financial year ended 31 December 2023.

7. Safe-keeping of Collateral received in respect of each SFT

State Street Custodial Services (Ireland) Limited is responsible for the safe-keeping of all collateral received in relation to the SFTs held on the Funds.

8. Returns and costs of the SFTs**Securities lending activities**

*There was no income in respect of total return swaps during the financial year ended 31 December 2023.

**Costs incurred in relation to total return swaps are not separately identifiable for disclosure within the financial statements.

Sustainable Finance Disclosure Regulation (Unaudited)

The Manager is a signatory to the internationally recognised Principles for Responsible Investment (“PRI”) and, as such, has developed an internal policy for the analysis, evaluation and classification of issuers according to environmental, social and governance factors (“ESG Policy”), as further detailed below. The aforementioned PRI constitutes the basis of the integration of sustainability factors in the responsible investment process adopted by the Manager.

The Manager’s ESG Policy is based on the following elements which characterise the investment process, with the exception of the ‘Specific ESG Strategies’ element as detailed at point 3 below, as this element of the process will only apply to a Fund which has been classified by the Manager as an Article 8 (light green fund) or an Article 9 (dark green fund) pursuant to the Sustainable Finance Disclosure Regulation (EU) 2088/2019 (“SFDR”):

1. Sustainability risk monitoring: A description of this aspect is provided in the section of the Prospectus entitled “Risk Factors”, under the heading “Sustainability Risk”.
2. Taking into account the principal adverse impacts of investment decisions on sustainability factors. The Manager considers the principal adverse impacts of investment decisions on sustainability factors on the basis of ESG data provided by third party data providers by monitoring E, S and G scores and indicators on greenhouse gas emissions, impact on biodiversity and investments in fossil fuels, labour rights and anti-corruption policies. In respect of those Funds invested in third-party UCITS, the Manager only considers principal adverse impacts where ESG data is available for those third-party funds.
3. Specific ESG strategies: The Manager applies specific ESG strategies to Funds promoting, among others, social and environmental characteristics, or which have as their objective sustainable investments, as identified by Article 8 and Article 9 of SFDR. These strategies tend to reduce and control investments in securities of issuers with poor ESG ratings.
4. Shareholder engagement: With regard to shareholder engagement practices, in addition to adhering to the Italian Stewardship Principles issued by Assogestioni (the Italian Asset Management Association), which are based on the European Fund and Asset Management Association (EFAMA) Stewardship Code, the Manager has put in place a dedicated shareholder engagement policy which is available on its website.

The Manager’s investment process is guided by its ESG Committee which provides advisory support to the Board of Directors of the Manager in defining, reviewing and ensuring the implementation of the ESG Policy, as well as advising on any recommended updates to same, and regularly monitors the Funds classification on the basis of sustainability risk (for more details please refer to the section of the Prospectus headed “Risk Factors”, heading “Sustainability Risk”).

The Board of Directors of the Manager periodically verifies that the ESG Policy has been correctly implemented based on checks carried out by the Manager.

The ESG Policy is assessed at least once a year to determine whether any update is required, also taking into account national and international trends in responsible investment. Further details of the Manager’s ESG Policy are available on the Manager’s website: <https://www.animasgr.it/EN/PolicyESG>.

As at 31 December 2023, the following Funds are classified as Article 8 of the SFDR. None of Funds are classified as Article 9.

- ANIMA Liquidity
- ANIMA Short Term Corporate Bond
- ANIMA Europe Equity
- ANIMA U.S. Equity
- ANIMA Asia/Pacific Equity
- ANIMA Global Equity Value
- ANIMA Euro Equity
- ANIMA Euro Government Bond
- ANIMA Italy
- ANIMA International Bond
- ANIMA Megatrend People Fund

ANNEX 1

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088

Product name: ANIMA Liquidity

Legal entity identifier: 213800SMT7YGFZ96E263

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes No

It made **sustainable investments with an environmental objective** with an _____% _____% in economic activities that qualify as environmentally sustainable under the EU Taxonomy

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective** with an _____% It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes both the preservation of the environment and natural resources, and fair work conditions, democracy and human and social rights on the social side, as pursued by government issuers.

The promotion of the above environmental and social characteristics are evaluated by the Manager based on the analysis carried out by specialised third party ESG data providers. Further elements of the financial product’s ESG strategy are described in the “Asset Allocation” sections below.

● **How did the sustainability indicators perform?**

The sustainability indicators, used to measure the attainment of each of the environmental or social characteristics promoted by this financial product, are the E, S and G scores by a third party ESG data provider, which assess countries’ prosperity by considering its access to – and management of – natural, human and institutional wealth.

The scores assigned to the 3 factors above are then averaged in one final score (the Country ESG Score), on a scale that goes from 0 to 100 (100 being the best score).

Furthermore, the sustainability indicator used by this financial product is, for the respect of human rights, the exclusion of countries sanctioned at the central government level by the UN for systematic violations of human rights.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the period, the selection of investments was made taking into account the exclusions listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

- **... and compared to previous periods?**

There were no changes in the applied sustainability indicators.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considered the principal adverse impacts on sustainability factors as follows. Given that the financial product invests only in government bonds and money market instruments, it specifically considers only the PAI 16 (Violation of human rights), among those included in the list of mandatory indicators, included in the Technical Regulations (RTS) relating to the SFDR. In this regard, the adverse impact was greatly mitigated through the exclusion of government sanctioned at the central government level by the United Nations for systematic human rights violations.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is from 01/01/2023 to 29/12/2023

Largest investments	Sector	%Assets	Country

BTF 0% 01/24/2024	SOVEREIGN	3.27%	FRANCE

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The strategic asset allocation of the financial product has been defined by its risk-return profile and implemented through the modulation of its investments over time. 91.45% of the financial product net assets has been invested in issuers which promote the environmental and social characteristics, in accordance with the binding elements of the

investment strategy, and which have an ESG Combined Score higher than 25. Investments in SFDR art. 8 or 9 financial products are also considered to be aligned with the E/S characteristics promoted by this financial products. While the Financial product did not have sustainable investing as its objective, the Financial product invested 0.00% of its assets in sustainable investments with an environmental and/or social objective, as detailed in the sections above. Regarding the percentage of alignment with the taxonomy, sustainable investments with an environmental objective were aligned with the EU taxonomy for 0.00% of revenue, 0.00% of capital expenditures, 0.00% of operating expenditures (data reported by issuing companies).

0.01% of the financial product net assets has been invested in money market instruments, different from the ones mentioned in the previous sentence, or a mix of money market instruments and investments in issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25, subject to a maximum limit of 10% of the financial product's net assets for the latter. In this case, those issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25 have still been compliant with the exclusion criteria set out in the "Investment Strategy" section above.

Any investment included in the above referenced remaining component refers to financial products and instruments deemed to be of interest from a strictly financial point of view (liquidity included) and/or which, given their characteristics, help to complete the thematic, sector and geographic profile of the portfolio.

● **In which economic sectors were the investments made?**

Equity:

n/d

Bond:

Description	Average
Sovereign	91.53%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments with an environmental objective were aligned with the EU taxonomy for 0.00% of revenue, 0.00% of capital expenditures, 0.00% of operating expenditures (data reported by issuing companies).

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities were 0.00% of revenue, 0.00% of capital expenditures, 0.00% of operating expenditures (data reported by issuing companies).

The share of investments made in enabling activities were 0.00% of revenue, 0.00% of capital expenditures, 0.00% of operating expenditures (data reported by issuing companies).

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned to the EU taxonomy were 0% of turnover, 0% of capital expenditure, 0% of operating expenditure (data reported by companies).

Keep in mind that part of such sustainable investments with an environmental objective is also sustainable from a social point of view.

What was the share of socially sustainable investments?

0%.

Keep in mind that some of these sustainable investments with a social objective are also sustainable from an environmental point of view.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Please refer to the response to the previous paragraph on asset allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the period, the selection of investments was carried out in compliance with all the limits and allocations of the assets indicated above and compliance with the limits and allocations described in the previous paragraphs was monitored continuously by the various structures of the Management Company.

With regard to the voting activity relating to the product during the period, please refer to the annual report of the product itself, or to the reports of the individual funds present in the portfolio during the period.

With regards to the Management Company's engagement activity, please refer to the engagement policy and the Engagement Policy Report published on the website of the Management Company.

How did this financial product perform compared to the reference benchmark?

No index has been designated as a benchmark to meet the environmental or social characteristics promoted by the financial product.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX 1

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088

Product name: ANIMA Short Term Corporate Bond

Legal entity identifier: 213800GYPD7YECMSMD70

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 33.61% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective** _____%

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes both the preservation of the environment and natural resources, and fair work conditions, democracy and human and social rights on the social side, as pursued by government issuers. From a corporate point of view, this financial product promotes also the following environmental and social characteristics:

- the fight against climate change;
- the respect of human rights;
- the protection of human health;
- the protection of human well-being.

The promotion of the above environmental and social characteristics are evaluated by the Manager based on the analysis carried out by specialised third party ESG data providers. Further elements of the financial product's ESG strategy are described in the "Asset Allocation" sections below.

● How did the sustainability indicators perform?

The sustainability indicators used by this financial product are:

- the exclusion of corporate issuers involved in the production of thermal coal which accounts for more than 30% of their revenues, for the fight against climate change;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- the exclusion of:
 - corporate issuers involved in the production of controversial weapons, which include anti-personnel land mines, cluster munitions, biological, chemical, blinding weapons, white phosphorus, nuclear armaments and which have mostly been banned by UN treaties;
 - countries sanctioned at the central government level by the UN for systematic violations of human rights;

for the respect of human rights;

- the exclusion of issuers involved in the production of tobacco, for the protection of human health;
- the exclusion of corporate issuers involved in the gambling sector, for the protection of human well-being.

During the period, the selection of investments was made taking into account the exclusions listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***... and compared to previous periods?***

There were no changes in the applied sustainability indicators.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As mentioned above, although the product does not have a sustainable objective, it did invest 33.61% of its AuM in issuers defined as “SFDR” sustainable according to an internal algorithm of the Management Company. This algorithm provides that issuers are considered sustainable if they:

- comply with the exclusion criteria mentioned in the “Investment Strategy” section further below;
- pass the DNSH test, described in the following section;
- pass a Good Governance test, which is set at the level of 25 out 100 for their G score;
- pass a general E and S test, which is set at the level of 25 out 100 for their E and S scores;
- contribute positively to at least one of the following three areas: Climate Transition, Environment or Society. Positive contribution is measured on the basis of issuers' involvement in certain initiatives or on the basis of best-in-class criteria related to specific environmental and/or social factors.

During the period, the selection of investments was made taking into account the criteria listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The assessment that issuers considered to be sustainable do not cause significant harm to other sustainable investment objectives was carried out on the basis of the Do No Significant Harm test (DNSH, developed internally by the Management Company), which, in line with regulatory recommendations, is based on the mandatory Principal Indicators of Adverse Impact (PAI, see the RTS to the SFDR). In particular, investments are considered to cause significant harm when they involve issuers that:

- do not publish data on Carbon Footprint, Carbon Intensity and Board Gender Diversity;
- are involved in the fossil fuels sector or the controversial weapons sector;
- are involved in very severe controversies related to compliance with the UN Global Compact and OECD requirements for multinational companies;

- exceed strict threshold values (specifically identified by the Management Company based on a diversified sample of issuers worldwide) for any of the following PAI indicators: 2*, 3*, 5, 6*, 8, 9, 12 and 13;
- exceed critical thresholds (specifically identified by the Management Company based on a diversified sample of issuers worldwide) for at least 4 of the following PAI indicators: 2*, 3*, 5, 6*, 7, 8, 9, 10, 11, 12 and 13.

Note *: it should be noted that, for the purposes of the DNSH test, absolute GHG emissions levels (PAI 1) are used to calculate PAIs 2 and 3; also, Carbon Footprint and GHG Intensity are calculated taking into account only Scope 1 and 2 emissions. It should also be noted that PAI 6 currently takes into account the sectoral classification provided by the provider Refinitiv as a proxy for the NACE classification required by the regulations.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to the previous paragraph.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The alignment of sustainable investments with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights is pursued through several investment selection and management criteria, explained above and consistent with the aforementioned guidelines. In particular:

- exclusions relating to controversial weapons, which apply to all investments;
- exclusions based on the DNSH principle, applied through the definition of threshold levels on PAI indicators;
- inclusions based on the identification of positive contributions to climate, social or environmental objectives;
- exclusions of environmental or social ratings that fall into the worst quartile of the rankings based on the data provided by specialized third party providers;
- application to equity investments of the voting rights policy, based on the third party provider (ISS) model, which takes into account specific ESG factors and refers to guidelines consistent with sustainable business practices on the environment, fair treatment of labour, non-discriminatory policies and protection of human rights, framed in initiatives such as those of the United Nations Environment Programme Finance Initiative (UNEP FI), United Nations Principles for Responsible Investment (UNPRI), United Nations Global Compact, Global Reporting Initiative (GRI), Carbon Principles, International Labour Organisation Conventions (ILO), CERES Principles, Global Sullivan Principles, MacBride Principles and the European Union Directives on social and environmental issues.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considered the principal adverse impacts on sustainability factors as follows. In general, the consideration of PAIs is based on the contribution of certain mitigating factors, such as:

1. value exclusions,
2. exclusions/limitations resulting from investing in sustainable issuers according to the SFDR,
3. the setting up of objectives for specific adverse impact indicators, chosen among those belonging to the Mandatory list in the RTS to the SFDR.

In particular:

1. from a value perspective, issuers involved in controversial weapons (connection to PAI 14), nuclear weapons, tobacco, gambling and thermal coal mining (connection to PAI 4) were excluded;
2. the share of the financial product's AuM invested in sustainable issuers ensured that these issuers, by construction, passed the Good Governance and general E and S tests (detailed in the "sustainable investment" sections above) and the DNSH test (which takes into consideration all the 14 mandatory PAI, detailed in the "sustainable investment" sections above) while contributing positively to climate, environmental and social topics;
3. objectives for specific mandatory adverse impact indicators:
 - a. PAI 4 (fossil fuels exposure): the adverse impact was mitigated through the limitation of the exposure to the fossil fuels sector, due to the exclusion of issuers with more than 30% of revenues from thermal coal mining.
 - b. PAI 14 (controversial weapons): the adverse impact was eliminated through the exclusion of issuers involved in controversial weapons.
 - c. PAI 16 (human rights violations): the adverse impact was mitigated through the exclusion of issuers sanctioned by the UN for human rights violations.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is from 01/01/2023 to 29/12/2023

Largest investments	Sector	%Assets	Country
BTPS 0% 08/01/2026	SOVEREIGN	4.14%	ITALY

NOVAKR 1.8750% 27/01/2025	BANKING	1.79%	SLOVENIA

What was the proportion of sustainability-related investments?

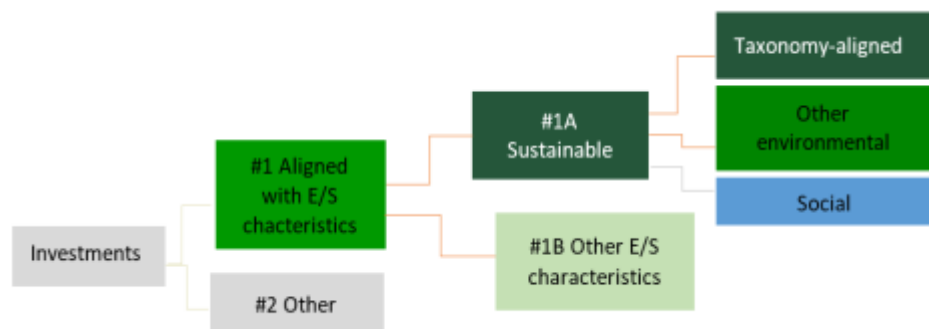

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

corresponding to the best performance.

The strategic asset allocation of the financial product has been defined by its risk-return profile and implemented through the modulation of its investments over time.

82.17% of the financial product net assets has been invested in issuers which promote the environmental and social characteristics, in accordance with the binding elements of the investment strategy, and which have an ESG Combined Score higher than 25. Investments in SFDR art. 8 or 9 financial products are also considered to be aligned with the E/S characteristics promoted by this financial products. While the Financial product did not have sustainable investing as its objective, the Financial product invested 33.61% of its assets in sustainable investments with an environmental and/or social objective, as detailed in the sections above. Regarding the percentage of alignment with the taxonomy, sustainable investments with an environmental objective were aligned with the EU taxonomy for 0.08% of revenue, 0.31% of capital expenditures, 0.38% of operating expenditures (data reported by issuing companies).

13.99% (Not Aligned #2 Other) of the financial product net assets has been invested in money market instruments, different from the ones mentioned in the previous sentence, or a mix of money market instruments and investments in issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25, subject to a maximum limit of 10% of the financial product's net assets for the latter. In this case, those issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25 have still been compliant with the exclusion criteria set out in the "Investment Strategy" section above.

Any investment included in the above referenced remaining component refers to financial products and instruments deemed to be of interest from a strictly financial point of view (liquidity included) and/or which, given their characteristics, help to complete the thematic, sector and geographic profile of the portfolio.

● ***In which economic sectors were the investments made?***

Equity:

n/d

Bond:

Description	Average
Banking	27.77%

Local-Authority	0.00%
Media	0.00%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments with an environmental objective were aligned with the EU taxonomy for 0.08% of revenue, 0.31% of capital expenditures, 0.38% of operating expenditures (data reported by issuing companies).

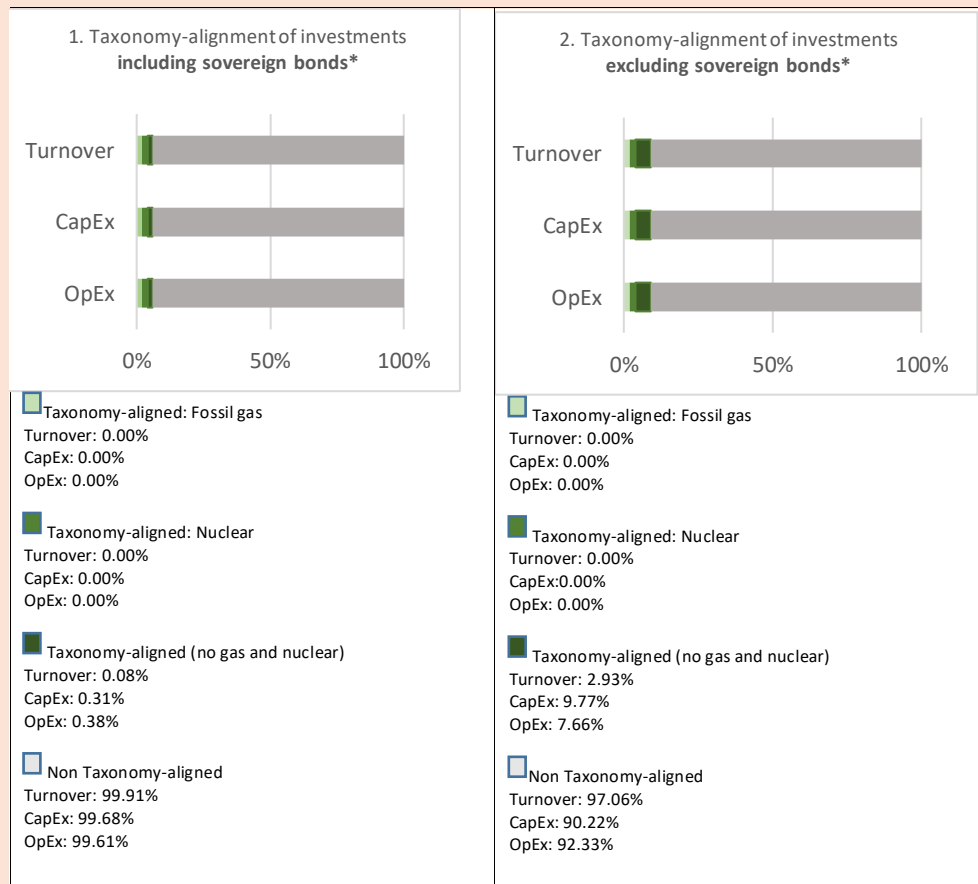

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes
 In fossil gas
 In nuclear energy
 No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities were 0.00% of revenue, 0.00% of capital expenditures, 0.00% of operating expenditures (data reported by issuing companies).

The share of investments made in enabling activities were 1.62% of revenue, 3.67% of capital expenditures, 4.40% of operating expenditures (data reported by issuing companies).

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned to the EU taxonomy were 28.76% of turnover, 28.53% of capital expenditure, 28.46% of operating expenditure (data reported by companies).

Keep in mind that part of such sustainable investments with an environmental objective is also sustainable from a social point of view.

What was the share of socially sustainable investments?

18.64%.

Keep in mind that some of these sustainable investments with a social objective are also sustainable from an environmental point of view.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Please refer to the response to the previous paragraph on asset allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the period, the selection of investments was carried out in compliance with all the limits and allocations of the assets indicated above and compliance with the limits and allocations described in the previous paragraphs was monitored continuously by the various structures of the Management Company.

With regard to the voting activity relating to the product during the period, please refer to the annual report of the product itself, or to the reports of the individual funds present in the portfolio during the period.

With regards to the Management Company's engagement activity, please refer to the engagement policy and the Engagement Policy Report published on the website of the Management Company.

How did this financial product perform compared to the reference benchmark?

No index has been designated as a benchmark to meet the environmental or social characteristics promoted by the financial product.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX 1

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088

Product name: ANIMA Europe Equity

Legal entity identifier: 213800SLVBZTNAY8NL21

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 66.32% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective** _____%

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes both the preservation of the environment and natural resources, and fair work conditions, democracy and human and social rights on the social side, as pursued by government issuers. From a corporate point of view, this financial product promotes also the following environmental and social characteristics:

- the fight against climate change;
- the respect of human rights;
- the protection of human health;
- the protection of human well-being.

The promotion of the above environmental and social characteristics are evaluated by the Manager based on the analysis carried out by specialised third party ESG data providers. Further elements of the financial product's ESG strategy are described in the "Asset Allocation" sections below.

● **How did the sustainability indicators perform?**

The sustainability indicators used by this financial product are:

- the exclusion of corporate issuers involved in the production of thermal coal which accounts for more than 30% of their revenues, for the fight against climate change;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- the exclusion of:
 - corporate issuers involved in the production of controversial weapons, which include anti-personnel land mines, cluster munitions, biological, chemical, blinding weapons, white phosphorus, nuclear armaments and which have mostly been banned by UN treaties;
 - countries sanctioned at the central government level by the UN for systematic violations of human rights;

for the respect of human rights;

- the exclusion of issuers involved in the production of tobacco, for the protection of human health;
- the exclusion of corporate issuers involved in the gambling sector, for the protection of human well-being.

During the period, the selection of investments was made taking into account the exclusions listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***... and compared to previous periods?***

There were no changes in the applied sustainability indicators.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As mentioned above, although the product does not have a sustainable objective, it did invest 66.32% of its AuM in issuers defined as “SFDR” sustainable according to an internal algorithm of the Management Company. This algorithm provides that issuers are considered sustainable if they:

- comply with the exclusion criteria mentioned in the “Investment Strategy” section further below;
- pass the DNSH test, described in the following section;
- pass a Good Governance test, which is set at the level of 25 out 100 for their G score;
- pass a general E and S test, which is set at the level of 25 out 100 for their E and S scores;
- contribute positively to at least one of the following three areas: Climate Transition, Environment or Society. Positive contribution is measured on the basis of issuers' involvement in certain initiatives or on the basis of best-in-class criteria related to specific environmental and/or social factors.

During the period, the selection of investments was made taking into account the criteria listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The assessment that issuers considered to be sustainable do not cause significant harm to other sustainable investment objectives was carried out on the basis of the Do No Significant Harm test (DNSH, developed internally by the Management Company), which, in line with regulatory recommendations, is based on the mandatory Principal Indicators of Adverse Impact (PAI, see the RTS to the SFDR). In particular, investments are considered to cause significant harm when they involve issuers that:

- do not publish data on Carbon Footprint, Carbon Intensity and Board Gender Diversity;
- are involved in the fossil fuels sector or the controversial weapons sector;
- are involved in very severe controversies related to compliance with the UN Global Compact and OECD requirements for multinational companies;

- exceed strict threshold values (specifically identified by the Management Company based on a diversified sample of issuers worldwide) for any of the following PAI indicators: 2*, 3*, 5, 6*, 8, 9, 12 and 13;
- exceed critical thresholds (specifically identified by the Management Company based on a diversified sample of issuers worldwide) for at least 4 of the following PAI indicators: 2*, 3*, 5, 6*, 7, 8, 9, 10, 11, 12 and 13.

Note *: it should be noted that, for the purposes of the DNSH test, absolute GHG emissions levels (PAI 1) are used to calculate PAIs 2 and 3; also, Carbon Footprint and GHG Intensity are calculated taking into account only Scope 1 and 2 emissions. It should also be noted that PAI 6 currently takes into account the sectoral classification provided by the provider Refinitiv as a proxy for the NACE classification required by the regulations.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to the previous paragraph.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The alignment of sustainable investments with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights is pursued through several investment selection and management criteria, explained above and consistent with the aforementioned guidelines. In particular:

- exclusions relating to controversial weapons, which apply to all investments;
- exclusions based on the DNSH principle, applied through the definition of threshold levels on PAI indicators;
- inclusions based on the identification of positive contributions to climate, social or environmental objectives;
- exclusions of environmental or social ratings that fall into the worst quartile of the rankings based on the data provided by specialized third party providers;
- application to equity investments of the voting rights policy, based on the third party provider (ISS) model, which takes into account specific ESG factors and refers to guidelines consistent with sustainable business practices on the environment, fair treatment of labour, non-discriminatory policies and protection of human rights, framed in initiatives such as those of the United Nations Environment Programme Finance Initiative (UNEP FI), United Nations Principles for Responsible Investment (UNPRI), United Nations Global Compact, Global Reporting Initiative (GRI), Carbon Principles, International Labour Organisation Conventions (ILO), CERES Principles, Global Sullivan Principles, MacBride Principles and the European Union Directives on social and environmental issues.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considered the principal adverse impacts on sustainability factors as follows. In general, the consideration of PAIs is based on the contribution of certain mitigating factors, such as:

1. value exclusions,
2. exclusions/limitations resulting from investing in sustainable issuers according to the SFDR,
3. the setting up of objectives for specific adverse impact indicators, chosen among those belonging to the Mandatory list in the RTS to the SFDR.

In particular:

1. from a value perspective, issuers involved in controversial weapons (connection to PAI 14), nuclear weapons, tobacco, gambling and thermal coal mining (connection to PAI 4) were excluded;
2. the share of the financial product's AuM invested in sustainable issuers ensured that these issuers, by construction, passed the Good Governance and general E and S tests (detailed in the "sustainable investment" sections above) and the DNSH test (which takes into consideration all the 14 mandatory PAI, detailed in the "sustainable investment" sections above) while contributing positively to climate, environmental and social topics;
3. objectives for specific mandatory adverse impact indicators:
 - a. PAI 4 (fossil fuels exposure): the adverse impact was mitigated through the limitation of the exposure to the fossil fuels sector, due to the exclusion of issuers with more than 30% of revenues from thermal coal mining.
 - b. PAI 14 (controversial weapons): the adverse impact was eliminated through the exclusion of issuers involved in controversial weapons.
 - c. PAI 16 (human rights violations): the adverse impact was mitigated through the exclusion of issuers sanctioned by the UN for human rights violations.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is from 01/01/2023 to 29/12/2023

Largest investments	Sector	%Assets	Country
NOVO NORDISK-B	PHARMACEUTICALS	2.69%	DENMARK
NESTLE SA-REG	PACKAGED FOODS & MEATS	2.46%	SWISS
LVMH MOET HENNE	APPAREL, ACCESSORIES & LUXURY GOODS	2.37%	FRANCE
ASML HOLDING NV	SEMICONDUCTOR MATERIALS & EQUIPMENT	2.30%	NETHERLANDS
ASTRAZENECA PLC	PHARMACEUTICALS	2.00%	UNITED KINGDOM
SHELL PLC	INTEGRATED OIL & GAS	2.00%	UNITED KINGDOM
NOVARTIS AG-REG	PHARMACEUTICALS	1.82%	SWISS
ROCHE HLDG-GENUS	PHARMACEUTICALS	1.65%	SWISS
BP PLC	INTEGRATED OIL & GAS	1.60%	UNITED KINGDOM

ENEL SPA	ELECTRIC UTILITIES	1.31%	ITALY
DEUTSCHE TELEKOM	INTEGRATED TELECOMMUNICATION SERVICES	1.16%	GERMANY

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The strategic asset allocation of the financial product has been defined by its risk-return profile and implemented through the modulation of its investments over time.

95.15% of the financial product net assets has been invested in issuers which promote the environmental and social characteristics, in accordance with the binding elements of the investment strategy, and which have an ESG Combined Score higher than 25. Investments in SFDR art. 8 or 9 financial products are also considered to be aligned with the E/S characteristics promoted by this financial products. While the Financial product did not have sustainable investing as its objective, the Financial product invested 66.32% of its assets in sustainable investments with an environmental and/or social objective, as detailed in the sections above. Regarding the percentage of alignment with the taxonomy, sustainable investments with an environmental objective were aligned with the EU taxonomy for 1.24% of revenue, 2.55% of capital expenditures, 2.21% of operating expenditures (data reported by issuing companies).

0.84% (Not Aligned #2 Other) of the financial product net assets has been invested in money market instruments, different from the ones mentioned in the previous sentence, or a mix of money market instruments and investments in issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25, subject to a maximum limit of 10% of the financial product's net assets for the latter. In this case, those issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25 have still been compliant with the exclusion criteria set out in the "Investment Strategy" section above.

Any investment included in the above referenced remaining component refers to financial products and instruments deemed to be of interest from a strictly financial point of view (liquidity included) and/or which, given their characteristics, help to complete the thematic, sector and geographic profile of the portfolio.

● ***In which economic sectors were the investments made?***

Equity:

Description	Average
Health Care	17.84%

Real Estate	0.01%

Bond:

n/d

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments with an environmental objective were aligned with the EU taxonomy for 1.24% of revenue, 2.55% of capital expenditures, 2.21% of operating expenditures (data reported by issuing companies).

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

 In fossil gas

 In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

are sustainable investments with an environmental objective that do not take into account the criteria for

- **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities were 0.30% of revenue, 0.32% of capital expenditures, 0.16% of operating expenditures (data reported by issuing companies).

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The share of investments made in enabling activities were 1.38% of revenue, 1.88% of capital expenditures, 2.02% of operating expenditures (data reported by issuing companies).

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned to the EU taxonomy were 63.80% of turnover, 62.49% of capital expenditure, 62.84% of operating expenditure (data reported by companies).

Keep in mind that part of such sustainable investments with an environmental objective is also sustainable from a social point of view.

What was the share of socially sustainable investments?

37.12%.

Keep in mind that some of these sustainable investments with a social objective are also sustainable from an environmental point of view.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Please refer to the response to the previous paragraph on asset allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the period, the selection of investments was carried out in compliance with all the limits and allocations of the assets indicated above and compliance with the limits and allocations described in the previous paragraphs was monitored continuously by the various structures of the Management Company.

With regard to the voting activity relating to the product during the period, please refer to the annual report of the product itself, or to the reports of the individual funds present in the portfolio during the period.

With regards to the Management Company's engagement activity, please refer to the engagement policy and the Engagement Policy Report published on the website of the Management Company.

How did this financial product perform compared to the reference benchmark?

No index has been designated as a benchmark to meet the environmental or social characteristics promoted by the financial product.

- **How does the reference benchmark differ from a broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

ANNEX 1

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088

Product name: ANIMA U.S. Equity

Legal entity identifier: 213800GBQ60L1IZIWQ12

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 64.09% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective** _____%

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes both the preservation of the environment and natural resources, and fair work conditions, democracy and human and social rights on the social side, as pursued by government issuers. From a corporate point of view, this financial product promotes also the following environmental and social characteristics:

- the fight against climate change;
- the respect of human rights;
- the protection of human health;
- the protection of human well-being.

The promotion of the above environmental and social characteristics are evaluated by the Manager based on the analysis carried out by specialised third party ESG data providers. Further elements of the financial product's ESG strategy are described in the "Asset Allocation" sections below.

● How did the sustainability indicators perform?

The sustainability indicators used by this financial product are:

- the exclusion of corporate issuers involved in the production of thermal coal which accounts for more than 30% of their revenues, for the fight against climate change;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- the exclusion of:
 - corporate issuers involved in the production of controversial weapons, which include anti-personnel land mines, cluster munitions, biological, chemical, blinding weapons, white phosphorus, nuclear armaments and which have mostly been banned by UN treaties;
 - countries sanctioned at the central government level by the UN for systematic violations of human rights;

for the respect of human rights;

- the exclusion of issuers involved in the production of tobacco, for the protection of human health;
- the exclusion of corporate issuers involved in the gambling sector, for the protection of human well-being.

During the period, the selection of investments was made taking into account the exclusions listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***... and compared to previous periods?***

There were no changes in the applied sustainability indicators.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As mentioned above, although the product does not have a sustainable objective, it did invest 64.09% of its AuM in issuers defined as “SFDR” sustainable according to an internal algorithm of the Management Company. This algorithm provides that issuers are considered sustainable if they:

- comply with the exclusion criteria mentioned in the “Investment Strategy” section further below;
- pass the DNSH test, described in the following section;
- pass a Good Governance test, which is set at the level of 25 out 100 for their G score;
- pass a general E and S test, which is set at the level of 25 out 100 for their E and S scores;
- contribute positively to at least one of the following three areas: Climate Transition, Environment or Society. Positive contribution is measured on the basis of issuers' involvement in certain initiatives or on the basis of best-in-class criteria related to specific environmental and/or social factors.

During the period, the selection of investments was made taking into account the criteria listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The assessment that issuers considered to be sustainable do not cause significant harm to other sustainable investment objectives was carried out on the basis of the Do No Significant Harm test (DNSH, developed internally by the Management Company), which, in line with regulatory recommendations, is based on the mandatory Principal Indicators of Adverse Impact (PAI, see the RTS to the SFDR). In particular, investments are considered to cause significant harm when they involve issuers that:

- do not publish data on Carbon Footprint, Carbon Intensity and Board Gender Diversity;
- are involved in the fossil fuels sector or the controversial weapons sector;
- are involved in very severe controversies related to compliance with the UN Global Compact and OECD requirements for multinational companies;

- exceed strict threshold values (specifically identified by the Management Company based on a diversified sample of issuers worldwide) for any of the following PAI indicators: 2*, 3*, 5, 6*, 8, 9, 12 and 13;
- exceed critical thresholds (specifically identified by the Management Company based on a diversified sample of issuers worldwide) for at least 4 of the following PAI indicators: 2*, 3*, 5, 6*, 7, 8, 9, 10, 11, 12 and 13.

Note *: it should be noted that, for the purposes of the DNSH test, absolute GHG emissions levels (PAI 1) are used to calculate PAIs 2 and 3; also, Carbon Footprint and GHG Intensity are calculated taking into account only Scope 1 and 2 emissions. It should also be noted that PAI 6 currently takes into account the sectoral classification provided by the provider Refinitiv as a proxy for the NACE classification required by the regulations.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to the previous paragraph.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The alignment of sustainable investments with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights is pursued through several investment selection and management criteria, explained above and consistent with the aforementioned guidelines. In particular:

- exclusions relating to controversial weapons, which apply to all investments;
- exclusions based on the DNSH principle, applied through the definition of threshold levels on PAI indicators;
- inclusions based on the identification of positive contributions to climate, social or environmental objectives;
- exclusions of environmental or social ratings that fall into the worst quartile of the rankings based on the data provided by specialized third party providers;
- application to equity investments of the voting rights policy, based on the third party provider (ISS) model, which takes into account specific ESG factors and refers to guidelines consistent with sustainable business practices on the environment, fair treatment of labour, non-discriminatory policies and protection of human rights, framed in initiatives such as those of the United Nations Environment Programme Finance Initiative (UNEP FI), United Nations Principles for Responsible Investment (UNPRI), United Nations Global Compact, Global Reporting Initiative (GRI), Carbon Principles, International Labour Organisation Conventions (ILO), CERES Principles, Global Sullivan Principles, MacBride Principles and the European Union Directives on social and environmental issues.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considered the principal adverse impacts on sustainability factors as follows. In general, the consideration of PAIs is based on the contribution of certain mitigating factors, such as:

1. value exclusions,
2. exclusions/limitations resulting from investing in sustainable issuers according to the SFDR,
3. the setting up of objectives for specific adverse impact indicators, chosen among those belonging to the Mandatory list in the RTS to the SFDR.

In particular:

1. from a value perspective, issuers involved in controversial weapons (connection to PAI 14), nuclear weapons, tobacco, gambling and thermal coal mining (connection to PAI 4) were excluded;
2. the share of the financial product's AuM invested in sustainable issuers ensured that these issuers, by construction, passed the Good Governance and general E and S tests (detailed in the "sustainable investment" sections above) and the DNSH test (which takes into consideration all the 14 mandatory PAI, detailed in the "sustainable investment" sections above) while contributing positively to climate, environmental and social topics;
3. objectives for specific mandatory adverse impact indicators:
 - a. PAI 4 (fossil fuels exposure): the adverse impact was mitigated through the limitation of the exposure to the fossil fuels sector, due to the exclusion of issuers with more than 30% of revenues from thermal coal mining.
 - b. PAI 14 (controversial weapons): the adverse impact was eliminated through the exclusion of issuers involved in controversial weapons.
 - c. PAI 16 (human rights violations): the adverse impact was mitigated through the exclusion of issuers sanctioned by the UN for human rights violations.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is from 01/01/2023 to 29/12/2023

Largest investments	Sector	%Assets	Country
APPLE INC	TECHNOLOGY HARDWARE, STORAGE & PERIPHERALS	8.72%	UNITED STATES
MICROSOFT CORP	SYSTEMS SOFTWARE	6.12%	UNITED STATES
NVIDIA CORP	SEMICONDUCTORS	3.45%	UNITED STATES
BERKSHIRE HATH-B	MULTI-SECTOR HOLDINGS	3.42%	UNITED STATES
AMAZON.COM INC	BROADLINE RETAIL	3.17%	UNITED STATES
BANK OF AMERICA	DIVERSIFIED BANKS	2.27%	UNITED STATES
ELI LILLY & CO	PHARMACEUTICALS	1.89%	UNITED STATES
ALPHABET INC-A	INTERACTIVE MEDIA & SERVICES	1.87%	UNITED STATES
META PLATFORMS-A	INTERACTIVE MEDIA & SERVICES	1.76%	UNITED STATES
ALPHABET INC-C	INTERACTIVE MEDIA & SERVICES	1.65%	UNITED STATES
UNITEDHEALTH GRP	MANAGED HEALTH CARE	1.61%	UNITED STATES
TESLA INC	AUTOMOBILE MANUFACTURERS	1.60%	UNITED STATES
AMERICAN EXPRESS	CONSUMER FINANCE	1.56%	UNITED STATES
CHEVRON CORP	INTEGRATED OIL & GAS	1.34%	UNITED STATES
ADOBE INC	APPLICATION SOFTWARE	1.26%	UNITED STATES

What was the proportion of sustainability-related investments?

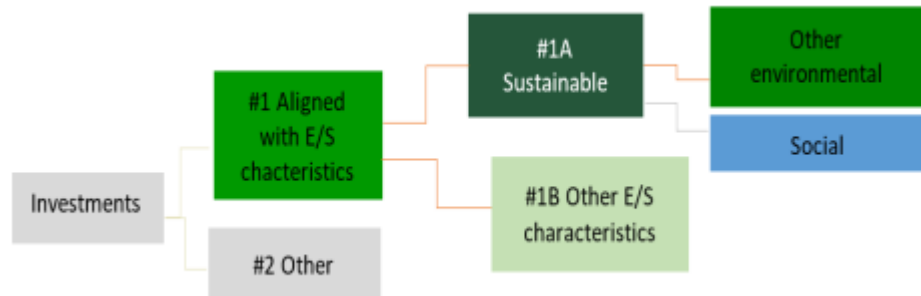

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The strategic asset allocation of the financial product has been defined by its risk-return profile and implemented through the modulation of its investments over time.

96.30% of the financial product net assets has been invested in issuers which promote the environmental and social characteristics, in accordance with the binding elements of the

investment strategy, and which have an ESG Combined Score higher than 25. Investments in SFDR art. 8 or 9 financial products are also considered to be aligned with the E/S characteristics promoted by this financial products. While the Financial product did not have sustainable investing as its objective, the Financial product invested 64.09% of its assets in sustainable investments with an environmental and/or social objective, as detailed in the sections above. Regarding the percentage of alignment with the taxonomy, sustainable investments with an environmental objective were aligned with the EU taxonomy for 0.00% of revenue, 0.00% of capital expenditures, 0.00% of operating expenditures (data reported by issuing companies).

3.11% (Not Aligned #2 Other) of the financial product net assets has been invested in money market instruments, different from the ones mentioned in the previous sentence, or a mix of money market instruments and investments in issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25, subject to a maximum limit of 10% of the financial product's net assets for the latter. In this case, those issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25 have still been compliant with the exclusion criteria set out in the "Investment Strategy" section above.

Any investment included in the above referenced remaining component refers to financial products and instruments deemed to be of interest from a strictly financial point of view (liquidity included) and/or which, given their characteristics, help to complete the thematic, sector and geographic profile of the portfolio.

● **In which economic sectors were the investments made?**

Equity:

Description	Average
Information Technology	31.05%
Health Care	13.48%
Financials	12.44%
Consumer Discretionary	11.31%
Communication Services	7.89%
Consumer Staples	7.11%

Energy	5.39%
Materials	2.42%
Utilities	1.51%
Real Estate	0.54%

Bond:

n/d

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments with an environmental objective were aligned with the EU taxonomy for 0.00% of revenue, 0.00% of capital expenditures, 0.00% of operating expenditures (data reported by issuing companies).

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- Yes
 No
 In fossil gas
 In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities were 0.00% of revenue, 0.00% of capital expenditures, 0.00% of operating expenditures (data reported by issuing companies).

The share of investments made in enabling activities were 0.00% of revenue, 0.00% of capital expenditures, 0.00% of operating expenditures (data reported by issuing companies).

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned to the EU taxonomy were 55.65% of turnover, 55.65% of capital expenditure, 55.65% of operating expenditure (data reported by companies).

Keep in mind that part of such sustainable investments with an environmental objective is also sustainable from a social point of view.

What was the share of socially sustainable investments?

37.15%.

Keep in mind that some of these sustainable investments with a social objective are also sustainable from an environmental point of view.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Please refer to the response to the previous paragraph on asset allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the period, the selection of investments was carried out in compliance with all the limits and allocations of the assets indicated above and compliance with the limits and allocations described in the previous paragraphs was monitored continuously by the various structures of the Management Company.

With regard to the voting activity relating to the product during the period, please refer to the annual report of the product itself, or to the reports of the individual funds present in the portfolio during the period.

With regards to the Management Company's engagement activity, please refer to the engagement policy and the Engagement Policy Report published on the website of the Management Company.

How did this financial product perform compared to the reference benchmark?

No index has been designated as a benchmark to meet the environmental or social characteristics promoted by the financial product.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

ANNEX 1

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088

Product name: ANIMA Asia/Pacific Equity

Legal entity identifier: 213800GTH3GM45WFT162

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective _____%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 40.65% of sustainable investments
<input type="checkbox"/> _____% in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> _____% with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> _____% in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> _____% with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective _____%	<input checked="" type="checkbox"/> _____% with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective _____%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes both the preservation of the environment and natural resources, and fair work conditions, democracy and human and social rights on the social side, as pursued by government issuers. From a corporate point of view, this financial product promotes also the following environmental and social characteristics:

- the fight against climate change;
- the respect of human rights;
- the protection of human health;
- the protection of human well-being.

The promotion of the above environmental and social characteristics are evaluated by the Manager based on the analysis carried out by specialised third party ESG data providers. Further elements of the financial product’s ESG strategy are described in the “Asset Allocation” sections below.

● **How did the sustainability indicators perform?**

The sustainability indicators used by this financial product are:

- the exclusion of corporate issuers involved in the production of thermal coal which accounts for more than 30% of their revenues, for the fight against climate change;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- the exclusion of:
 - corporate issuers involved in the production of controversial weapons, which include anti-personnel land mines, cluster munitions, biological, chemical, blinding weapons, white phosphorus, nuclear armaments and which have mostly been banned by UN treaties;
 - countries sanctioned at the central government level by the UN for systematic violations of human rights;

for the respect of human rights;

- the exclusion of issuers involved in the production of tobacco, for the protection of human health;
- the exclusion of corporate issuers involved in the gambling sector, for the protection of human well-being.

During the period, the selection of investments was made taking into account the exclusions listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***... and compared to previous periods?***

There were no changes in the applied sustainability indicators.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As mentioned above, although the product does not have a sustainable objective, it did invest 40.65% of its AuM in issuers defined as “SFDR” sustainable according to an internal algorithm of the Management Company. This algorithm provides that issuers are considered sustainable if they:

- comply with the exclusion criteria mentioned in the “Investment Strategy” section further below;
- pass the DNSH test, described in the following section;
- pass a Good Governance test, which is set at the level of 25 out 100 for their G score;
- pass a general E and S test, which is set at the level of 25 out 100 for their E and S scores;
- contribute positively to at least one of the following three areas: Climate Transition, Environment or Society. Positive contribution is measured on the basis of issuers' involvement in certain initiatives or on the basis of best-in-class criteria related to specific environmental and/or social factors.

During the period, the selection of investments was made taking into account the criteria listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The assessment that issuers considered to be sustainable do not cause significant harm to other sustainable investment objectives was carried out on the basis of the Do No Significant Harm test (DNSH, developed internally by the Management Company), which, in line with regulatory recommendations, is based on the mandatory Principal Indicators of Adverse Impact (PAI, see the RTS to the SFDR). In particular, investments are considered to cause significant harm when they involve issuers that:

- do not publish data on Carbon Footprint, Carbon Intensity and Board Gender Diversity;
- are involved in the fossil fuels sector or the controversial weapons sector;
- are involved in very severe controversies related to compliance with the UN Global Compact and OECD requirements for multinational companies;

- exceed strict threshold values (specifically identified by the Management Company based on a diversified sample of issuers worldwide) for any of the following PAI indicators: 2*, 3*, 5, 6*, 8, 9, 12 and 13;
- exceed critical thresholds (specifically identified by the Management Company based on a diversified sample of issuers worldwide) for at least 4 of the following PAI indicators: 2*, 3*, 5, 6*, 7, 8, 9, 10, 11, 12 and 13.

Note *: it should be noted that, for the purposes of the DNSH test, absolute GHG emissions levels (PAI 1) are used to calculate PAIs 2 and 3; also, Carbon Footprint and GHG Intensity are calculated taking into account only Scope 1 and 2 emissions. It should also be noted that PAI 6 currently takes into account the sectoral classification provided by the provider Refinitiv as a proxy for the NACE classification required by the regulations.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to the previous paragraph.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The alignment of sustainable investments with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights is pursued through several investment selection and management criteria, explained above and consistent with the aforementioned guidelines. In particular:

- exclusions relating to controversial weapons, which apply to all investments;
- exclusions based on the DNSH principle, applied through the definition of threshold levels on PAI indicators;
- inclusions based on the identification of positive contributions to climate, social or environmental objectives;
- exclusions of environmental or social ratings that fall into the worst quartile of the rankings based on the data provided by specialized third party providers;
- application to equity investments of the voting rights policy, based on the third party provider (ISS) model, which takes into account specific ESG factors and refers to guidelines consistent with sustainable business practices on the environment, fair treatment of labour, non-discriminatory policies and protection of human rights, framed in initiatives such as those of the United Nations Environment Programme Finance Initiative (UNEP FI), United Nations Principles for Responsible Investment (UNPRI), United Nations Global Compact, Global Reporting Initiative (GRI), Carbon Principles, International Labour Organisation Conventions (ILO), CERES Principles, Global Sullivan Principles, MacBride Principles and the European Union Directives on social and environmental issues.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considered the principal adverse impacts on sustainability factors as follows. In general, the consideration of PAIs is based on the contribution of certain mitigating factors, such as:

1. value exclusions,
2. exclusions/limitations resulting from investing in sustainable issuers according to the SFDR,
3. the setting up of objectives for specific adverse impact indicators, chosen among those belonging to the Mandatory list in the RTS to the SFDR.

In particular:

1. from a value perspective, issuers involved in controversial weapons (connection to PAI 14), nuclear weapons, tobacco, gambling and thermal coal mining (connection to PAI 4) were excluded;
2. the share of the financial product's AuM invested in sustainable issuers ensured that these issuers, by construction, passed the Good Governance and general E and S tests (detailed in the "sustainable investment" sections above) and the DNSH test (which takes into consideration all the 14 mandatory PAI, detailed in the "sustainable investment" sections above) while contributing positively to climate, environmental and social topics;
3. objectives for specific mandatory adverse impact indicators:
 - a. PAI 4 (fossil fuels exposure): the adverse impact was mitigated through the limitation of the exposure to the fossil fuels sector, due to the exclusion of issuers with more than 30% of revenues from thermal coal mining.
 - b. PAI 14 (controversial weapons): the adverse impact was eliminated through the exclusion of issuers involved in controversial weapons.
 - c. PAI 16 (human rights violations): the adverse impact was mitigated through the exclusion of issuers sanctioned by the UN for human rights violations.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is from 01/01/2023 to 29/12/2023

Largest investments	Sector	%Assets	Country
ISH CORE MSCI JP	000	5.78%	ITALY

TOKYO ELECTRON	SEMICONDUCTOR MATERIALS & EQUIPMENT	1.29%	JAPAN
HITACHI LTD	INDUSTRIAL CONGLOMERATES	1.23%	JAPAN

What was the proportion of sustainability-related investments?

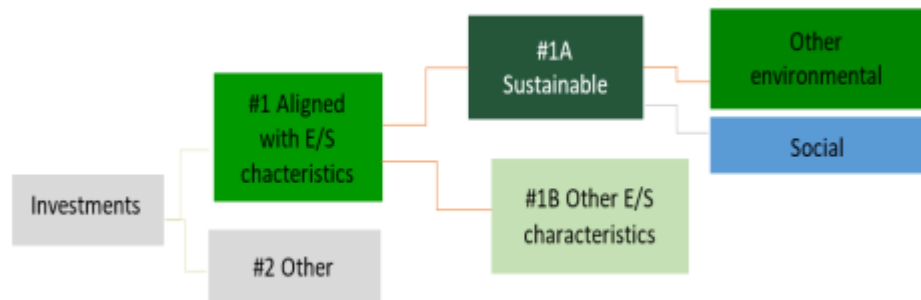

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The strategic asset allocation of the financial product has been defined by its risk-return profile and implemented through the modulation of its investments over time.

92.73% of the financial product net assets has been invested in issuers which promote the environmental and social characteristics, in accordance with the binding elements of the investment strategy, and which have an ESG Combined Score higher than 25. Investments in SFDR art. 8 or 9 financial products are also considered to be aligned with the E/S characteristics promoted by this financial products. While the Financial product did not have sustainable investing as its objective, the Financial product invested 40.65% of its assets in sustainable investments with an environmental and/or social objective, as detailed in the sections above. Regarding the percentage of alignment with the taxonomy, sustainable investments with an environmental objective were aligned with the EU taxonomy for 0.00% of revenue, 0.00% of capital expenditures, 0.00% of operating expenditures (data reported by issuing companies).

0.77% (Not Aligned #2 Other) of the financial product net assets has been invested in money market instruments, different from the ones mentioned in the previous sentence, or a mix of money market instruments and investments in issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25, subject to a maximum limit of 10% of the financial product's net assets for the latter. In this case, those issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25 have still been compliant with the exclusion criteria set out in the "Investment Strategy" section above.

Any investment included in the above referenced remaining component refers to financial products and instruments deemed to be of interest from a strictly financial point of view (liquidity included) and/or which, given their characteristics, help to complete the thematic, sector and geographic profile of the portfolio.

● ***In which economic sectors were the investments made?***

Equity:

Description	Average
Financials	21.53%
Industrials	14.42%
Consumer Discretionary	13.38%
Information Technology	8.84%
Health Care	7.88%
Materials	7.63%
Multisector	5.99%
Communication Services	5.82%
Consumer Staples	4.75%
Energy	2.11%
Real Estate	2.07%
Utilities	0.74%

Bond:

Description	Average
Sovereign	1.80%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments with an environmental objective were aligned with the EU taxonomy for 0.00% of revenue, 0.00% of capital expenditures, 0.00% of operating expenditures (data reported by issuing companies).

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes
 In fossil gas
 In nuclear energy
 No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities were 0.00% of revenue, 0.00% of capital expenditures, 0.00% of operating expenditures (data reported by issuing companies).

The share of investments made in enabling activities were 0.00% of revenue, 0.00% of capital expenditures, 0.00% of operating expenditures (data reported by issuing companies).

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned to the EU taxonomy were 37.72% of turnover, 37.72% of capital expenditure, 37.72% of operating expenditure (data reported by companies).

Keep in mind that part of such sustainable investments with an environmental objective is also sustainable from a social point of view.

What was the share of socially sustainable investments?

21.35%.

Keep in mind that some of these sustainable investments with a social objective are also sustainable from an environmental point of view.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Please refer to the response to the previous paragraph on asset allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the period, the selection of investments was carried out in compliance with all the limits and allocations of the assets indicated above and compliance with the limits and allocations described in the previous paragraphs was monitored continuously by the various structures of the Management Company.

With regard to the voting activity relating to the product during the period, please refer to the annual report of the product itself, or to the reports of the individual funds present in the portfolio during the period.

With regards to the Management Company's engagement activity, please refer to the engagement policy and the Engagement Policy Report published on the website of the Management Company.

How did this financial product perform compared to the reference benchmark?

No index has been designated as a benchmark to meet the environmental or social characteristics promoted by the financial product.

- **How does the reference benchmark differ from a broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

ANNEX 1

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088

Product name: ANIMA Global Equity Value

Legal entity identifier: 21380077NJPWJCMRZ997

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes No

It made **sustainable investments with an environmental objective** ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 55.29% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective** ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes both the preservation of the environment and natural resources, and fair work conditions, democracy and human and social rights on the social side, as pursued by government issuers. From a corporate point of view, this financial product promotes also the following environmental and social characteristics:

- the fight against climate change;
- the respect of human rights;
- the protection of human health;
- the protection of human well-being.

The promotion of the above environmental and social characteristics are evaluated by the Manager based on the analysis carried out by specialised third party ESG data providers. Further elements of the financial product’s ESG strategy are described in the “Asset Allocation” sections below.

● **How did the sustainability indicators perform?**

The sustainability indicators used by this financial product are:

- the exclusion of corporate issuers involved in the production of thermal coal which accounts for more than 30% of their revenues, for the fight against climate change;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- the exclusion of:
 - corporate issuers involved in the production of controversial weapons, which include anti-personnel land mines, cluster munitions, biological, chemical, blinding weapons, white phosphorus, nuclear armaments and which have mostly been banned by UN treaties;
 - countries sanctioned at the central government level by the UN for systematic violations of human rights;

for the respect of human rights;

- the exclusion of issuers involved in the production of tobacco, for the protection of human health;
- the exclusion of corporate issuers involved in the gambling sector, for the protection of human well-being.

During the period, the selection of investments was made taking into account the exclusions listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***... and compared to previous periods?***

There were no changes in the applied sustainability indicators.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As mentioned above, although the product does not have a sustainable objective, it did invest 55.29% of its AuM in issuers defined as “SFDR” sustainable according to an internal algorithm of the Management Company. This algorithm provides that issuers are considered sustainable if they:

- comply with the exclusion criteria mentioned in the “Investment Strategy” section further below;
- pass the DNSH test, described in the following section;
- pass a Good Governance test, which is set at the level of 25 out 100 for their G score;
- pass a general E and S test, which is set at the level of 25 out 100 for their E and S scores;
- contribute positively to at least one of the following three areas: Climate Transition, Environment or Society. Positive contribution is measured on the basis of issuers' involvement in certain initiatives or on the basis of best-in-class criteria related to specific environmental and/or social factors.

During the period, the selection of investments was made taking into account the criteria listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The assessment that issuers considered to be sustainable do not cause significant harm to other sustainable investment objectives was carried out on the basis of the Do No Significant Harm test (DNSH, developed internally by the Management Company), which, in line with regulatory recommendations, is based on the mandatory Principal Indicators of Adverse Impact (PAI, see the RTS to the SFDR). In particular, investments are considered to cause significant harm when they involve issuers that:

- do not publish data on Carbon Footprint, Carbon Intensity and Board Gender Diversity;
- are involved in the fossil fuels sector or the controversial weapons sector;
- are involved in very severe controversies related to compliance with the UN Global Compact and OECD requirements for multinational companies;

- exceed strict threshold values (specifically identified by the Management Company based on a diversified sample of issuers worldwide) for any of the following PAI indicators: 2*, 3*, 5, 6*, 8, 9, 12 and 13;
- exceed critical thresholds (specifically identified by the Management Company based on a diversified sample of issuers worldwide) for at least 4 of the following PAI indicators: 2*, 3*, 5, 6*, 7, 8, 9, 10, 11, 12 and 13.

Note *: it should be noted that, for the purposes of the DNSH test, absolute GHG emissions levels (PAI 1) are used to calculate PAIs 2 and 3; also, Carbon Footprint and GHG Intensity are calculated taking into account only Scope 1 and 2 emissions. It should also be noted that PAI 6 currently takes into account the sectoral classification provided by the provider Refinitiv as a proxy for the NACE classification required by the regulations.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to the previous paragraph.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The alignment of sustainable investments with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights is pursued through several investment selection and management criteria, explained above and consistent with the aforementioned guidelines. In particular:

- exclusions relating to controversial weapons, which apply to all investments;
- exclusions based on the DNSH principle, applied through the definition of threshold levels on PAI indicators;
- inclusions based on the identification of positive contributions to climate, social or environmental objectives;
- exclusions of environmental or social ratings that fall into the worst quartile of the rankings based on the data provided by specialized third party providers;
- application to equity investments of the voting rights policy, based on the third party provider (ISS) model, which takes into account specific ESG factors and refers to guidelines consistent with sustainable business practices on the environment, fair treatment of labour, non-discriminatory policies and protection of human rights, framed in initiatives such as those of the United Nations Environment Programme Finance Initiative (UNEP FI), United Nations Principles for Responsible Investment (UNPRI), United Nations Global Compact, Global Reporting Initiative (GRI), Carbon Principles, International Labour Organisation Conventions (ILO), CERES Principles, Global Sullivan Principles, MacBride Principles and the European Union Directives on social and environmental issues.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considered the principal adverse impacts on sustainability factors as follows. In general, the consideration of PAIs is based on the contribution of certain mitigating factors, such as:

1. value exclusions,
2. exclusions/limitations resulting from investing in sustainable issuers according to the SFDR,
3. the setting up of objectives for specific adverse impact indicators, chosen among those belonging to the Mandatory list in the RTS to the SFDR.

In particular:

1. from a value perspective, issuers involved in controversial weapons (connection to PAI 14), nuclear weapons, tobacco, gambling and thermal coal mining (connection to PAI 4) were excluded;
2. the share of the financial product's AuM invested in sustainable issuers ensured that these issuers, by construction, passed the Good Governance and general E and S tests (detailed in the "sustainable investment" sections above) and the DNSH test (which takes into consideration all the 14 mandatory PAI, detailed in the "sustainable investment" sections above) while contributing positively to climate, environmental and social topics;
3. objectives for specific mandatory adverse impact indicators:
 - a. PAI 4 (fossil fuels exposure): the adverse impact was mitigated through the limitation of the exposure to the fossil fuels sector, due to the exclusion of issuers with more than 30% of revenues from thermal coal mining.
 - b. PAI 14 (controversial weapons): the adverse impact was eliminated through the exclusion of issuers involved in controversial weapons.
 - c. PAI 16 (human rights violations): the adverse impact was mitigated through the exclusion of issuers sanctioned by the UN for human rights violations.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is from 01/01/2023 to 29/12/2023

Largest investments	Sector	%Assets	Country
MICROSOFT CORP	SYSTEMS SOFTWARE	2.17%	UNITED STATES
INTEL CORP	SEMICONDUCTORS	1.78%	UNITED STATES

BTF 0% 03/20/2024	SOVEREIGN	0.84%	FRANCE
SHELL PLC	INTEGRATED OIL & GAS	0.81%	UNITED KINGDOM
BP PLC	INTEGRATED OIL & GAS	0.77%	UNITED KINGDOM
BROADCOM INC	SEMICONDUCTORS	0.77%	UNITED STATES
AT&T INC	INTEGRATED TELECOMMUNICATION SERVICES	0.75%	UNITED STATES

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The strategic asset allocation of the financial product has been defined by its risk-return profile and implemented through the modulation of its investments over time.

92.23% of the financial product net assets has been invested in issuers which promote the environmental and social characteristics, in accordance with the binding elements of the investment strategy, and which have an ESG Combined Score higher than 25. Investments in SFDR art. 8 or 9 financial products are also considered to be aligned with the E/S characteristics promoted by this financial products. While the Financial product did not have sustainable investing as its objective, the Financial product invested 55.29% of its assets in sustainable investments with an environmental and/or social objective, as detailed in the sections above. Regarding the percentage of alignment with the taxonomy, sustainable investments with an environmental objective were aligned with the EU taxonomy for 0.14% of revenue, 0.25% of capital expenditures, 0.21% of operating expenditures (data reported by issuing companies).

1.69% (Not Aligned #2 Other) of the financial product net assets has been invested in money market instruments, different from the ones mentioned in the previous sentence, or a mix of money market instruments and investments in issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25, subject to a maximum limit of 10% of the financial product's net assets for the latter. In this case, those issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25 have still been compliant with the exclusion criteria set out in the "Investment Strategy" section above.

Any investment included in the above referenced remaining component refers to financial products and instruments deemed to be of interest from a strictly financial point of view (liquidity included) and/or which, given their characteristics, help to complete the thematic, sector and geographic profile of the portfolio.

● ***In which economic sectors were the investments made?***

Equity:

Description	Average
Information Technology	17.71%
Health Care	15.60%
Financials	11.98%
Consumer Discretionary	9.66%
Consumer Staples	8.88%
Communication Services	8.35%
Industrials	6.73%
Energy	5.80%
Materials	4.29%
Utilities	2.45%
Real Estate	0.99%

Bond:

Description	Average
Sovereign	3.11%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments with an environmental objective were aligned with the EU taxonomy for 0.14% of revenue, 0.25% of capital expenditures, 0.21% of operating expenditures (data reported by issuing companies).

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes **In fossil gas** **In nuclear energy**
 No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

are sustainable investments with an environmental objective that do not take into account the criteria for

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities were 0.12% of revenue, 0.09% of capital expenditures, 0.05% of operating expenditures (data reported by issuing companies).

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The share of investments made in enabling activities were 0.36% of revenue, 0.43% of capital expenditures, 0.46% of operating expenditures (data reported by issuing companies).

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned to the EU taxonomy were 51.33% of turnover, 51.22% of capital expenditure, 51.26% of operating expenditure (data reported by companies).

Keep in mind that part of such sustainable investments with an environmental objective is also sustainable from a social point of view.

What was the share of socially sustainable investments?

29.27%.

Keep in mind that some of these sustainable investments with a social objective are also sustainable from an environmental point of view.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Please refer to the response to the previous paragraph on asset allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the period, the selection of investments was carried out in compliance with all the limits and allocations of the assets indicated above and compliance with the limits and allocations described in the previous paragraphs was monitored continuously by the various structures of the Management Company.

With regard to the voting activity relating to the product during the period, please refer to the annual report of the product itself, or to the reports of the individual funds present in the portfolio during the period.

With regards to the Management Company's engagement activity, please refer to the engagement policy and the Engagement Policy Report published on the website of the Management Company.

How did this financial product perform compared to the reference benchmark?

No index has been designated as a benchmark to meet the environmental or social characteristics promoted by the financial product.

- **How does the reference benchmark differ from a broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

ANNEX 1

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088

Product name: ANIMA Euro Equity

Legal entity identifier: 2138001MPVLI3KMZME29

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 65.54% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective** _____%

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes both the preservation of the environment and natural resources, and fair work conditions, democracy and human and social rights on the social side, as pursued by government issuers. From a corporate point of view, this financial product promotes also the following environmental and social characteristics:

- the fight against climate change;
- the respect of human rights;
- the protection of human health;
- the protection of human well-being.

The promotion of the above environmental and social characteristics are evaluated by the Manager based on the analysis carried out by specialised third party ESG data providers. Further elements of the financial product's ESG strategy are described in the "Asset Allocation" sections below.

● How did the sustainability indicators perform?

The sustainability indicators used by this financial product are:

- the exclusion of corporate issuers involved in the production of thermal coal which accounts for more than 30% of their revenues, for the fight against climate change;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- the exclusion of:
 - corporate issuers involved in the production of controversial weapons, which include anti-personnel land mines, cluster munitions, biological, chemical, blinding weapons, white phosphorus, nuclear armaments and which have mostly been banned by UN treaties;
 - countries sanctioned at the central government level by the UN for systematic violations of human rights;

for the respect of human rights;

- the exclusion of issuers involved in the production of tobacco, for the protection of human health;
- the exclusion of corporate issuers involved in the gambling sector, for the protection of human well-being.

During the period, the selection of investments was made taking into account the exclusions listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***... and compared to previous periods?***

There were no changes in the applied sustainability indicators.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As mentioned above, although the product does not have a sustainable objective, it did invest 65.54% of its AuM in issuers defined as “SFDR” sustainable according to an internal algorithm of the Management Company. This algorithm provides that issuers are considered sustainable if they:

- comply with the exclusion criteria mentioned in the “Investment Strategy” section further below;
- pass the DNSH test, described in the following section;
- pass a Good Governance test, which is set at the level of 25 out 100 for their G score;
- pass a general E and S test, which is set at the level of 25 out 100 for their E and S scores;
- contribute positively to at least one of the following three areas: Climate Transition, Environment or Society. Positive contribution is measured on the basis of issuers' involvement in certain initiatives or on the basis of best-in-class criteria related to specific environmental and/or social factors.

During the period, the selection of investments was made taking into account the criteria listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The assessment that issuers considered to be sustainable do not cause significant harm to other sustainable investment objectives was carried out on the basis of the Do No Significant Harm test (DNSH, developed internally by the Management Company), which, in line with regulatory recommendations, is based on the mandatory Principal Indicators of Adverse Impact (PAI, see the RTS to the SFDR). In particular, investments are considered to cause significant harm when they involve issuers that:

- do not publish data on Carbon Footprint, Carbon Intensity and Board Gender Diversity;
- are involved in the fossil fuels sector or the controversial weapons sector;
- are involved in very severe controversies related to compliance with the UN Global Compact and OECD requirements for multinational companies;

- exceed strict threshold values (specifically identified by the Management Company based on a diversified sample of issuers worldwide) for any of the following PAI indicators: 2*, 3*, 5, 6*, 8, 9, 12 and 13;
- exceed critical thresholds (specifically identified by the Management Company based on a diversified sample of issuers worldwide) for at least 4 of the following PAI indicators: 2*, 3*, 5, 6*, 7, 8, 9, 10, 11, 12 and 13.

Note *: it should be noted that, for the purposes of the DNSH test, absolute GHG emissions levels (PAI 1) are used to calculate PAIs 2 and 3; also, Carbon Footprint and GHG Intensity are calculated taking into account only Scope 1 and 2 emissions. It should also be noted that PAI 6 currently takes into account the sectoral classification provided by the provider Refinitiv as a proxy for the NACE classification required by the regulations.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to the previous paragraph.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The alignment of sustainable investments with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights is pursued through several investment selection and management criteria, explained above and consistent with the aforementioned guidelines. In particular:

- exclusions relating to controversial weapons, which apply to all investments;
- exclusions based on the DNSH principle, applied through the definition of threshold levels on PAI indicators;
- inclusions based on the identification of positive contributions to climate, social or environmental objectives;
- exclusions of environmental or social ratings that fall into the worst quartile of the rankings based on the data provided by specialized third party providers;
- application to equity investments of the voting rights policy, based on the third party provider (ISS) model, which takes into account specific ESG factors and refers to guidelines consistent with sustainable business practices on the environment, fair treatment of labour, non-discriminatory policies and protection of human rights, framed in initiatives such as those of the United Nations Environment Programme Finance Initiative (UNEP FI), United Nations Principles for Responsible Investment (UNPRI), United Nations Global Compact, Global Reporting Initiative (GRI), Carbon Principles, International Labour Organisation Conventions (ILO), CERES Principles, Global Sullivan Principles, MacBride Principles and the European Union Directives on social and environmental issues.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considered the principal adverse impacts on sustainability factors as follows. In general, the consideration of PAIs is based on the contribution of certain mitigating factors, such as:

1. value exclusions,
2. exclusions/limitations resulting from investing in sustainable issuers according to the SFDR,
3. the setting up of objectives for specific adverse impact indicators, chosen among those belonging to the Mandatory list in the RTS to the SFDR.

In particular:

1. from a value perspective, issuers involved in controversial weapons (connection to PAI 14), nuclear weapons, tobacco, gambling and thermal coal mining (connection to PAI 4) were excluded;
2. the share of the financial product's AuM invested in sustainable issuers ensured that these issuers, by construction, passed the Good Governance and general E and S tests (detailed in the "sustainable investment" sections above) and the DNSH test (which takes into consideration all the 14 mandatory PAI, detailed in the "sustainable investment" sections above) while contributing positively to climate, environmental and social topics;
3. objectives for specific mandatory adverse impact indicators:
 - a. PAI 4 (fossil fuels exposure): the adverse impact was mitigated through the limitation of the exposure to the fossil fuels sector, due to the exclusion of issuers with more than 30% of revenues from thermal coal mining.
 - b. PAI 14 (controversial weapons): the adverse impact was eliminated through the exclusion of issuers involved in controversial weapons.
 - c. PAI 16 (human rights violations): the adverse impact was mitigated through the exclusion of issuers sanctioned by the UN for human rights violations.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is from 01/01/2023 to 29/12/2023

Largest investments	Sector	%Assets	Country
ASML HOLDING NV	SEMICONDUCTOR MATERIALS & EQUIPMENT	5.17%	NETHERLANDS

VINCI SA	CONSTRUCTION & ENGINEERING	1.68%	FRANCE
DEUTSCHE TELEKOM	INTEGRATED TELECOMMUNICATION SERVICES	1.54%	GERMANY

What was the proportion of sustainability-related investments?

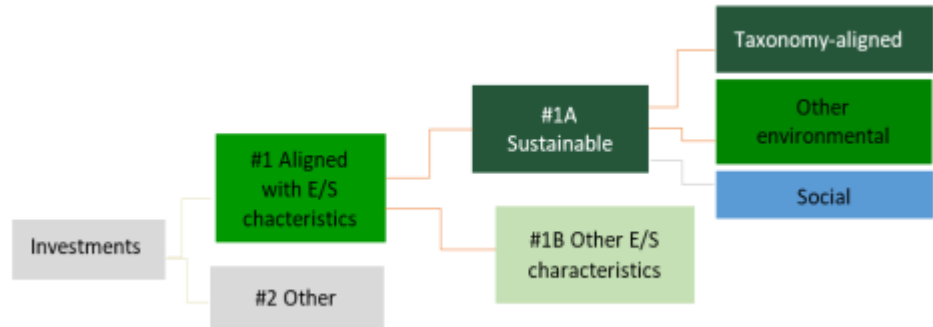

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The strategic asset allocation of the financial product has been defined by its risk-return profile and implemented through the modulation of its investments over time.

94.01% of the financial product net assets has been invested in issuers which promote the environmental and social characteristics, in accordance with the binding elements of the investment strategy, and which have an ESG Combined Score higher than 25. Investments in SFDR art. 8 or 9 financial products are also considered to be aligned with the E/S characteristics promoted by this financial products. While the Financial product did not have sustainable investing as its objective, the Financial product invested 65.54% of its assets in sustainable investments with an environmental and/or social objective, as detailed in the sections above. Regarding the percentage of alignment with the taxonomy, sustainable investments with an environmental objective were aligned with the EU taxonomy for 1.52% of revenue, 4.20% of capital expenditures, 3.21% of operating expenditures (data reported by issuing companies).

0.65% (Not Aligned #2 Other) of the financial product net assets has been invested in money market instruments, different from the ones mentioned in the previous sentence, or a mix of money market instruments and investments in issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25, subject to a maximum limit of 10% of the financial product's net assets for the latter. In this case, those issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25 have still been compliant with the exclusion criteria set out in the "Investment Strategy" section above.

Any investment included in the above referenced remaining component refers to financial products and instruments deemed to be of interest from a strictly financial point of view (liquidity included) and/or which, given their characteristics, help to complete the thematic, sector and geographic profile of the portfolio.

● ***In which economic sectors were the investments made?***

Equity:

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments with an environmental objective were aligned with the EU taxonomy for 1.52% of revenue, 4.20% of capital expenditures, 3.21% of operating expenditures (data reported by issuing companies).

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes **In fossil gas** **In nuclear energy**
 No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

are sustainable investments with an environmental objective that do not take into account the criteria for

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities were 0.19% of revenue, 0.20% of capital expenditures, 0.11% of operating expenditures (data reported by issuing companies).

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The share of investments made in enabling activities were 2.26% of revenue, 4.37% of capital expenditures, 4.12% of operating expenditures (data reported by issuing companies).

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned to the EU taxonomy were 62.60% of turnover, 59.92% of capital expenditure, 60.91% of operating expenditure (data reported by companies).

Keep in mind that part of such sustainable investments with an environmental objective is also sustainable from a social point of view.

What was the share of socially sustainable investments?

38.36%.

Keep in mind that some of these sustainable investments with a social objective are also sustainable from an environmental point of view.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Please refer to the response to the previous paragraph on asset allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the period, the selection of investments was carried out in compliance with all the limits and allocations of the assets indicated above and compliance with the limits and allocations described in the previous paragraphs was monitored continuously by the various structures of the Management Company.

With regard to the voting activity relating to the product during the period, please refer to the annual report of the product itself, or to the reports of the individual funds present in the portfolio during the period.

With regards to the Management Company's engagement activity, please refer to the engagement policy and the Engagement Policy Report published on the website of the Management Company.

How did this financial product perform compared to the reference benchmark?

No index has been designated as a benchmark to meet the environmental or social characteristics promoted by the financial product.

- **How does the reference benchmark differ from a broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

ANNEX 1

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088

Product name: ANIMA Euro Government Bond

Legal entity identifier: 213800MYMBS3FLKE4U39

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes No

It made **sustainable investments with an environmental objective** ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 4.38% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective** ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes both the preservation of the environment and natural resources, and fair work conditions, democracy and human and social rights on the social side, as pursued by government issuers.

The promotion of the above environmental and social characteristics are evaluated by the Manager based on the analysis carried out by specialised third party ESG data providers. Further elements of the financial product’s ESG strategy are described in the “Asset Allocation” sections below.

● **How did the sustainability indicators perform?**

The sustainability indicators, used to measure the attainment of each of the environmental or social characteristics promoted by this financial product, are the E, S and G scores by a third party ESG data provider, which assess countries’ prosperity by considering its access to – and management of – natural, human and institutional wealth.

The scores assigned to the 3 factors above are then averaged in one final score (the Country ESG Score), on a scale that goes from 0 to 100 (100 being the best score).

Furthermore, the sustainability indicator used by this financial product is, for the respect of human rights, the exclusion of countries sanctioned at the central government level by the UN for systematic violations of human rights.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the period, the selection of investments was made taking into account the exclusions listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

- **... and compared to previous periods?**

There were no changes in the applied sustainability indicators.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considered the principal adverse impacts on sustainability factors as follows. Given that the financial product invests only in government bonds and money market instruments, it specifically considers only the PAI 16 (Violation of human rights), among those included in the list of mandatory indicators, included in the Technical Regulations (RTS) relating to the SFDR. In this regard, the adverse impact was greatly mitigated through the exclusion of government sanctioned at the central government level by the United Nations for systematic human rights violations.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is from 01/01/2023 to 29/12/2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The strategic asset allocation of the financial product has been defined by its risk-return profile and implemented through the modulation of its investments over time.

93.67% of the financial product net assets has been invested in issuers which promote the environmental and social characteristics, in accordance with the binding elements of the

investment strategy, and which have an ESG Combined Score higher than 25. Investments in SFDR art. 8 or 9 financial products are also considered to be aligned with the E/S characteristics promoted by this financial products. While the Financial product did not have sustainable investing as its objective, the Financial product invested 4.38% of its assets in sustainable investments with an environmental and/or social objective, as detailed in the sections above. Regarding the percentage of alignment with the taxonomy, sustainable investments with an environmental objective were aligned with the EU taxonomy for 0.27% of revenue, 0.35% of capital expenditures, 0.36% of operating expenditures (data reported by issuing companies).

3.79% of the financial product net assets has been invested in money market instruments, different from the ones mentioned in the previous sentence, or a mix of money market instruments and investments in issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25, subject to a maximum limit of 10% of the financial product's net assets for the latter. In this case, those issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25 have still been compliant with the exclusion criteria set out in the "Investment Strategy" section above.

Any investment included in the above referenced remaining component refers to financial products and instruments deemed to be of interest from a strictly financial point of view (liquidity included) and/or which, given their characteristics, help to complete the thematic, sector and geographic profile of the portfolio.

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX 1

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088

Product name: ANIMA Italy

Legal entity identifier: 549300MGC9SMSII64183

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes No

It made **sustainable investments with an environmental objective** ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 36.06% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective** ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes both the preservation of the environment and natural resources, and fair work conditions, democracy and human and social rights on the social side, as pursued by government issuers. From a corporate point of view, this financial product promotes also the following environmental and social characteristics:

- the fight against climate change;
- the respect of human rights;
- the protection of human health;
- the protection of human well-being.

The promotion of the above environmental and social characteristics are evaluated by the Manager based on the analysis carried out by specialised third party ESG data providers. Further elements of the financial product’s ESG strategy are described in the “Asset Allocation” sections below.

● **How did the sustainability indicators perform?**

The sustainability indicators used by this financial product are:

- the exclusion of corporate issuers involved in the production of thermal coal which accounts for more than 30% of their revenues, for the fight against climate change;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- the exclusion of:
 - corporate issuers involved in the production of controversial weapons, which include anti-personnel land mines, cluster munitions, biological, chemical, blinding weapons, white phosphorus, nuclear armaments and which have mostly been banned by UN treaties;
 - countries sanctioned at the central government level by the UN for systematic violations of human rights;

for the respect of human rights;

- the exclusion of issuers involved in the production of tobacco, for the protection of human health;
- the exclusion of corporate issuers involved in the gambling sector, for the protection of human well-being.

During the period, the selection of investments was made taking into account the exclusions listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***... and compared to previous periods?***

There were no changes in the applied sustainability indicators.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As mentioned above, although the product does not have a sustainable objective, it did invest 36.06% of its AuM in issuers defined as “SFDR” sustainable according to an internal algorithm of the Management Company. This algorithm provides that issuers are considered sustainable if they:

- comply with the exclusion criteria mentioned in the “Investment Strategy” section further below;
- pass the DNSH test, described in the following section;
- pass a Good Governance test, which is set at the level of 25 out 100 for their G score;
- pass a general E and S test, which is set at the level of 25 out 100 for their E and S scores;
- contribute positively to at least one of the following three areas: Climate Transition, Environment or Society. Positive contribution is measured on the basis of issuers' involvement in certain initiatives or on the basis of best-in-class criteria related to specific environmental and/or social factors.

During the period, the selection of investments was made taking into account the criteria listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The assessment that issuers considered to be sustainable do not cause significant harm to other sustainable investment objectives was carried out on the basis of the Do No Significant Harm test (DNSH, developed internally by the Management Company), which, in line with regulatory recommendations, is based on the mandatory Principal Indicators of Adverse Impact (PAI, see the RTS to the SFDR). In particular, investments are considered to cause significant harm when they involve issuers that:

- do not publish data on Carbon Footprint, Carbon Intensity and Board Gender Diversity;
- are involved in the fossil fuels sector or the controversial weapons sector;
- are involved in very severe controversies related to compliance with the UN Global Compact and OECD requirements for multinational companies;

- exceed strict threshold values (specifically identified by the Management Company based on a diversified sample of issuers worldwide) for any of the following PAI indicators: 2*, 3*, 5, 6*, 8, 9, 12 and 13;
- exceed critical thresholds (specifically identified by the Management Company based on a diversified sample of issuers worldwide) for at least 4 of the following PAI indicators: 2*, 3*, 5, 6*, 7, 8, 9, 10, 11, 12 and 13.

Note *: it should be noted that, for the purposes of the DNSH test, absolute GHG emissions levels (PAI 1) are used to calculate PAIs 2 and 3; also, Carbon Footprint and GHG Intensity are calculated taking into account only Scope 1 and 2 emissions. It should also be noted that PAI 6 currently takes into account the sectoral classification provided by the provider Refinitiv as a proxy for the NACE classification required by the regulations.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to the previous paragraph.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The alignment of sustainable investments with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights is pursued through several investment selection and management criteria, explained above and consistent with the aforementioned guidelines. In particular:

- exclusions relating to controversial weapons, which apply to all investments;
- exclusions based on the DNSH principle, applied through the definition of threshold levels on PAI indicators;
- inclusions based on the identification of positive contributions to climate, social or environmental objectives;
- exclusions of environmental or social ratings that fall into the worst quartile of the rankings based on the data provided by specialized third party providers;
- application to equity investments of the voting rights policy, based on the third party provider (ISS) model, which takes into account specific ESG factors and refers to guidelines consistent with sustainable business practices on the environment, fair treatment of labour, non-discriminatory policies and protection of human rights, framed in initiatives such as those of the United Nations Environment Programme Finance Initiative (UNEP FI), United Nations Principles for Responsible Investment (UNPRI), United Nations Global Compact, Global Reporting Initiative (GRI), Carbon Principles, International Labour Organisation Conventions (ILO), CERES Principles, Global Sullivan Principles, MacBride Principles and the European Union Directives on social and environmental issues.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considered the principal adverse impacts on sustainability factors as follows. In general, the consideration of PAIs is based on the contribution of certain mitigating factors, such as:

1. value exclusions,
2. exclusions/limitations resulting from investing in sustainable issuers according to the SFDR,
3. the setting up of objectives for specific adverse impact indicators, chosen among those belonging to the Mandatory list in the RTS to the SFDR.

In particular:

1. from a value perspective, issuers involved in controversial weapons (connection to PAI 14), nuclear weapons, tobacco, gambling and thermal coal mining (connection to PAI 4) were excluded;
2. the share of the financial product's AuM invested in sustainable issuers ensured that these issuers, by construction, passed the Good Governance and general E and S tests (detailed in the "sustainable investment" sections above) and the DNSH test (which takes into consideration all the 14 mandatory PAI, detailed in the "sustainable investment" sections above) while contributing positively to climate, environmental and social topics;
3. objectives for specific mandatory adverse impact indicators:
 - a. PAI 4 (fossil fuels exposure): the adverse impact was mitigated through the limitation of the exposure to the fossil fuels sector, due to the exclusion of issuers with more than 30% of revenues from thermal coal mining.
 - b. PAI 14 (controversial weapons): the adverse impact was eliminated through the exclusion of issuers involved in controversial weapons.
 - c. PAI 16 (human rights violations): the adverse impact was mitigated through the exclusion of issuers sanctioned by the UN for human rights violations.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is from 01/01/2023 to 29/12/2023

Largest investments	Sector	%Assets	Country
ENEL SPA	ELECTRIC UTILITIES	9.86%	ITALY
UNICREDIT SPA	DIVERSIFIED BANKS	8.86%	ITALY
STELLANTIS NV	AUTOMOBILE MANUFACTURERS	7.81%	ITALY
INTESA SANPAOLO	DIVERSIFIED BANKS	7.40%	ITALY
ENI SPA	INTEGRATED OIL & GAS	4.48%	ITALY
MEDIOBANCA	DIVERSIFIED BANKS	4.35%	ITALY
FERRARI NV	AUTOMOBILE MANUFACTURERS	4.21%	ITALY
MONCLER SPA	APPAREL, ACCESSORIES & LUXURY GOODS	3.85%	ITALY
EXOR NV	MULTI-SECTOR HOLDINGS	3.29%	NETHERLANDS
A2A SPA	MULTI-UTILITIES	3.06%	ITALY
FINECOBANK SPA	DIVERSIFIED BANKS	2.75%	ITALY
GENERALI ASSIC	MULTI-LINE INSURANCE	1.98%	ITALY
BANCA MONTE DEI	DIVERSIFIED BANKS	1.70%	ITALY
SNAM SPA	GAS UTILITIES	1.68%	ITALY
TERNA-RETE ELETT	ELECTRIC UTILITIES	1.58%	ITALY

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The strategic asset allocation of the financial product has been defined by its risk-return profile and implemented through the modulation of its investments over time.

91.38% of the financial product net assets has been invested in issuers which promote the environmental and social characteristics, in accordance with the binding elements of the

investment strategy, and which have an ESG Combined Score higher than 25. Investments in SFDR art. 8 or 9 financial products are also considered to be aligned with the E/S characteristics promoted by this financial products. While the Financial product did not have sustainable investing as its objective, the Financial product invested 36.06% of its assets in sustainable investments with an environmental and/or social objective, as detailed in the sections above. Regarding the percentage of alignment with the taxonomy, sustainable investments with an environmental objective were aligned with the EU taxonomy for 0.42% of revenue, 1.04% of capital expenditures, 0.63% of operating expenditures (data reported by issuing companies).

2.07% (Not Aligned #2 Other) of the financial product net assets has been invested in money market instruments, different from the ones mentioned in the previous sentence, or a mix of money market instruments and investments in issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25, subject to a maximum limit of 10% of the financial product's net assets for the latter. In this case, those issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25 have still been compliant with the exclusion criteria set out in the "Investment Strategy" section above.

Any investment included in the above referenced remaining component refers to financial products and instruments deemed to be of interest from a strictly financial point of view (liquidity included) and/or which, given their characteristics, help to complete the thematic, sector and geographic profile of the portfolio.

● **In which economic sectors were the investments made?**

Equity:

Description	Average
Financials	38.29%
Consumer Discretionary	18.78%
Utilities	17.33%
Energy	8.75%
Industrials	5.31%
Communication Services	3.21%
Information Technology	1.78%
Health Care	1.48%
Materials	1.07%
Consumer Staples	0.99%
Real Estate	0.00%

Bond:

n/d

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments with an environmental objective were aligned with the EU taxonomy for 0.42% of revenue, 1.04% of capital expenditures, 0.63% of operating expenditures (data reported by issuing companies).

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

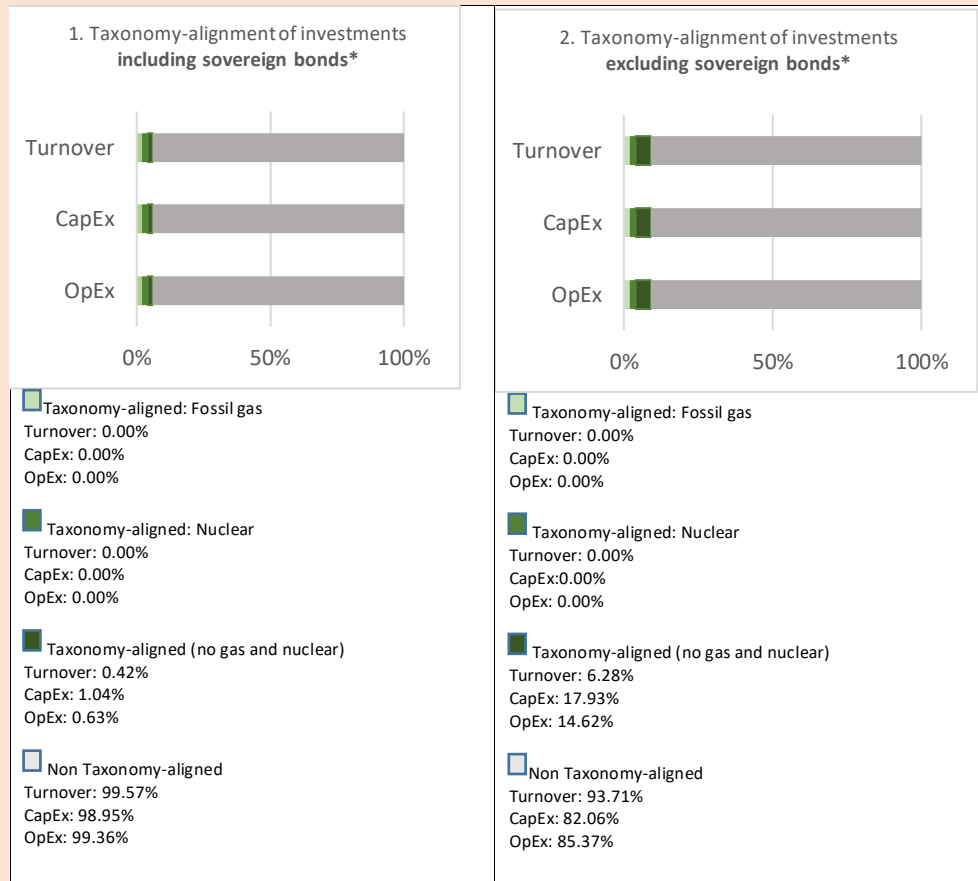

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- Yes
 No
 In fossil gas
 In nuclear energy

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities were 0.02% of revenue, 0.35% of capital expenditures, 0.25% of operating expenditures (data reported by issuing companies).

The share of investments made in enabling activities were 3.59% of revenue, 7.87% of capital expenditures, 8.41% of operating expenditures (data reported by issuing companies).

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned to the EU taxonomy were 24.53% of turnover, 23.90% of capital expenditure, 24.31% of operating expenditure (data reported by companies).

Keep in mind that part of such sustainable investments with an environmental objective is also sustainable from a social point of view.

What was the share of socially sustainable investments?

25.97%.

Keep in mind that some of these sustainable investments with a social objective are also sustainable from an environmental point of view.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Please refer to the response to the previous paragraph on asset allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the period, the selection of investments was carried out in compliance with all the limits and allocations of the assets indicated above and compliance with the limits and allocations described in the previous paragraphs was monitored continuously by the various structures of the Management Company.

With regard to the voting activity relating to the product during the period, please refer to the annual report of the product itself, or to the reports of the individual funds present in the portfolio during the period.

With regards to the Management Company's engagement activity, please refer to the engagement policy and the Engagement Policy Report published on the website of the Management Company.

How did this financial product perform compared to the reference benchmark?

No index has been designated as a benchmark to meet the environmental or social characteristics promoted by the financial product.

● **How does the reference benchmark differ from a broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

ANNEX 1

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088

Product name: ANIMA International Bond

Legal entity identifier: 213800J53RXVZG1ABH53

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective** _____%

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes both the preservation of the environment and natural resources, and fair work conditions, democracy and human and social rights on the social side, as pursued by government issuers.

The promotion of the above environmental and social characteristics are evaluated by the Manager based on the analysis carried out by specialised third party ESG data providers.

Further elements of the financial product's ESG strategy are described in the "Asset Allocation" sections below.

● **How did the sustainability indicators perform?**

The sustainability indicators, used to measure the attainment of each of the environmental or social characteristics promoted by this financial product, are the E, S and G scores by a third party ESG data provider, which assess countries' prosperity by considering its access to – and management of – natural, human and institutional wealth.

The scores assigned to the 3 factors above are then averaged in one final score (the Country ESG Score), on a scale that goes from 0 to 100 (100 being the best score).

Furthermore, the sustainability indicator used by this financial product is, for the respect of human rights, the exclusion of countries sanctioned at the central government level by the UN for systematic violations of human rights.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

During the period, the selection of investments was made taking into account the exclusions listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

- **... and compared to previous periods?**

There were no changes in the applied sustainability indicators.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considered the principal adverse impacts on sustainability factors as follows. Given that the financial product invests only in government bonds and money market instruments, it specifically considers only the PAI 16 (Violation of human rights), among those included in the list of mandatory indicators, included in the Technical Regulations (RTS) relating to the SFDR. In this regard, the adverse impact was greatly mitigated through the exclusion of government sanctioned at the central government level by the United Nations for systematic human rights violations.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is from 01/01/2023 to 29/12/2023

Largest investments	Sector	%Assets	Country

What was the proportion of sustainability-related investments?

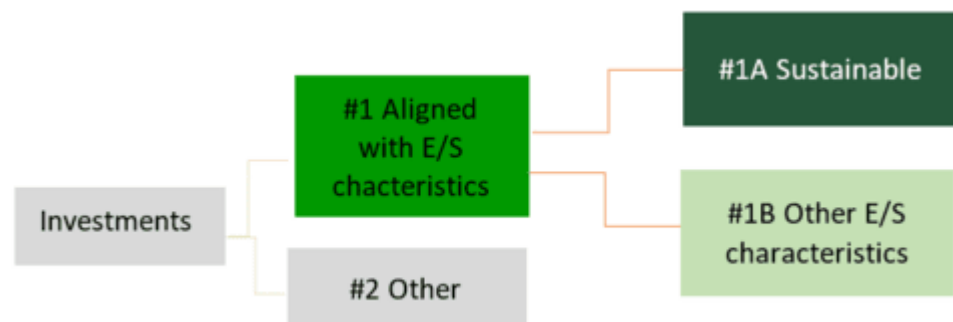

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The strategic asset allocation of the financial product has been defined by its risk-return profile and implemented through the modulation of its investments over time.

91.52% of the financial product net assets has been invested in issuers which promote the environmental and social characteristics, in accordance with the binding elements of the investment strategy, and which have an ESG Combined Score higher than 25. Investments in SFDR art. 8 or 9 financial products are also considered to be aligned with the E/S characteristics promoted by this financial products. While the Financial product did not have sustainable investing as its objective, the Financial product invested 0.00% of its assets in sustainable investments with an environmental and/or social objective, as detailed in the sections above. Regarding the percentage of alignment with the taxonomy, sustainable investments with an environmental objective were aligned with the EU taxonomy for 0.00% of revenue, 0.00% of capital expenditures, 0.00% of operating expenditures (data reported by issuing companies).

0.00% of the financial product net assets has been invested in money market instruments, different from the ones mentioned in the previous sentence, or a mix of money market instruments and investments in issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25, subject to a maximum limit of 10% of the financial product's net assets for the latter. In this case, those issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25 have still been compliant with the exclusion criteria set out in the "Investment Strategy" section above.

Any investment included in the above referenced remaining component refers to financial products and instruments deemed to be of interest from a strictly financial point of view (liquidity included) and/or which, given their characteristics, help to complete the thematic, sector and geographic profile of the portfolio.

● **In which economic sectors were the investments made?**

Equity:

As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities were 0.00% of revenue, 0.00% of capital expenditures, 0.00% of operating expenditures (data reported by issuing companies).

The share of investments made in enabling activities were 0.00% of revenue, 0.00% of capital expenditures, 0.00% of operating expenditures (data reported by issuing companies).

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned to the EU taxonomy were 0% of turnover, 0% of capital expenditure, 0% of operating expenditure (data reported by companies).

Keep in mind that part of such sustainable investments with an environmental objective is also sustainable from a social point of view.

What was the share of socially sustainable investments?

0%.

Keep in mind that some of these sustainable investments with a social objective are also sustainable from an environmental point of view.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Please refer to the response to the previous paragraph on asset allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the period, the selection of investments was carried out in compliance with all the limits and allocations of the assets indicated above and compliance with the limits and allocations described in the previous paragraphs was monitored continuously by the various structures of the Management Company.

With regard to the voting activity relating to the product during the period, please refer to the annual report of the product itself, or to the reports of the individual funds present in the portfolio during the period.

With regards to the Management Company's engagement activity, please refer to the engagement policy and the Engagement Policy Report published on the website of the Management Company.

How did this financial product perform compared to the reference benchmark?

No index has been designated as a benchmark to meet the environmental or social characteristics promoted by the financial product.

● ***How does the reference benchmark differ from a broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

ANNEX 1

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088

Product name: ANIMA Megatrend People Fund

Legal entity identifier: 549300OPY4VPHVHZQ284

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63.38% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective** _____%

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes both the preservation of the environment and natural resources, and fair work conditions, democracy and human and social rights on the social side, as pursued by government issuers. From a corporate point of view, this financial product promotes also the following environmental and social characteristics:

- the fight against climate change;
- the respect of human rights;
- the protection of human health;
- the protection of human well-being.

The promotion of the above environmental and social characteristics are evaluated by the Manager based on the analysis carried out by specialised third party ESG data providers. Further elements of the financial product's ESG strategy are described in the "Asset Allocation" sections below.

● How did the sustainability indicators perform?

The sustainability indicators used by this financial product are:

- the exclusion of corporate issuers involved in the production of thermal coal which accounts for more than 30% of their revenues, for the fight against climate change;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- the exclusion of:
 - corporate issuers involved in the production of controversial weapons, which include anti-personnel land mines, cluster munitions, biological, chemical, blinding weapons, white phosphorus, nuclear armaments and which have mostly been banned by UN treaties;
 - countries sanctioned at the central government level by the UN for systematic violations of human rights;

for the respect of human rights;

- the exclusion of issuers involved in the production of tobacco, for the protection of human health;
- the exclusion of corporate issuers involved in the gambling sector, for the protection of human well-being.

During the period, the selection of investments was made taking into account the exclusions listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***... and compared to previous periods?***

There were no changes in the applied sustainability indicators.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As mentioned above, although the product does not have a sustainable objective, it did invest 63.38% of its AuM in issuers defined as “SFDR” sustainable according to an internal algorithm of the Management Company. This algorithm provides that issuers are considered sustainable if they:

- comply with the exclusion criteria mentioned in the “Investment Strategy” section further below;
- pass the DNSH test, described in the following section;
- pass a Good Governance test, which is set at the level of 25 out 100 for their G score;
- pass a general E and S test, which is set at the level of 25 out 100 for their E and S scores;
- contribute positively to at least one of the following three areas: Climate Transition, Environment or Society. Positive contribution is measured on the basis of issuers' involvement in certain initiatives or on the basis of best-in-class criteria related to specific environmental and/or social factors.

During the period, the selection of investments was made taking into account the criteria listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The assessment that issuers considered to be sustainable do not cause significant harm to other sustainable investment objectives was carried out on the basis of the Do No Significant Harm test (DNSH, developed internally by the Management Company), which, in line with regulatory recommendations, is based on the mandatory Principal Indicators of Adverse Impact (PAI, see the RTS to the SFDR). In particular, investments are considered to cause significant harm when they involve issuers that:

- do not publish data on Carbon Footprint, Carbon Intensity and Board Gender Diversity;
- are involved in the fossil fuels sector or the controversial weapons sector;
- are involved in very severe controversies related to compliance with the UN Global Compact and OECD requirements for multinational companies;

- exceed strict threshold values (specifically identified by the Management Company based on a diversified sample of issuers worldwide) for any of the following PAI indicators: 2*, 3*, 5, 6*, 8, 9, 12 and 13;
- exceed critical thresholds (specifically identified by the Management Company based on a diversified sample of issuers worldwide) for at least 4 of the following PAI indicators: 2*, 3*, 5, 6*, 7, 8, 9, 10, 11, 12 and 13.

Note *: it should be noted that, for the purposes of the DNSH test, absolute GHG emissions levels (PAI 1) are used to calculate PAIs 2 and 3; also, Carbon Footprint and GHG Intensity are calculated taking into account only Scope 1 and 2 emissions. It should also be noted that PAI 6 currently takes into account the sectoral classification provided by the provider Refinitiv as a proxy for the NACE classification required by the regulations.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to the previous paragraph.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The alignment of sustainable investments with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights is pursued through several investment selection and management criteria, explained above and consistent with the aforementioned guidelines. In particular:

- exclusions relating to controversial weapons, which apply to all investments;
- exclusions based on the DNSH principle, applied through the definition of threshold levels on PAI indicators;
- inclusions based on the identification of positive contributions to climate, social or environmental objectives;
- exclusions of environmental or social ratings that fall into the worst quartile of the rankings based on the data provided by specialized third party providers;
- application to equity investments of the voting rights policy, based on the third party provider (ISS) model, which takes into account specific ESG factors and refers to guidelines consistent with sustainable business practices on the environment, fair treatment of labour, non-discriminatory policies and protection of human rights, framed in initiatives such as those of the United Nations Environment Programme Finance Initiative (UNEP FI), United Nations Principles for Responsible Investment (UNPRI), United Nations Global Compact, Global Reporting Initiative (GRI), Carbon Principles, International Labour Organisation Conventions (ILO), CERES Principles, Global Sullivan Principles, MacBride Principles and the European Union Directives on social and environmental issues.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considered the principal adverse impacts on sustainability factors as follows. In general, the consideration of PAIs is based on the contribution of certain mitigating factors, such as:

1. value exclusions,
2. exclusions/limitations resulting from investing in sustainable issuers according to the SFDR,
3. the setting up of objectives for specific adverse impact indicators, chosen among those belonging to the Mandatory list in the RTS to the SFDR.

In particular:

1. from a value perspective, issuers involved in controversial weapons (connection to PAI 14), nuclear weapons, tobacco, gambling and thermal coal mining (connection to PAI 4) were excluded;
2. the share of the financial product's AuM invested in sustainable issuers ensured that these issuers, by construction, passed the Good Governance and general E and S tests (detailed in the "sustainable investment" sections above) and the DNSH test (which takes into consideration all the 14 mandatory PAI, detailed in the "sustainable investment" sections above) while contributing positively to climate, environmental and social topics;
3. objectives for specific mandatory adverse impact indicators:
 - a. PAI 4 (fossil fuels exposure): the adverse impact was mitigated through the limitation of the exposure to the fossil fuels sector, due to the exclusion of issuers with more than 30% of revenues from thermal coal mining.
 - b. PAI 14 (controversial weapons): the adverse impact was eliminated through the exclusion of issuers involved in controversial weapons.
 - c. PAI 16 (human rights violations): the adverse impact was mitigated through the exclusion of issuers sanctioned by the UN for human rights violations.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is from 01/01/2023 to 29/12/2023

Largest investments	Sector	%Assets	Country
APPLE INC	TECHNOLOGY HARDWARE, STORAGE & PERIPHERALS	4.38%	UNITED STATES
MICROSOFT CORP	SYSTEMS SOFTWARE	4.00%	UNITED STATES
AMAZON.COM INC	BROADLINE RETAIL	3.19%	UNITED STATES
ALPHABET INC-A	INTERACTIVE MEDIA & SERVICES	2.31%	UNITED STATES
NVIDIA CORP	SEMICONDUCTORS	2.14%	UNITED STATES
META PLATFORMS-A	INTERACTIVE MEDIA & SERVICES	1.69%	UNITED STATES
JPMORGAN CHASE	DIVERSIFIED BANKS	1.54%	UNITED STATES
ELI LILLY & CO	PHARMACEUTICALS	1.12%	UNITED STATES
BERKSHIRE HATH-B	MULTI-SECTOR HOLDINGS	1.09%	UNITED STATES
COSTCO WHOLESALE	CONSUMER STAPLES MERCHANDISE RETAIL	1.07%	UNITED STATES
NOVO NORDISK-B	PHARMACEUTICALS	1.06%	DENMARK
MASTERCARD INC-A	TRANSACTION & PAYMENT PROCESSING SERVICES	0.96%	UNITED STATES
VISA INC-CLASS A	TRANSACTION & PAYMENT PROCESSING SERVICES	0.95%	UNITED STATES
BANK OF AMERICA	DIVERSIFIED BANKS	0.95%	UNITED STATES
UNITEDHEALTH GRP	MANAGED HEALTH CARE	0.94%	UNITED STATES

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The strategic asset allocation of the financial product has been defined by its risk-return profile and implemented through the modulation of its investments over time.

94.49% of the financial product net assets has been invested in issuers which promote the environmental and social characteristics, in accordance with the binding elements of the investment strategy, and which have an ESG Combined Score higher than 25. Investments in SFDR art. 8 or 9 financial products are also considered to be aligned with the E/S characteristics promoted by this financial products. While the Financial product did not have sustainable investing as its objective, the Financial product invested 63.38% of its assets in sustainable investments with an environmental and/or social objective, as detailed in the sections above. Regarding the percentage of alignment with the taxonomy, sustainable investments with an environmental objective were aligned with the EU taxonomy for 0.00% of revenue, 0.30% of capital expenditures, 0.01% of operating expenditures (data reported by issuing companies).

1.72% (Not Aligned #2 Other) of the financial product net assets has been invested in money market instruments, different from the ones mentioned in the previous sentence, or a mix of money market instruments and investments in issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25, subject to a maximum limit of 10% of the financial product's net assets for the latter. In this case, those issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25 have still been compliant with the exclusion criteria set out in the "Investment Strategy" section above.

Any investment included in the above referenced remaining component refers to financial products and instruments deemed to be of interest from a strictly financial point of view (liquidity included) and/or which, given their characteristics, help to complete the thematic, sector and geographic profile of the portfolio.

● ***In which economic sectors were the investments made?***

Equity:

Description	Average
Health Care	25.38%
Information Technology	23.69%
Financials	12.78%
Consumer Staples	10.23%
Communication Services	9.15%
Consumer Discretionary	8.13%
Industrials	2.57%
Materials	2.50%
Utilities	1.35%
Real Estate	0.35%
Energy	0.00%

Bond:

Description	Average
Sovereign	2.47%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Sustainable investments with an environmental objective were aligned with the EU taxonomy for 0.00% of revenue, 0.30% of capital expenditures, 0.01% of operating expenditures (data reported by issuing companies).

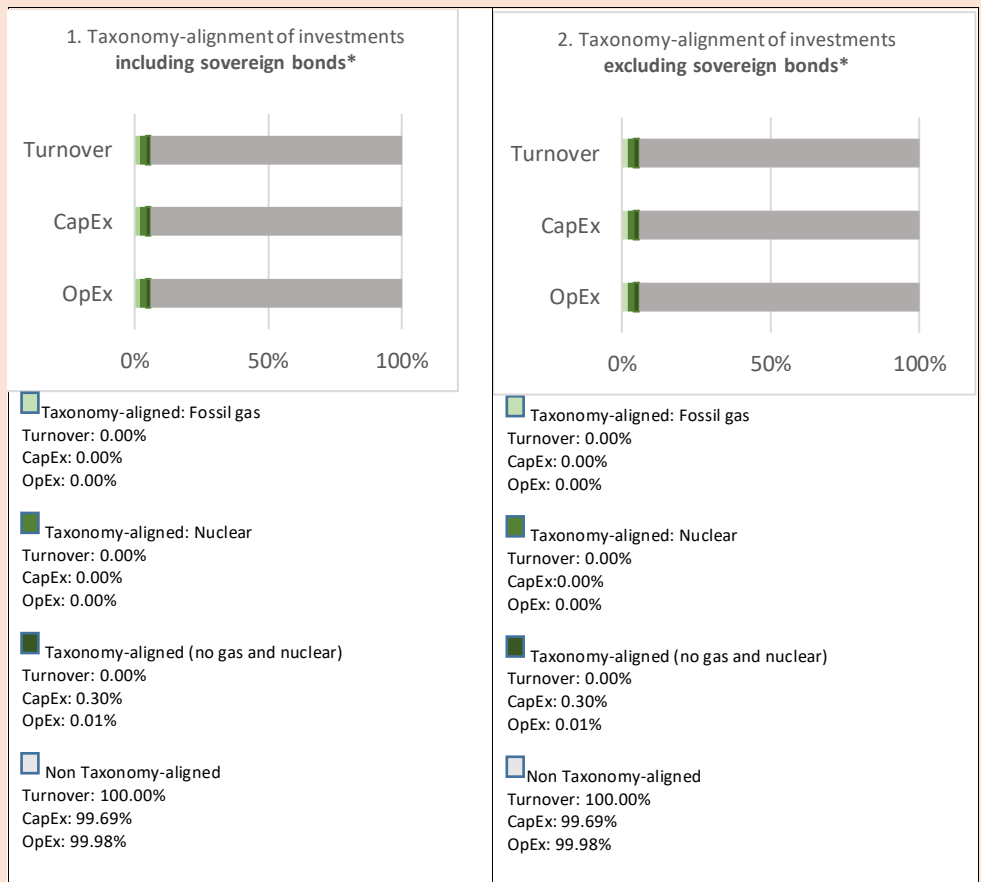

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes
 In fossil gas
 In nuclear energy
 No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

are sustainable investments with an environmental objective that do not take into account the criteria for

- **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional activities were 0.00% of revenue, 0.01% of capital expenditures, 0.00% of operating expenditures (data reported by issuing companies).

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The share of investments made in enabling activities were 0.00% of revenue, 0.01% of capital expenditures, 0.00% of operating expenditures (data reported by issuing companies).

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned to the EU taxonomy were 57.16% of turnover, 56.86% of capital expenditure, 57.14% of operating expenditure (data reported by companies).

Keep in mind that part of such sustainable investments with an environmental objective is also sustainable from a social point of view.

What was the share of socially sustainable investments?

38.42%.

Keep in mind that some of these sustainable investments with a social objective are also sustainable from an environmental point of view.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Please refer to the response to the previous paragraph on asset allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the period, the selection of investments was carried out in compliance with all the limits and allocations of the assets indicated above and compliance with the limits and allocations described in the previous paragraphs was monitored continuously by the various structures of the Management Company.

With regard to the voting activity relating to the product during the period, please refer to the annual report of the product itself, or to the reports of the individual funds present in the portfolio during the period.

With regards to the Management Company's engagement activity, please refer to the engagement policy and the Engagement Policy Report published on the website of the Management Company.

How did this financial product perform compared to the reference benchmark?

No index has been designated as a benchmark to meet the environmental or social characteristics promoted by the financial product.

- **How does the reference benchmark differ from a broad market index?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.
