This Fund is authorised in Ireland and regulated by the Central Bank of Ireland. The PRIIP Manufacturer is authorised in Italy and regulated by Bank of Italy.

The information contained in the KID is accurate as at 28/02/2023

What is this product?

Type: The Fund is a sub-fund of ANIMA Funds plc (the "Company"), an open-ended investment company with variable capital incorporated in Ireland and authorised by the Central Bank of Ireland as a UCITS. The assets of the Fund are segregated from those of other sub-funds and cannot be used to pay the debts of other sub-funds of the Company. The Fund is a Standard Money Market Fund ("MMF") with variable NAV. The Fund complies with the ESMA Guidelines and with the Regulation (EU) 2017/1131 on Money Market Funds.

Term: The Company has an unlimited life and there is no maturity date for this Fund.

Investment Objective: The MMF is not a guaranteed investment. An investment in MMFs is different from an investment in deposits, with particular reference to the risk that the principal invested in an MMF is capable of fluctuation. MMF does not rely on external support for guaranteeing the liquidity of the MMF or stabilising the NAV per share. The risk of loss of the principal is to be borne by the investor. The objective of the Fund is to offer returns in line with money market rates, to the extent consistent with preservation of value of the investment. The Fund is actively managed in reference to its Benchmark.

The Manager has classified the Fund as promoting environmental and social characteristics under Article 8 of the Sustainable Finance Disclosure Regulation (EU) 2019/2088. Preference will be given to securities/instruments/indices that, in the Manager's opinion, have a particular focus on environmental, social and corporate governance criteria (so-called "Environmental, Social and corporate Governance factors" - ESG). To this end, the Manager uses a proprietary model to assess the positioning of issuers with respect to the above mentioned ESG criteria.

The Fund will seek to achieve this objective through investment in money market instruments, issued by European sovereign and/or by supranational entities, in Euro Area countries.

Securities will be of investment grade or equivalent at the time of investment.

Financial instruments are primarily denominated in Euro.

Investments in bank deposits are limited.

The Fund will not invest in money market instruments not compliant with the Manager's credit rating policy.

Benchmark: 100% ICE BofA Euro Treasury Bill (Gross Total Return - in Euro).

Degree of discretion with respect to the Benchmark: the investment strategy will restrict the extent to which the portfolio holdings may deviate from the Benchmark. This deviation may be material. This is likely to limit the extent to which the Fund can outperform the Benchmark.

No dividend is payable on the Shares. Income earned by the Fund will be retained by the Fund and will be reflected in the value of your Shares.

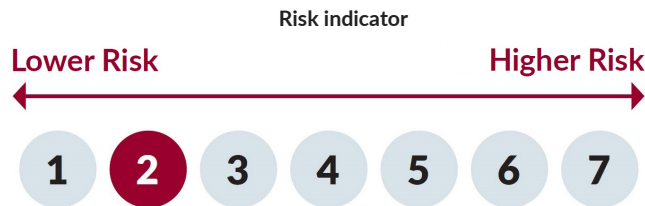

Intended retail investor: This Fund is suitable for retail and institutional investors identified on the basis of the following characteristics:

- is an Investor willing to keep the investment for a period of time not less than 1 year; accordingly, the Fund is suitable for Investors with a time horizon short;
- is an Investor who can bear limited capital loss as the Fund is not guaranteed and has a low risk class and a low risk tolerance;
- is an Investor looking for capital preservation.

The Depositary of the Fund is State Street Custodial Services (Ireland) Limited.

Copies of the Prospectus (including the Fund Information Card) and the annual and half-yearly reports of the Company may be obtained from the Administrator, free of charge, or by visiting www.animasgr.it. These documents are available in English. The Net Asset Value ("NAV") of the Fund is calculated in Euro. The NAV per Share will be available from the Administrator and will also be published on www.animasgr.it each time it is calculated.

What are the risks and what could I get in return?

The risk indicator assumes you keep the Fund for 1 year, in accordance with the recommended holding period. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity to repay the initial capital amount invested.

Other risks that are materially relevant to the Fund and which are not adequately captured in the summary risk indicator:

○ **Credit Risk:** the risk that the issuer of a debt instrument may default, in whole or in part, on its obligation to repay the full capital amount invested and/or the interest thereon.

This product does not include any protection from future market performance so you could lose some or all of your investment.

The PRIIP Manufacturer has no obligation to make any payment to you. The Company is not required to make any payment to you in respect of your investment. If the Company shall be wound up or dissolved, the assets available for distribution among the holders of the participating shares shall be distributed in accordance with the respective interests in the respective sub-funds. There is no compensation or guarantee scheme in place that applies to the Company and, if you invest in the Company, you should be prepared to assume the risk that you could lose all of your investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Table 1 - Costs over time:

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and, if applicable, how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

- 10,000 Euro is invested.

Single investment: 10,000 Euro	
If you exit after 1 year	
Total costs	170 Euro

We may share part of the costs with the person selling you the product to cover the services they provide to you. These figures include the maximum distribution fee that the person selling you the product may charge (0.50% of amount invested. Single investment 50 Euro).
