## What is this product?

**Type:** The Fund is a sub-fund of ANIMA Funds plc (the "Company"), an open-ended investment company with variable capital incorporated in Ireland and authorised by the Central Bank of Ireland as a UCITS. The assets of the Fund are segregated from those of other sub-funds and cannot be used to pay the debts of other sub-funds of the Company.

**Term:** The Company has an unlimited life and there is no maturity date for this Fund.

**Investment Objective:** The objective of the Fund is to seek to provide an attractive rate of return.

The Fund is actively managed in reference to its Benchmark.

The Fund will invest primarily in Euro denominated fixed and floating rate Italian government bonds listed or traded on any Recognised Exchanges. All of the assets may be invested in fixed and/or floating rate and/or inflation linked Italian government bonds and notes, zero-coupon and discount bonds, as well as up to 30% in debentures issued or guaranteed by issuers of an OECD Member State other than Italy. Up to 30% of assets may be invested in money market instruments (including cash, treasury bills, commercial paper and/or certificates of deposit).

The Fund may invest in excess of 30% of its assets in below investment grade bonds at the time of purchase or, if unrated, which are in the opinion of the Manager, of comparable quality.

Up to 10% of net assets may be invested in Collective Investment Schemes which invest in money market instruments, and/or fixed and/or floating rate debt instruments.

The Fund may use Financial Derivative Instruments for (i) hedging, (ii) risk reduction and/or (iii) investment purposes. The Fund may use financial leverage to increase the amount invested in financial instruments to twice the value of the Fund's net asset value. This means that if there are changes in the prices of the financial instruments the Fund could either gain or lose twice as much as it would gain or lose without using financial leverage.

Benchmark: 70% JP Morgan GBI Italy (Gross Total Return - in Euro); 30% ICE BofA Euro Treasury Bill (Gross Total Return - in Euro).

Degree of discretion with respect to the Benchmark: the investment strategy will restrict the extent to which the portfolio holdings may deviate from the Benchmark. This deviation may be material. This is likely to limit the extent to which the Fund can outperform the Benchmark.

No dividend is payable on the Shares. Income earned by the Fund will be retained by the Fund and will be reflected in the value of your Shares.

**Intended retail investor:** This Fund is suitable for retail and institutional investors identified on the basis of the following characteristics:

- is an Investor willing to keep the investment for a period of time in line with the Recommended Holding Period; accordingly, the Fund is suitable for Investors with a time horizon medium;
- is an Investor who can bear total capital loss as the Fund is not guaranteed and has a medium-low risk class and a medium-low risk tolerance;

The Depositary of the Fund is State Street Custodial Services (Ireland) Limited.

## What are the risks and what could I get in return?

### Risk indicator

The risk indicator assumes you keep the Fund for 5 years, in accordance with the recommended holding period. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to repay the initial capital amount invested.

Other risks that are materially relevant to the Fund and which are not adequately captured in the summary risk indicator:

- **Credit Risk:** the risk that the issuer of a debt instrument may default, in whole or in part, on its obligation to repay the full capital amount invested and/or the interest thereon.

This product does not include any protection from future market performance so you could lose some or all of your investment.

## What happens if ANIMA SGR S.p.A. on behalf of the Fund is unable to pay out?

The PRIIP Manufacturer has no obligation to make any payment to you. The Company is not required to make any payment to you in respect of your investment. If the Company shall be wound up or dissolved, the assets available for distribution among the holders of the participating shares shall be distributed in accordance with the respective interests in the respective sub-funds. There is no compensation or guarantee scheme in place that applies to the Company and, if you invest in the Company, you should be prepared to assume the risk that you could lose all of your investment.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Table 1 - Costs over time:

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and, if applicable, how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario;
- 10,000 Euro is invested.

Single investment: 10,000 Euro		
	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	<b>222 Euro</b>	<b>695 Euro</b>
Annual cost impact (*)	2.2%	1.4%

(\*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 0.4% before costs and -1.0% after costs. We may share part of the costs with the person selling you the product to cover the services they provide to you. These figures include the maximum distribution fee that the person selling you the product may charge (1.00% of amount invested. Single investment 100 Euro). This person will inform you of the actual distribution fee.

**Table 2 - Composition of Costs**
