What is this product?

Type: The Fund is a sub-fund of Anima Investment Sicav (the "Company"), an open-ended investment company with variable capital incorporated in the Grand Duchy of Luxembourg and authorised by the Commission de Surveillance du Secteur Financier as a UCITS. The assets and liabilities of the Fund are segregated from those of other sub-funds and cannot be used to pay the debts of other sub-funds of the Company.

Term: The Company has an unlimited life and there is no maturity date for this Fund.

Investment Objective: The objective of the Fund is to increase the value of your investment over the long term. The Fund is actively managed without reference to any benchmark.

The Fund will primarily take long and/or short positions in the global equity markets.

The Fund may also invest in global fixed income, both investment grade and sub investment grade, and currency instruments.

The portfolio's net exposure to equity market risk (long positions less short positions) is between -25% and 50%.

The investment strategy consists in managing a portfolio of long positions on companies considered attractive. The Manager employs an active management approach, using an internal quantitative methodology. The Manager uses a set of Value, Growth, Quality, Momentum and other economic indicators to generate an investment portfolio based on the Manager's global security selection and asset allocation models. The Manager will use a tactical allocation to manage the net exposure to the equity market.

For this purpose the Fund may also invest in derivatives for both hedging and non-hedging strategies, including to implement short positions and to obtain synthetic exposure to companies or markets.

The Fund issues only accumulation shares (shares in which any income earned is added to the share price).

Intended retail investor: This Fund is suitable for retail investors identified on the basis of the following characteristics:

- is an Investor willing to keep the investment for a period of time in line with the Recommended Holding Period; accordingly, the Fund is suitable for Investors with a time horizon medium;
- is an Investor who can bear total capital loss as the Fund is not guaranteed and has a medium-low risk class and a medium-low risk tolerance;
- is an Investor looking for capital growth.

The Depositary of the Fund is BNP Paribas S.A. - Luxembourg Branch.

Copies of the Prospectus and the annual and half-yearly reports of Anima Investment Sicav may be obtained free of charge by visiting www.animasgr.it. These documents are available in English. The Net Asset Value ("NAV") of the Fund is calculated in Euro. The NAV per Share will be published on www.animasgr.it each time it is calculated.

What are the risks and what could I get in return?

The risk indicator assumes you keep the Fund for 5 years, in accordance with the recommended holding period. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to repay the initial capital amount invested.

Other risks that are materially relevant to the Fund and which are not adequately captured in the summary risk indicator:

- **Credit Risk:** the risk that the issuer of a debt instrument may default, in whole or in part, on its obligation to repay the full capital amount invested and/or the interest thereon;
- **Risks associated with investing in derivative financial instruments:** the risk that the strategies implemented through the use of derivative financial instruments may cause substantial losses.

This product does not include any protection from future market performance so you could lose some or all of your investment.
