

## Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of this fund. You are advised to read it so you can make an informed decision about whether to invest.

**ANIMA Credit Opportunities (the “Fund”), a sub-fund of ANIMA Funds plc  
I Class Shares ISIN: IE00BWCH3Z81 (the “Shares”). The Fund has appointed ANIMA SGR SpA, as its UCITS  
management company (the “Manager”), part of the ANIMA Holding S.p.A. group of companies.**

### Objectives and Investment Policy

**Investment Objective:** The objective of the Fund is to seek to provide medium to long term capital appreciation.

**Main categories of financial instruments that are the object of investment:** The Fund will invest globally, mainly in a diversified portfolio of fixed and/or floating rate transferable debt securities of all types (including, but not limited to corporate debt securities, bonds and notes (including inflation linked bonds), zero-coupon and discount bonds, debentures, commercial paper) which are listed or traded on any Recognised Exchange and issued by sovereign, government agencies and/or supranational entities and/or corporate issuers. It is expected that a majority of the Fund’s net assets will be invested in a diversified portfolio of corporate debt securities, either directly or up to 10% of net assets through investment in Collective Investment Schemes, and up to 100% of its entire portfolio may be invested in corporate debt securities with up to 5 years of duration. The Fund may gain an exposure of up to 100% of net assets in instruments which are below investment grade or which are unrated at the time of purchase or which, in the opinion of the Manager, are of comparable quality. In certain circumstances, the Fund may invest up to 30% of its entire portfolio in money market instruments. The Fund’s exposure to non-Euro currencies will generally be hedged, to maintain a low exposure to non-Euro currencies.

The Fund may use Financial Derivative Instruments for (i) hedging, (ii) risk reduction and/or (iii) investment purposes. The Fund may use financial leverage to increase the amount invested in financial instruments to twice the value of the Fund’s net asset value. This means that if there are changes in the prices of the financial instruments the Fund could either gain or lose twice as much as it would gain or lose without using financial leverage.

**Redemption of Shares:** You can ask the Fund to buy back your Shares on any business day whether full or partial repayment of the Shares held is required. Please refer to the Prospectus for further dealing information.

**Benchmark:** The Fund does not aim to track the performance of a benchmark. Portfolio composition is determined based on active and discretionary investment decisions and choices.

**Income:** The Directors may decide to declare to distributions which may be paid out of the capital of the Fund. Please refer to the risks outlined below. Distributions, if declared, will be distributed on an annual basis.

**Recommendation:** This Fund is suitable for investors who are willing to set aside capital for up to 3 years.

### Risk reward and Profile

The historical data used to calculate the synthetic risk indicator cannot provide a reliable indication about the future risk profile of the Fund.

Lower Risk Higher Risk

←-----→

Typically lower rewards Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The Fund has been classified in risk/reward class 3, because the annualized volatility of the weekly returns of the pro-forma asset mix over the last five years is equal to or greater than 2% and less than 5%.

The risk/reward category shown is not guaranteed to remain unchanged and the categorization of the Fund may shift over time. Please note, the lowest category on the indicator does not mean risk free.

**Risks that are materially relevant to the Fund and which are not adequately captured in the risk-reward indicator:**

**Credit Risk:** The risk that the issuer of a debt instrument may default, in whole or in part, on its obligation to repay the full capital amount invested and/or the interest thereon.

**Liquidity Risk:** Where a significant level of investment is made in financial instruments which are by their nature sufficiently liquid, yet which may under certain circumstances have a relatively low level of liquidity, so as to have an impact on the level of liquidity risk of the Fund as a whole.

Dividends may be paid out of the capital of the Fund. As a result capital will be eroded and distributions will be achieved by foregoing the potential for future capital growth and this cycle may continue until all capital is depleted.

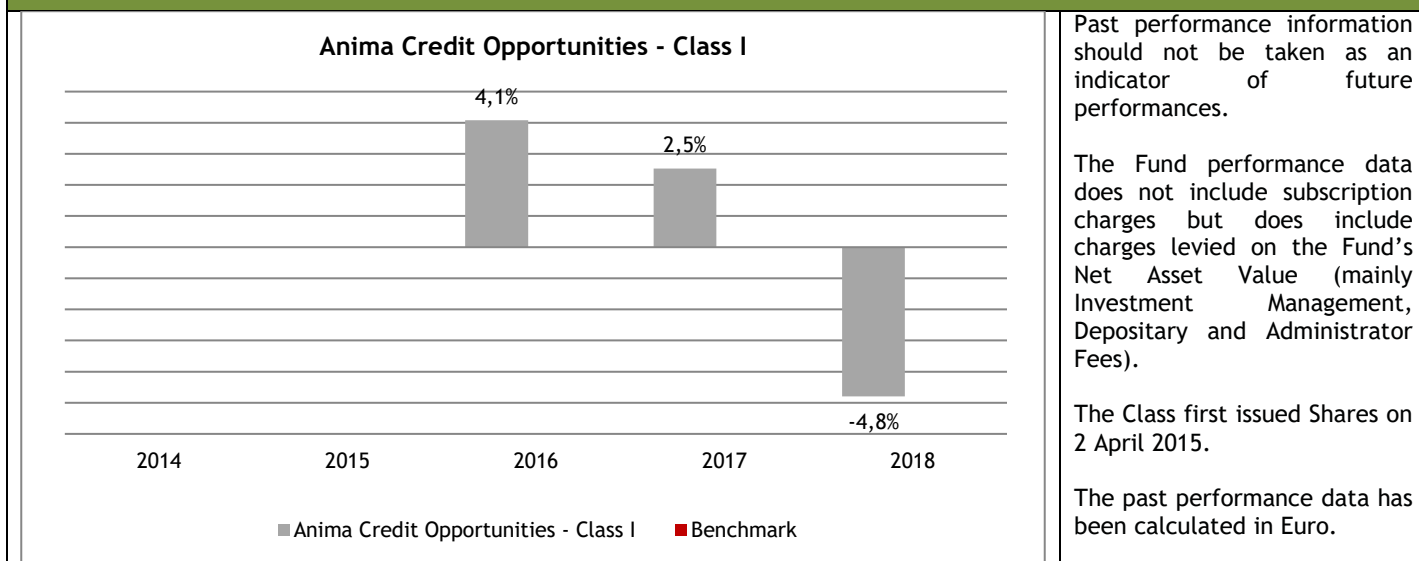

*For further information on the risks related to the Fund please refer to its Fund Information Card and to the section of the Prospectus entitled “Risk Factors”.*
