Objectives and Investment Policy

Investment Objective: The objective of the Fund is to provide an attractive rate of return.

The Fund is “actively managed” in reference to a benchmark, i.e. the Manager has discretion over the composition of its portfolio, subject to the stated investment objective and policy.

Main categories of financial instruments that are the object of investment: The Fund invests a majority of its assets in short term corporate bonds (either directly or indirectly via Collective Investment Schemes). The Fund invests in bonds issued by both corporate issuers with a high credit rating and sovereign states and similar issuers as well as supranational organizations. Investment in unrated securities or securities with ratings lower than the investment grade is residual. The Fund may gain exposures of up to 10% of its net assets to emerging markets globally (Russia included). Exchange rate risks associated with financial instruments denominated in non-Euro currencies will generally be hedged and accordingly the Fund will maintain a low currency exposure. The exposure to exchange rate risk is actively managed.

The Fund may enter into stock lending arrangements for efficient portfolio management purposes, and/or may use Financial Derivative Instruments for (i) hedging, (ii) risk reduction and/or (iii) investment purposes.

The Fund may use financial leverage to increase the amount invested in financial instruments to twice the value of the Fund’s net asset value.

This means that if there are changes in the prices of the financial instruments the Fund could either gain or lose twice as much as it would gain or lose without using financial leverage.

Redemption of Shares: You can ask the Fund to buy back your Shares on any business day whether full or partial repayment of the Shares held is required. Please refer to the Prospectus for further dealing information.

Benchmark: 90% ICE BofA 1-3 Year Euro Large Cap Corporate, 10% Bloomberg Barclays Euro Treasury Bill. The Fund does not aim to replicate the composition of the Benchmark. The Fund also invests in securities which are not included in the indices or which are present in different proportions.

Degree of discretion with respect to the Benchmark: significant.

Income: No dividend is payable on the Shares. Income earned by the Fund will be retained by the Fund and will be reflected in the value of your Shares.

Recommendation: This Fund is suitable for investors who are willing to set aside capital for up to 3 years.

Risk reward and Profile

The historical data used to calculate the synthetic risk indicator cannot provide a reliable indication about the future risk profile of the Fund.

The Fund has been classified in risk/reward class 2 because the annualized volatility of its weekly returns over the last five years is equal to or greater than 0.5% and less than 2%.

The risk/reward category shown is not guaranteed to remain unchanged and the categorization of the Fund may shift over time. Please note, the lowest category on the indicator does not mean risk free.

Risks that are materially relevant to the Fund and which are not adequately captured in the risk-reward indicator:

Liquidity Risk: the risk that, in certain market conditions, financial instruments may not be readily sold, unless substantial losses are incurred.

Credit Risk: The risk that the issuer of a debt instrument may default, in whole or in part, on its obligation to repay the full capital amount invested and/or the interest thereon.
