Description

ANIMA Funds Plc (the “Company”) is an open ended umbrella investment company with variable capital and segregated liability between sub-funds (each a “Fund”, collectively the “Funds”) incorporated with limited liability in Ireland under the Companies Act, 2014 with registration number 308009 and authorised under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”) and subject to the Central Bank (Supervision & Enforcement) Act 2013 (Section 48(1) (Undertakings for Collective Investment in Transferable Securities)) Regulations 2019 (the “Central Bank UCITS Regulations”).

The Company is structured as an umbrella investment company in that different Funds may be established with the prior approval of the Central Bank. In addition, each Fund may issue more than one Share Class. The Shares of each class issued by a Fund will rank pari passu with each other in all respects except as to all or any of the following:

- currency of denomination of the class;
- hedging strategies;
- dividend policy;
- the level of fees and expenses to be charged; and
- the minimum subscription and minimum holding applicable.

The assets of each Fund will be separate from one another and will be invested in accordance with the investment objectives and policies applicable to each such Fund.

The Funds in existence during the financial year were as follows:

* Please refer to Note 22 to the financial statements for details of Fund launches, Fund mergers and Fund terminations during the financial year.

** This Fund changed name during the financial year, see Note 22 for further details. The new name is used throughout the financial statement.

Categories of Funds

The Funds are detailed below under three headings as per the Prospectus: Markets Funds, Strategies Funds and Solution Funds.

- Markets Funds: means a traditional bond or equity type Fund, which seeks to achieve its objective through investment in transferable securities and financial derivative instruments.
- Strategies Funds: means a Fund, the policy of which has been formulated with a view to following a particular trading or investment strategy.
- Solution Funds: means a Fund, the policy of which has been formulated with a view to providing investment solutions over a specific timeframe.

Segregated Liability

The Company is structured as an open-ended umbrella investment company with segregated liability between its Funds. While the provisions of the Companies Act, 2014, as amended provide for segregated liability between Funds, these provisions have not been tested in foreign courts, in particular in satisfying local creditors' claims. Accordingly it is not free from doubt that the assets of any Fund of the Company may not be exposed to the liabilities of other Funds.

Investment Objectives

Please refer to the Prospectus for each Fund's investment objectives and policies.

Manager

The Company has appointed ANIMA SGR S.p.A. as manager of the Company (the "Manager") pursuant to the Management Agreement. Under the terms of the Management Agreement the Manager is responsible, subject to the overall supervision and control of the Directors, for the management, investment management and administration of the Company's affairs, and the distribution of Shares.

ANIMA SGR S.p.A. is regulated as a funds management company by Bank of Italy and is a 100% direct subsidiary of ANIMA Holding S.p.A.. Ordinary shares of ANIMA Holding S.p.A. are listed on the MTA (Mercato Telematico Azionario) of the Italian Stock Exchange.

Net Asset Value

The Net Asset Value of a Fund is determined by valuing the assets of each relevant Fund (including income accrued but not collected) and deducting the liabilities of each relevant Fund (including a provision for duties and charges, accrued expenses and fees and other liabilities). The Net Asset Value of a class is determined by calculating that portion of the Net Asset Value of the relevant Fund attributable to the relevant class subject to adjustment to take account of assets and/or liabilities attributable to the Class. The Net Asset Value of a Fund is expressed in the base currency of the Fund. The base currency of each Fund may vary as a result of the primary economic environment in which it operates.

The Net Asset Value per Share is calculated by dividing the Net Asset Value of the relevant Fund or Class by the total number of Shares in issue in the Fund or Class at the relevant Valuation Point rounded to four decimal places.

Issue and Redemption of Shares**Issue of Shares**

Applications for Shares should be made to the Administrator or to the Distributor for onward transmission to the Administrator. Applications received by the Administrator or by the Distributor prior to the Dealing Deadline for any Dealing Day are dealt with on that Dealing Day. Any applications received after the Dealing Deadline will be dealt with on the following Dealing Day unless the Directors in their absolute discretion determine otherwise provided that the application is received before the Valuation Point. Minimum Subscription amounts are disclosed in the Fund or Class Information Card in the Prospectus.

Redemption of Shares

Applications for the redemption of Shares are made to the Administrator or to the Distributor for onward transmission to the Administrator. Requests for redemptions received prior to the Dealing Deadline for any Dealing Day are dealt with on that Dealing Day. Any requests for redemptions received after the Dealing Deadline for a Dealing Day will be dealt with on the next Dealing Day unless the Directors in their absolute discretion determine otherwise provided that the application is received before the Valuation Point. Redemption requests will only be accepted where cleared Funds and completed documents are in place for original subscriptions. There is no minimum redemption transaction size for any Class of Share in any Fund. Shareholders should note that if a redemption request would, if processed, leave the Shareholder holding Shares having a Net Asset Value of less than the Minimum Holding, the Directors may, in their discretion, redeem the whole of the Shareholder's holding. The redemption price per Share shall be the Net Asset Value per Share less applicable duties and charges.

Published Information

The Net Asset Value per Share is made available at the registered office of the Administrator during normal business hours and at the following website www.animasgr.it/en not later than the third Business Day following the relevant Valuation Point. The Prospectus also allows for publication in such other places as may be determined by the Directors from time to time. The Directors of the Company have approved the daily publication of the Net Asset Value per Share in "Il Sole-24 Ore" (Italian daily newspaper).

The Directors submit their report together with the audited financial statements of the Company for the financial year ended 31 December 2022.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' report and the financial statements in accordance with Irish law. Irish law requires the Directors to prepare financial statements for each financial year that gives a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and of the profit or loss of the Company for the financial year. Under that law the Directors have prepared the financial statements in accordance with International Financial Reporting Standards and Irish law.

Under Irish law, the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and the profit or loss of the Company for the financial year.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in question, subject to any material departures from those standards being disclosed and explained in the notes to the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping proper books of account that disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 2014, as amended.

The Directors confirm that they believe that they have complied with the above requirements in preparing the financial statements.

The Directors are responsible for the maintenance and integrity of the corporate and financial information relating to the Company which may be included on the Manager's website. Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

In carrying out the above requirements the Company has appointed ANIMA SGR S.p.A. as Manager of the Company (the "Manager") and the Manager has appointed State Street Fund Services (Ireland) Limited to act as administrator (the "Administrator") of the Company. The Directors believe that they have complied with the requirements of the Companies Act, 2014, as amended, with regard to accounting records by employing an experienced administrator with appropriate expertise and by providing adequate resources to the financial function. The accounting records of the Company are maintained by the Administrator at 78 Sir John Rogerson's Quay, Dublin 2, Ireland.

The Directors are also responsible for safeguarding the assets of the Company. In this regard they have appointed State Street Custodial Services (Ireland) Limited (the "Depositary") as depositary to the Company pursuant to the terms of a depositary agreement. The Directors have a responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities.

Compliance statement

The Directors acknowledge that they are responsible for securing compliance by the Company with its Relevant Obligations as defined with the Companies Act 2014 (the "Relevant Obligations"). The Directors confirm that they have drawn up and adopted a compliance policy statement setting out the Company's policies that, in the Directors' opinion, are appropriate to the Company in respect of its compliance with its Relevant Obligations.

The Directors further confirm the Company has put into place appropriate arrangements or structures that are, in the Directors' opinion, designed to secure material compliance with its Relevant Obligations and that measures have been taken throughout the financial year to which this Report relates to meet and satisfy the Company's compliance with the Relevant Obligations.

Relevant audit information

The Directors have taken all the steps that they ought to have taken as Directors in order to make themselves aware of any relevant audit information and to ensure that the Company's Statutory Auditors are aware of this information.

Audit Committee

The Company has not established a separate Audit Committee as the Directors operate as a unitary Board whilst considering such related matters. The Directors believe that the Company's straightforward structure together with the delegation of responsibilities to the Manager does not warrant such a function. This is reviewed by the Board annually.

Transactions with Connected Persons

Regulation 43(1) of the Central Bank UCITS Regulations "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the unit-holders of the UCITS".

As required under Central Bank UCITS Regulation 81.(4), the Directors, as responsible persons, are satisfied that there are arrangements in place, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected persons that were entered into during the period to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

Employees

There were no persons employed by the Company during the financial year.

Review of performance of the business, principal activities and future developments of the business

A detailed performance review of the business, the Funds' principal activities and future developments is included in the Manager's Report for each Fund.

Principal risks and uncertainties

Under the Companies Act 2014, as amended, the Company is required to give a description of the principal risks and uncertainties which it faces. Investment in the Company carries with it a degree of risk, including, but not limited to, the risks referred to below and in Notes 2 and 3 of these Financial Statements. Information about the financial risk management objectives and policies of the Company is also discussed in Notes 2 and 3.

The principal risks and uncertainties facing the Company include Market risk, Credit risk and Liquidity risk. These risks should not be regarded as a complete and comprehensive statement of all potential risks and uncertainties. The Prospectus issued by the Company discloses a variety of other risks and uncertainties which investors should consider before investing. Other risks may arise of which the Board is not aware or which it deems immaterial.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risks: currency risk, interest rate risk and other price risk. Market risks are referred to in Note 3 of these Financial Statements.

Credit risk is the risk that the issuer or the counterparty of a financial instrument will be unable to pay amounts in full when they fall due. Credit risk comprises two types of risks: issuer risk and counterparty risk.

All securities, cash at bank balances are held by the Depository, State Street Custodial Services (Ireland) Limited. Bankruptcy or insolvency of the Depository, State Street Custodial Services (Ireland) Limited, may cause the Company's rights with respect to cash and securities held by these entities to be delayed or limited and the Company would be treated as a general creditor of that entity in respect of its cash balances. Periodic monitoring and an annual review are performed on the Depository by an outsourcing monitoring team of the Manager. This review may include as appropriate an assessment of the Depository's liquidity position, income streams, asset quality and credit ratings. Credit risk is referred to in Note 3 of these Financial Statements.

Liquidity risk is the risk that the Funds will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial assets. Delivery obligation may arise from: account payable (i.e. management fees, depositary fees, etc.), financial derivative instruments, cash redemptions of redeemable participating shares. Liquidity risks are referred to in Note 3 of these Financial Statements.

Going Concern

The Directors have made an assessment of the Company's ability to continue as a going concern and are satisfied that the Company will continue in business for the foreseeable future. Notwithstanding the challenging global financial environment, the management is not aware of any material uncertainties that may cast doubt upon the Company's ability to continue as a going concern. Therefore the financial statements continue to be prepared on a going concern basis. The Directors consider that the financial statements taken as a whole are fair, balanced and understandable.

Accordingly, having assessed its principal risks, the Directors of the Company believe that the Company is well placed to manage its risks successfully and it is thus appropriate to prepare the financial statements on a going concern basis. The Company does not have a fixed life. The Directors of the Company consider that the financial statements taken as a whole are fair, balanced and understandable and they provide the information necessary for the shareholder to assess the Company's position, performance, business model and strategy.

The Directors of the Company do not believe that there is any material uncertainty that casts any doubts on the Company's ability to continue as a going concern.

Results and distributions

The results and distributions for the financial year are set out in the Statement of Comprehensive Income for each Fund.

Distribution Policy

The Articles of Association of the Company empower the Directors to declare dividends in respect of any Shares in the following Funds out of the net income, realised gains or capital standing to the credit account of the Fund:

*Please refer to Note 22 to the financial statements for details of Fund launches, Fund mergers and Fund terminations during the financial year.

The above details are in summary form only and must be read in conjunction with the detailed information contained within the Prospectus of the Funds.

Significant events during the financial year

Significant events during the financial year are disclosed in Note 22 to the financial statements.

Significant events after the financial year end

Significant events after the financial year end are disclosed in Note 23 of the financial statements.

Corporate Governance Code

The Irish Funds association ("IF") in association with the Central Bank has published a corporate governance code (the "IF Code") that may be adopted on a voluntary basis by Irish authorised collective investment schemes. The Company adheres to the IF Code.

Directors

The name and nationality of persons who were Directors at any time during the financial year ended 31 December 2022 are set out below. All Directors are non-executive directors.

Andrew Bates, Chairman (Irish)
 Rory Mason (Irish - Independent Director)
 Pierluigi Giverso (Italian)
 Davide Sosio (Italian)
 Agostino Ricucci (Italian)

Directors' and Secretary's interests

None of the Directors or the Company Secretary hold or held any beneficial interest in the shares of the Company during the financial year.

Other than as disclosed in Note 17, no Directors had at any time during the financial year or at the financial year end, a material interest in any contract of significance, in relation to the business of the Company.

Independent Auditors

Deloitte Ireland LLP, Independent Auditors, have signified their willingness to continue in office in accordance with section 383(2) of the Companies Act 2014.

Sustainable Finance Disclosure Regulation

Sustainable Finance Disclosure Regulation are disclosed in Appendix III.

On behalf of the Board of Directors:

Markets

Inflationary pressures, commodity price fluctuations, the restrictive stance of central banks, geo-political tensions, the pandemic, the energy crisis have all influenced the performance of the financial markets in 2022, intensifying fears of stagflation and growth deterioration. The increase in upward pressure on interest rates was accentuated by the particularly aggressive approach by the Fed and the ECB, aimed at countering inflationary dynamics. Risk aversion, widespread and sudden increases in volatility and heavy losses were evident in both the equity and bond segments, despite some phases of partial recovery.

Year-on-year, at the end of 2022, the MSCI World Local global stock index recorded a performance of around -16% in local currency, with declines on all major indexes in developed countries: USA (about -20%), Europe (about -9%), Euro (about -12.5%), Japan (about -5%); the UK index was an exception, which closed 2022 with a positive result of around +7%. The Emerging Markets equity index was down around 16%, particularly affected by the Chinese downturn (around -20%). The best sector performance, globally, was recorded by the energy sector, the worst by communication services, consumer discretionary goods and information technology.

Even the bond indexes, in 2022, recorded negative results on global government bonds (the reference index recorded around -13% year-on-year): inflation expectations and real rates led to an increase in yields. The losses in the various geographical areas varied between approximately -12.8% in the USA and -18% in the Euro area (the losses recorded by the German and Italian indexes were only slightly better). The yield of the 10-year BTP at the end of 2022 was 4.68%; the BTP-Bund spread stood at just over 212 basis points at the end of 2022. The pressures on the short end of the curves were driven by the progressive repricing of monetary normalization expectations. The real component, with alternating impacts, had a contrasting impact on the dynamics of interest rates and on the slope of the curves. Corporate bonds (around -14% year-on-year in 2022) were also penalized by both the rise in rates and the widening spreads, despite some tightening in the last quarter of the year.

The Euro/Dollar exchange rate stood at 1.07 at the end of 2022, after repeatedly falling below parity between August and November. The last quarter of the year saw a partial recovery of the Euro, when the Dollar lost strength. After the Bank of Japan expanded its 10-year government bond yield target range to 0%+/-0.5% in December, the Yen strengthened significantly and the 10-year bond recorded a sharp jump in yield.

At the end of 2022, the price of gold stood at around 1,824 dollars an ounce (1,826.2 for futures), down slightly year-on-year. After losses caused by US real rates and the strength of the dollar, gold recorded a significant rebound from November, to the point of almost cancelling the losses suffered between the second and third quarters.

After periods of volatility, oil prices fell back from the highs of March and June, recording, however, an increase of around 10.4% for Brent and 6.7% for WTI year-on-year in 2022.

In 2022, many raw materials experienced phases of strong volatility, with a significant rise in prices but, at the same time, uncertainties about the stability of demand and global growth penalized the prices of other basic materials (aluminium, copper and steel). European natural gas also experienced high volatility.

Macroeconomic Scenario

Following the invasion of Ukraine, Western countries imposed economic sanctions and embargoes on Russia, and also provided military support to Kiev. The evolution of events led to strong alterations in the prices of energy and, albeit to a lesser extent, agriculture. Today, there are still no concrete signs to suggest the suspension or end of hostilities.

Despite the resumption of the COVID outbreaks in Europe and the USA between the summer and autumn, the pressures on the health systems appeared to be under control. At the beginning of 2023, China abandoned its 'zero-COVID' policy, with significant implications for the slowdown of the economy and risks for growth.

Pressures on the side of demand, raw materials and energy and bottlenecks in supply fuelled price momentum, while the pandemic, war and extreme weather events led to a hike in food inflation and an increase in consumer prices. Except in China and Japan, the main central banks have adopted restrictive monetary policies to counter inflation, sometimes even reducing extraordinary stimulus. In the first two months of 2023, the growth dynamics in the main economies are cooling only minimally and extremely slowly. Headline inflation has shown some downturns, but the pressures of the core components remain robust and persistent.

The Fed has accelerated tapering and indicated that it intends to proceed with rate hikes and balance sheet normalization faster than expected. The FOMC raised interest rates by 25 basis points in March, 50 in May and 75 in June, July, September, November, slowing down in December with a 50 basis point increase following the better-than-expected autumn inflation data, reaching the range 4.25%-4.5%. The FOMC raised interest rates by a further 25 basis points in February 2023, reaching the 4.5%-4.75% range, slowing the pace of the increases, but foreseeing further incremental steps in the next meetings until clear evidence emerges of a slowdown in inflation.

After accelerating the reduction in purchases, the ECB underlined how the increase in energy prices could represent a significant risk for the inflation outlook. To limit excessively divergent trends in financial conditions, and control government spreads, in mid-June flexible reinvestments of the pandemic plan - PEPP - were launched and the completion of the new anti-fragmentation tool TPI (Transmission Protection Instrument) was accelerated, with the aim of ensuring support for the transmission of the

monetary policy. The ECB announced the early end of Quantitative Easing, raising rates by 50 basis points in July, 75 in September and October, and 50 in December with the aim of stable inflation at 2% in the medium term. A further 50 basis points were added in February 2023, bringing the deposit rate to 2.5%, the ECB's announcements expressed aggressive rhetoric in forecasts of future actions during the year.

The Bank of England raised the reference rate with four steps of 25 basis points in the first half, 50 in August and September, 75 in November, and a further 50 in December. From early 2023, the rate was raised by a further 50 basis points in February, reaching 4%.

The Bank of Japan reiterated the need to continue supporting the economy, stemming the upward pressure on interest rates. Following a government order, an operation was conducted on the foreign exchange market to limit the depreciation of the Yen; however, towards the end of the year, the Central Bank doubled the ceiling on 10-year JGB yields to 0%+/-0.5%, announcing an increase in the pace of bond purchases. At its January meeting, the Bank of Japan maintained the same accommodative monetary policy stance, continuing to support the economy and curbing upward pressure on rates.

The People's Bank of China also remained accommodative by cutting rates, cutting the reserve requirement ratio and accelerating monetary and fiscal support to boost the economy.

War, inflation, the energy crisis, the pandemic and tightening financial conditions have significantly worsened expectations for global growth. The United States recorded a decline in GDP in the first two quarters of 2022, coinciding with the initial tightening by the Fed. Overall, consumption held up, with a tendency for demand to rotate from goods to services. Retail sales experienced some ups and downs, as did manufacturing and durable goods orders and industrial production. The dynamics of supply suffered more restrictive financial conditions, which weighed on the manufacturing sector; the news flows on corporate earnings were mixed. The labour market showed positive data: the unemployment rate, stable and low, was slightly higher than pre-COVID levels; wage growth led to significant inflationary effects. The cyclical indicators, which expanded in the first half of the year, showed some crossings into the recession area from September; consumer confidence fell compared to the start of 2022, albeit with some surprises on the upside. Prices recorded an increase due to inflationary pressure driven by demand: consumer and producer prices, after prolonged growth in October and November, slowed down somewhat. 2023 opened with confirmation of the tightness of the labour market, with unemployment declining, while wage growth led to inflationary effects. The US economy remains resilient, providing mixed and conflicting signals about the strength of aggregate demand. Some cyclical indicators fell into the recession area. Consumer confidence held up, but with some slowdown in expectations. The main indicators (CPI and PPI) revealed an inflation trend that remained consistent.

In the Euro area, the dynamics of real GDP in 2022 signalled different economic impacts for the various countries. Growth had benefited from the recovery of domestic demand, which was accompanied by less impressive investments and exports. Retail sales slowed after a moderate spring recovery; industrial production slowed appreciably in July, to then recover moderately between August and September. Cyclical indicators showed progressive declines, falling into the recession area: business confidence worsened both in the manufacturing sector and the services sector; consumer confidence also showed a persistent negative turn. Unemployment (stable at around 6.5%) fell below pre-COVID levels, with an increasing participation rate. Headline inflation, which grew in both production and consumption data, was driven by energy, raw material and food prices.

In the first two months of 2023, data in the Euro area signalled the resilience of the economy and a slight decline in headline inflation, which was however accompanied by the stability of core inflation. Fears of an energy crisis were temporarily averted, and governments also intervened with tax measures to support businesses and consumers. Retail sales and industrial production recorded declines. With regard to the cyclical indicator (PMI), both the composite figure and that of the services sector improved, rising above the expansionary threshold and expectations. Confidence among manufacturing businesses, on the other hand, slowed, remaining in the recession area. The supply chain is improving. Consumer confidence is on the rise.

In China, growth was held back by COVID restrictions. Up to May, the cyclical indicators (PMI, Caixin) remained below the expansionary threshold, later exceeded in the summer data; however, the economic rebound has since lost momentum; the January 2023 surveys recorded improvements as far as exceeding the expansionary threshold, with the exception of a slight divergence on the manufacturing index. The real estate market suffered a slowdown in investments, a profound contraction in sales and a drop in prices. Inflation is under control, with weak growth in consumer prices and decelerating producer prices.

In December the dynamics of domestic demand showed some weakness; industrial production stabilized, while international commercial activity recorded a contraction.

In the first two months of 2023, the removal of the zero-COVID policy progressed, facilitating an increase in mobility.

Outlook

The publication of macroeconomic data suggests that the major economies may slow down with weak growth between the second and third quarters of 2023.

Among Developed Markets, conflicting signals on the strength of aggregate demand lead to expectations that the US could enter a shallow and short-lived recession; without excluding the possibility of such recession being further delayed due to a mild cyclical weakening. Demand for goods and services could continue to hold up due to positive consumer confidence supported by a solid labour market, bank credit and savings. Future tighter lending conditions could lead to contractions in investments.

The growth prospects for the Euro area include a scenario similar to that envisaged in the US for a possible recession, but with different characterizing factors: the composite leading indicator (PMI) are pointing in a positive direction, the stabilization of the price of gas and the mitigation of the looming energy crisis could encourage the recovery of even the most energy-intensive companies, while the dynamics of consumption appear less positive than in the US. Credit conditions appear more restrictive in the future.

Thanks to the progressive and rapid removal of the zero-COVID policy, in China, the recovery phase is moving on vigorously and should provide a significant boost to the economy. Looking ahead, in terms of the measures adopted to continue to support the real economy, rather than monetary easing, policy makers could continue to maintain fiscal stimuli through infrastructure investments and subsidized credit.

It is believed that the dynamics of inflation, in Developed Markets, could lead to uncertainty both in the USA and in Europe: prices could still remain rather volatile for some time, with asymmetric dynamics in the various European areas.

In the US, the headline and core inflation profiles have been revised upwards, mainly incorporating certain mechanical effects of the revision of the data: risks are believed to be tilted to the upside, with possible implications for interest rates due to prices of core goods and services that are potentially more rigid than previously anticipated.

Even in the Euro area, the prospects for inflation remain complex, especially in relation to the divergence between the headline components, which are slowing down due to energy disinflation, and the stubbornly persistent core components.

In China, inflation will gradually accelerate, however it will remain conditioned by producer prices, which are held back by the decline in the energy component.

Monetary policy in Developed Markets, geared towards tighter financial conditions, will continue to aim at containing inflation expectations. Central Banks will maintain restrictive stances, albeit with a change in hawkishness compared to the past. Actions and rhetoric had supported investors' expectations for a softening of the hawkish approach, more or less quickly in the various geographical areas; however, the peak of the restrictive cycles was revised upwards and the expectations of cuts diminished.

Within the FOMC, risk management considerations should continue to prevail in determining the reaction function and the terminal rate. With headline inflation still strong and solid labour market data, the Fed Funds Rate could see further increases at upcoming meetings. If the data on jobs and prices maintain the current line and PCE spending rebounds, the hike cycle could be extended at least until June. The Fed has indicated that an easing of financial conditions is not currently in the future plans, however, a trend reversal could occur in the second half of 2023, as a consequence of a possible slowdown in US growth, an increase in unemployment and a convincing core CPI trend towards the target.

The ECB also announced the continuation of the increase in rates, constrained by persistently rising core inflation for both goods and services, in the light of rising wage prospects, and thanks to more resilient growth than expected. The uncertainty over the announced upward path remains connected to growth outlook, the risks of its deterioration and the evolution of inflation dynamics.

In China, where inflation does not appear to show excesses, the PBoC is expected to maintain stable rates, such as to facilitate, with ample liquidity, the flow of credit to businesses and consumers, confirming, in the first half of the year, a moderately expansive approach. In the second half of 2023, it is conceivable that the PBoC will gradually normalize monetary policy as growth momentum strengthens and inflationary pressure mounts as a result of the reopening.

The global stock markets, conditioned by the extreme variability of news flows, lead us to continue to focus on the performance of the macroeconomic picture and the fundamentals, on the possible decline (or exhaustion) of system liquidity flows that facilitated their rise and on the possible magnitude of a future sell-off. In the event of a possible future mild and temporary recession, the cyclical slowdown could already be partially priced into the markets and be manifested less intensely and immediately than assumed in the past. Expectations on earnings could already incorporate some risks related to the slowdown or the conceivable contraction phase of the activity, while the erosion of margins, due to the previous increase in energy costs, could prove to be more limited than feared. The extent and timing of a possible recession will be crucial for the evolution of future equity dynamics.

The hawkish action of the Central Banks, with particular attention to the Euro area, introduces further factors of uncertainty, potentially a hindrance and capable of generating volatility. Even the BoJ and PBoC, currently still in an expansionary phase, could abandon the easing approach. This suggests that a neutral view on equities be maintained, as far as Developed Markets are concerned, to an extent suitable for dealing effectively with the climate of persistent uncertainty, favouring value over growth: given that we are unable to exclude phases of correction, in a short-term perspective, the progressive positioning to more defensive sectors could prove to be effective. There continues to be a moderately positive view on China due to the continued reopening, the potential to support the economy and the benefits that could also be reflected in the other Emerging Markets in Asia.

In the government bond segment, the distinctly hawkish rhetoric of the Fed and the ECB has continued to put strong upward pressure on short-term rates; already, government bond yields have reached interesting levels, and in the medium term they will continue to be worthwhile investments. This is based on defensive considerations, in the face of possible signs of an economic slowdown and a decline in inflation, which could lead both the Fed and the ECB to adopt less hawkish attitudes. Since we cannot exclude that further increases could lead to further bad debts, the combination of the aforementioned factors of uncertainty,

combined with the awareness that rates are unlikely to fall in the short term, suggest that overall neutral views be adopted on bonds and duration, pursuing tactical repositioning. The risks associated with the quantitative tightening will have to be assessed from time to time, especially with regard to the BTP: the more stringent financing conditions, the prospective funding needs, the substantial amount of domestic debt and the tight spread suggest we should maintain an approach of greater caution. With regard to corporate bonds, there are currently no factors emerging that could lead to an easing of financial conditions. A cautious and selective approach is required in view of the significant narrowing of spreads. The aim of curbing excesses of volatility and illiquidity suggests that we should favour a good level of diversification, directing the selection towards high quality issuers. The investment grade segment offers better access to the market, also by virtue of a stable basic demand and attractive yields along the subordination scale, without having to chase credit risk. In the high-yield segment, in the face of copious issuances, there is the risk that the market could suffer from a certain overcrowding: looking ahead, the more fragile companies with lower credit ratings could encounter difficulties in refinancing their debt, also due to high issuance rates.

Strong uncertainty remains over the Euro/Dollar exchange rate, in relation to the impact of the flow of news from the Fed and the ECB. The unbalanced risks associated with relative currency weakness could, on the Euro side, cause an increase in imported inflation. The dynamics of the Yen should be carefully evaluated in relation to possible future changes in the BoJ's monetary policy.

With regard to commodities, the fears of recession are contrasted by the Chinese reopening, which could continue to support the prices of raw materials. On the energy front, the variety of sources and the differences between geographical areas could compromise the transmission of the easing of upstream pressures to the real economy. The accumulation of reserves, facilitated both by the mild climate (and in part the seasonality) and by the reduction in consumption, could help to keep gas prices down in the rest of 2023.

During 2022, each of the Funds reported a net negative absolute performance. The objective of each Fund is to seek to provide a positive investment return linked to an exposure to a dynamically managed basket of equity and fixed income indices, while aiming to protect the Fund's NAV per Share at a specific determined percentage of the initial offer price at the maturity date. Each Fund can pay specific defined coupons and aims to achieve its investment objectives by direct investment in debt instruments to achieve the protection element, by entering into an Interest Return Swap and by exposure to the Actively Managed Portfolio.

The management of the Funds is linked to a buy and hold strategy for the whole portfolio.

ANIMA Brightview 2023-I

During 2022, the Fund reported a net negative absolute performance. The objective of the Fund is to seek a positive investment return linked to an exposure to a dynamically managed basket of equity and fixed income indices, while aiming to protect the Fund's NAV per Share at 90% of the initial offer price at the maturity date. The Fund aims to achieve its investment objectives by direct investment in Debt instruments to achieve the protection element, entering into a Total Return Swap, and by exposure to the Actively Managed Portfolio. The Fund reached maturity at the beginning of 2023.

ANIMA Thematic VI

During 2022, the Fund reported a negative absolute performance. The objective of the Fund is to seek a positive investment return linked to an exposure to a dynamically managed basket of equity and fixed income indices, while aiming to protect the Fund's NAV per Share at 100% of the initial offer price at the Maturity Date. The Fund aims to achieve its investment objectives by direct investment in Debt Instruments to achieve the protection element, entering into an Interest Rate Swap, and by exposure to the Actively Managed Portfolio.

Currently the Fund is in the subscription period.

ANIMA Thematic VII

During 2022, the Fund reported a slight positive absolute performance. The objective of the Fund is to seek a positive investment return linked to an exposure to a dynamically managed basket of equity and fixed income indices, while aiming to protect the Fund's NAV per Share at 100% of the initial offer price at the Maturity Date. The Fund aims to achieve its investment objectives by direct investment in Debt Instruments to achieve the protection element, entering into an Interest Rate Swap and exposure to the Actively Managed Portfolio.

Currently the Fund is in the subscription period.

ANIMA Orizzonte Benessere 2023, ANIMA Orizzonte Consumi 2023, ANIMA Orizzonte Energia 2023, ANIMA Orizzonte Europa 2022, ANIMA Orizzonte Europa 2023 – Rendimento Bilanciato, ANIMA Orizzonte Sostenibile 2023

During 2022, each Fund reported a net negative performance. Each Fund is primarily structured to seek to provide a positive return to investors at the maturity date. The objective of each Fund is to seek to provide Shareholders with Dividends on the Dividend Payment Dates and capital appreciation at the Maturity Date, while trying to limit downside in adverse market conditions. After the maturity date, the objective of each Fund will be to provide liquidity and current income, to the extent of preservation of capital. Each Fund will seek to achieve its investment objective by investing in different components: debt instruments, Interest Rate Swap and Equity Swap. Each Fund can pay specific defined coupons. The Equity exposure is obtained through a Forward on a basket of multi-asset indices (the equity indices represent the theme of the Funds) with a Risk control mechanism. During 2022, this component contributed negatively to the performance of each of the Funds as the underlying posted a negative performance.

The management of each Fund is linked to a buy and hold strategy for the whole portfolio.

ANIMA Active Selection

During 2022, the Fund reported a net negative performance. During the year the Fund invested in a range of Funds managed by ANIMA, AXA and Alliance Bernstein. The Fund invests in Core and Satellite portfolios with the Core portfolios representing lower risk assets as compared to the Satellite portfolios. The Core invested mainly in fixed income funds, but the Fund maintained an exposure also to flexible bond Fund, flexible equity Funds, money market Funds and liquidity. Regarding the duration of the Fund, it moved between a maximum of 3.0 years in April to a minimum of 2.0 years at the end of the year. The Fund started the year with an exposure to the Satellite portfolio of around 60%; then the equity volatility started to increase significantly at the end of February, as indicated by the proprietary model, the weight of the satellite portfolio was decreased initially to around 35-40%, then the Satellite portfolio was decreased further and at the end of June was at around 30%. In the second half of the year the Satellite was maintained between 35% and 48% as indicated by the proprietary allocation model. At the end of December, the Satellite portfolio was at around 42% and the Core at 58%. The Fund's negative return during the year was attributable mainly to the negative contribution of the Satellite portfolio, but also the Core portfolio, due mainly to the allocation to fixed income and flexible bond Fund, generated a negative contribution.

The Fund will continue to aim to achieve its investment objectives by investing in two different components, Core and Satellite portfolio, as indicated by the proprietary allocation model.

ANIMA Asia/Pacific Equity

The Fund's performance for 2022 was negative in absolute terms and flat relative to the benchmark. During 2022, the portfolio maintained a slightly lower equity exposure than the benchmark. Within the Pacific region, Japan (with an export-reopen play-trading company overweight sector exposure and a tech-semiconductor underweight exposure) and Australia (with a material and financials overweight exposure) were preferred during the year while maintaining a lower exposure to Hong Kong and Singapore.

ANIMA Bond Dollar

The Fund's performance in 2022 was negative in absolute terms. The management of the Fund relies on a quantitative investment process based on a risk budget within a defined tracking error limit. During the year, on average, the Fund had a bond exposure equal to 95% of the portfolio, mainly allocated to US Treasuries. During the year, the Fund duration was aligned with that of the benchmark: at the end of December, it was 6 years. The gross Fund performance at the end of the year was -6.94%, compared to the benchmark of -6.79%.

The Fund follows a management style characterized by a limited level of Tracking Error compared to the reference benchmark.

ANIMA Bond Flex

The Fund's performance in 2022 was negative in absolute terms. The initial exposure was very prudent both in terms of allocation (only government bonds from developed countries) and in terms of exposure to interest rate risk. The duration was slightly negative, concentrated on US Treasury and German Bund. The main currency exposure saw a long USD vs. EUR of just over 3% held as a countercyclical currency that does well during bouts of risk-off. Duration was managed tactically given the volatility and the movement of rates. We moved from negative to positive rates exposure by February and, since then, we increased exposure

ANIMA Bond Flex (continued)

as we thought that the market would put more attention to the negative effect of the Ukraine war on growth rather than on inflation. During the summer, Fund performance recovered thanks to the bond rally as worries about a global growth slowdown seemed to have replaced that of high inflation. Short covering in all likelihood exacerbated the rally. Peripheral spreads stabilized, supported by a decrease of volatility. On currency, we closed the long USD v.s. EUR exposure as we reached our target level. With the fading of the summer seasonality and the Fed Chair Jerome Powell's Jackson Hole speech, yield picked up aggressively. We slightly reduced duration exposure, maintaining a constructive approach to US Treasuries relative to the Bund. We maintained carry trades (via BTPs) on the 3-5 year bucket. The portfolio did not change this approach until the end of the year, calibrating risk rate exposure according to the level reached by rates given the volatility that characterized the last quarter. Therefore, the Fund maintained a long duration through US Treasury and Bund futures, we kept a low risk profile on long-end BTPs while investing on the short and medium part of the BTPs curve for carry and roll-down purposes.

The great repricing of 2022 has caused valuations to drop from past peaks, opening up opportunities for investors to recover losses and seek entry points to take advantage of the rebound in 2023.

ANIMA Credit Opportunities

The Fund's performance in 2022 was negative in absolute terms. Negative contributions came from all components of the portfolio, particularly from securities with higher ratings as they were more correlated to government bonds. The trend in spreads was similar for all ratings reaching a maximum of around 700bps at the end of September. The final part of the year, on the other hand, saw a clear contraction of the spreads down to below the 500 area, as a more neutral level in terms of recession probability.

Specifically, the Fund had a very prudent approach starting from March, bringing the level of High Yield bond to 10%. In addition, subordinated paper, after the July rally, was reduced to a minimal exposure due to the intensification of "perpetuity risk".

In general, the portfolio had a defensive approach with an average invested level below 80% which rewarded up to September but, subsequently, the better performance of BB bonds and the lack of carry of the portfolio itself didn't catch the underlying rally of BB and BBB components.

As far as currencies are concerned, almost all of the issues are denominated in Euro and the Fund's exposure to currency risk was hedged throughout the year.

The macroeconomic scenario presents many elements of uncertainty, but with the repricing that took place over the last two years, the bond world and credit in particular seems to offer some more opportunities; current yields are high enough to absorb price swings. The portfolio should therefore be able to generate positive, albeit modest, returns. The portfolio will slightly increase the investment percentage while maintaining a good level of liquidity to exploit moments of volatility as buying opportunities.

ANIMA Defensive

The Fund reported a negative return in 2022, attributable mainly to the negative contribution of the Satellite portfolio in the first six months of the year, although performance in the second part of the year was also slightly negative. The Fund started the year with an exposure to the Satellite portfolio at around 82%, represented mainly by long only fixed income funds, flexible fixed income funds and to a lesser extent, equity funds. Due to an initial drawdown of the Fund in the first part of the year, the target volatility moved from 3.5% to 1.75%; at the middle of June, when a significant spike in the government bond yields and a strong sell-off of all risky assets occurred, the Fund had another drawdown which then brought the target volatility to 0%. More specifically, given the objective of the Fund, which includes the objective to deliver protection at Minimum Target NAV (in particular, capital protection equal to 90% of the highest Net Asset Value), the indication of the quantitative model was to bring to 0% the Satellite portfolio and invest exclusively in the Core Portfolio (represented by liquidity, Money Market Instruments and UCITS Collective Investment Schemes investing in Money Market Instruments). In the second semester the Fund was therefore invested exclusive in money market funds, money market instruments and liquidity.

The Fund, in line with its mandate, for the foreseeable future will continue to be invested in Money Market Instruments and in UCITS Collective Investment Schemes investing in Money Market Instruments (Core Portfolio), but at the same time it will continue to maintain the possibility to invest also in the Satellite Portfolio, if a gradual recovery from the drawdown of 2022 will be achieved in the future.

ANIMA Emerging Markets Equity

The Fund closed the 2022 period with a negative absolute and relative performance. In the first half of 2022 and until October, the Fund maintained an equity exposure lower than the benchmark. Subsequently, this equity exposure was broadly in line with that of the benchmark. Regarding geographical exposure, in the first half of the year there was a significant overweights in Korea, India, Brazil, and Taiwan, which was substantially reduced with a preference for Asia, in particular, China and Indonesia. In October overweight in China significantly increased and Brazil was brought back to overweight while positions in India and Taiwan were trimmed.

With regard to the strategies to be implemented during 2023, particular attention will be paid to American monetary policy, Chinese fiscal and monetary policies, and the evolution of the geopolitical context in Eastern Europe.

ANIMA Euro Equity

In 2022, European equity markets reported one of their worst performances ever: the Fund reported a negative absolute performance but a positive relative performance. During the first nine months the Eurozone equity index fell sharply, losing more than 20% of its value. Investors were concerned about inflation, raising rates and decelerating growth. In October and November, markets rebounded on the assumption of less aggressive central banks, after the publication of data showing some deceleration in inflation. Equity markets in the Eurozone ended the year down circa 14%. Despite the falling equity markets, some sectors were able to appreciate in absolute terms: oil integrated companies rose by 20%, helped by record gas prices and high oil prices. On the opposite, high multiple stocks such as tech companies and luxury companies lost almost one third of their value. Anima Euro Equity depreciated in absolute terms, but it outperformed its benchmark. Sector allocation is the main reason of the relative outperformance: the Fund has been characterized by an overweight position in energy and healthcare and an underweight position in cyclical sectors. Stock picking also helped the relative performance. In December, after two months of strong rebound, we reduced equity exposure selling mainly industrial companies.

In 2023 we expect earnings estimates to go down. Equity index multiples are low, and we could argue that markets are already discounting a deceleration in terms of earnings growth, but visibility is low, and we prefer to keep a cautious positioning.

ANIMA Euro Government Bond

During 2022, the Fund reported a negative performance in absolute terms and below the reference benchmark. The Fund was penalized by the increase in government bond yields worldwide, while maintaining a lower duration exposure than the benchmark for part of the year. During the first half, government bond yields in the United States and Europe gradually increased, in the wake of better than expected economic data, and higher than expected inflation. In the second half, government bond yields increased significantly, due to restrictive monetary policies and the persistence of the inflationary pressures. As regards investment policies, at the beginning of the year the portfolio has been set up with a lower duration than the benchmark. The Fund started with an underweight duration (approximately -0.5 years), reducing the underweight duration during the second quarter of 2022, reaching a neutral stance in the second half of the year.

The portfolio was constructed with an underweight in German fixed-rate securities and an overweight position in Italian government bonds, and supranational issuers such as the European Union.

For 2023, the outlook remains uncertain, due to the negative impact of the restrictive monetary policy, and due to the fears about a high inflation growth.

ANIMA Europe Equity

In 2022, the Fund reported a negative absolute return, but a positive return relative to that of its benchmark thanks to a positive stock picking versus the benchmark's. The Fund began the year with a modest underweight position. However, in February, on the back of the increased tensions between Russia and Ukraine the Fund's exposure was cut by 2% to reach -5% against benchmark. Since the end of April, the Fund was brought back again at -3% versus benchmark, taking advantage of the second sell-off phase in equity markets for the year. From a sector allocation point of view, we preferred value sectors like banks, basic resources and energy, plus those stocks geared to a re-opening of the economy, particularly among sectors like leisure (hotels and catering) and beverages. Since May, we started taking profits selectively in the sectors mentioned above and moved the overall positioning from slightly overweight banks/energy/materials to an underweight position, in favor of reducing the underweight in sectors like industrials, autos and luxury that were already discounting a greater degree of economic slowdown by that time. We also took profits on the large part of our re-opening basket, exiting positions in hotels and airports, in favor of new positions in healthcare (particularly medtech and biotech) and software. During the 3rd quarter the equity exposure was cut further to reach 8% underweight on average versus benchmark. At the sector level we maintained a prudent allocation, with a preference for defensive sectors (consumer staples, healthcare and utilities in particular) versus cyclical sectors (industrials, materials and financial services in particular). In October, after the equity market sell-off in August and September, we reduced materially our underweight position versus the Fund's benchmark, from -8% to -1%. By doing so, we also rebalanced the portfolio by reducing marginally some defensive sectors (in particular consumer staples and healthcare) in favor of increasing both the cyclical component of the portfolio (in particular banks, energy and industrials) and its exposure to stocks that are positively correlated with growth factor. However, on the back of more hawkish messages from the most important Central Banks (Fed and ECB), in November we reduced marginally the exposure back to -3% versus benchmark. At the sector level, we reduced again the more cyclical component of the Fund, in particular within the capital goods sector, and increased defensive sectors like staples and pharmaceutical companies. During December, we reduced further our exposure versus benchmark, ending the year around -5%. At the sector level, we reduced further the cyclical component of the portfolio (again in capital goods) and increased the defensive sectors with a preference for staples and utilities. The financials, healthcare and consumer discretionary sectors were among those which contributed the most to the overall positive relative performance of the Fund.

The management team maintains a preference for companies with a high profile of revenue and cash flow growth and a solid balance sheet, particularly in the context of the substantial rise in yields and credit spreads. In this market environment, where there are no strong themes and there is still a lot of uncertainty from a macroeconomic point of view, we believe that stock picking could be the main driver of performance in the coming months. From a sector point of view, the Fund maintains a conservative approach between cyclicals and defensives, -10% versus Benchmark. From a style point of view, we have a preference for defensive growth stocks.

ANIMA Global Bond

The Fund's performance for 2022 was negative in absolute terms and negative compared to the benchmark. The management of the Fund relies on a quantitative investment process based on a risk budget with a defined tracking error limit. During 2022, the Fund had, on average, a bond exposure equal to 95% of the portfolio, fully allocated to government securities. The portfolio was country neutral relative to the benchmark: at the end of December, the fixed income component was mainly allocated in USA (43%) and Japan (22%). During the year, the Fund duration was aligned with that of the benchmark: at the end of December, it was 7.1 years.

The Fund follows a management style characterized by a limited level of Tracking Error compared to the reference benchmark.

ANIMA Global Equity Value

Given the macroeconomic environment in 2022, the Fund ended the year with a negative net performance, but it outperformed the benchmark. A strong focus on fundamentals and valuations and the resulting stock selection allowed the Fund to outperform the market. Compared to the benchmark, the Fund was rewarded by the stock selection in the U.S., especially in the consumer discretionary sector (in the first part of the year, the Fund kept underweight stocks such as Amazon and Tesla) and in the technology sector, where the higher-rated stocks that underperformed during the year were not part of the Fund. In addition, the Fund was rewarded by the overweight position in healthcare, despite it was partially offset by the stock selection in the sector. U.S. stock selection was also supported by M&A deals involving two overweight companies in the portfolio. Regarding other areas, the Fund was rewarded for both allocation and selection in Japan; specifically alpha was created in the technology sector, which until early December benefited from the weakness of the yen. In addition to technology, allocation and selection of financial stocks contributed positively to the Fund's performance, thanks especially to the timely investment in banks heading to December, a month marked by the BoJ's policy change. As for the Eurozone, the contribution of this area during the year was neutral, noteworthy is the good stock selection in utilities and healthcare. The Fund was also rewarded for its geographic positioning, keeping the U.S. and Eurozone underweight and Japan overweight, on average during the year the Fund was under invested relative to the benchmark, thus managing to improve its relative performance.

ANIMA Global Macro

During 2022, the Fund delivered a net negative performance. The investment activity followed the quantitative methods developed by the team. The Fund started 2022 with an equity exposure of 22%, reduced progressively to 2%, in parallel with the reduction in risk budget used. Equity exposure was subsequently increased, reaching 13% in November. Moreover, duration of 8.5 years at the beginning of the year was progressively reduced to a minimum of 1.5 years in May. Duration was subsequently increased, reaching 6 years in November. Commodity exposure, which started the year at 11% of NAV, was progressively reduced to 2%, in parallel with the reduction in risk budget used. Commodity exposure was subsequently increased, reaching 6% in November. Finally, FX exposure (USD) started the year at -25% of NAV and was increased to a maximum of +2% in April and finished the year near that level. FX exposure against euro reached 12% in November. The portfolio strategies used also a derivative component in order to optimize the geographical exposure and to optimize the management of the Fund when more efficient than cash. The FX strategy was implemented through forward exposure.

The Fund will continue to adopt the investment strategies provided by the quantitative models internally developed.

ANIMA Global Selection

During 2022 the Fund reported a negative absolute performance of -13.0% for the I Class, -13.88% for the Prestige Class and -14.17% for Silver Class, lower than the reference benchmark (-12.78%). The 2022 underperformance of the Fund is slightly offset by the contribution of the stock selection and positive contribution from asset allocation, in the latter case thanks to the level of invested equity being kept underweight compared to the benchmark. Japan and the Pacific Area contributed negatively, in particular Japan suffered from non-rewarding choices in the technology sector while the Pacific Area suffered in the financial sector. In terms of sector selection, the Fund had a preference since the beginning of the year for cyclical sectors in particular energy due to the sharp increase in the price of oil, financials which benefited from the sudden increase in government bond yields and materials against sales in the sector IT. However, over the course of the year following the escalation of the conflict between Russia and Ukraine and due to a sudden deterioration in macroeconomic conditions and related fears regarding a potential slowdown in global economic growth, the Fund significantly reduced the beta of portfolio by increasing exposure to defensive sectors such as utilities, healthcare, consumer staples, by reducing exposure in the financials and industrials sectors. At the end of December, the Fund had an equity exposure of approximately 94%. In particular, the geographical exposure was allocated to the US (65%), Eurozone (10%) and Japan (6.5%). The main sectors in the portfolio were: IT (20%), Healthcare (13%) and Financials (13%). The main overweights compared to the benchmark were in the telecommunications services sector and in the consumer staples sector, while underweights in the industrial sector and in the real estate sector are noted.

ANIMA High Yield Bond

The Fund's performance in 2022 was negative and below that of the reference benchmark. Negative contributions came from all components of the portfolio, particularly from securities with higher ratings as they were more correlated to government bonds. The trend in spreads was similar for all ratings, reaching a maximum of around 700bp at the end of September. The final part of the year, on the other hand, saw a clear contraction of the spreads down to below the 500 area, pricing a more neutral level in terms of a recession probability.

ANIMA High Yield Bond (continued)

During the year, the Fund had an underweight position in Hybrid bonds due to “perpetuity risk” for this type of product and, in the second half of the year, the percentage of AT1 securities was also eliminated, even if the level of risk was not perceived so high compared to Hybrid securities in terms of extension risk.

The portfolio had a defensive approach with an average invested level below 80% which was rewarded up to September but, subsequently, the better performance of BB bonds and the lack of carry of the portfolio itself compared to the index led to a slight deterioration compared to the benchmark. At the sector level, there were no major deviations from the benchmark except for Russia-related securities, in which the Fund was not invested, and real estate-related securities where the level of investment was marginal compared to the reference benchmark.

As far as currencies are concerned, almost all of the issues are denominated in Euro and the Fund's exposure to currency risk was hedged throughout the year.

The macroeconomic scenario presents many elements of uncertainty, but with the repricing that took place over the last two years, the fixed income world and particularly credit seems to offer some more opportunities; current yields are high enough to absorb price swings. The portfolio should therefore be able to generate positive, albeit modest, returns. The portfolio will slightly increase the investment percentage while maintaining a good level of liquidity to exploit moments of volatility as buying opportunities.

ANIMA Hybrid Bond

During 2022, the Fund reported a negative absolute and relative performance. The rise in interest rates that took place during the half-year together with the widening of spreads is the main cause of the negative return in absolute terms. As regards the relative performance, the Fund reported a negative return mainly due to the strong widening that took place on the spread component of corporate bonds. This scenario also resulted in strong volatility on credit risk, due to high inflation and uncertainty about future developments, which turned into a strong widening of corporate bond spreads. The subordinated structure suffered a strong spillover effect due to the extension risk embedded in the structure, which led hybrid bonds to underperform the corporate bond market. The Fund has invested almost 82% in corporate hybrids. The liquidity at the end of the year was close to 18% due to the above mentioned scenario. Preferred sectors were: utilities (4%) above benchmark, consumers non-cyclical (+0.25%) while, the less preferred sectors were: consumers cyclical (-2.76%), communications (-2.76%) and energy (-3%). The portfolio was very concentrated towards those companies that we believe the most undervalued. The total amount of high yield allocated was around 44%, while the remaining were investment grade bonds. Thus, the Fund had a beta that was slightly above the benchmark. The Fund made use of derivative instruments, both to hedge the exchange rate risk (through the use of forwards), and to carry out tactical operations on the interest rate front if liquidity had been limited on cash securities (in this case through the use of futures).

We expect to see a volatile first half but overall having a higher carry than the benchmark will help the Fund to offset any sell off in the market. Each purchase will be managed to take advantage of what we consider to be the best opportunities on the market.

ANIMA International Bond

In 2022, the Fund achieved a negative performance in absolute terms and below the reference benchmark, the Fund was penalized by the increase in government bond yields worldwide, while maintaining a lower duration exposure than the benchmark for part of the year.

During the first half, United States and Europe's government bond yields gradually increased, in the wake of better than expected economic data, and higher than expected inflation. In the second half, government bond yields increased significantly, due to restrictive monetary policy and the persistence of the inflationary pressures.

As regards investment policies, the portfolio allocation at the beginning of the year, was characterized by a lower duration than the benchmark. The Fund started with a significant underweight (approximately -2 years), reducing the underweight during the second half of the 2022, reaching a neutral level in second quarter and becoming overweight by the end of the year, also using derivative instruments to hedge the underlying securities.

The portfolio was constructed with an underweight in US and German fixed-rate securities. In terms of currency risk, exposure to the US dollar was strategically managed, creating an overweight of the US dollar against the benchmark during the first half. It was reduced during the second half.

The outlook for 2023 remains uncertain, due to the negative impact of the restrictive monetary policies, and due to the fears about a high inflation growth.

ANIMA Italian Bond

In 2022, the Fund reported a negative performance in absolute terms and below the reference benchmark. The Fund was penalized by the increase in government bond yields worldwide, while maintaining a lower duration exposure than the benchmark for part of the year. During the first half, government bond yields in the United States and Europe gradually increased, on the back of better than expected economic data, and higher than expected inflation. In the second half, government bond

ANIMA Italian Bond (continued)

yields increased significantly, due to restrictive monetary policy and the persistence of the inflationary pressures. As regards investment policies, the portfolio allocation at the beginning of the year, was characterized by a lower duration than the benchmark. The Fund started with a significant underweight (approximately -0.5 years), reducing the underweight during the second half of 2022, reaching a neutral level by the second quarter and becoming overweight by the end of the year, also using derivative instruments to hedge the underlying securities. The portfolio was constructed with a short position in German fixed rate securities (through derivatives), and an overweight in Italian government bonds.

The outlook for 2023 remains uncertain, due to the negative impact of the restrictive monetary policy, and due to the fears about a high inflation growth.

ANIMA Italian Small Mid Cap Equity

In 2022, the Fund achieved a negative absolute performance but a positive relative performance against its benchmark. During the year, the portfolio has been managed with a defensive approach, especially after March, following the beginning of the Russian-Ukrainian conflict and an increasingly challenging macroeconomic scenario. A more aggressive positioning in the last quarter has been driven by more technical than fundamental considerations since the market positioning was oversold to extreme levels both in sentiment and positioning indicators leaving the door open for a short-lived market rally. At sector level, the Fund maintained an overweight in financials, especially banks, until September financed through an underweight positioning in industrials and in consumer discretionary, with the latter only recently reduced as a consequence of more attractive valuations on several companies. On the other hand, the situation for industrial and discretionary is quite different since the macro slowdown and a skyrocketing inflation had a strong impact on the consumer and businesses confidence. The energy sector has been kept overweight during the year. The exposure to that sector is more tactical than structural but the energy remains one of the best sectors to face the current market environment as high prices leaves the door open to high profits capable of fueling important buyback/dividend flows. At portfolio level, it has been tried to maintain an extremely cautious approach on all those companies that have a high level of indebtedness since the significant rise in interest rates could make very expensive the debt refinancing. It is believed that highly leveraged and bearable financial structures in a context of zero interest rates may no longer be affordable in this new macro environment, pushing to recapitalization needs.

Looking forward, the Fund will maintain a cautious approach, as it is believed that the short-term scenario has changed, not really at a macro level, but more in terms of monetary policies which are becoming tighter.

ANIMA Italy

In 2022, the Fund achieved a negative absolute performance but a positive net performance relative against its benchmark. During the year, the portfolio has been managed with a defensive and careful approach, especially after March, following the beginning of the Russian-Ukrainian conflict and an increasingly challenging macroeconomic scenario. A more aggressive positioning in the last quarter has been driven by more technical than fundamental considerations since the market positioning was oversold to extreme levels both in sentiment and positioning indicators leaving the door open for a short-lived market rally. At sector level, the Fund has kept an overweight in financials, especially banks, until September financed through an underweight positioning in industrials and in consumer discretionary, with the latter only recently reduced as a consequence of more attractive valuations on several companies. On the other hand, the situation for industrial and discretionary is quite different since the macro slowdown and a skyrocketing inflation have a strong impact on the consumer and businesses confidence. The energy sector has been kept overweight during the year. The exposure to the sector is more tactical than structural but the energy remains one of the best sectors to face the current market environment as high prices leaves open the door to high profits capable of fueling important buyback/dividend flows. At portfolio level, it has been tried to maintain an extremely cautious approach on all those companies that have a high level of debt since the significant rise in interest rates could make very expensive the debt refinancing. It is believed that highly leveraged and bearable financial structures in a context of zero interest rates may no longer be affordable in this new macro environment, pushing to recapitalization needs.

Looking forward, the Fund will keep a cautious approach as it is believed that the short-term scenario has changed, not really at a macro level, but more in terms of monetary policies which are becoming tighter and tighter.

ANIMA Liquidity

In 2022, the Fund reported a net negative absolute performance and a negative performance compared to its benchmark. In the first half of 2022 the Fund kept an average duration neutral to the benchmark, with overweight positions in Italian, Spanish and Portuguese issues, in order to maximize the portfolio's yield to maturity in an environment of deeply negative money markets yields. Core countries have been kept underweight, compared to the benchmark. The overweight in peripheral countries was maintained in the second part of the year due to the extra-return offered by these bonds. The underweight in core countries was also kept.

We expect to maintain an overweight in the peripheral sector in 2023, with the aim of enhancing the yield to maturity of the portfolio. In addition, we expect to invest a reduced size in core and semi-core countries, given the lower returns these bonds offer.

ANIMA Medium Term Bond

In 2022, the Fund performance was negative in absolute terms, with a negative return compared to the benchmark. The management of the Fund relies on a quantitative investment process based on a risk budget within a defined tracking error limit. During the year, on average, the Fund had a bond exposure equal to 95% of the portfolio, fully allocated on government securities. The portfolio was country neutral relative to the benchmark: at the end of December, the fixed income component was mainly allocated in France (24%), Italy (20%), Germany (18%) and Spain (14%). During the year, the Fund duration was aligned with that of the benchmark: at the end of December, it was 6.8 years.

The Fund follows a management style characterized by a limited level of Tracking Error compared to the reference benchmark.

ANIMA Megatrend People Fund

The Fund's performance at the end of 2022 was negative in absolute terms, with a negative delta compared to the benchmark. The absence of the energy sector in the portfolio was the main reason for the Fund's relative underperformance. The biggest contribution at sector level was recorded in the healthcare sector, both in terms of allocation and stock selection. We recall that the Fund's strategy is focused on identifying companies that have a high exposure to investment themes related to global demographic changes, therefore, the energy sector has never been present in the portfolio. In an already complex scenario characterized by rising inflation and struggling central banks, the conflict in Ukraine has further exacerbated bottlenecks in the global supply chain and pushed up commodity prices. The prospects, especially for the less well-off, have also deteriorated due to the lack of new stimuli from governments. For this reason, since the first quarter, the weight of discretionary consumption has been reduced and at the same time the weight of basic consumption, especially in supermarkets which tend to be more resilient, has increased. Within discretionary consumption, we reduced exposure to the real estate market as the less favorable financing conditions (mortgage rates) started to slow down activity in the sector; the same is true for the automotive sector. Within defensive sectors, we maintained a preference for healthcare, consumer staples and communication services. In the health sector, during the year, an area of great interest was the issue of obesity, where certain new solutions proved to be revolutionary for the treatment of obesity. The growth potential of these innovative medicines is very high, as the treatment rate remains low and barriers to entry are high. Within the theme of digitalization, after the downgrade of the high-growth sector, we selectively increased the companies exposed to cybersecurity and after the passage of the Chip Act by the US Government, we increased the exposure to companies that will benefit from the relocation of the semiconductor industry considered strategic for the growth of the United States. At sector level, the healthcare sector remains the most representative in the Fund, specifically we continue to be constructive on the issue of robotics, obesity and Alzheimer's. At a geographical level, exposure (direct and indirect) to China increased toward the end of the year. This change in strategy was attributable to the attractive valuations together with interesting growth prospects in the medium term linked to the rapid expansion of the middle class, the increase in domestic consumption and investments in strategic sectors. We believe that in the coming months the Chinese economy could benefit from support measures aimed at the real estate sector in order to prevent systemic risk (a sector that affects 50% of household wealth) and from reopening after two years of Zero-Covid Policy.

ANIMA Opportunities 2027

The Fund's performance in 2022 was slightly negative in absolute terms. The relatively short duration of the Fund helped a lot in an environment where negative returns came in the most part from fixed income securities.

Specifically, the Fund had a very prudent approach starting from March until the end of the year.

As far as currencies are concerned, almost all of the issues were denominated in Euro and the Fund's exposure to currency risk was hedged throughout the year.

2022 was characterized by the growth of inflation, exacerbated by the Russian-Ukrainian conflict, and the consequent strong reaction of central banks. The very restrictive monetary policies implemented led to a repricing of all financial asset classes. The ICE BofA Euro Government Index, which had already had a negative return in 2021 (-1.74%) lost 19.59% in 2022 with negative consequences also on the entire credit world which saw spreads widening. The spread of the BTP against the Bund in this context of rising rates obviously widened; from the level of 135 basis points at the end of 2021, the spread reached a maximum of over 250 bps in September to then retrace and close the year at 214 bps.

The macroeconomic scenario presents many elements of uncertainty, but with the repricing that took place over the last two years, the bond world and credit in particular seem to offer some more opportunities; current yields are high enough to absorb price swings. The portfolio should therefore be able to generate positive, albeit modest, returns. The portfolio will slightly increase the investment percentage while maintaining a good level of liquidity to exploit moments of volatility as buying opportunities.

ANIMA Selection Conservative

The Fund's negative return in 2022 was attributable mainly to the negative contribution of the flexible bond funds and multi-asset funds, whereas the contribution of flexible equity funds was overall neutral.

In the first part of the year the Fund maintained, on average, more than 30% of Nav allocated to flexible equity funds, around 30% of the Nav allocated to flexible bond funds and around 23% to multi-asset strategies; the rest of the portfolio was maintained in liquidity. The allocation to flexible bond funds was slightly increased in the last part of the half year and the duration of the Fund

ANIMA Selection Conservative (continued)

increased accordingly. In the second part of the year the flexible bond Funds allocation was further increased through the introduction of a new flexible bond strategy, while the allocation to multi-asset and flexible equity strategies didn't change significantly in the last six months of the year. At the end of December, the Fund had an allocation to flexible equity funds at around 31%, an allocation to flexible bond funds at around 44% and an allocation to multi-asset funds at around 22%; the rest of the portfolio, around 3%, was maintained in liquidity. Regarding significant events during the year, in March 2022 the MPS Private Solution Absolute was merged into Anima Selection Conservative.

The Fund will continue to aim to achieve its investment objectives by investing in a portfolio of absolute funds employing different styles and strategies.

ANIMA Selection Moderate

The Fund's negative return in 2022 was attributable mainly to the negative return generated by equity and fixed income funds, but flexible funds also generated a negative contribution.

In the first part of the year the Fund maintained, on average, an allocation to equity funds at around 27% and an allocation to fixed flexible equity strategies at around 15%; the rest of the portfolio was maintained in fixed income funds, flexible bond funds, money market funds and liquidity. In the first semester the equity funds allocation was slightly decreased, due to a more challenging outlook for equity as an asset class more challenging; at the same time, the fixed income component and the overall duration of the Fund was increased. In the second semester, and in particular in October, the allocation to equity funds was increased and it reached 30%, but then from November was reduced again to 25%. In addition, the duration in the last part of the year was reduced and it was brought below 3.0 years. At the end of December, the allocation to equity funds was at 25% and the allocation to flexible equity funds at 15%; the rest of the portfolio was invested in fixed income funds, flexible bond funds and maintained in liquidity. Some significant events during the year were the merger into the Fund in March of MPS Private Solution Flexible, MPS Private Solution Multi Asset and MPS Private Solution Global.

The Fund will continue to aim to achieve its investment objectives by investing in a portfolio of long and/or flexible funds, employing different styles and strategies.

ANIMA Short Term Bond

The Fund's performance for 2022 was negative in absolute terms, with a negative return compared to the benchmark. The management of the Fund relies on a quantitative investment process based on a risk budget within a defined tracking error limit. During the year, on average, the Fund had a bond exposure equal to 95% of the portfolio, fully allocated to government securities. The portfolio was country neutral relative to the benchmark: at the end of December, the fixed income component was mainly allocated to Italy (24%), France (22%), Germany (20%) and Spain (14%). During the year, the Fund duration was aligned with the one of the benchmark: at the end of December, it was 1.8 years.

The Fund follows a management style characterized by a limited level of Tracking Error compared to the reference Benchmark.

ANIMA Short Term Corporate Bond

During 2022, the Fund reported a negative absolute performance but positive against the benchmark. The Fund started the year with an overall duration shorter than the benchmark, which helped the Fund to limit the losses over this period. During the year, not only have interest rates sharply risen beyond expectations, but also the spread component suffered significant losses due to the severe widening that affected the entire asset class. At the end of the year the Fund was 68% invested in corporate bonds and 15% invested in BTPs and bond proxies of the Italian government. Liquidity was still relatively high, close to 17% of Fund's NAV. In more detail, the financial sector was underweighted by 11% as well as consumer cyclical (-7%) and non-cyclical (-3.5%). Among the biggest underweighted sectors were also industrial and real estate, even though to a lesser extent. However, there were a couple of sectors where the Fund was slightly overweight, which were utilities and telecoms, respectively. The Fund's active management is not only pursued through the sectors allocation, as the capital structure selection is also a pivotal driver of the performance. Indeed, the Fund presented a markedly overweight of subordinated debt, both in financial and non-financial bonds. At the end of 2022 duration of the fund was 0.5 year shorter than the benchmark. Last but not least, the Fund maintained high yield bond overweighted in the short term part of the curve, where visibility to be repaid is quite high.

ANIMA Smart Volatility Emerging Markets

During 2022, the Fund reported a negative absolute performance. The Fund follows a quantitative approach, using a proprietary risk control model to determine equity exposure to Emerging Markets. Market volatility rose sharply during the first half of the year. As a result, equity exposure fell from 60% in January to 40% at the end of June. In the following months the market has seen both turmoil and recovery scenarios; allocation to risky assets ranged between 35% and 55% and at the end of December was around 45%. Overall, the exposure to Emerging Equity Markets has been on average 45%.

The Fund will follow signals generated by the proprietary quantitative model.

ANIMA Smart Volatility Europe

During 2022, the Fund reported a negative absolute performance. The Fund follows a quantitative approach, using a proprietary risk control model to determine equity exposure to European Markets. Market volatility rose sharply during the first half of the year. As a result, equity exposure fell from 45% in January to 32% at the end of June. In the following months the market has seen both turmoil and recovery scenarios; allocation to risky assets ranged between 20% and 40%. Overall, the exposure to European Equity Markets has been on average 30%.

ANIMA Smart Volatility Global

During 2022, the Fund reported a negative absolute performance. The Fund follows a quantitative approach, using a proprietary risk control model to determine equity exposure to Global Markets. Market volatility rose sharply during the first half of the year. As a result, equity exposure fell from 52% in January to 32% at the end of June. In the following months the market has seen both turmoil and recovery scenarios; allocation to risky assets ranged between 25% and 60% and at the end of December was around 40%. Overall, the exposure to Global Equity Markets has been on average 40%.

The Fund will follow signals generated by the proprietary quantitative model.

ANIMA Smart Volatility USA

During 2022, the Fund reported a negative absolute performance. The Fund follows a quantitative approach, using a proprietary risk control model to determine equity exposure to U.S. Market. Market volatility rose sharply during the first half of the year. As a result, equity exposure fell from 50% in January to 36% at the end of June. In the following months the market has seen both turmoil and recovery scenarios; allocation to risky assets ranged between 25% and 65% and at the end of December was around 40%. Overall, the exposure to U.S. Equity Market has been on average 40%.

The Fund will follow signals generated by the proprietary quantitative model.

ANIMA Solution 2023-I

The Fund's negative return of the year was attributable to the negative performance generated by the negative contribution of both the Satellite and Core portfolios, in particular in the first six months of the years, but also in the second half of the year the Fund generated a negative return.

During the year, the Fund invested in a range of funds managed by ANIMA, AXA and Alliance Bernstein. The Fund started the year with an exposure to the Satellite portfolio of around 50%; then the equity volatility increased significantly at the end of February and it remained very high also in the second quarter, therefore, following the signal from the quantitative model, the weight of the Satellite portfolio was decreased significantly and at end of June was below 10%. In the second half of the year the volatility, for both the Satellite and the Core portfolios, continued to remain very high. Therefore the Fund maintained a high allocation to money market funds and liquidity (above 20%). Since November the volatility started to gradually decrease, in particular for the Satellite portfolio, therefore, following the signal generated by the quantitative model, the Satellite portfolio was increased to around 16%.

At the end of December, the Satellite was at around 16% and the Core at around 84%; the Core was represented by fixed funds, flexible bond funds, money market funds and liquidity.

The Fund will continue to aim to achieve its investment objectives by investing in two different components, Core and Satellite portfolio, following the indication of the proprietary allocation model.

ANIMA Solution EM

The Fund's negative return of the year was attributable to the negative performance generated by the negative contribution of both the Satellite and Core portfolios, in particular in the first six months of the years, but also in the second half of the year the Fund generated a negative return.

During the year, the Fund invested in a range of funds managed by ANIMA, AXA and Alliance Bernstein. The Fund started the year with an exposure to the Satellite portfolio of around 50%; then the equity volatility increased significantly at the end of February and it continued to remain high, therefore, following the indication of the quantitative model, the weight of the satellite portfolio was decreased significantly and at end of June was below 10%. Also in the second half of the year the volatility, for both the Satellite and the Core, continued to remain very high, therefore the Fund maintained a high allocation to money market funds and liquidity (above 20%). Since November the volatility started to gradually decrease, in particular for the Satellite portfolio, therefore, following a signal from the quantitative model, the Satellite was increased to around 20%.

At the end of December, the Satellite was at around 20% and the Core at around 80%; the Core was represented by fixed funds, flexible bond funds, money market funds and liquidity.

The Fund will continue to aim to achieve its investment objectives by investing in two different components, Core and Satellite portfolio, following the indication of the proprietary allocation model.

ANIMA Star High Potential Europe

During 2022, the Fund achieved a positive absolute return, in particular thanks to stock selection. Specifically, the allocation to materials and healthcare, and the stock selection in consumer discretionary, financials and materials sectors, contributed the most to the positive absolute performance of the Fund. On the other hand, both the allocation and picking in technology contributed negatively.

We maintained a cautious positioning in 2022, with an average net equity exposure of around 15%.

The Fund started the year with a net equity exposure of 35%, but it was promptly cut to around 5% in the most intense period of the conflict between Russia and Ukraine, and it was gradually increased to around 15% in March, as investors started to price in a "de-escalation" of the war. From a sector allocation perspective, we favored value and cyclical sectors in the first part of the year, in particular basic materials, banks and oil, while we subsequently increased more defensive sectors, in particular telecommunications and utilities. In light of the conflict between Russia and Ukraine, we increased the exposure to "defensive-growth" companies, to those assets that can overperform in a stagflationary environment and that can work as a hedge against raising inflation, like real assets and infrastructure, and to those companies that can facilitate the European energy independence from Russian imports like renewables. Moreover, we increased the exposure to the defense sector, as it will benefit from the expansion of government budgets dedicated to military spending.

After the reporting season, we took profit in some short positions and we gradually increased the net equity exposure to around 25% at the end of May as we thought that, in the absence of negative idiosyncratic factors, the market could exhibit a bear market rally. However, as the market maintained its weakness due to central banks hawkishness and to deteriorating macroeconomic data, the net equity exposure was reduced to about 15% at the end of the first half of the year. From a sector perspective, the overweight to the energy sector was neutralized, while basic materials sector was reduced to underweight. The Fund remained exposed to utilities, telecom and healthcare among defensives, and to consumer discretionary and tech sectors among cyclicals.

During the third quarter net equity exposure was further reduced to around 10% on average. From a sector perspective, we maintained a prudent allocation, with a preference for defensive sectors (especially consumer staples, healthcare and utilities) over cyclical sectors (especially industrials, materials and financial services).

After the sell-off in August and September, global equity markets were pushed higher in the fourth quarter by hopes around «peak FED hawkishness», the decline in price of natural gas and the end of «zero Covid policy» in China. Net equity exposure was therefore increased to around 25% in mid-November and the portfolio was rebalanced by reducing defensive sectors and increasing cyclicals (especially banks and energy) and technology. However, on the back of more hawkish messages from the most important Central Banks (FED and ECB), net equity exposure was cut to around 2.5% at the end of December and the portfolio's beta was reduced.

We believe that the market will experience a period of high volatility in 2023: the macroeconomic environment is weakening and the inflation rate is decelerating, but monetary policy remains restrictive and the timing of the "Fed pivot" remains unclear. From a sector allocation perspective, we maintain a preference for "defensive-growth" sectors, while from a thematic perspective "China reopening" remains our strongest conviction.

ANIMA Star High Potential Italy

During 2022, the Fund reported a negative absolute return, mainly due to the net long equity allocation, maintained at +18% on average.

The Fund began the year with a +40% net long position, however, on the back of the increased tensions between Russia and Ukraine, in February the Fund's exposure was cut by 15% to reach +25%. Since the end of April, the Fund was brought back again at +40%, taking advantage of the second sell-off phase in equity markets for the year. From a sector allocation point of view, we preferred value sectors like banks and energy, plus those stocks geared to a re-opening of the economy, particularly among sectors like luxury and beverages. Since May, we started taking profits selectively in the sectors mentioned above, in favor of a greater exposure to sectors like autos, semiconductors and payments that were already discounting a greater degree of economic slowdown by that time. We also took profits among some defensive sectors like telecoms and utilities. During the course of the 3rd quarter the equity exposure was cut further to 18% on average. At the sector level we maintained a prudent allocation, with a preference for defensive sectors (consumer staples, healthcare and utilities in particular) versus cyclicals (industrials, materials and financial services in particular). After the equity market sell-off in August and September, during the month of October we increased materially our net equity exposure to +35%. By doing so, we also rebalanced the portfolio by reducing marginally some defensive sectors (in particular consumer staples and healthcare) in favor of increasing both the cyclicity of the portfolio (in particular banks, energy and industrials) and its exposure to stocks that are positively correlated with growth factor. However, on the back of more hawkish messages from the most important Central Banks (Fed and ECB), during the month of November we reduced the net exposure to +15%. At the sector level, we reduced again the more cyclical component of the Fund, in particular within the capital goods sector, and increased defensive sectors like staples and pharmaceutical companies. During December, we reduced further our exposure, ending the year around +8%. At the sector level, we reduced further the cyclical component of the portfolio (again in capital goods) and increased the defensive sectors with a preference for healthcare and utilities.

ANIMA Star High Potential Italy (continued)

The management team maintains a preference for companies with a high profile of revenue and cash flow growth and a solid balance sheet, particularly in the context of the substantial rise in yields and credit spreads. In this market environment, where there are no strong themes and there is still a lot of uncertainty from a macroeconomic point of view, we believe that stock picking could be the main driver of performance in the coming months. From a sector point of view, the Fund maintains a conservative approach between cyclicals and defensives. From a style point of view, we have a preference for defensive growth stocks.

ANIMA Trading Fund

In 2022, the Fund reported a negative absolute return. At the beginning of the year, with inflation at 7.5%, the Fed's tone changed and in an initial phase the trend in real rates led to a rapid downgrade of high-growth sectors and markets, and then also extended to some cyclical sectors (financial). The conflict in Ukraine has added to further exacerbate bottlenecks in the global supply chain and pushed up commodity prices. Inflation dynamics, in particular the increase in petrol, heating and food prices, have led us to have a cautious view on consumers' discretionary spending capacity. The Fund's strategy favored a prudent approach, maintaining an average net exposure of 35%. This has led us to be constructive on the healthcare, utilities, communication services and some technology sectors. We were overweight commodity-related sectors as an inflation hedge over the year. The allocation detracted from the Fund's absolute performance, partially offset by stock selection. At a sector level, the largest contributors came from stock selection in the energy, healthcare, technology, industrials and consumer discretionary sectors. While there are negative contributions in the financial sector and the allocation in communication services. Over the last months of 2022, the exposure to emerging markets has been increased and at the same time the exposure to Europe has been reduced. The risk of a possible total blockade of gas supplies by Russia had led us to have a cautious approach to the European area. Conversely, with the reopening of China, expectations are for an acceleration in growth supported by the recovery in consumption and greater fiscal stimulus from the authorities. In this regard, we have increased exposure to companies (both domestic and international) benefiting from the reopening process as well as through the use of derivatives. At the end of December, the Fund had a bond exposure of +49.5% and a net equity exposure of +26.4%. In particular, the geographical exposure is allocated to the USA (+22.2%), China (+7.6%) and the United Kingdom (+2.6%). The main sectors in the portfolio are: healthcare (+7.5%), communication services (+5.3%) and consumer discretionary (+3.1%). The bond component contributed negatively to the overall performance due to the sudden rise in interest rates, especially those in the short/medium term. The losses were concentrated in the Italian government bond component with 1-3 year maturities. Bond investments accounted for approximately 40% of the NAV throughout the year. During the year, maturing securities were reinvested in short-term bonds with decidedly attractive yields. At the end of December, the overall duration was around 0.35 years, lower than the 0.5 years at the beginning of 2022. The average yield on the bond portfolio is around 4%. 30% of the portfolio's bond exposure will mature by the end of 2023, the remaining exposure of approximately 13% within the next 12 months, the cash will be reinvested in stocks or bonds depending on the prevailing macroeconomic environment in the near future.

ANIMA U.S. Equity

In 2022, the Fund's performance was negative and lower than the benchmark. For the year, in the US, Energy was up a whopping 59.1%, while every other sector was in the red. Most of the 10 best-performing industries in 2022 came from Value sectors, and the worst 10 were from Growth sectors. Communication Services (-40.4%) and Consumer Discretionary (-37.6%) saw the biggest declines on the year and marked the sectors' worst and third-worst performances on record, respectively.

During the year we increased the Fund's weight in the healthcare sector. Indeed, this sector, within the defensives, has the least correlation of companies' fundamentals with inflation rates. It also presents attractive valuations in terms of free cash flow yield and cash generation. On the other side, we also kept the exposure to the most cyclical sectors, such as IT and consumer discretionary, which had a negative contribution to the overall Fund's performance against the benchmark.

The industrial sector also was one of the cyclical sectors that contributed negatively to the performance of the Fund because of the absence of the defense subsector (a sector we cannot invest in for ESG reasons): indeed the lack of exposure to tobacco and defense companies caused a negative 60 bps to the overall performance of the Fund.

Surprisingly for a down year, several quality factors did poorly in 2022, including High vs. Low Quality, cash position, net profit margin and return on assets. Value, Momentum, and Low Quality were an odd combination in a down year. This also affected the performance of the Fund relative to the benchmark, given the quality bias, from an investment style perspective, that characterizes the Fund.

We still have an overweight position on the healthcare sector, where the free cash flow yields remain elevated vis-à-vis those of the tech sector: biotech is where the skepticism about the value of R&D is greatest. We also have an overweight position in the financial sector versus the benchmark, where bank multiples remain low relative to the market and to the history and most of the big banks remain levered to the trajectory of the nominals.

The most defensive sectors like telecom, healthcare, real estate, consumer staples but also the energy sector were positive contributors to the overall performance over the course of the year.

We are emphasizing GARP(y) growth stocks and at the same time some low P/E cyclicals, in order to have a barbell and balanced approach in the Fund.

ANIMA Variable Rate Bond

During 2022, the Fund reported a negative absolute performance. Since the beginning of the year the Fund has kept an average exposure of around 85% to Italian CCTs, 5% over-benchmark. The remaining part of the portfolio has been invested in Italian Government Bills and Fixed Coupon BTPs. The overweight CCTs position is explained by our beginning-of-year conviction of higher rates throughout the first half of the year. This position has been able to benefit from market conditions especially during the first leg-up in rates in January and February. In addition, we started off the year with a tactical underweight in short-end Bunds, given our view of higher rates throughout 2022. As a result of these positions, the Fund has had an average duration higher than that of the benchmark, given especially our overweight position in Italian CCTs. During the second part of the year, we maintained our overweight position in CCTs, reducing it slightly ahead of the latter part of the year. The underweight position in short-end German government bonds has been kept, given our belief in a global scenario of higher rates and less accommodative monetary policies.

For 2023, the outlook remains uncertain, due to the negative impact of the restrictive monetary policy, and due to the fears about a high inflation growth.

ANIMA Zephyr Global

In 2022, the Fund delivered a net negative performance. The investment activity followed the quantitative methods developed by the team. The Fund started the year with an equity exposure of 42%, which has been reduced to 30% during the first quarter. A further reduction has been deployed in the second half, with equity exposure closing the year at 27%. In the Fixed Income component, slightly less than 80% of the portfolio has been invested in Italian government debt, while the remaining part has been invested in other Eurozone government bonds, mainly Germany, Spain and Austria. A significant part of the investment in Italy was dedicated to floating rates bonds and inflation-linked Italian government bonds, even if both have been reduced during the year. The Fund started the year with a low duration; since March, after the first remarkable phase of surging yields, we started to gradually increase the duration by buying both German and Italian Government bonds, mainly in the mid-long part of the curve as the curves were dramatically flattening. Purchases have then been stopped and scaled back somewhat, starting from summer, as global central banks showed a very aggressive stance toward the worsening inflation spiral. The Fund closed 2022 with a still moderate duration of around 3.3 years.

In the Multi Asset component, the Fund will continue to adopt the investment strategies provided by the quantitative models internally developed.

ANIMA Zephyr Global Allocation

In 2022, the Fund delivered a net negative performance. The investment activity followed the quantitative methods developed by the team. The Fund started the year with an equity exposure of 22%, which has been reduced to 14% during the first quarter. A further reduction has been deployed in the second half, with equity exposure ending the year at 13%. In the Fixed Income component, slightly less than 80% of the portfolio has been invested in Italian government debt, while the remaining part has been invested in other Eurozone government bonds, mainly Germany, Spain and Austria. A significant part of the investment in Italy was dedicated to floating rates bonds and inflation-linked Italian government bonds, even if both have been reduced during the year. The Fund started the year with a low duration; since March, after the first remarkable phase of surging yields, we started to gradually increase the duration by buying both German and Italian Government bonds, mainly in the mid-long part of the curve as the curves were dramatically flattening. Purchases have then been stopped and scaled back somewhat, starting from summer, as global central banks showed a very aggressive stance toward the worsening inflation spiral. The Fund closed 2022 with a still moderate duration of around 3.3 years.

In the Multi Asset component, the Fund will continue to adopt the investment strategies provided by the quantitative models internally developed.

ANIMA Zephyr New

In 2022, the Fund delivered a net negative performance. The investment activity followed the quantitative methods developed by the team. The Fund started the year with an equity exposure of 42%, which has been reduced progressively to 15% during the first quarter. A further reduction has been deployed in the second half, with equity exposure ending the year at 11%. In the Fixed Income component, slightly less than 80% of the portfolio has been invested in Italian government debt, while the remaining part has been invested in other Eurozone government bonds, mainly Germany, Spain and Austria. A significant part of the investment in Italy was dedicated to floating rates bonds and inflation-linked Italian government bonds, even if both have been reduced during the year. The Fund started the year with a low duration; since March, after the first remarkable phase of surging yields, we started to gradually increase the duration by buying both German and Italian Government bonds, mainly in the mid-long part of the curve as the curves were dramatically flattening. Purchases have then been stopped and scaled back somewhat, starting from summer, as global central banks showed a very aggressive stance toward the worsening inflation spiral. The Fund closed 2022 with a still moderate duration of around 3.3 years.

In the Multi Asset component, the Fund will continue to adopt the investment strategies provided by the quantitative models internally developed.

ANIMA Zephyr Real Assets

In 2022, the Fund delivered a net negative performance. The investment activity followed the quantitative methods developed by the team. The Fund started the year with an overall risk (equity and commodity) exposure of 44%, which has been reduced to 34% during the first quarter. A further reduction has been deployed in the second half, with equity and commodity exposure ending the year at 25%. In the Fixed Income component, slightly less than 80% of the portfolio has been invested in Italian government debt, while the remaining part has been invested in other Eurozone government bonds, mainly Germany, Spain and Austria. A significant part of the investment in Italy was dedicated to floating rates bonds and inflation-linked Italian government bonds, even if both have been reduced during the year. The Fund started the year with a low duration; since March, after the first remarkable phase of surging yields, we started to gradually increase the duration by buying both German and Italian Government bonds, mainly in the mid-long part of the curve as the curves were dramatically flattening. Purchases have then been stopped and scaled back somewhat, starting from Summer, as global central banks showed a very aggressive stance toward the worsening inflation spiral. The Fund closed 2022 with a still moderate duration of around 3.3 years.

In the Multi Asset component, the Fund will continue to adopt the investment strategies provided by the quantitative models internally developed.

The Manager
ANIMA SGR S.p.A.
Milan, April 2023

We have enquired into the conduct of ANIMA Funds Plc ("the Company") for the financial year ended 31 December 2022, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company as a body, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ('the UCITS Regulations'), and under the Central Bank (Supervision Enforcement) Act 2013 (Section 48 (i)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that financial year in accordance with the provisions of the Company's constitution (the "Constitution") and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Constitution and the UCITS Regulations and (ii) otherwise in accordance with the Constitution and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the financial year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Constitution, the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019, ('the Central Bank UCITS Regulations'); and
- (ii) otherwise in accordance with the provisions of the Constitution, the UCITS Regulations and the Central Bank UCITS Regulations.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF ANIMA FUNDS PLC

Report on the audit of the financial statements

Opinion on the financial statements of ANIMA Funds plc ("the company")

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the company as at 31 December 2022 and of the loss for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework, the applicable Regulations and, in particular, with the requirements of the Companies Act 2014.

The financial statements we have audited comprise:

- the Statement of Comprehensive Income;
- the Statement of Financial Position;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares;
- the Statement of Cash Flows; and
- the related notes 1 to 27, including a summary of significant accounting policies as set out in note 1.

The relevant financial reporting framework that has been applied in their preparation is the Companies Act 2014 and International Financial Reporting Standards as adopted by the European Union ("IFRS") ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "*Auditor's responsibilities for the audit of the financial statements*" section of our report.

We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF ANIMA FUNDS PLC

Other information

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the Annual Report and Audited Financial Statements. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Statement of Directors' Responsibilities, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and otherwise comply with the Companies Act 2014, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: <https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements>. This description forms part of our auditor's report.

Report on other legal and regulatory requirements

Opinion on other matters prescribed by the Companies Act 2014

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.
- In our opinion the information given in the directors' report is consistent with the financial statements and the directors' report has been prepared in accordance with the Companies Act 2014.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not

Continued on next page/

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF ANIMA FUNDS PLC

identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the Companies Act 2014 which require us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by law are not made.

Use of our report

This report is made solely to the company's shareholders, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

The accompanying notes form an integral part of the Financial Statements.

1. Significant Accounting Policies

ANIMA Funds Plc (“the Company”) is an open ended umbrella investment company with variable capital and segregated liability between Funds incorporated with limited liability in Ireland under the Companies Act, 2014 with registration number 308009 and registered office 78 Sir John Rogerson’s Quay, Dublin 2, Ireland.

a) Basis of preparation

These Financial Statements have been prepared on a going concern basis in accordance with International Financial Reporting Standards (“IFRS”) as adopted by the European Union (EU) and in accordance with the provisions of the Companies Act, 2014 and authorised by the Central Bank under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”) and under the Central Bank (Supervision & Enforcement) Act 2013 (Section 48(1) (Undertakings for Collective Investment in Transferable Securities)) Regulations 2019 (the “Central Bank UCITS Regulations”).

The significant accounting policies are set out below.

The preparation of Financial Statements in conformity with IFRS requires the use of certain critical estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the Financial Statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management’s best knowledge of the amount, event or actions, actual results ultimately may differ from those estimates.

International Financial Reporting Standards:

(i) New standards, amendments and interpretations issued and effective for the financial year beginning on or after 1 January 2022 and not early adopted

There are no new standards, amendments or interpretations issued and effective for the financial year beginning 1 January 2022 that have a significant impact on the Company’s financial position, performance or disclosures in its financial statements.

(ii) New standards, amendments and interpretations issued but not effective for financial year beginning on or after 1 January 2022 and not early adopted

IFRS 17 “Insurance Contracts” was issued in May 2017 and will become effective for accounting periods beginning on or after 1 January 2023. It applies to: insurance contracts, including reinsurance contracts, issued by an entity; reinsurance contracts held by an entity; and investment contracts with discretionary participation features issued by an entity that issues insurance contracts. An insurance contract is defined as “a contract under which one party (the issuer) accepts significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder if a specified uncertain future event (the insured event) adversely affects the policyholder”. The new standard is not expected to have a significant impact on the Company’s financial position, performance or disclosures in its financial statements.

There are no other standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a significant impact on the Company.

b) Financial Instruments

(i) Classification

IFRS 9 sets out the requirements for recognition and measurement of all financial assets and financial liabilities including derivative instruments. The Company has classified all financial instruments as financial assets or financial liabilities at fair value through profit or loss. These include equity instruments, bonds, futures, exchange traded funds, forward contracts, equity swaps, portfolio swaps, interest rates swaps and coupon swaps. These assets are acquired principally for the purpose of generating a profit from short-term fluctuations in price. All derivatives and liabilities from short sales of financial instruments are classified as held for trading. The Company’s policy is not to apply hedge accounting.

Financial instruments at fair value through profit or loss include Investment Funds. These financial instruments are measured on the basis that their fair value can be reliably measured and their performance has been evaluated on a fair value basis in accordance with the risk management and/or investment strategy as set out in the Company’s offering document.

1. Significant Accounting Policies (continued)**b) Financial Instruments (continued)****(ii) Recognition**

All regular way purchases and sales of financial instruments are recognised on the trade date, which is the date that the Company commits to purchase or sell an asset. Regular way purchases or sales are purchases or sales of financial instruments that require delivery of assets within the period generally established by regulation or convention in the market place. Realised gains and losses on disposals of financial instruments are calculated using average cost method.

(iii) Derecognition

A financial asset (or, where applicable part of a financial asset or part of group of similar assets) is derecognised where;

- The rights to receive cash flows from the assets have been expired; or
- The Company transferred its rights to receive cash flows from assets or has assumed an obligation to pay the received cashflows in full without material delay to a third party under 'pass through' arrangements; or
- Either (a) the Company has transferred substantially all the risks and rewards of the assets, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the assets, but has transferred control of the asset.

When the Company has transferred its right to receive cash flows from an asset or has entered into a pass through arrangement and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Company's continuing involvement in the asset. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the right and obligations that the Company has retained.

The Company derecognises a financial liability when the obligation specified in the contract is discharged, cancelled or expires.

(iv) Initial Measurement

Financial instruments categorised at fair value through profit or loss are recognised initially at fair value, with transaction costs for such instruments being recognised directly in the Statement of Comprehensive Income.

(v) Subsequent measurement

After initial measurement, the Company measures financial instruments which are classified as at fair value through profit or loss at their fair values. Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. The fair value of financial instruments is based on their quoted market price on a recognised exchange or sourced from a reputable broker/counterparty in the case of nonexchange traded instruments, at the statement of financial position date without any deduction for estimated future selling costs. Financial assets and financial liabilities are priced at their last traded prices.

If a quoted market price is not available on a recognised stock exchange or from a broker/counterparty, the fair value of the financial instruments may be estimated by the Company using valuation techniques, including the use of recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cashflow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Where the Company has assets and liabilities with offsetting market risks, it uses mid-market prices as a basis for establishing fair values for the offsetting risk positions.

Investments in investment funds are recorded at the NAV per share as reported by the Administrator of such Funds at period end, as this is deemed by the Directors to approximate fair value for these investments.

If necessary, the Funds make adjustments to the NAV of various Investment funds based on their audited NAV versus dealing NAV to obtain the best estimates of fair value.

Subsequent changes in the fair value of financial instruments at fair value through profit or loss are recognised in the Statement of Comprehensive Income. Interest earned or incurred is accrued in interest income or expense, respectively, according to the terms of contract.

1. Significant Accounting Policies (continued)**c) Offsetting Financial Instruments**

Financial assets and liabilities are offset and the net amount reported in the statement of financial position where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liability simultaneously. Refer to Note 3 for further details of the Funds where Offsetting is applicable.

d) Cash and Cash Equivalents

Cash comprises current deposits with bank or Depositary and bank overdrafts. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value, and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

e) Income**(i) Bond income**

Income earned arising on fixed interest securities and liquidity instruments is recognised on an effective yield basis. Bond income on securities classified as financial assets at fair value through profit or loss are accounted for through the Statement of Comprehensive Income under net gains/(losses) on financial assets and liabilities at fair value through profit and loss.

(ii) Dividend income

Dividends, gross of withholding taxes, where applicable, are included as income when the security is declared to be ex-dividend. Withholding tax is recorded separately in the Statement of Comprehensive Income.

(iii) Deposit interest

Deposit interest is accounted for on an accrual basis.

(iv) Investment Fund income

Investment fund income is derived from the underlying funds distributions and accounted for when announced by the underlying funds.

(v) Securities Lending income

Securities lending income is accounted for on an accrual basis.

(vi) Swap income

Swap income is calculated on a discounted cash flow basis. It is released from the swap on a quarterly basis to meet the expenses of the Company.

f) Fees and Charges

In accordance with the Prospectus, management fees, administration fees, Depositary fees and other operating expenses are charged to the Statement of Comprehensive Income on an accruals basis.

g) Derivative Instruments

Changes in the value of the derivatives are recognised as gains and losses by marking to market on a daily basis to reflect the value of the derivative at the end of each day's trading. All listed derivatives are valued at official settlement price established each day on which they are traded. Non-listed derivative instruments are valued as per counterparty price. The Company's investment therein, representing unrealised gain or loss on such contracts, is included in the Statement of Comprehensive Income within the Net gains/(losses) on financial assets and liabilities and on the Statement of Financial Position within financial assets at fair value through profit or loss and financial liabilities at fair value through profit or loss.

Typically, financial derivative instruments ("FDIs") serve as components of the Company's investment strategy and are utilised primarily to structure and economically hedge investments to enhance performance and reduce risk to the Company (the Company does not designate any FDIs as hedges for hedge accounting purposes as described under IFRS 9 Financial Instruments: Recognition and Measurement). The Company records its FDI activities on a mark to market

1. Significant Accounting Policies (continued)**g) Derivative Instruments (continued)**

basis. Fair values are determined using counterparty prices. For Over The Counter ("OTC") FDIs, the Company may enter into master netting agreements with its counterparties, therefore, assets represent the Company's unrealised gains, less unrealised losses for OTC FDI in which the Company has a master netting agreement. There is no netting in the Statement of Financial Position on any of the Funds. (Please refer to Note 3 for details).

h) Redeemable Participating Shares

Redeemable Participating Shares are redeemable at the Shareholder's option and are classified as financial liabilities. These shares can be put back to the Company on any Dealing Day for cash equal to a proportionate share of the Fund's net asset value.

i) Gains and Losses on Investments

Realised gains or losses on disposal of investments during the financial year and unrealised gains and losses on valuation of investments held at the financial year end are accounted for through the Statement of Comprehensive Income under net gains/(losses) on financial assets and liabilities at fair value through profit and loss.

j) Taxation

The Company is exempt from all forms of taxation in Ireland, including income, capital gains and withholding taxes. However, in some jurisdictions, investment income and capital gains are subject to withholding tax deducted at the source of the income. Withholding tax is a generic term used for the amount of withholding tax deducted at the source of the income and is not significant for the Company. The Company presents the withholding tax separately from the gross investment income in the Statement of Comprehensive Income. For the purpose of the Statement of Cash Flows, cash inflows from investments are presented net of withholding taxes, when applicable.

k) Foreign Exchange

The functional and presentation currency of the Company is Euro. The Directors have determined that this reflects the Company's primary economic environment, as the majority of the Company's Net Assets Attributable to Holders of Redeemable Participating Shares are denominated in Euro.

Foreign exchange gains and losses on financial assets and financial liabilities at fair value through profit or loss are recognised together with other changes in the fair value. Net currency gains/(losses) as set out in Note 5, these include net foreign exchange gains and losses on monetary financial assets and liabilities other than those classified at fair value through profit or loss.

Assets and liabilities denominated in foreign currencies, other than the functional currency of the Company, have been translated at the rate of exchange ruling at 31 December 2022. Refer to Note 15 on page 520 and 521 for further details. Transactions in foreign currencies are translated into Euro at the exchange rate ruling at the date of the transaction. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the result for the financial year.

l) Distributions to Holders of Redeemable Participating Shares

Distributions to Holders of Redeemable Participating Shares are recognised as financial costs in the Statement of Comprehensive Income when declared to Holders of Redeemable Participating Shares.

m) Collateral

The Company's assets may be pledged as collateral to, and be held by a counterparty and/or brokers for open futures and swap contracts. A Fund may also receive collateral in the form of cash or stock from counterparties for derivative contracts. This collateral is held ultimately for the benefit of the Company's trading counterparties, and therefore does not form part of the net assets of the relevant Fund.

n) Subscriber Shares

The Company's Subscriber Shares are classified as equity in accordance with the Company's Articles of Association. These shares do not participate in the profits of the Company.

1. Significant Accounting Policies (continued)**o) Amounts due to/from broker**

Amounts due from and amounts due to brokers represents cash held with brokers, for financial derivative contracts on the Statement of Financial Position date.

p) Options

Each Fund may purchase and sell (write) call and put options on securities, securities indices and foreign currencies traded on a national securities exchange or in an over-the-counter market.

When a Fund writes a call or a put option, a premium is received by the Fund. The premium is subsequently marked-to market to reflect the fair value of the option written, which is reported within financial assets or liabilities at fair value through profit or loss on the Statement of Financial Position for each relevant Fund. The difference between the premium amount and the fair value reported on the Statement of Financial Position gives rise to an unrealised gain (loss).

When a Fund purchases a call or a put option, a premium is paid by the Fund. The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is included in determining initial fair value of the securities or foreign currency purchased. Premiums paid on the purchase of options which expire unexercised are treated as realised losses. The option is subsequently marked to market to reflect the fair value of the option purchased, which is reported within financial assets at fair value through profit or loss on the Statement of Financial Position for each relevant Fund. The over-the-counter options are valued at close of business on the dealing day at the settlement price as provided by the counterparty/broker and the values are independently valued, at a minimum, weekly. The fair value of exchange traded options are based upon their quoted daily settlement prices on the relevant exchange. In the event of it being impossible or incorrect to carry out a valuation of a specific investment in accordance with the valuation rules, or if such valuation is not representative of a security's fair market value, the Directors are entitled to use other generally recognised valuation methods in order to reach a proper valuation of that specific instrument, provided that such method of valuation has been approved by the Depositary.

If an option which a Fund has written either expires on its stipulated expiration date or a Fund enters into a closing purchase transaction, a Fund realises a gain (or loss, if the cost of a closing purchase transaction exceeds the premium received when the option was sold) without regard to any unrealised gain or loss on the underlying security, and the liability related to such option is extinguished. If a call option which a Fund has written is exercised, a Fund realises a capital gain or loss from the sale of the underlying security, and the proceeds from such sales are increased by the premium originally received. When a put option which a Fund has written is exercised, the amount of the premium originally received will reduce the cost of the security which a Fund purchases upon exercise of the option.

q) Futures Contracts

Initial margin deposits are made upon entering into futures contracts and are generally made in cash or cash equivalents. The fair value of futures contracts is based upon their current quoted daily settlement prices on the relevant exchange as of the Statement of Financial Position date under net gain/(losses) in the financial assets and liabilities at fair value through profit or loss. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time realised gains and losses are recognised. For each relevant Fund, gains or losses on open futures contracts are shown in the Schedule of Investments and as appropriate, on the Statement of Financial Position as financial assets or liabilities at fair value through profit or loss.

r) Forward and Spot Foreign Currency Exchange Contracts

The fair value of open forward foreign currency exchange contracts and open foreign currency exchange spot contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the Statement of Financial Position date. For each relevant Fund, gains or losses on open foreign currency exchange spot contracts are included in cash and cash equivalents in the Statement of Financial Position and gains or losses on open forward foreign currency exchange contracts are included in financial assets or liabilities at fair value through profit or loss, as appropriate, on the Statement of Financial Position and Schedule of Investments.

s) Unfunded Swaps

Realised gains or losses depend on the prices used to value the underlying financial instruments within the swaps at the swaps' settlement dates and are recorded as net realised gains or losses in the Statement of Comprehensive Income for each relevant Fund.

1. Significant Accounting Policies (continued)**s) Unfunded Swaps (continued)**

Unrealised gains or losses are fair valued for the amounts expected to be received or paid under the swap agreements if such amounts were terminated at the valuation date.

Unrealised gains or losses are recorded as investments held at fair value through profit or loss in the Statement of Financial Position and the resulting movements in the unrealised gains or losses are recorded as net gains or losses in financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income for each relevant Fund.

t) Funded Swaps

For funded swaps, there is a transfer of the notional amount on inception to the Approved Counterparties, the principal amounts will be returned on the maturity of the swap together with any mark to market value of the underlying index (equity, hedge fund, commodity or real estate).

Unrealised gains or losses are fair valued for the amounts expected to be received or paid under the swap agreements if such amounts were terminated at the valuation date.

Unrealised gains or losses are recorded as investments held at fair value through profit or loss in the Statement of Financial Position and the resulting movements in the unrealised gains or losses are recorded as net gains or losses in financial assets and liabilities at fair value through profit or loss in the Statement of Comprehensive Income for each relevant Fund.

u) Warrants

The valuation of the warrants depends on the level of trading. If the warrants are actively traded in the market then the market price is used. If the warrants are not actively traded in the market then either the intrinsic value of the warrant based on underlying equity price and warrant strike price or modified Black Scholes derived value, adjusted for liquidity/other risks deemed appropriate are used.

v) Total Return Swaps

A total return swap is an agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains. In total return swaps, the underlying asset, referred to as the reference asset, is usually a stock or fixed income index. This is owned by the party receiving the set rate payment. Total return swaps allow the party receiving the total return to gain exposure and benefit from a reference asset without actually having to own it. The fair value of these swaps is determined based on the mark to market valuation provided by the counterparty and validated by the Administrator. In determining the mark to market valuation, the counterparty makes assumptions that are based on market conditions existing on each Statement of Financial Position date and uses valuation techniques which include the use of comparable recent arm's length transactions, discounted cash flow techniques, option pricing models and other valuation techniques commonly used by market participants. Movements in the fair value of swaps are recorded as unrealised gains or losses when marked to market, and are recorded as a realised gain or loss when the position is closed.

2. Fair Value of Financial Instruments

IFRS 13 requires disclosures relating to fair value measurements using a three-level fair value hierarchy. The level within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement. Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability. The following table shows financial instruments recognised at fair value, categorised between those whose fair value is based on:

Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable; and

Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

2. Fair Value of Financial Instruments (continued)

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" requires significant judgement by the Company.

The Company considers observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Manager's perceived risk of that instrument.

The Company uses widely recognised valuation models for determining fair values of over the counter derivatives. The most frequently applied techniques include forward pricing and swap models using present value calculations. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates and interest rate curves. Where inputs in the models are market observable, such financial instruments are included within Level 2. For certain derivatives the valuation is carried out using counterparty prices.

The Company may invest in other Investment Funds from time to time. These investments are not quoted on an active market (with exception of exchange traded funds which are classified within Level 1) and which may be subject to restrictions such as lock up period, redemption gates and/or side pockets. Such investments are valued at the net asset value (NAV) per share published by the appointed third party administrator to those schemes. Such NAV's may be adjusted where necessary, to reflect the effect of time passed since the calculation date, liquidity risk, limitations on redemptions and other factors. Depending on the fair value of the underlying Fund's assets and liabilities and on the adjustments needed to the NAV per share published by such scheme, the Company classifies the fair value of that investment as either Level 2 or Level 3.

Valuation Techniques

Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, Manager's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. The Manager uses prices and inputs that are current as of the measurement date, including periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many securities. This condition could cause a security to be reclassified to a higher level within the fair value hierarchy.

When fair values of listed equities as well as publicly traded derivatives at the reporting date are based on quoted market prices or binding dealer price quotations, without any deduction for transaction costs, the instruments are included within Level 1 of the hierarchy. When the Company has assets and liabilities with offsetting market risks, it uses last traded prices as a basis for establishing fair values for the off-setting risk positions.

The Company uses valuation models for determining fair values of OTC derivatives. For these financial instruments, inputs into models are market observable and are therefore included within Level 2. For certain derivatives the valuation is carried using counterparty prices.

On a day to day basis, counterparties provide the Administrator with mark to market valuations of their FDI. The Administrator will then compare these valuations against their own internal analysis, assessing the coherence of the variation against movements in market parameters. The Administrator was appointed by the Manager as the competent person to carry out such valuation reviews.

All structured products are valued using weighted average counterparty prices. Structured products refer to OTC FDI which include swaps and options held on Funds. The list of Funds' investments can be viewed in the Schedule of Investments.

There have been no transfers between Level 1 and Level 2 on any of the Funds during the current financial year and prior financial year under review.

2. Fair Value of Financial Instruments (continued)

Valuation Techniques (continued)

The following is a summary of the fair valuations according to the inputs as at 31 December 2022 in valuing the Funds assets and liabilities:

ANIMA Liquidity

2. Fair Value of Financial Instruments (continued)**Securities classified as Level 3****ANIMA Asia/Pacific Equity**

The Fund holds 172,228 shares in BGP Holdings Plc, a Maltese, unlisted, private limited company that was expected to list on a public exchange in 2009, however to date this has not occurred. The BGP Holdings Plc shares are considered to have no current value, are not transferrable, are not currently listed on any exchange, have no intention to list on any exchange in the future. They have been valued at nil in these and the Company's previous audited financial statements.

ANIMA Emerging Markets Equity

The Fund holds 66,000 shares in Sound Global Ltd which provides water and wastewater treatment solutions in China. The shares are listed on the Hong Kong Stock Exchange. Trading was suspended for the first time on 5 February 2015, again on 16 March 2015 and also on 12 April 2016. Due to the merger with ANIMA SICAV during the financial year 2016, the Sound Global Ltd shares were transferred into the Fund at a value of EUR 24,051, no trading took place on the investment during the financial year, as at 31 December 2022 and 31 December 2021 the shares have a value of nil and nil, respectively, and are classified as Level 3 in the financial statements.

The Fund also holds 172 shares in the India Magnum Fund. This security has been delisted since 2004 where the Board of Directors of the India Magnum Fund (the "Fund") announced during the annual general meeting held on 30 March 2004, that the stockholders of the Fund have approved the voluntary liquidation of the Fund. Accordingly the Fund no longer required a listing and an application has been made for the Shares of the Fund to be removed from the Official List of the Irish Stock Exchange (source: www.investigate.co.uk). Due to the merger with ANIMA SICAV during the financial year 2016, the India Magnum Fund shares were transferred into the Fund at a fair value of nil, no trading took place on the investment during the financial year, the shares are considered to have no current value and have been classified as Level 3 in the financial statements.

The Fund also holds 9 shares in the LUKOIL PJSC ADR. This security has exposure to Russia and was suspended due to the sanctions on trading the assets held. These have been valued at nil and are classified as Level 3 in the financial statements.

The Fund also holds 45 shares in the MMC Norilsk Nickel PJSC ADR. This security has exposure to Russia and was suspended due to the sanctions on trading the assets held. These have been valued at nil and are classified as Level 3 in the financial statements.

ANIMA Star High Potential Europe

The Fund holds 50,000 shares in Squarestone Brasil Ltd, a company which provides real estate services, specialising in acquiring and developing shopping malls in Brazil. Squarestone Brasil Ltd is involved in construction of Golden Square shopping center in Sao Paulo. The current view on the Company suggests that repayment of ordinary shares issued by Squarestone Brasil Ltd is highly unlikely in view of the fact that, according to the information collected, the proceeds of the sale of the main assets of Squarestone Brasil Ltd are not sufficient to repay in full the privileged shares issued by Squarestone Brasil Ltd. The Squarestone Brasil shares are considered to have no current value and have been classified as Level 3 in the financial statements.

ANIMA High Yield Bond

The Funds holds 102,258 shares in Astaldi S.p.A. Participative Financial Instruments ("SFP"). The Astaldi S.p.a. SFPs are considered to have no current value, are not trading on the market and derive from the conversion of the Astaldi S.p.a. defaulted bonds. These have been valued at nil in the Company's financial statements.

The following table shows a reconciliation of all movements in the fair value of financial instruments categorised within Level 3 during the financial year ended 31 December 2022:

2. Fair Value of Financial Instruments (continued)**Securities classified as Level 3 (continued)**

	ANIMA Asia/Pacific Equity EUR	ANIMA Emerging Markets Equity EUR
Opening Balance Fair Value	-	-
Transfer from Level 1 to Level 3	-	1,199,435
Realised gains/(losses)	493	(915,483)
Unrealised gains	-	66,568
Purchases	-	225,035
Sales	(493)	(575,555)
Closing Balance Fair Value	-	-

The following table shows a reconciliation of all movements in the fair value of financial instruments categorised within Level 3 during the financial year ended 31 December 2021:

	ANIMA Emerging Markets Equity EUR
Opening Balance Fair Value	1,979
Transfer from Level 1 to Level 3	-
Realised gains	-
Unrealised losses	(1,979)
Purchases	-
Sales	-
Closing Balance Fair Value	-

No Level 3 sensitivity analysis of assumptions used in determining the fair value have been included for these positions. These are immaterial to the Company at the financial years ended 31 December 2022 and 31 December 2021.

3. Financial Risk Management**Strategy in using Financial Derivative Instruments**

The Company trades in financial instruments, including FDIs, both traded and over-the-counter. The investment objectives of each Fund are detailed in the Prospectus.

During the financial year ended 31 December 2022, the following FDIs have been used in the Funds:

- futures on bonds;
- futures on equity indices;
- futures on equities;
- futures on commodity indices;
- over-the-counter currency forwards;
- over-the-counter currency options;
- options on equity indices;
- options on futures on bonds;
- interest rate swaps;
- total return swaps;
- swaps on bond coupons and principals; and
- swaps on baskets of indices or stocks

In relation to FDIs, the methodology used to determine the incremental exposure and leverage generated by each fund through the use of FDIs is the Global Exposure under the Commitment Approach as set out in the relevant UCITS Regulation (The Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019) and Guidance Notes issued by the Central Bank.

3. Financial Risk Management (continued)

Strategy in using Financial Derivative Instruments (continued)

In pursuing its investment objectives, the Company is exposed to a variety of financial risks: market risk (including currency risk, interest rate risk, and other price risk), credit risk, liquidity risk and depositary risk, which could result in a reduction in the Company's net assets or a reduction of the profits available for distribution. The Company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company's financial performance.

The risks, and the Company's approach to the management of the risks, are described in the following sections.

Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risks: currency risk, interest rate risk and other price risk.

(a) Currency risk

The Funds may invest in financial instruments and enter into transactions denominated in currencies other than their respective financial currency. Furthermore, the Funds may enter into financial derivative transactions on foreign currencies. Consequently, the Funds may be exposed to the risk that the exchange rate of its currency relative to other foreign currencies may change in a manner that has an adverse effect on Funds' net asset value.

(b) Interest rate risk

The Funds may invest in debt securities and enter into FDI transactions on debt securities or interest rates. Consequently, the Funds may be exposed to the risk that interest rates may change in a manner that has an adverse effect on the Funds' net asset values.

(c) Other price risk

The Funds may invest in equity securities and other funds. The Funds may also enter into FDI transactions on equity securities and financial indices including commodity indices. Consequently, the Funds may be exposed to the risk that the price of equity securities, financial indices or other funds may change (whether caused by factors specific to the instrument, to the issuer or to the whole market), in a manner that has an adverse effect on the Funds' net asset values.

In regards to the management of market risk, a distinction can be made depending on the Fund type.

(i) Market and Absolute Return Funds

For Market Funds (i.e. Funds which are specialised in a specific asset class and with a benchmark) and Absolute Return Funds* (i.e. Funds with an absolute return objective and an absolute risk limit), market risk is monitored firstly by the Manager of each Fund during the continuing process of implementation of the investment policy.

Market risk is also monitored daily by Risk Manager of the Manager.

For each Fund, a risk limit is established by the Board of Directors of the Manager, taking into consideration the Fund's risk profile. The risk limit is expressed in term of tracking error for Market Funds and in terms of volatility for Absolute Return Funds. Such risk limit is monitored on a daily basis through a risk management system.

The risk management system used for monitoring market risk is called "Risk Manager" and is developed by the company MSCI Inc. (from here on called RiskMetrics) to deliver a suite of fixed income, equity and currency risk models within an integrated solution. RiskMetrics is a risk management tool used to aggregate, manage and mitigate risks across asset classes. The risk management system did not change during the reporting period.

RiskMetrics is a widely understood software for risk management and is used by a number of primary asset managers worldwide. The system is used as application service provider ("ASP"), over the Internet. The provider maintains models and data, whilst the Risk Manager provides position and over-the counter term and conditions data.

*UCITS that are managed according to investment policies or strategies which envisage a variable allocation of the portfolio of the fund across asset classes, under the constraint of a predetermined risk limit, shall be considered as absolute return funds.

3. Financial Risk Management (continued)**Market Risk (continued)****(c) Other price risk (continued)****(i) Market and Absolute Return Funds (continued)**

RiskMetrics is able to calculate a variety of risk indicators, both absolute and relative, using three methodologies: parametric, Monte Carlo simulation and historical simulation. For equities and investment funds, the actual time series of returns is used as risk factor, whilst for bonds both risk-free interest rate curves and spread curves are used. For options volatility surfaces are also used. The system is flexible in establishing the length of historical data series used, the frequency of data (up to daily) and their decay factor.

For each Fund, minimum and/or maximum level of exposure to the principal risk factors to which each Fund is exposed to are also established by the Board of Directors of the Manager, taking into consideration the Funds' risk profile. Such exposure limits are monitored on a daily basis of the Manager through the risk management proprietary systems.

(ii) Total Return Funds

For Total Return Funds (i.e. Funds with an absolute return objective but without an absolute risk limit, including Funds with a pre-determined time horizon and which are specialised in bonds which mature at about the same date as the time horizon but which may take additional exposure to other asset classes), market risk is managed firstly by the Manager during the initial portfolio construction process and during the continuing process of implementation of the investment policy.

Market risk is also monitored daily by Risk Manager of the Manager.

For each Fund, minimum and/or maximum level of exposure to the principal risk factors to which each Fund is exposed to are established by the Board of Directors of the Manager, taking into consideration the Funds' risk profile. Such exposure limits are monitored on a daily basis of the Manager through the risk management proprietary systems.

Credit risk

Credit risk is the risk that the issuer or the counterparty of a financial instrument will be unable to pay amounts in full when they fall due. Credit risk comprises two types of risks: issuer risk and counterparty risk.

All securities, cash at bank balances are held by the Depositary, State Street Custodial Services (Ireland) Limited. Bankruptcy or insolvency of the Depositary, may cause the Company's rights with respect to cash and securities held by these entities to be delayed or limited and the Company would be treated as a general creditor of that entity in respect of its cash balances. Periodic monitoring and an annual review are performed on the Depositary by an outsourcing monitoring team of the Manager. This review may include as appropriate an assessment of the Depositary's liquidity position, income streams, asset quality and credit ratings.

Risk is managed by monitoring the credit quality and financial positions of the Fund.

(a) Issuer risk

The Funds may invest in debt securities and FDIs on debt securities. Consequently, the Funds may be exposed to the risk that the issuer of the debt securities may be unable to repay in full the periodic coupons and/or the principal.

(b) Counterparty risk

The Funds may enter into OTC FDIs, security lending and reverse repurchase agreement transactions. Consequently, the Funds may be exposed to the risk that the counterparty of those transactions may be unable to discharge in full any obligation or commitment that it has entered with the Funds.

Issuer risk is monitored by the Manager during the initial and continuing process of implementation of the investment policy. Issuer risk is monitored primarily through the use of the credit rating of one or more rating agencies (External Credit Assessment Institutions), but through the use of the internal credit rating attributed by the Manager according to an internal policy approved by the Board of Directors of the Manager. When a security is not compliant anymore with the risk profile of a Fund (i.e. due to the downgrade below the minimum external or internal rating requirement), the Manager will dispose of the holding, as soon as practical, considering the interest of the shareholders.

3. Financial Risk Management (continued)**Credit risk (continued)****(b) Counterparty risk (continued)**

Counterparty risk is monitored by the Manager during the initial and continuing process of implementation of the investment policy. Counterparty risk is monitored primarily through the use of an internal counterparty rating attributed by the Manager according to an internal policy approved by the Board of Directors of the Manager. When a counterparty is not compliant anymore with the counterparty authorisation policy (i.e. due to the downgrade below the minimum internal rating requirement), the Manager will terminate the transaction, as soon as practical, considering the interest of the shareholders.

Counterparty risk related to OTC FDIs is also mitigated by the daily receipt of collateral, of adequate level, quality and diversification and with the application of appropriate haircuts, according to an internal policy approved by the Board of Directors of the Manager, in compliance with EMIR regulations. Counterparty risk related to security lending and reverse repo transactions is also mitigated by the daily receipt of collateral, of adequate level, quality and diversification and with the application of appropriate haircuts, according to an internal policy approved by the Board of Directors of the Manager.

The below table discloses the Standard & Poor's long term debt ratings of the counterparties as at the financial year end and also it discloses the Counterparty Risk exposure across all the Funds within the Company as a percentage of the NAV:

As at 31 December 2022			As at 31 December 2021		
Bank of America	A+	0.01%	Bank of America	A+	0.02%
BNP Paribas	A+	0.07%	BNP Paribas	A+	0.03%
Credit Agricole	A+	0.04%	Credit Agricole	A+	0.00%
Deutsche Bank	A-	0.02%	Goldman Sachs	A+	0.25%
Goldman Sachs	A+	0.38%	JP Morgan	A+	0.20%
JP Morgan	A+	0.29%	Morgan Stanley	A+	0.03%
Morgan Stanley	A+	0.11%	MPS Capital Service	B+	3.76%
MPS Capital Service	B+	3.98%	Nomura International	BBB+	0.00%
Nomura International	BBB+	0.00%			

Liquidity risk

Liquidity risk is the risk that the Funds will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial assets. Delivery obligation may arise from: accounts payable (i.e. management fees, depositary fees, etc.), FDIs, cash redemptions of redeemable participating shares.

The investment processes of the Manager are organised in a way whereby a liquidity profile for each Fund is identified taking into account all relevant factors: investment policy (i.e. instrument type in which the Fund is mainly invested), risk classification, diversification of shareholders, frequency of NAV price calculation, recent trend of subscription and redemption. According to that profile, a desired Fund's minimum liquidity level is defined. In making an investment decision, high priority is given to the liquidity of each eligible investment.

For each Fund, maximum levels of exposure to less liquid assets are established by the Board of Directors of the Manager, taking into consideration the Fund's risk profile. Such exposure limits are monitored on a daily basis of the Manager through the risk management proprietary systems.

The liquidity of equities is mainly estimated from volumes traded in regulated exchanges, whilst the liquidity of fixed income securities is mainly estimated using a variety of information (issuer type, amount outstanding, bid/ask spreads, credit rating, etc). For FDIs, the liquidity of the underlying asset is used. For Underlying Investment Fund (UIF), the Manager carry out a specific due diligence process to ensure that the dealing profile of the target UIF meets the dealing and the liquidity requirements of the investing Fund.

Risk Monitoring

In addition to the risk monitoring performed by the Manager, other risk review activities are scheduled.

3. Financial Risk Management (continued)**Risk Monitoring (continued)**

The risk and return of the Funds is also analysed by the Board of Directors of the Manager on a regular basis at periodic board meetings.

The Board of Directors of the Company supervises the Manager and is ultimately responsible for the risk management within the Company.

Exposure Analysis / Sensitivity Analysis

In this section, an exposure analysis is presented for each risk type to which the Fund is exposed at the reporting date and at the previous period reporting date. In addition to that, a sensitivity analysis is presented for each risk type of market risk to which the Fund is exposed at the report date and at previous period reporting date, showing how the net asset value of the Fund would have been affected by changes in the relevant risk variable that were reasonably possible.

A risk concentration analysis for each financial instrument type is also present in the "Schedule of Investments" section.

Capital risk management

The capital of the Company is represented by the net assets attributable to holders of redeemable shares. The amount of net asset attributable to holders of redeemable shares can change significantly on a daily/weekly basis, as the Company is subject to daily/weekly subscriptions and redemptions at the discretion of shareholders. The Fund's objective when managing capital is to safeguard the Fund's ability to continue as a going concern in order to provide returns for shareholders, provide benefits for other stakeholders and maintain a strong capital base to support the development of the investment activities of the Company.

(a) Currency risk

The tables below summarise the currency exposure as a percentage of the Funds' net asset value, which is calculated with the inclusion of currency forwards. The percentages below are net of the effect of forward foreign currency exchange ("FX") contracts.

ANIMA Zephyr Real Assets	11.61 %	-1.16 %

3. Financial Risk Management (continued)**Capital risk management (continued)****(c) Other price risk (continued)**

The tables below summarise the equity exposure of the Funds, which is calculated with the inclusion of equity FDIs.

As at 31 December 2022

Portfolio	Equity Risk	
	Equity Exposure % of NAV	10% Decrease of Equity
ANIMA Thematic	17.82 %	-1.78 %
ANIMA Thematic II	21.15 %	-2.12 %
ANIMA Thematic III	23.26 %	-2.33 %
ANIMA Thematic IV	21.59 %	-2.16 %
ANIMA Thematic V	17.03 %	-1.70 %
ANIMA Selection Moderate	24.77 %	-2.48 %
ANIMA Selection Conservative	1.95 %	-0.20 %
ANIMA Megatrend People Fund	96.56 %	-9.66 %

A 10% increase would have resulted in an equal but opposite effect on the amounts shown above, on the basis that all other variables remain constant.

3. Financial Risk Management (continued)

Capital risk management (continued)

(c) Other price risk (continued)

The tables below summarise the equity exposure of the Funds, which is calculated with the inclusion of equity FDIs.

Liquidity risk

The tables below summarise the liquidity risk exposure of the Funds in terms of assets and liabilities by maturity bucket. Balances due within six months equal their carrying amounts, as the impact of discounting is insignificant. The maturity groupings are based on the remaining period from the end of the reporting period to the contractual maturity date. Where the counterparty has a choice of when the payment required, the liability is allocated to the earliest timeframe in which the Fund could be required to pay.

ANIMA Liquidity

3. Financial Risk Management (continued)**Offsetting Financial Assets and Financial Liabilities**

Each Fund may be eligible to present net on the Statement of Financial Position, certain financial assets and liabilities according to criteria described in Note 1 (c) to the Financial Statements.

As at 31 December 2022, none of the financial assets and financial liabilities met the eligibility criteria and therefore none were presented net on the Statement of Financial Position.

The following tables present each Funds financial assets and financial liabilities subject to offsetting, enforceable master netting arrangements and similar agreements. The tables are presented by counterparty.

¹ This Fund was launched during the financial year ended 31 December 2021.

7. Cash and Cash Equivalents

Cash and Cash Equivalents recognised at the Statement of Financial Position as of 31 December 2022 and 31 December 2021 are held within the State Street Bank and Trust Company ("State Street").

8. Balance due from/to brokers

Balances due from and due to brokers recognised at the Statement of Financial Position are due from/to BNP Paribas. BNP Paribas is a counterparty for future contracts on the Funds.

Cash is deposited by or on behalf of the Funds for margin purposes and held by brokers for exchange traded derivative instruments held by the Relevant Funds. As this amount is normally the minimum deemed by the brokers for collateral requirements the cash is as such restricted and is reported separately to the unrestricted cash and cash equivalents on the Funds' Statement of Financial Position.

, This Fund was launched during the financial year ended 31 December 2021.

11. Share Capital

Authorised

The Authorised Share Capital of the Company is EUR 40,000 divided into 40,000 Subscriber Shares of a par value of EUR1 each and 5 billion Participating Shares of no par value.

Exercise of Voting rights

The Company has appointed ANIMA SGR S.p.A. as Manager of the Company, pursuant to a Management Agreement, with effect from 1 January 2019. The Manager undertakes the responsibility for managing the assets and investments of each Fund within the Company and it is delegated by the Company to exercise such voting rights in the exclusive benefit of the Company. The Manager, taking into consideration the Company's portfolio under management, monitors corporate events and decides whether or not to exercise the right of voting and how to vote.

The Company makes sure that the voting rights, carried out by the delegates on its behalf, will only be exercised in the interest of the relevant sub-fund and its shareholders and defines the strategies to follow when conflicts of interest or potential conflicts of interest may arise. Details of the actions taken on the basis of those strategies are made available to shareholders free of charge and on their request.

Subscriber Shares

The Company has issued 40,000 Subscriber Shares as a quarter paid up and as they are not part of the participating Shares of the Company, they do not form part of the Net Asset Value of the Company. These Subscriber Shares are held by the Manager.

Redeemable Participating Shares

The Net Assets attributable to Redeemable Participating Shareholders of the Company are at all times equal to the Net Asset Value of the Company. The Participating Shares are in substance a liability of the Company to the Shareholders under IAS 32 and they can be redeemed at the option of the Shareholders. Every Shareholder or Holder of non-participating shares, present in person or by proxy, who votes on a show of hands shall be entitled to one vote. The rights attaching to the Shares issued in any Class or Fund may, whether or not the Company is being wound up, be varied or abrogated with the consent in writing of the Shareholders of three-quarters of the issued Shares or of that Class or Fund, or with the sanction of a resolution passed at a separate meeting of the Participating Shareholders of the Class by a majority of three-fourths of the votes cast at such a meeting of that Class or Fund.

Share Classes

The Company may create more than one class of Shares (each a "Class") in relation to each Fund. The Company is structured as an umbrella fund consisting of different Funds comprising one or more Share Classes. A separate portfolio of assets is not maintained for each Class. The investment objective and policies and other details in relation to each Fund are set out in the relevant Information Cards, which form part of the Prospectus. Within the maximum permitted limit the Manager's fees may differ between Funds and between Classes of the same Fund. The current fees charged by the Investment Manager for each class are specified in the Class Information Cards or in the relevant Information Cards. Shares issued in a Fund or Class will be denominated in the base currency or in such other currency as may be specified in the Class Information Cards or in the relevant Information Cards.

In accordance with the objectives listed in the Directors' Report and in the risk management policies as discussed in Note 3, the Company strives to invest the subscriptions of redeemable participating shares in appropriate investments, while maintaining sufficient liquidity to meet Shareholder redemptions. Requests for redemptions received by the Administrator prior to the Dealing deadline for any Dealing Day will be dealt with on that Dealing Day.

13. Securities Lending

On 23 March 2016, a stock lending agency agreement was signed between the Company, ANIMA Asset Management Limited (now merged into Anima Alternative SGR S.p.A.) (the "Stock Lending Agent") and State Street Custodial Services (Ireland) Limited (the "Depositary"). On the same date, a stock lending sub-agency agreement was signed between the Stock Lending Agent, the Depositary, State Street GMBH London Branch (now Frankfurt Branch) (the "Stock Lending Sub-Agent") and State Street Bank and Trust Company. On the basis of economic agreements between the parties, the Company will receive 70% of the securities lending income and the remaining 30% will be received by the Stock Lending Agent and its Sub-Agent.

13. Securities Lending (continued)

Transaction Costs

Transaction costs are defined as the incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value through profit or loss plus, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs relating to the brokers commission on the purchase and sale of a financial asset or financial liability, are included in its purchase and sale price. Transaction costs of the Depositary are embedded in the Depositary fees in the Statement of Comprehensive Income.

Transaction costs amounted to EUR 12,257,895 (2021: EUR 9,923,678) and includes EUR 6,231,007 (2021: EUR 5,191,146) of commission fees and EUR 6,026,888 (2021: EUR 4,732,532) trade expense fees for the financial year ended 31 December 2022.

In addition to these fees, order routing fees amounting to EUR 1,124,931 (2021: EUR 734,797) were paid to ANIMA Asset Management Limited.

16. Efficient Portfolio Management

The Company may, on behalf of each Fund, employ (subject to the conditions and within the limits laid down by the Central Bank of Ireland (CBI)) techniques and instruments relating to transferable securities, provided that such techniques and instruments are used for efficient portfolio management purposes. The Company may also employ techniques and instruments intended to provide protection against exchange risks in the context of the management of its assets and liabilities or for the purposes of:

- (a) hedging
- (b) risk reduction or management
- (c) performance enhancement such as reduction of cost and/or generation of additional capital or income
- (d) management of interest, currency and/or exchange risks
- (e) management of securities prices
- (f) management of target Funds
- (g) achieving a foreign exchange exposure different from the underlying securities in order to neutralise active risk against the benchmark (currency overlay) and/or
- (h) seeking active foreign exchange exposure in order to enhance portfolio performance

The types of instruments which each Fund may use for these purposes are disclosed in Appendix V to the Prospectus. Each Fund may invest in FDIs. The FDIs used by each Fund during the reference period include futures, swaps, forward currency contracts and options. Please refer to the Schedule of Investments of these Funds on pages 551 to 842 to view details of these instruments including the instruments. The names of counterparties are also disclosed in the Schedule of Investments where applicable.

The Company may utilise securities lending agreements and reverse repurchase agreements for efficient portfolio management purposes.

Financial Derivative Instruments

Typically, FDIs serve as components of the Company's investment strategy and are utilised primarily to structure and economically hedge investments to enhance performance and reduce risk to the Company (the Company does not designate any derivatives as hedges for hedge accounting purposes as described under IFRS 9 Financial Instruments: Measurement). The Company records its FDI activities on a mark to market basis. Fair values are determined using counterparty prices. For Over the Counter ("OTC") FDIs, the Company may enter into master netting agreements with its counterparties, therefore, assets represent the Company's unrealised gains, less unrealised losses for OTC FDIs in which the Company has a master netting agreement. There is no netting taking place in the Statement of Financial Position on any of the Funds.

The primary difference in the risk associated with OTC FDIs and exchange-traded contracts is counterparty risk. The Company is exposed to counterparty risk from OTC FDIs when two conditions are present; (i) the OTC FDIs have unrealised gains, net of any collateral and (ii) the counterparty to the contracts defaults. The counterparty risk related to exchange-traded FDIs is minimal because the exchange ensures that these FDIs are always honoured. Changes in the value of the FDIs are recognised as gains and losses by marking to market on a daily basis to reflect the value of the FDI at the end of each day's trading. They are valued at the settlement price established each day on which they are traded, and the Company's investment therein, representing unrealised gain or loss on such contracts, is included in the Statement of Comprehensive Income within the Net gains/(losses) on financial assets and liabilities and on the Statement of Financial Position within financial assets at fair value through profit or loss and Financial liabilities at fair value through profit or loss.

17. Related Party Transactions

Transactions Involving Directors

There were no contracts or arrangements of any significance in relation to the business of the Company in which the Directors or Company Secretary had any interest (as defined in the Companies Act, 2014), at any time during the financial year or prior financial year.

Mr. Davide Sosio is the CFO and HR Director of ANIMA Holding S.p.A., the parent company of ANIMA SGR S.p.A., and until 31 December 2022, was a Director of ANIMA Asset Management Limited. He is Finance Director of ANIMA SGR S.p.A..

Mr. Pierluigi Givero is Joint General Manager at ANIMA Holding S.p.A. and ANIMA SGR S.p.A. He is a Director of Anima Alternative SGR S.p.A. and was, until 31 December 2022, a Director of ANIMA Asset Management Limited.

Mr. Rory Mason was, until 31 December 2022, a Director and the Chairman of the Board of Directors of ANIMA Asset Management Limited.

Mr. Andrew Bates was, until 31 December 2022, a Director of ANIMA Asset Management Limited and during 2022 was a consultant in the Company's legal advisors, Dillon Eustace, Solicitors. Dillon Eustace is considered to be a related party by virtue of the consultancy of Andrew Bates. Fees paid to the Company's legal advisors, including Company Secretarial Fees, during the financial year amounted to EUR 102,666 (31 December 2021: EUR 104,065).

Mr. Agostino Ricucci was, until 31 December 2022, a Director and the General Manager of ANIMA Asset Management Limited. From 1 January 2023, he is Chief Operating & Trading Officer of Anima Alternative SGR S.p.A.

ANIMA Asset Management Limited merged into Anima Alternative SGR S.p.A. with effective date of 1 January 2023. Anima Alternative SGR S.p.A. is a company fully owned by ANIMA Holding S.p.A.

Collateral Positions

The counterparties and the Company have in place certain OTC derivatives transactions. Considering the exposure that the Company and the counterparties have vis-a-vis each other, collateral is posted in order to hedge counterparty exposure. The following table reports the market value of the collateral provided by the Company to counterparties (negative signs represent collateral held by the Company).

18. Auditor's Remuneration

The remuneration for all work carried out by the statutory audit firm in respect of the financial years under review was as follows:

	Year ended 31 December 2022	Year ended 31 December 2021
	EUR	EUR
Statutory audit of the company financial statements	368,000	346,700
Tax Advisory Services	-	-
	<u>368,000</u>	<u>346,700</u>

The above amount reflects the audit fee (exclusive of VAT) agreed for the current financial statement year, however amounts disclosed in the Statement of Comprehensive Income and Note 6 are reflective of amounts accrued in the financial year.

19. Taxation

Under current Irish law and practice the Company qualifies as an investment undertaking under Section 739B of the Taxes Consolidation Act, 1997 and is not therefore chargeable to Irish tax on its relevant income or relevant gains. No stamp, transfer or registration tax is payable in Ireland on the issue, redemption or transfer of Shares in the Company. Distributions and interest on securities issued in countries other than Ireland may be subject to taxes including withholding taxes imposed by such countries. The Company may not be able to benefit from a reduction in the rate of withholding tax by virtue of the double taxation agreement in operation between Ireland and other countries. The Company may not, therefore, be able to reclaim withholding tax suffered by it in particular countries.

To the extent that a chargeable event arises in respect of a Shareholder, the Company may be required to deduct tax in connection with that chargeable event and pay the tax to the Irish Revenue Commissioners. A chargeable event can include dividend payments to Shareholders, appropriation, cancellation, redemption, repurchase or transfer of shares, or a deemed disposal of Shares every 8 years beginning from the date of acquisition of those Shares. Certain exemptions can apply. To the extent that Shareholders have appropriate tax declarations in place with the Company there may be no requirement to deduct tax.

20. Cross Investment between Funds

Under the Investment Funds, Companies and Miscellaneous Provisions Act 2005, the Company is permitted to engage in cross-investment between Funds within the umbrella structure.

Please refer to the Schedule of Investments of these Funds on pages 540 to 843 to view their holdings in the other Funds. The cross holdings are indicated with an asterisk on the applicable Funds' Schedule of Investments of these Funds. The cross holdings have the nominal amounts and market value disclosed on the Schedules of Investments. No distributions were paid out of the cross holding during the current or prior periods. For the purpose of producing the financial statements these cross holdings were eliminated in order to prevent double counting.

These holdings are removed from the Company totals on the primary statements.

The management and investment management fees were waived on the cross holding portion of the Funds. Please refer to the table below which details the amounts of the management fees waived in relation to the cross holdings.

	Year ended 31 December 2022	Year ended 31 December 2021

21. Soft Commission Arrangements and Directed Brokerage

There were no soft commission arrangements or directed brokerage arrangements affecting the Company during the financial year or prior financial year.

22. Significant events during the financial year

The geopolitical crisis in Eastern Europe has been marked by a dramatic escalation in intensity: after first recognizing the separatist republics in the eastern area in the Donec basin, Russia then invaded Ukraine.

The Company and the Manager are constantly monitoring the events related to the war between Russia and Ukraine.

New Funds and addenda approved by the Central Bank of Ireland

The Prospectus of the Company was approved by the CBI on 1 January 2022.

The First Addendum to Prospectus was noted by the CBI on 22 February 2022.

ANIMA Brightview IX paid a dividend of EUR 0.21 per share on 28 April 2022.

ANIMA Orizzonte Sostenibile 2023 paid a dividend of EUR 0.05 per share on 4 May 2022.

ANIMA Orizzonte Benessere 2023 paid a dividend of EUR 0.05 per share on 20 July 2022.

ANIMA Brightview VI paid a dividend of EUR 0.246 per share on 21 July 2022.

ANIMA Thematic paid a dividend of EUR 0.2205 per share on 4 August 2022.

ANIMA Brightview VII paid a dividend of EUR 0.15 per share on 29 September 2022.

22. Significant events during the financial year (continued)**Dividends Paid (continued)**

ANIMA Orizzonte Energia 2023 paid a dividend of EUR 0.0625 per share on 5 October 2022.

ANIMA Brightview III paid a dividend of EUR 0.107 per share on 20 October 2022.

ANIMA Thematic II paid a dividend of EUR 0.20517 per share on 27 October 2022.

ANIMA Orizzonte Consumi 2023 paid a dividend of EUR 0.0625 per share on 14 December 2022.

Funds launched during the financial year

ANIMA Italy was launched on 10 January 2022.

ANIMA Megatrend People Fund was launched on 10 January 2022.

ANIMA Thematic IV was launched on 9 February 2022.

ANIMA Thematic V was launched on 11 May 2022.

ANIMA Thematic VI was launched on 20 July 2022.

ANIMA Thematic VII was launched on 16 November 2022.

Other significant events during the financial year

The Prospectus of the Company was approved by the CBI on 1 January 2022.

The main changes have concerned:

- In respect of the Funds applying the incentive fee, the calculation methodology was amended such that incentive fee are calculated net of all fees and expenses including accrued incentive fee (as of 1 January 2022).
- In respect of the Fund ANIMA Short Term Corporate Bond, the incentive fee calculation methodology was changed from HWM to Outperformance of an index (as of 1 January 2022).
- In respect of the Fund ANIMA Euro Equity, the change of the MSCI EMU index type used as parameter for incentive fee, from MSCI EMU price index to MSCI EMU net total return index (as of 1 January 2022).
- In respect of the Funds applying the HWM as incentive fee calculation methodology, the introduction of an incentive fee cap of 10% (as of 1 January 2022).
- The alignment with the Regulation (EU) 2020/852 (the "Taxonomy Regulation"): specifically, for non-ESG Funds a Taxonomy disclosure was required to be inserted by 1 January 2022.

MPS Private Solution Absolute (Fund was a part of Multi Solution Fund umbrella which was managed by ANIMA Asset Management LTD) was merged into ANIMA Selection Conservative on 31 March 2022.

MPS Private Solution Flexible, MPS Private Solution Global and MPS Private Solution Multi-Asset (Funds were a part of Multi Solution Fund umbrella which were managed by ANIMA Asset Management LTD) were merged into ANIMA Selection Moderate on 31 March 2022.

The Prospectus of the Company was approved by the CBI on 28 June 2022.

The main changes have concerned:

- Conversion of the following sub-funds from article 6 (SFDR) to article 8 (SFDR): ANIMA U.S. Equity, ANIMA Europe Equity, ANIMA Asia/Pacific Equity, ANIMA Global Equity Value, ANIMA Euro Government Bond, ANIMA International Bond, ANIMA Liquidity, ANIMA Italy, ANIMA Megatrend People Fund.
- Introduction of the use of credit default swaptions in respect of certain sub-funds.
- Introduction of the definition of "government bond" in the FICs of ANIMA Italian Bond and ANIMA Euro Government Bond.

22. Significant events during the financial year (continued)**Other significant events during the financial year (continued)**

- Renaming of “ANIMA Megatrend Fund” into “ANIMA Megatrend People Fund”.
- Update of sustainability risk levels.
- Update of Country Supplement for Germany.

The First Addendum to Prospectus was noted by the CBI on 16 September 2022. The change has concerned the Dealing Deadline definition on the Fund Information Card of ANIMA Active Selection.

The Second Addendum to Prospectus was noted by the CBI on 20 October 2022. The changes have concerned, among others, the Fund Information Card of ANIMA Bond 2022 Opportunities renamed into ANIMA Opportunities 2027.

The Third Addendum to Prospectus was noted by the CBI on 1 December 2022 to address the disclosure requirements pursuant to (i) the Sustainable Finance Disclosure Regulations (EU) 2019/2088 (as of 30 December 2022); and (ii) the Delegated Regulation (EU) 2022/1288 (as of 1 January 2023).

The Fourth Addendum to Prospectus was noted by the CBI on 14 December 2022 to reduce, as of 1 January 2023, the subscription fee from “up to 3%” to “up to 1%” of ANIMA Short Term Corporate Bond.

Funds terminated during the financial year

ANIMA Solution 2022-I was terminated on 1 March 2022.

ANIMA Solution 2022-II was terminated on 30 June 2022.

ANIMA Solution 2022-III was terminated on 15 November 2022.

ANIMA Smart Volatility Europe was totally redeemed on 23 December 2022.

Funds merged during the financial year

ANIMA Flexible Bond was merged into ANIMA Bond Flex on 27 June 2022.

There have been no other significant events affecting the Company during the financial year.

23. Significant events after the financial year end**Dividends Paid**

ANIMA Brightview VIII paid a dividend of EUR 0.21 per share on 26 January 2023.

ANIMA Thematic III paid a dividend of EUR 0.2205 per share on 26 January 2023.

Other significant events after the financial year end

The Prospectus of the Company was approved by the CBI on 3 January 2023 to reflect the following edits:

- changing of references from Key Investor Information Document/KIID to Key Information Document/KID;
- removal of the Fund Information Card in respect of ANIMA Tesoreria Imprese in light of the sub-fund's revocation;
- inclusion of a note on the cover page of the ANIMA Zephyr ESG FIC.

ANIMA Brightview 2023-I was totally redeemed on 3 January 2023.

ANIMA Orizzonte Europa 2022 was automatically converted into ANIMA Liquidity - Class Silver on 11 January 2023.

ANIMA Thematic VIII was launched on 22 February 2023.

The First Addendum to Prospectus, changing all references to ANIMA Asset Management Ltd consistently with the cross-border merger with Anima Alternative SGR S.p.A., was noted by the CBI on 14 March 2023.

23. Significant events after the financial year end (continued)**Other significant events after the financial year end (continued)**

A new Sub-Fund named ANIMA Thematic X was approved by the CBI on 20 March 2023.

The Second Addendum to Prospectus was noted by the CBI on 30 March 2023. The changes concerned:

- the conversion of ANIMA Euro Equity and ANIMA Short Term Corporate Bond from Article 6 SFDR into Article 8 SFDR;
- the Sustainability Risks classification update in respect of certain Sub-Funds of the Company;
- the inclusion of additional content to the risk factor headed 'Sustainability Risks';
- the inclusion of a new risk factor headed "Use of Financial Indices";
- minor edits in respect of each SFDR Annex contained in the Prospectus of the Company.

The recent crises of the US regional banks Silicon Valley Bank and Signature Bank and of the Swiss giant Credit Suisse, have been contained by the positive actions taken by respective authorities and stock markets have stabilised. It is unclear if the continued interest rate increases will have further detrimentally impacts on the markets.

There have been no other significant events affecting the Company since the financial year end.

24. Segregated Liability

The Company is structured as an open-ended umbrella investment company with segregated liability between its Funds. While the provisions of the Companies Act 2014 provide for segregated liability between Funds, these provisions have not been tested in foreign courts, in particular in satisfying local creditors' claims. Accordingly it is not free from doubt that the assets of any Fund of the Company may not be exposed to the liabilities of other Funds of the Company.

25. Off Statement of Financial Position risk

Securities sold short and options written represent obligations of the Company to deliver the specified security at the contracted price and thereby create a liability to repurchase the security in the market at prevailing prices. Accordingly, these securities may result in off Statement of Financial Position risk as the Company's satisfaction of the obligation may exceed the amount recognised in the Statement of Financial Position.

26. Prospectus Update

Please refer to the Company's website www.animasgr.it/en to obtain a copy of the Company's most recent prospectus.

27. Approval of Financial Statements

The Financial Statements were approved by the Board of Directors on 13 April 2023.

The percentages in brackets show the equivalent sector holdings as at 31 December 2021.

Material Portfolio changes

Disclosed in the following pages are the aggregate purchase value of a security exceeding one per cent of the aggregate value of purchases for the financial year or the aggregate sale value of a security greater than one per cent of the total value of sales for the financial year. If there are fewer than twenty purchases or twenty sales that are greater than one percent, those purchases and such number of the next largest purchases/sales so that at least twenty purchases/sales are disclosed.

Remuneration Policy of the Manager

The Manager has established, implements and maintains an appropriate remuneration policy which is consistent with and promotes sound and effective risk management and does not induce excessive risk-taking which is inconsistent with the risk profile of a Fund. This policy identifies staff members of the Manager involved in the management of each Fund whose professional activities have a material impact on the risk profile of the relevant Fund. The remuneration policy of the Manager shall provide that where it pays its staff performance related pay with respect to the management of any Fund, the following requirements will be applied:

- a) where remuneration relating to the management of the Fund(s) is performance related, the total amount of remuneration is based on a combination of the assessment of the performance of the individual and of the business unit or the relevant Fund(s) and of the overall results of the Manager, and when assessing individual performance, financial as well as non-financial criteria are taken into account;
- b) the assessment of performance is based on longer term performance and takes into account the outstanding risk associated with the performance. The assessment of performance may be set in a multi-year framework in order to ensure that the assessment process is based on longer term performance is spread over the business cycle of the Firm;
- c) the Manager maintains a fully flexible policy on variable remuneration, and variable remuneration may not be paid as a result of negative performance by the relevant individual, the relevant business unit or the Manager itself;
- d) payments related to the early termination of a contract reflect performance achieved over time and are designed in a way that does not reward failure;
- e) the assessment of performance-based components of remuneration takes into account outstanding risks associated with the performance.

The remuneration policy of the Manager describes how remuneration and benefits are determined, the persons responsible for awarding such remuneration and benefits and the controls in place to comply with the provisions of the UCITS Directive in relation to remuneration, further details of which are available on www.animasgr.it or, upon request, free of charge from the Manager.

Total remuneration, broken down into the fixed and variable component, accrued for the year 2022, the number of beneficiaries.

All TRS positions are collateralised using cash denominated in Euros, the base currency of the Company.

The actual collateral pledged/received for the Company's TRS positions is not separately identifiable.

The Company's collateral management process is to pledge or receive collateral to each relevant counterparty based on the total net exposure to that counterparty which includes exposures from other FDIs such as forward currency contracts. The total collateral pledged/received as at the reporting date is disclosed in Note 18.

7. Ten largest Collateral Issuers (for Collateral received)

Securities lending activities

Sustainable Finance Disclosure Regulation (Unaudited)

The Manager is a signatory to the internationally recognised Principles for Responsible Investment (“PRI”) and, as such, has developed an internal policy for the analysis, evaluation and classification of issuers according to environmental, social and governance factors (“ESG Policy”), as further detailed below. The aforementioned PRI constitutes the basis of the integration of sustainability factors in the responsible investment process adopted by the Manager.

The Manager’s ESG Policy is based on the following elements which characterise the investment process, with the exception of the ‘Specific ESG Strategies’ element as detailed at point 3 below, as this element of the process will only apply to a Fund which has been classified by the Manager as an Article 8 (light green fund) or an Article 9 (dark green fund) Fund pursuant to the Sustainable Finance Disclosure Regulation (EU) 2088/2019 (“SFDR”):

1. Sustainability risk monitoring A description of this aspect is provided in the section entitled “Risk Factors”, under the heading “Sustainability Risk”.
2. Taking into account the principal adverse impacts of investment decisions on sustainability factors. The Manager considers the principal adverse impacts of investment decisions on sustainability factors on the basis of ESG data provided by third party data providers by monitoring E, S and G scores and indicators on greenhouse gas emissions, impact on biodiversity and investments in fossil fuels, labour rights and anti-corruption policies. In respect of those Funds invested in third-party UCITS, the Manager only considers principal adverse impacts where ESG data is available for those third-party funds.
3. Specific ESG strategies: The Manager applies specific ESG strategies to Funds promoting, among others, social and environmental characteristics, or which have as their objective sustainable investments, as identified by Article 8 and Article 9 of SFDR. These strategies tend to reduce and control investments in securities of issuers with poor ESG ratings.
4. Shareholder engagement: With regard to shareholder engagement practices, in addition to adhering to the Italian Stewardship Principles issued by Assogestioni (the Italian Asset Management Association), which are based on the European Fund and Asset Management Association (EFAMA) Stewardship Code, the Manager has put in place a dedicated shareholder engagement policy which is available on its website.

The Manager’s investment process is guided by its ESG Committee which provides advisory support to the Board of Directors of the Manager in defining, reviewing and ensuring the implementation of the ESG Policy, as well as advising on any recommended updates to same, and regularly monitors the Funds classification on the basis of sustainability risk (for more details please refer to the section of the Prospectus headed “Risk Factors”, heading “Sustainability Risk”).

The Board of Directors of the Manager periodically verifies that the ESG Policy has been correctly implemented based on checks carried out by the Manager.

The ESG Policy is assessed at least once a year to determine whether any update is required, also taking into account national and international trends in responsible investment. Further details of the Manager’s ESG Policy are available on the Manager’s website: <https://www.animasgr.it/EN/PolicyESG>.

As at 31 December 2022, the following Funds are classified as Article 8 of the SFDR. None of the Funds are classified as Article 9.

- ANIMA U.S. Equity
- ANIMA Europe Equity
- ANIMA Asia/Pacific Equity
- ANIMA Global Equity Value
- ANIMA Euro Government Bond
- ANIMA International Bond
- ANIMA Liquidity
- ANIMA Italy
- ANIMA Megatrend People Fund

Product name: ANIMA U.S. Equity

Legal entity identifier: 213800GBQ60L1IZIWQ12

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective** ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.36% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective** ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes both the preservation of the environment and natural resources, and fair work conditions, democracy and human and social rights on the social side, as pursued by government issuers. From a corporate point of view, this financial product promotes also the following environmental and social characteristics:

- the fight against climate change;
- the respect of human rights;
- the protection of human health;
- the protection of human well-being.

The promotion of the above environmental and social characteristics are evaluated by the Manager based on the analysis carried out by specialised third party ESG data providers. Further elements of the financial product's ESG strategy are described in the "Asset Allocation" sections below.

● **How did the sustainability indicators perform?**

The sustainability indicators used by this financial product are:

- the exclusion of corporate issuers involved in the production of thermal coal which accounts for more than 30% of their revenues, for the fight against climate change;
- the exclusion of:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- corporate issuers involved in the production of controversial weapons, which include anti-personnel land mines, cluster munitions, biological, chemical, blinding weapons, white phosphorus, nuclear armaments and which have mostly been banned by UN treaties;
- countries sanctioned at the central government level by the UN for systematic violations of human rights;

for the respect of human rights;

- the exclusion of issuers involved in the production of tobacco, for the protection of human health;
- the exclusion of corporate issuers involved in the gambling sector, for the protection of human well-being.

During the period, the selection of investments was made taking into account the exclusions listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***... and compared to previous periods?***

Not applicable.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As mentioned above, although the product does not have a sustainable objective, it did invest 57.36% of its AuM in issuers defined as “SFDR” sustainable according to an internal algorithm of the Asset Manager. This algorithm provides that issuers are considered sustainable if they:

- comply with the exclusion criteria mentioned in the “Investment Strategy” section further below;
- pass the DNSH test, described in the following section;
- pass a Good Governance test, which is set at the level of 25 out 100 for their G score;
- pass a general E and S test, which is set at the level of 25 out 100 for their E and S scores;
- contribute positively to at least one of the following three areas: Climate Transition, Environment or Society. Positive contribution is measured on the basis of issuers' involvement in certain initiatives or on the basis of best-in-class criteria related to specific environmental and/or social factors.

During the period, the selection of investments was made taking into account the criteria listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The assessment that issuers considered to be sustainable do not cause significant harm to other sustainable investment objectives was carried out on the basis of the Do No Significant Harm test (DNSH, developed internally by the Asset Manager), which, in line with regulatory recommendations, is based on the mandatory Principal Indicators of Adverse Impact (PAI, see the RTS to the SFDR). In particular, investments are considered to cause significant harm when they involve issuers that:

- do not publish data on Carbon Footprint, Carbon Intensity and Board Gender Diversity;
- are involved in the fossil fuels sector or the controversial weapons sector;
- are involved in very severe controversies related to compliance with the UN Global Compact and OECD requirements for multinational companies;

- exceed strict threshold values (specifically identified by the Asset Manager based on a diversified sample of issuers worldwide) for any of the following PAI indicators: 2*, 3*, 5, 6*, 8, 9, 12 and 13;
- exceed critical thresholds (specifically identified by the Asset Manager based on a diversified sample of issuers worldwide) for at least 4 of the following PAI indicators: 2*, 3*, 5, 6*, 7, 8, 9, 10, 11, 12 and 13.

Note *: it should be noted that, for the purposes of the DNSH test, absolute GHG emissions levels (PAI 1) are used to calculate PAIs 2 and 3; also, Carbon Footprint and GHG Intensity are calculated taking into account only Scope 1 and 2 emissions. It should also be noted that PAI 6 currently takes into account the sectoral classification provided by the provider Refinitiv as a proxy for the NACE classification required by the regulations.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to the previous paragraph.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The alignment of sustainable investments with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights is pursued through several investment selection and management criteria, explained above and consistent with the aforementioned guidelines. In particular:

- exclusions relating to controversial weapons, which apply to all investments;
- exclusions based on the DNSH principle, applied through the definition of threshold levels on PAI indicators;
- inclusions based on the identification of positive contributions to climate, social or environmental objectives;
- exclusions of environmental or social ratings that fall into the worst quartile of the rankings based on the data provided by specialized third party providers;
- application to equity investments of the voting rights policy, based on the third party provider (ISS) model, which takes into account specific ESG factors and refers to guidelines consistent with sustainable business practices on the environment, fair treatment of labour, non-discriminatory policies and protection of human rights, framed in initiatives such as those of the United Nations Environment Programme Finance Initiative (UNEP FI), United Nations Principles for Responsible Investment (UNPRI), United Nations Global Compact, Global Reporting Initiative (GRI), Carbon Principles, International Labour Organisation Conventions (ILO), CERES Principles, Global Sullivan Principles, MacBride Principles and the European Union Directives on social and environmental issues.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considered the principal adverse impacts on sustainability factors as follows. In general, the consideration of PAIs is based on the contribution of certain mitigating factors, such as:

1. value exclusions,
2. exclusions/limitations resulting from investing in sustainable issuers according to the SFDR,
3. the setting up of objectives for specific adverse impact indicators, chosen among those belonging to the Mandatory list in the RTS to the SFDR.

In particular:

1. from a value perspective, issuers involved in controversial weapons (connection to PAI 14), nuclear weapons, tobacco, gambling and thermal coal mining (connection to PAI 4) are excluded;
 2. investment in at least 21% of the financial product's AuM in sustainable issuers ensures that these issuers, by construction, pass the Good Governance and general E and S tests (detailed in the "sustainable investment" sections above) and the DNSH test (which takes into consideration all the 14 mandatory PAI, detailed in the "sustainable investment" sections above) while contributing positively to climate, environmental and social topics;
 3. objectives for specific mandatory adverse impact indicators:
 - a. PAI 4 (fossil fuels exposure): the adverse impact is mitigated through the limitation of the exposure to the fossil fuels sector, due to the exclusion of issuers with more than 30% of revenues from thermal coal mining.
 - b. PAI 14 (controversial weapons): the adverse impact is eliminated through the exclusion of issuers involved in controversial weapons.
 - c. PAI 16 (human rights violations): the adverse impact is mitigated through the exclusion of issuers sanctioned by the UN for human rights violations (see the "Strategy" sections below).
-

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is from 01/01/2022 to 30/12/2022

Largest investments	Sector	%Assets	Country
APPLE INC	TECHNOLOGY HARDWARE, STORAGE & PERIPHERALS	6.20%	UNITED STATES
MICROSOFT CORP	SYSTEMS SOFTWARE	6.19%	UNITED STATES
JOHNSON&JOHNSON	PHARMACEUTICALS	2.52%	UNITED STATES

BERKSHIRE HATH-B	MULTI-SECTOR HOLDINGS	1.25%	UNITED STATES
JPMORGAN CHASE	DIVERSIFIED BANKS	1.21%	UNITED STATES

What was the proportion of sustainability-related investments?

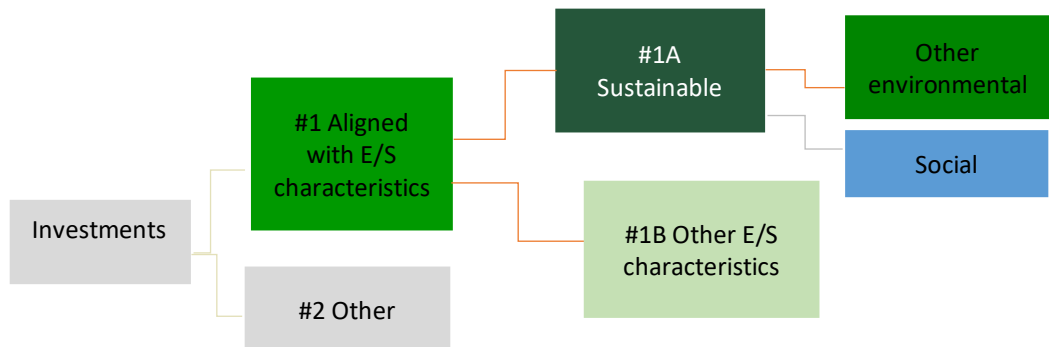

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the asset allocation?

The strategic asset allocation of the financial product has been defined by its risk-return profile and implemented through the modulation of its investments over time.

A 96.37% (Aligned) of the financial product net assets has been invested in issuers which promote the environmental and social characteristics, in accordance with the binding elements of the investment strategy, and which have an ESG Combined Score higher than 25. Investments in SFDR art. 8 or 9 financial products are also considered to be aligned with the E/S characteristics promoted by this financial products. While the Financial product did not have sustainable investing as its objective, the Financial product invested 57.36% (Sustainable) of its assets in sustainable investments with an environmental and/or social objective, as detailed in the sections above.

A 3.62% (Not Aligned #2 Other) of the financial product net assets has been invested in money market instruments, different from the ones mentioned in the previous sentence, or a mix of money market instruments and investments in issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25, subject to a maximum limit of 10% of the financial

product's net assets for the latter. In this case, those issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25 have still been compliant with the exclusion criteria set out in the "Investment Strategy" section above.

Any investment included in the above referenced remaining component refers to financial products and instruments deemed to be of interest from a strictly financial point of view (liquidity included) and/or which, given their characteristics, help to complete the thematic, sector and geographic profile of the portfolio.

● **In which economic sectors were the investments made?**

Equity:

Description	Average
Information Technology	30.15%
Health Care	15.34%
Consumer Discretionary	12.99%
Financials	11.01%
Consumer Staples	8.27%
Communication Services	7.08%
Industrials	5.29%
Energy	4.56%
Materials	1.58%
Utilities	0.94%
Real Estate	0.87%

Bond:

n/d

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

In fossil Gas

In nuclear energy

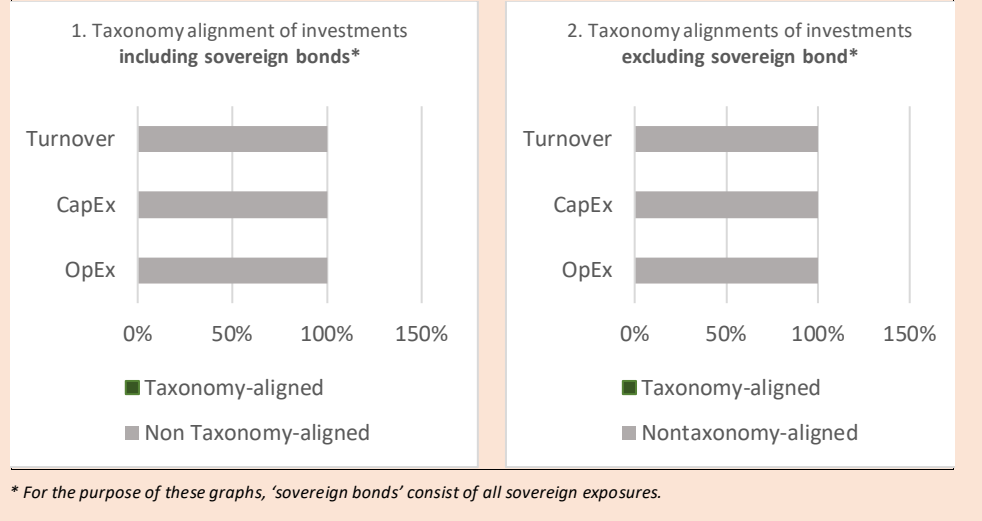

No

Taxonomy-aligned activities are expressed as a share of:

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of investments made in transitional and enabling activities?**
0%.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?
50.24%

The product strategy does not depend on alignment with the EU taxonomy, therefore no specific investment in these activities has been envisaged.

What was the share of socially sustainable investments?
47.38%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Please refer to the response to the previous paragraph on asset allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the period, the selection of investments was carried out in compliance with all the limits and allocations of the assets indicated above and compliance with the limits and allocations described in the previous paragraphs was monitored continuously by the various structures of the Management Company.

With regard to the voting activity relating to the product during the period, please refer to the annual report of the product itself, or to the reports of the individual funds present in the portfolio during the period.

With regards to the Management Company's engagement activity, please refer to the engagement policy and the Engagement Policy Report published on the website of the Management Company.

How did this financial product perform compared to the reference benchmark?

No index has been designated as a benchmark to meet the environmental or social characteristics promoted by the financial product.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 61.22% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective ___%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes both the preservation of the environment and natural resources, and fair work conditions, democracy and human and social rights on the social side, as pursued by government issuers. From a corporate point of view, this financial product promotes also the following environmental and social characteristics:

- the fight against climate change;
- the respect of human rights;
- the protection of human health;
- the protection of human well-being.

The promotion of the above environmental and social characteristics are evaluated by the Manager based on the analysis carried out by specialised third party ESG data providers. Further elements of the financial product’s ESG strategy are described in the “Asset Allocation” sections below.

● **How did the sustainability indicators perform?**

The sustainability indicators used by this financial product are:

- the exclusion of corporate issuers involved in the production of thermal coal which accounts for more than 30% of their revenues, for the fight against climate change;
- the exclusion of:
 - corporate issuers involved in the production of controversial weapons, which include anti-personnel land mines, cluster munitions, biological,

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

chemical, blinding weapons, white phosphorus, nuclear armaments and which have mostly been banned by UN treaties;

- countries sanctioned at the central government level by the UN for systematic violations of human rights;

for the respect of human rights;

- the exclusion of issuers involved in the production of tobacco, for the protection of human health;
- the exclusion of corporate issuers involved in the gambling sector, for the protection of human well-being.

During the period, the selection of investments was made taking into account the exclusions listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***... and compared to previous periods?***

Not applicable.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As mentioned above, although the product does not have a sustainable objective, it did invest 61.22% of its AuM in issuers defined as “SFDR” sustainable according to an internal algorithm of the Asset Manager. This algorithm provides that issuers are considered sustainable if they:

- comply with the exclusion criteria mentioned in the “Investment Strategy” section further below;
- pass the DNSH test, described in the following section;
- pass a Good Governance test, which is set at the level of 25 out 100 for their G score;
- pass a general E and S test, which is set at the level of 25 out 100 for their E and S scores;
- contribute positively to at least one of the following three areas: Climate Transition, Environment or Society. Positive contribution is measured on the basis of issuers' involvement in certain initiatives or on the basis of best-in-class criteria related to specific environmental and/or social factors.

During the period, the selection of investments was made taking into account the criteria listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The assessment that issuers considered to be sustainable do not cause significant harm to other sustainable investment objectives was carried out on the basis of the Do No Significant Harm test (DNSH, developed internally by the Asset Manager), which, in line with regulatory recommendations, is based on the mandatory Principal Indicators of Adverse Impact (PAI, see the RTS to the SFDR). In particular, investments are considered to cause significant harm when they involve issuers that:

- do not publish data on Carbon Footprint, Carbon Intensity and Board Gender Diversity;
 - are involved in the fossil fuels sector or the controversial weapons sector;
 - are involved in very severe controversies related to compliance with the UN Global Compact and OECD requirements for multinational companies;
 - exceed strict threshold values (specifically identified by the Asset Manager based on a diversified sample of issuers worldwide) for any of the following PAI indicators: 2*, 3*, 5, 6*, 8, 9, 12 and 13;
 - exceed critical thresholds (specifically identified by the Asset Manager based on a diversified sample of issuers worldwide) for at least 4 of the following PAI indicators: 2*, 3*, 5, 6*, 7, 8, 9, 10, 11, 12 and 13.
-

Note *: it should be noted that, for the purposes of the DNSH test, absolute GHG emissions levels (PAI 1) are used to calculate PAIs 2 and 3; also, Carbon Footprint and GHG Intensity are calculated taking into account only Scope 1 and 2 emissions. It should also be noted that PAI 6 currently takes into account the sectoral classification provided by the provider Refinitiv as a proxy for the NACE classification required by the regulations.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-

corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to the previous paragraph.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The alignment of sustainable investments with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights is pursued through several investment selection and management criteria, explained above and consistent with the aforementioned guidelines. In particular:

- exclusions relating to controversial weapons, which apply to all investments;
- exclusions based on the DNSH principle, applied through the definition of threshold levels on PAI indicators;
- inclusions based on the identification of positive contributions to climate, social or environmental objectives;
- exclusions of environmental or social ratings that fall into the worst quartile of the rankings based on the data provided by specialized third party providers;
- application to equity investments of the voting rights policy, based on the third party provider (ISS) model, which takes into account specific ESG factors and refers to guidelines consistent with sustainable business practices on the environment, fair treatment of labour, non-discriminatory policies and protection of human rights, framed in initiatives such as those of the United Nations Environment Programme Finance Initiative (UNEP FI), United Nations Principles for Responsible Investment (UNPRI), United Nations Global Compact, Global Reporting Initiative (GRI), Carbon Principles, International Labour Organisation Conventions (ILO), CERES Principles, Global Sullivan Principles, MacBride Principles and the European Union Directives on social and environmental issues.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considered the principal adverse impacts on sustainability factors as follows. In general, the consideration of PAIs is based on the contribution of certain mitigating factors, such as:

1. value exclusions,
2. exclusions/limitations resulting from investing in sustainable issuers according to the SFDR,

3. the setting up of objectives for specific adverse impact indicators, chosen among those belonging to the Mandatory list in the RTS to the SFDR.

In particular:

1. from a value perspective, issuers involved in controversial weapons (connection to PAI 14), nuclear weapons, tobacco, gambling and thermal coal mining (connection to PAI 4) are excluded;
 2. investment in at least 21% of the financial product's AuM in sustainable issuers ensures that these issuers, by construction, pass the Good Governance and general E and S tests (detailed in the "sustainable investment" sections above) and the DNSH test (which takes into consideration all the 14 mandatory PAI, detailed in the "sustainable investment" sections above) while contributing positively to climate, environmental and social topics;
 3. objectives for specific mandatory adverse impact indicators:
 - a. PAI 4 (fossil fuels exposure): the adverse impact is mitigated through the limitation of the exposure to the fossil fuels sector, due to the exclusion of issuers with more than 30% of revenues from thermal coal mining.
 - b. PAI 14 (controversial weapons): the adverse impact is eliminated through the exclusion of issuers involved in controversial weapons.
 - c. PAI 16 (human rights violations): the adverse impact is mitigated through the exclusion of issuers sanctioned by the UN for human rights violations (see the "Strategy" sections below).
-

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is from 01/01/2022 to 30/12/2022

Largest investments	Sector	%Assets	Country
NESTLE SA-REG	PACKAGED FOODS & MEATS	4.10%	SWISS
SHELL PLC	INTEGRATED OIL & GAS	2.92%	UNITED KINGDOM

TOTALENERGIES SE	INTEGRATED OIL & GAS	1.65%	FRANCE
PRUDENTIAL PLC	LIFE & HEALTH INSURANCE	1.61%	UNITED KINGDOM
UNILEVER PLC	PERSONAL PRODUCTS	1.47%	UNITED KINGDOM
COMPASS GROUP	RESTAURANTS	1.42%	UNITED KINGDOM

What was the proportion of sustainability-related investments?

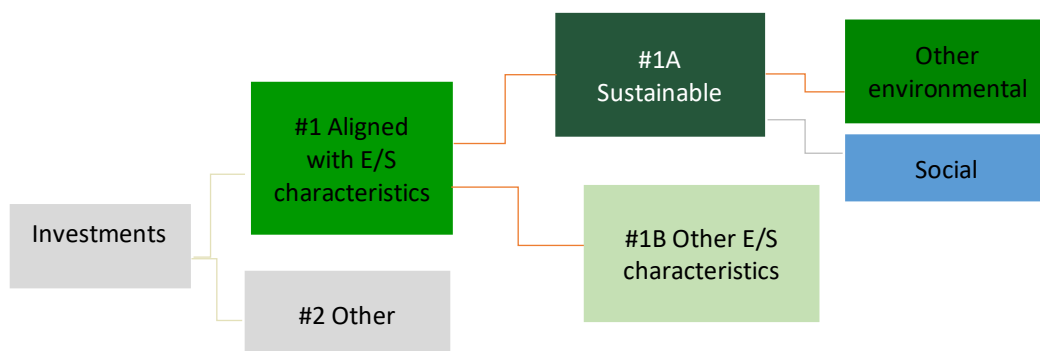

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the asset allocation?

The strategic asset allocation of the financial product has been defined by its risk-return profile and implemented through the modulation of its investments over time.

A 98.98% (Aligned) of the financial product net assets has been invested in issuers which promote the environmental and social characteristics, in accordance with the binding elements of the investment strategy, and which have an ESG Combined Score higher than 25. Investments in SFDR art. 8 or 9 financial products are also considered to be aligned with the E/S characteristics promoted by this financial products. While the Financial product did not have sustainable investing as its objective, the Financial product invested 61.22% (Sustainable) of its assets in sustainable investments with an environmental and/or social objective, as detailed in the sections above.

A 1.01% (Not Aligned #2 Other) of the financial product net assets has been invested in money market instruments, different from the ones mentioned in the previous sentence, or a mix of money market instruments and investments in issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25, subject to a maximum limit of 10% of the financial product's net assets for the latter. In this case, those issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25 have still been compliant with the exclusion criteria set out in the "Investment Strategy" section above.

Any investment included in the above referenced remaining component refers to financial products and instruments deemed to be of interest from a strictly financial point of view (liquidity included) and/or which, given their characteristics, help to complete the thematic, sector and geographic profile of the portfolio.

● **In which economic sectors were the investments made?**

Equity:

Description	Average
Health Care	15.34%
Consumer Staples	13.10%

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of investments made in transitional and enabling activities?**
0%.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

56.36%

The product strategy does not depend on alignment with the EU taxonomy, therefore no specific investment in these activities has been envisaged.

What was the share of socially sustainable investments?

43.40%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Please refer to the response to the previous paragraph on asset allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the period, the selection of investments was carried out in compliance with all the limits and allocations of the assets indicated above and compliance with the limits and allocations described in the previous paragraphs was monitored continuously by the various structures of the Management Company.

With regard to the voting activity relating to the product during the period, please refer to the annual report of the product itself, or to the reports of the individual funds present in the portfolio during the period.

With regards to the Management Company's engagement activity, please refer to the engagement policy and the Engagement Policy Report published on the website of the Management Company.

How did this financial product perform compared to the reference benchmark?

No index has been designated as a benchmark to meet the environmental or social characteristics promoted by the financial product.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It made sustainable investments with an environmental objective ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 29.77% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

<input type="checkbox"/> It promoted E/S characteristics	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes both the preservation of the environment and natural resources, and fair work conditions, democracy and human and social rights on the social side, as pursued by government issuers. From a corporate point of view, this financial product promotes also the following environmental and social characteristics:

- the fight against climate change;
- the respect of human rights;
- the protection of human health;
- the protection of human well-being.

The promotion of the above environmental and social characteristics are evaluated by the Manager based on the analysis carried out by specialised third party ESG data providers. Further elements of the financial product’s ESG strategy are described in the “Asset Allocation” sections below.

● **How did the sustainability indicators perform?**

The sustainability indicators used by this financial product are:

- the exclusion of corporate issuers involved in the production of thermal coal which accounts for more than 30% of their revenues, for the fight against climate change;
- the exclusion of:
 - corporate issuers involved in the production of controversial weapons, which include anti-personnel land mines, cluster munitions, biological,

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

chemical, blinding weapons, white phosphorus, nuclear armaments and which have mostly been banned by UN treaties;

- countries sanctioned at the central government level by the UN for systematic violations of human rights;

for the respect of human rights;

- the exclusion of issuers involved in the production of tobacco, for the protection of human health;
- the exclusion of corporate issuers involved in the gambling sector, for the protection of human well-being.

During the period, the selection of investments was made taking into account the exclusions listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***... and compared to previous periods?***

Not applicable.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As mentioned above, although the product does not have a sustainable objective, it did invest 29.77% of its AuM in issuers defined as “SFDR” sustainable according to an internal algorithm of the Asset Manager. This algorithm provides that issuers are considered sustainable if they:

- comply with the exclusion criteria mentioned in the “Investment Strategy” section further below;
- pass the DNSH test, described in the following section;
- pass a Good Governance test, which is set at the level of 25 out 100 for their G score;
- pass a general E and S test, which is set at the level of 25 out 100 for their E and S scores;
- contribute positively to at least one of the following three areas: Climate Transition, Environment or Society. Positive contribution is measured on the basis of issuers' involvement in certain initiatives or on the basis of best-in-class criteria related to specific environmental and/or social factors.

During the period, the selection of investments was made taking into account the criteria listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The assessment that issuers considered to be sustainable do not cause significant harm to other sustainable investment objectives was carried out on the basis of the Do No Significant Harm test (DNSH, developed internally by the Asset Manager), which, in line with regulatory recommendations, is based on the mandatory Principal Indicators of Adverse Impact (PAI, see the RTS to the SFDR). In particular, investments are considered to cause significant harm when they involve issuers that:

- do not publish data on Carbon Footprint, Carbon Intensity and Board Gender Diversity;
 - are involved in the fossil fuels sector or the controversial weapons sector;
 - are involved in very severe controversies related to compliance with the UN Global Compact and OECD requirements for multinational companies;
 - exceed strict threshold values (specifically identified by the Asset Manager based on a diversified sample of issuers worldwide) for any of the following PAI indicators: 2*, 3*, 5, 6*, 8, 9, 12 and 13;
 - exceed critical thresholds (specifically identified by the Asset Manager based on a diversified sample of issuers worldwide) for at least 4 of the following PAI indicators: 2*, 3*, 5, 6*, 7, 8, 9, 10, 11, 12 and 13.
-

Note *: it should be noted that, for the purposes of the DNSH test, absolute GHG emissions levels (PAI 1) are used to calculate PAIs 2 and 3; also, Carbon Footprint and GHG Intensity are calculated taking into account only Scope 1 and 2 emissions. It should also be noted that PAI 6 currently takes into account the sectoral classification provided by the provider Refinitiv as a proxy for the NACE classification required by the regulations.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to the previous paragraph.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The alignment of sustainable investments with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights is pursued through several investment selection and management criteria, explained above and consistent with the aforementioned guidelines. In particular:

- exclusions relating to controversial weapons, which apply to all investments;
- exclusions based on the DNSH principle, applied through the definition of threshold levels on PAI indicators;
- inclusions based on the identification of positive contributions to climate, social or environmental objectives;
- exclusions of environmental or social ratings that fall into the worst quartile of the rankings based on the data provided by specialized third party providers;
- application to equity investments of the voting rights policy, based on the third party provider (ISS) model, which takes into account specific ESG factors and refers to guidelines consistent with sustainable business practices on the environment, fair treatment of labour, non-discriminatory policies and protection of human rights, framed in initiatives such as those of the United Nations Environment Programme Finance Initiative (UNEP FI), United Nations Principles for Responsible Investment (UNPRI), United Nations Global Compact, Global Reporting Initiative (GRI), Carbon Principles, International Labour Organisation Conventions (ILO), CERES Principles, Global Sullivan Principles, MacBride Principles and the European Union Directives on social and environmental issues.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considered the principal adverse impacts on sustainability factors as follows. In general, the consideration of PAIs is based on the contribution of certain mitigating factors, such as:

1. value exclusions,
2. exclusions/limitations resulting from investing in sustainable issuers according to the SFDR,

3. the setting up of objectives for specific adverse impact indicators, chosen among those belonging to the Mandatory list in the RTS to the SFDR.

In particular:

1. from a value perspective, issuers involved in controversial weapons (connection to PAI 14), nuclear weapons, tobacco, gambling and thermal coal mining (connection to PAI 4) are excluded;
 2. investment in at least 21% of the financial product's AuM in sustainable issuers ensures that these issuers, by construction, pass the Good Governance and general E and S tests (detailed in the "sustainable investment" sections above) and the DNSH test (which takes into consideration all the 14 mandatory PAI, detailed in the "sustainable investment" sections above) while contributing positively to climate, environmental and social topics;
 3. objectives for specific mandatory adverse impact indicators:
 - a. PAI 4 (fossil fuels exposure): the adverse impact is mitigated through the limitation of the exposure to the fossil fuels sector, due to the exclusion of issuers with more than 30% of revenues from thermal coal mining.
 - b. PAI 14 (controversial weapons): the adverse impact is eliminated through the exclusion of issuers involved in controversial weapons.
 - c. PAI 16 (human rights violations): the adverse impact is mitigated through the exclusion of issuers sanctioned by the UN for human rights violations (see the "Strategy" sections below).
-

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The strategic asset allocation of the financial product has been defined by its risk-return profile and implemented through the modulation of its investments over time.

A 98.20% (Aligned) of the financial product net assets has been invested in issuers which promote the environmental and social characteristics, in accordance with the binding elements of the investment strategy, and which have an ESG Combined Score higher than 25. Investments in SFDR art. 8 or 9 financial products are also considered to be aligned with the E/S characteristics promoted by this financial products. While the Financial product did not have sustainable investing as its objective, the Financial product invested 29.77% (Sustainable) of its assets in sustainable investments with an environmental and/or social objective, as detailed in the sections above.

A 1.79% (Not Aligned #2 Other) of the financial product net assets has been invested in money market instruments, different from the ones mentioned in the previous sentence, or a mix of money market instruments and investments in issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25, subject to a maximum limit of 10% of the financial product's net assets for the latter. In this case, those issuers that have no ESG Combined Score

or have an ESG Combined Score lower than 25 have still been compliant with the exclusion criteria set out in the “Investment Strategy” section above.

Any investment included in the above referenced remaining component refers to financial products and instruments deemed to be of interest from a strictly financial point of view (liquidity included) and/or which, given their characteristics, help to complete the thematic, sector and geographic profile of the portfolio.

● **In which economic sectors were the investments made?**

Equity:

Description	Average

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

In fossil Gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of investments made in transitional and enabling activities?**
0%.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

23.90%

The product strategy does not depend on alignment with the EU taxonomy, therefore no specific investment in these activities has been envisaged.

What was the share of socially sustainable investments?

16.00%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Please refer to the response to the previous paragraph on asset allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the period, the selection of investments was carried out in compliance with all the limits and allocations of the assets indicated above and compliance with the limits and allocations described in the previous paragraphs was monitored continuously by the various structures of the Management Company.

With regard to the voting activity relating to the product during the period, please refer to the annual report of the product itself, or to the reports of the individual funds present in the portfolio during the period.

With regards to the Management Company's engagement activity, please refer to the engagement policy and the Engagement Policy Report published on the website of the Management Company.

How did this financial product perform compared to the reference benchmark?

No index has been designated as a benchmark to meet the environmental or social characteristics promoted by the financial product.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 55.20% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

<input type="checkbox"/> It promoted E/S characteristics	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes both the preservation of the environment and natural resources, and fair work conditions, democracy and human and social rights on the social side, as pursued by government issuers. From a corporate point of view, this financial product promotes also the following environmental and social characteristics:

- the fight against climate change;
- the respect of human rights;
- the protection of human health;
- the protection of human well-being.

The promotion of the above environmental and social characteristics are evaluated by the Manager based on the analysis carried out by specialised third party ESG data providers. Further elements of the financial product’s ESG strategy are described in the “Asset Allocation” sections below.

● **How did the sustainability indicators perform?**

The sustainability indicators used by this financial product are:

- the exclusion of corporate issuers involved in the production of thermal coal which accounts for more than 30% of their revenues, for the fight against climate change;
- the exclusion of:
 - corporate issuers involved in the production of controversial weapons, which include anti-personnel land mines, cluster munitions, biological,

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

chemical, blinding weapons, white phosphorus, nuclear armaments and which have mostly been banned by UN treaties;

- countries sanctioned at the central government level by the UN for systematic violations of human rights;

for the respect of human rights;

- the exclusion of issuers involved in the production of tobacco, for the protection of human health;
- the exclusion of corporate issuers involved in the gambling sector, for the protection of human well-being.

During the period, the selection of investments was made taking into account the exclusions listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***... and compared to previous periods?***

Not applicable.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As mentioned above, although the product does not have a sustainable objective, it did invest 55.20% of its AuM in issuers defined as “SFDR” sustainable according to an internal algorithm of the Asset Manager. This algorithm provides that issuers are considered sustainable if they:

- comply with the exclusion criteria mentioned in the “Investment Strategy” section further below;
- pass the DNSH test, described in the following section;
- pass a Good Governance test, which is set at the level of 25 out 100 for their G score;
- pass a general E and S test, which is set at the level of 25 out 100 for their E and S scores;
- contribute positively to at least one of the following three areas: Climate Transition, Environment or Society. Positive contribution is measured on the basis of issuers' involvement in certain initiatives or on the basis of best-in-class criteria related to specific environmental and/or social factors.

During the period, the selection of investments was made taking into account the criteria listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The assessment that issuers considered to be sustainable do not cause significant harm to other sustainable investment objectives was carried out on the basis of the Do No Significant Harm test (DNSH, developed internally by the Asset Manager), which, in line with regulatory recommendations, is based on the mandatory Principal Indicators of Adverse Impact (PAI, see the RTS to the SFDR). In particular, investments are considered to cause significant harm when they involve issuers that:

- do not publish data on Carbon Footprint, Carbon Intensity and Board Gender Diversity;
 - are involved in the fossil fuels sector or the controversial weapons sector;
 - are involved in very severe controversies related to compliance with the UN Global Compact and OECD requirements for multinational companies;
 - exceed strict threshold values (specifically identified by the Asset Manager based on a diversified sample of issuers worldwide) for any of the following PAI indicators: 2*, 3*, 5, 6*, 8, 9, 12 and 13;
 - exceed critical thresholds (specifically identified by the Asset Manager based on a diversified sample of issuers worldwide) for at least 4 of the following PAI indicators: 2*, 3*, 5, 6*, 7, 8, 9, 10, 11, 12 and 13.
-

Note *: it should be noted that, for the purposes of the DNSH test, absolute GHG emissions levels (PAI 1) are used to calculate PAIs 2 and 3; also, Carbon Footprint and GHG Intensity are calculated taking into account only Scope 1 and 2 emissions. It should also be noted that PAI 6 currently takes into account the sectoral classification provided by the provider Refinitiv as a proxy for the NACE classification required by the regulations.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-

corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to the previous paragraph.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The alignment of sustainable investments with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights is pursued through several investment selection and management criteria, explained above and consistent with the aforementioned guidelines. In particular:

- exclusions relating to controversial weapons, which apply to all investments;
- exclusions based on the DNSH principle, applied through the definition of threshold levels on PAI indicators;
- inclusions based on the identification of positive contributions to climate, social or environmental objectives;
- exclusions of environmental or social ratings that fall into the worst quartile of the rankings based on the data provided by specialized third party providers;
- application to equity investments of the voting rights policy, based on the third party provider (ISS) model, which takes into account specific ESG factors and refers to guidelines consistent with sustainable business practices on the environment, fair treatment of labour, non-discriminatory policies and protection of human rights, framed in initiatives such as those of the United Nations Environment Programme Finance Initiative (UNEP FI), United Nations Principles for Responsible Investment (UNPRI), United Nations Global Compact, Global Reporting Initiative (GRI), Carbon Principles, International Labour Organisation Conventions (ILO), CERES Principles, Global Sullivan Principles, MacBride Principles and the European Union Directives on social and environmental issues.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considered the principal adverse impacts on sustainability factors as follows. In general, the consideration of PAIs is based on the contribution of certain mitigating factors, such as:

1. value exclusions,
2. exclusions/limitations resulting from investing in sustainable issuers according to the SFDR,

3. the setting up of objectives for specific adverse impact indicators, chosen among those belonging to the Mandatory list in the RTS to the SFDR.

In particular:

1. from a value perspective, issuers involved in controversial weapons (connection to PAI 14), nuclear weapons, tobacco, gambling and thermal coal mining (connection to PAI 4) are excluded;
 2. investment in at least 21% of the financial product's AuM in sustainable issuers ensures that these issuers, by construction, pass the Good Governance and general E and S tests (detailed in the "sustainable investment" sections above) and the DNSH test (which takes into consideration all the 14 mandatory PAI, detailed in the "sustainable investment" sections above) while contributing positively to climate, environmental and social topics;
 3. objectives for specific mandatory adverse impact indicators:
 - a. PAI 4 (fossil fuels exposure): the adverse impact is mitigated through the limitation of the exposure to the fossil fuels sector, due to the exclusion of issuers with more than 30% of revenues from thermal coal mining.
 - b. PAI 14 (controversial weapons): the adverse impact is eliminated through the exclusion of issuers involved in controversial weapons.
 - c. PAI 16 (human rights violations): the adverse impact is mitigated through the exclusion of issuers sanctioned by the UN for human rights violations (see the "Strategy" sections below).
-

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is from 01/01/2022 to 30/12/2022

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes No

<input type="checkbox"/> It made sustainable investments with an environmental objective ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 6.70% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective ___%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes both the preservation of the environment and natural resources, and fair work conditions, democracy and human and social rights on the social side, as pursued by government issuers.

The promotion of the above environmental and social characteristics are evaluated by the Manager based on the analysis carried out by specialised third party ESG data providers. Further elements of the financial product’s ESG strategy are described in the “Asset Allocation” sections below.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

The sustainability indicators, used to measure the attainment of each of the environmental or social characteristics promoted by this financial product, are the E, S and G scores by a third party ESG data provider, which assess countries’ prosperity by considering its access to – and management of – natural, human and institutional wealth.

The scores assigned to the 3 factors above are then averaged in one final score (the Country ESG Score), on a scale that goes from 0 to 100 (100 being the best score).

Furthermore, the sustainability indicators used by this financial product is the exclusion of countries sanctioned at the central government level by the UN for systematic violations of human rights; for the respect of human rights.

During the period, the selection of investments was made taking into account the exclusions listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

- **... and compared to previous periods?**

Not applicable.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considered the principal adverse impacts on sustainability factors as follows. Given that the financial product invests only in government bonds and money market instruments, it specifically considers only the PAI 16 (Violation of human rights), among those included in the list of mandatory indicators, included in the Technical Regulations (RTS) relating to the SFDR. In this regard, the adverse impact is greatly mitigated through the exclusion of government broadcasters sanctioned at the central government level by the United Nations for systematic human rights violations.

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

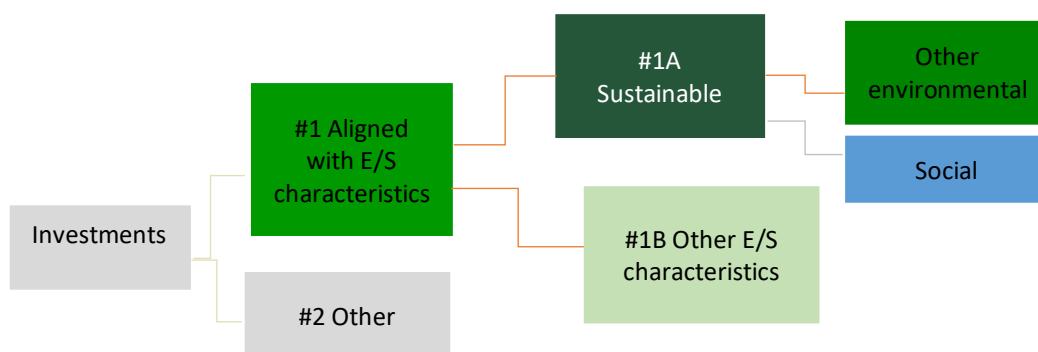

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the asset allocation?

The strategic asset allocation of the financial product has been defined by its risk-return profile and implemented through the modulation of its investments over time.

A 96.48% (Aligned) of the financial product net assets has been invested in issuers which promote the environmental and social characteristics, in accordance with the binding elements of the investment strategy, and which have an ESG Combined Score higher than 25. Investments in SFDR art. 8 or 9 financial products are also considered to be aligned with the E/S characteristics promoted by this financial products. While the Financial product did not have sustainable investing as its objective, the Financial product invested 6.70% (Sustainable) of its assets in sustainable investments with an environmental and/or social objective, as detailed in the sections above.

A 3.51% (Not Aligned) of the financial product net assets has been invested in money market instruments, different from the ones mentioned in the previous sentence, or a mix of money market instruments and investments in issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25, subject to a maximum limit of 10% of the financial

product's net assets for the latter. In this case, those issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25 have still been compliant with the exclusion criteria set out in the "Investment Strategy" section above.

Any investment included in the above referenced remaining component refers to financial products and instruments deemed to be of interest from a strictly financial point of view (liquidity included) and/or which, given their characteristics, help to complete the thematic, sector and geographic profile of the portfolio.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.00%. The product strategy does not depend on alignment with the EU taxonomy, therefore no specific investment in these activities has been envisaged.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

In fossil Gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of investments made in transitional and enabling activities?**

0%.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

5.53%

The product strategy does not depend on alignment with the EU taxonomy, therefore no specific investment in these activities has been envisaged.

- **What was the share of socially sustainable investments?**

4.32%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Please refer to the response to the previous paragraph on asset allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the period, the selection of investments was carried out in compliance with all the limits and allocations of the assets indicated above and compliance with the limits and allocations described in the previous paragraphs was monitored continuously by the various structures of the Management Company.

With regard to the voting activity relating to the product during the period, please refer to the annual report of the product itself, or to the reports of the individual funds present in the portfolio during the period.

With regards to the Management Company's engagement activity, please refer to the engagement policy and the Engagement Policy Report published on the website of the Management Company.

How did this financial product perform compared to the reference benchmark?

No index has been designated as a benchmark to meet the environmental or social characteristics promoted by the financial product.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective** _____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes both the preservation of the environment and natural resources, and fair work conditions, democracy and human and social rights on the social side, as pursued by government issuers.

The promotion of the above environmental and social characteristics are evaluated by the Manager based on the analysis carried out by specialised third party ESG data providers.

Further elements of the financial product’s ESG strategy are described in the “Asset Allocation” sections below.

- **How did the sustainability indicators perform?**

The sustainability indicators, used to measure the attainment of each of the environmental or social characteristics promoted by this financial product, are the E, S and G scores by a third party ESG data provider, which assess countries’ prosperity by considering its access to – and management of – natural, human and institutional wealth.

The scores assigned to the 3 factors above are then averaged in one final score (the Country ESG Score), on a scale that goes from 0 to 100 (100 being the best score).

Furthermore, the sustainability indicators used by this financial product is the exclusion of countries sanctioned at the central government level by the UN for systematic violations of human rights; for the respect of human rights.

During the period, the selection of investments was made taking into account the exclusions listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

- **... and compared to previous periods?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Not applicable.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considered the principal adverse impacts on sustainability factors as follows. Given that the financial product invests only in government bonds and money market instruments, it specifically considers only the PAI 16 (Violation of human rights), among those included in the list of mandatory indicators, included in the Technical Regulations (RTS) relating to the SFDR. In this regard, the adverse impact is greatly mitigated through the exclusion of government broadcasters sanctioned at the central government level by the United Nations for systematic human rights violations.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is from 01/01/2022 to 30/12/2022

What was the proportion of sustainability-related investments?

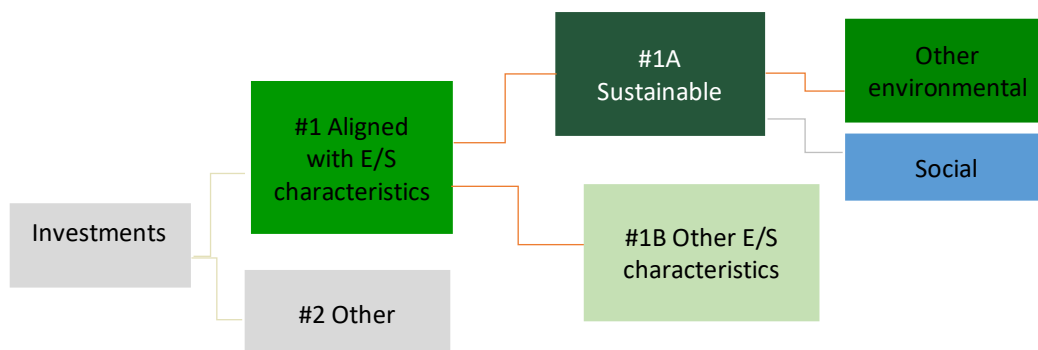

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and

● What was the asset allocation?

The strategic asset allocation of the financial product has been defined by its risk-return profile and implemented through the modulation of its investments over time.

A 106.05% (Aligned) of the financial product net assets has been invested in issuers which promote the environmental and social characteristics, in accordance with the binding elements of the investment strategy, and which have an ESG Combined Score higher than 25. Investments in SFDR art. 8 or 9 financial products are also considered to be aligned with the E/S characteristics promoted by this financial products. While the Financial product did not have sustainable investing as its objective, the Financial product invested 0.00% (Sustainable)

among others have
greenhouse gas
emission levels
corresponding to the
best performance.

of its assets in sustainable investments with an environmental and/or social objective, as detailed in the sections above.

A 0.00% (Not Aligned)) of the financial product net assets has been invested in money market instruments, different from the ones mentioned in the previous sentence, or a mix of money market instruments and investments in issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25, subject to a maximum limit of 10% of the financial product's net assets for the latter. In this case, those issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25 have still been compliant with the exclusion criteria set out in the "Investment Strategy" section above.

Any investment included in the above referenced remaining component refers to financial products and instruments deemed to be of interest from a strictly financial point of view (liquidity included) and/or which, given their characteristics, help to complete the thematic, sector and geographic profile of the portfolio.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective** _____%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 37.05% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective** _____%

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes both the preservation of the environment and natural resources, and fair work conditions, democracy and human and social rights on the social side, as pursued by government issuers. From a corporate point of view, this financial product promotes also the following environmental and social characteristics:

- the fight against climate change;
- the respect of human rights;
- the protection of human health;
- the protection of human well-being.

The promotion of the above environmental and social characteristics are evaluated by the Manager based on the analysis carried out by specialised third party ESG data providers. Further elements of the financial product’s ESG strategy are described in the “Asset Allocation” sections below.

● **How did the sustainability indicators perform?**

The sustainability indicators used by this financial product are:

- the exclusion of corporate issuers involved in the production of thermal coal which accounts for more than 30% of their revenues, for the fight against climate change;
- the exclusion of:
 - corporate issuers involved in the production of controversial weapons, which include anti-personnel land mines, cluster munitions, biological,

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

chemical, blinding weapons, white phosphorus, nuclear armaments and which have mostly been banned by UN treaties;

- countries sanctioned at the central government level by the UN for systematic violations of human rights;

for the respect of human rights;

- the exclusion of issuers involved in the production of tobacco, for the protection of human health;
- the exclusion of corporate issuers involved in the gambling sector, for the protection of human well-being.

During the period, the selection of investments was made taking into account the exclusions listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***... and compared to previous periods?***

Not applicable.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As mentioned above, although the product does not have a sustainable objective, it did invest 37.05% of its AuM in issuers defined as “SFDR” sustainable according to an internal algorithm of the Asset Manager. This algorithm provides that issuers are considered sustainable if they:

- comply with the exclusion criteria mentioned in the “Investment Strategy” section further below;
- pass the DNSH test, described in the following section;
- pass a Good Governance test, which is set at the level of 25 out 100 for their G score;
- pass a general E and S test, which is set at the level of 25 out 100 for their E and S scores;
- contribute positively to at least one of the following three areas: Climate Transition, Environment or Society. Positive contribution is measured on the basis of issuers' involvement in certain initiatives or on the basis of best-in-class criteria related to specific environmental and/or social factors.

During the period, the selection of investments was made taking into account the criteria listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The assessment that issuers considered to be sustainable do not cause significant harm to other sustainable investment objectives was carried out on the basis of the Do No Significant Harm test (DNSH, developed internally by the Asset Manager), which, in line with regulatory recommendations, is based on the mandatory Principal Indicators of Adverse Impact (PAI, see the RTS to the SFDR). In particular, investments are considered to cause significant harm when they involve issuers that:

- do not publish data on Carbon Footprint, Carbon Intensity and Board Gender Diversity;
 - are involved in the fossil fuels sector or the controversial weapons sector;
 - are involved in very severe controversies related to compliance with the UN Global Compact and OECD requirements for multinational companies;
 - exceed strict threshold values (specifically identified by the Asset Manager based on a diversified sample of issuers worldwide) for any of the following PAI indicators: 2*, 3*, 5, 6*, 8, 9, 12 and 13;
 - exceed critical thresholds (specifically identified by the Asset Manager based on a diversified sample of issuers worldwide) for at least 4 of the following PAI indicators: 2*, 3*, 5, 6*, 7, 8, 9, 10, 11, 12 and 13.
-

Note *: it should be noted that, for the purposes of the DNSH test, absolute GHG emissions levels (PAI 1) are used to calculate PAIs 2 and 3; also, Carbon Footprint and GHG Intensity are calculated taking into account only Scope 1 and 2 emissions. It should also be noted that PAI 6 currently takes into account the sectoral classification provided by the provider Refinitiv as a proxy for the NACE classification required by the regulations.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-

corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to the previous paragraph.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The alignment of sustainable investments with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights is pursued through several investment selection and management criteria, explained above and consistent with the aforementioned guidelines. In particular:

- exclusions relating to controversial weapons, which apply to all investments;
- exclusions based on the DNSH principle, applied through the definition of threshold levels on PAI indicators;
- inclusions based on the identification of positive contributions to climate, social or environmental objectives;
- exclusions of environmental or social ratings that fall into the worst quartile of the rankings based on the data provided by specialized third party providers;
- application to equity investments of the voting rights policy, based on the third party provider (ISS) model, which takes into account specific ESG factors and refers to guidelines consistent with sustainable business practices on the environment, fair treatment of labour, non-discriminatory policies and protection of human rights, framed in initiatives such as those of the United Nations Environment Programme Finance Initiative (UNEP FI), United Nations Principles for Responsible Investment (UNPRI), United Nations Global Compact, Global Reporting Initiative (GRI), Carbon Principles, International Labour Organisation Conventions (ILO), CERES Principles, Global Sullivan Principles, MacBride Principles and the European Union Directives on social and environmental issues.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considered the principal adverse impacts on sustainability factors as follows. In general, the consideration of PAIs is based on the contribution of certain mitigating factors, such as:

1. value exclusions,
2. exclusions/limitations resulting from investing in sustainable issuers according to the SFDR,

3. the setting up of objectives for specific adverse impact indicators, chosen among those belonging to the Mandatory list in the RTS to the SFDR.

In particular:

1. from a value perspective, issuers involved in controversial weapons (connection to PAI 14), nuclear weapons, tobacco, gambling and thermal coal mining (connection to PAI 4) are excluded;
 2. investment in at least 21% of the financial product's AuM in sustainable issuers ensures that these issuers, by construction, pass the Good Governance and general E and S tests (detailed in the "sustainable investment" sections above) and the DNSH test (which takes into consideration all the 14 mandatory PAI, detailed in the "sustainable investment" sections above) while contributing positively to climate, environmental and social topics;
 3. objectives for specific mandatory adverse impact indicators:
 - a. PAI 4 (fossil fuels exposure): the adverse impact is mitigated through the limitation of the exposure to the fossil fuels sector, due to the exclusion of issuers with more than 30% of revenues from thermal coal mining.
 - b. PAI 14 (controversial weapons): the adverse impact is eliminated through the exclusion of issuers involved in controversial weapons.
 - c. PAI 16 (human rights violations): the adverse impact is mitigated through the exclusion of issuers sanctioned by the UN for human rights violations (see the "Strategy" sections below).
-

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is from 01/01/2022 to 30/12/2022

Largest investments	Sector	%Assets	Country
UNICREDIT SPA	DIVERSIFIED BANKS	7.41%	ITALY
ENI SPA	INTEGRATED OIL & GAS	7.15%	ITALY
ENEL SPA	ELECTRIC UTILITIES	6.96%	ITALY
MEDIOBANCA	DIVERSIFIED BANKS	6.40%	ITALY
STELLANTIS NV	AUTOMOBILE MANUFACTURERS	5.39%	ITALY
MONCLER SPA	APPAREL, ACCESSORIES & LUXURY GOODS	5.02%	ITALY
INTESA SANPAOLO	DIVERSIFIED BANKS	4.68%	ITALY
EXOR NV	MULTI-SECTOR HOLDINGS	3.83%	NETHERLANDS
FINECOBANK SPA	DIVERSIFIED BANKS	3.22%	ITALY
GENERALI ASSIC	MULTI-LINE INSURANCE	2.77%	ITALY
TERNA-RETE ELETT	ELECTRIC UTILITIES	2.37%	ITALY
A2A SPA	MULTI-UTILITIES	1.91%	ITALY
FERRARI NV	AUTOMOBILE MANUFACTURERS	1.88%	ITALY
BANCO BPM SPA	DIVERSIFIED BANKS	1.84%	ITALY
SNAM SPA	GAS UTILITIES	1.74%	ITALY

What was the proportion of sustainability-related investments?

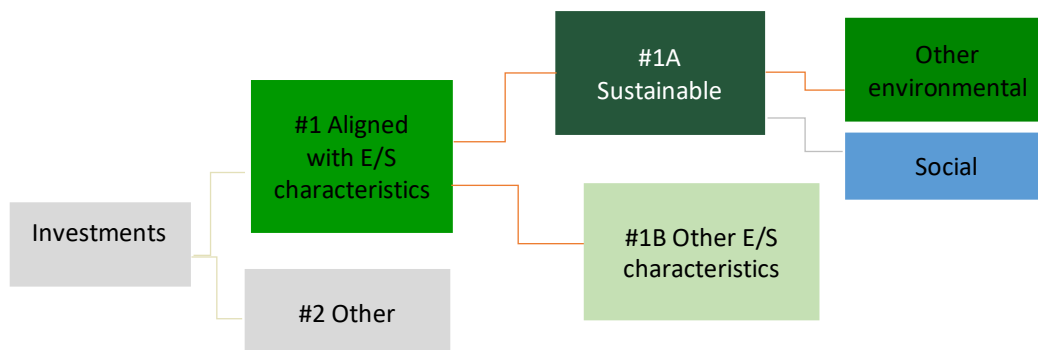

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the asset allocation?

The strategic asset allocation of the financial product has been defined by its risk-return profile and implemented through the modulation of its investments over time.

A 97.93% (Aligned) of the financial product net assets has been invested in issuers which promote the environmental and social characteristics, in accordance with the binding elements of the investment strategy, and which have an ESG Combined Score higher than 25. Investments in SFDR art. 8 or 9 financial products are also considered to be aligned with the E/S characteristics promoted by this financial products. While the Financial product did not have sustainable investing as its objective, the Financial product invested 37.05% (Sustainable) of its assets in sustainable investments with an environmental and/or social objective, as detailed in the sections above.

A 2.06% (Not Aligned #2 Other) of the financial product net assets has been invested in money market instruments, different from the ones mentioned in the previous sentence, or a mix of money market instruments and investments in issuers that have no ESG Combined Score or have an ESG Combined Score lower than 25, subject to a maximum limit of 10% of the financial product's net assets for the latter. In this case, those issuers that have no ESG Combined Score

or have an ESG Combined Score lower than 25 have still been compliant with the exclusion criteria set out in the “Investment Strategy” section above.

Any investment included in the above referenced remaining component refers to financial products and instruments deemed to be of interest from a strictly financial point of view (liquidity included) and/or which, given their characteristics, help to complete the thematic, sector and geographic profile of the portfolio.

● **In which economic sectors were the investments made?**

Equity:

Description	Average
Financials	35.86%
Utilities	17.10%
Consumer Discretionary	14.72%
Energy	9.78%
Industrials	8.88%
Information Technology	3.64%
Health Care	3.03%
Communication Services	2.66%
Materials	1.42%
Consumer Staples	0.80%
Real Estate	0.00%

Bond:

n/d

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes

In fossil Gas

In nuclear energy

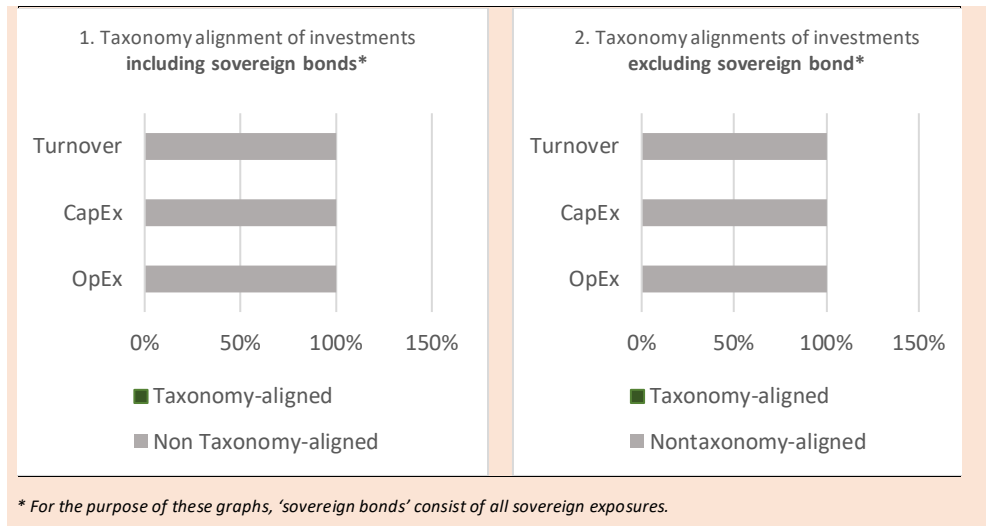

No

Taxonomy-aligned activities are expressed as a share of:

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of investments made in transitional and enabling activities?**
0%.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

33.46%

The product strategy does not depend on alignment with the EU taxonomy, therefore no specific investment in these activities has been envisaged.

What was the share of socially sustainable investments?

27.28%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Please refer to the response to the previous paragraph on asset allocation.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the period, the selection of investments was carried out in compliance with all the limits and allocations of the assets indicated above and compliance with the limits and allocations described in the previous paragraphs was monitored continuously by the various structures of the Management Company.

With regard to the voting activity relating to the product during the period, please refer to the annual report of the product itself, or to the reports of the individual funds present in the portfolio during the period.

With regards to the Management Company's engagement activity, please refer to the engagement policy and the Engagement Policy Report published on the website of the Management Company.

How did this financial product perform compared to the reference benchmark?

No index has been designated as a benchmark to meet the environmental or social characteristics promoted by the financial product.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 49.72% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective ___%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This financial product promotes both the preservation of the environment and natural resources, and fair work conditions, democracy and human and social rights on the social side, as pursued by government issuers. From a corporate point of view, this financial product promotes also the following environmental and social characteristics:

- the fight against climate change;
- the respect of human rights;
- the protection of human health;
- the protection of human well-being.

The promotion of the above environmental and social characteristics are evaluated by the Manager based on the analysis carried out by specialised third party ESG data providers. Further elements of the financial product’s ESG strategy are described in the “Asset Allocation” sections below.

● **How did the sustainability indicators perform?**

The sustainability indicators used by this financial product are:

- the exclusion of corporate issuers involved in the production of thermal coal which accounts for more than 30% of their revenues, for the fight against climate change;
- the exclusion of:
 - corporate issuers involved in the production of controversial weapons, which include anti-personnel land mines, cluster munitions, biological,

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

chemical, blinding weapons, white phosphorus, nuclear armaments and which have mostly been banned by UN treaties;

- countries sanctioned at the central government level by the UN for systematic violations of human rights;

for the respect of human rights;

- the exclusion of issuers involved in the production of tobacco, for the protection of human health;
- the exclusion of corporate issuers involved in the gambling sector, for the protection of human well-being.

During the period, the selection of investments was made taking into account the exclusions listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***... and compared to previous periods?***

Not applicable.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As mentioned above, although the product does not have a sustainable objective, it did invest 49.72% of its AuM in issuers defined as “SFDR” sustainable according to an internal algorithm of the Asset Manager. This algorithm provides that issuers are considered sustainable if they:

- comply with the exclusion criteria mentioned in the “Investment Strategy” section further below;
- pass the DNSH test, described in the following section;
- pass a Good Governance test, which is set at the level of 25 out 100 for their G score;
- pass a general E and S test, which is set at the level of 25 out 100 for their E and S scores;
- contribute positively to at least one of the following three areas: Climate Transition, Environment or Society. Positive contribution is measured on the basis of issuers' involvement in certain initiatives or on the basis of best-in-class criteria related to specific environmental and/or social factors.

During the period, the selection of investments was made taking into account the criteria listed above. Compliance with the related constraints was ensured by the monitoring carried out on an ongoing basis by the control functions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The assessment that issuers considered to be sustainable do not cause significant harm to other sustainable investment objectives was carried out on the basis of the Do No Significant Harm test (DNSH, developed internally by the Asset Manager), which, in line with regulatory recommendations, is based on the mandatory Principal Indicators of Adverse Impact (PAI, see the RTS to the SFDR). In particular, investments are considered to cause significant harm when they involve issuers that:

- do not publish data on Carbon Footprint, Carbon Intensity and Board Gender Diversity;
 - are involved in the fossil fuels sector or the controversial weapons sector;
 - are involved in very severe controversies related to compliance with the UN Global Compact and OECD requirements for multinational companies;
 - exceed strict threshold values (specifically identified by the Asset Manager based on a diversified sample of issuers worldwide) for any of the following PAI indicators: 2*, 3*, 5, 6*, 8, 9, 12 and 13;
 - exceed critical thresholds (specifically identified by the Asset Manager based on a diversified sample of issuers worldwide) for at least 4 of the following PAI indicators: 2*, 3*, 5, 6*, 7, 8, 9, 10, 11, 12 and 13.
-

Note *: it should be noted that, for the purposes of the DNSH test, absolute GHG emissions levels (PAI 1) are used to calculate PAIs 2 and 3; also, Carbon Footprint and GHG Intensity are calculated taking into account only Scope 1 and 2 emissions. It should also be noted that PAI 6 currently takes into account the sectoral classification provided by the provider Refinitiv as a proxy for the NACE classification required by the regulations.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-

corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please refer to the previous paragraph.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The alignment of sustainable investments with the OECD Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights is pursued through several investment selection and management criteria, explained above and consistent with the aforementioned guidelines. In particular:

- exclusions relating to controversial weapons, which apply to all investments;
- exclusions based on the DNSH principle, applied through the definition of threshold levels on PAI indicators;
- inclusions based on the identification of positive contributions to climate, social or environmental objectives;
- exclusions of environmental or social ratings that fall into the worst quartile of the rankings based on the data provided by specialized third party providers;
- application to equity investments of the voting rights policy, based on the third party provider (ISS) model, which takes into account specific ESG factors and refers to guidelines consistent with sustainable business practices on the environment, fair treatment of labour, non-discriminatory policies and protection of human rights, framed in initiatives such as those of the United Nations Environment Programme Finance Initiative (UNEP FI), United Nations Principles for Responsible Investment (UNPRI), United Nations Global Compact, Global Reporting Initiative (GRI), Carbon Principles, International Labour Organisation Conventions (ILO), CERES Principles, Global Sullivan Principles, MacBride Principles and the European Union Directives on social and environmental issues.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considered the principal adverse impacts on sustainability factors as follows. In general, the consideration of PAIs is based on the contribution of certain mitigating factors, such as:

1. value exclusions,
2. exclusions/limitations resulting from investing in sustainable issuers according to the SFDR,

3. the setting up of objectives for specific adverse impact indicators, chosen among those belonging to the Mandatory list in the RTS to the SFDR.

In particular:

1. from a value perspective, issuers involved in controversial weapons (connection to PAI 14), nuclear weapons, tobacco, gambling and thermal coal mining (connection to PAI 4) are excluded;
 2. investment in at least 21% of the financial product's AuM in sustainable issuers ensures that these issuers, by construction, pass the Good Governance and general E and S tests (detailed in the "sustainable investment" sections above) and the DNSH test (which takes into consideration all the 14 mandatory PAI, detailed in the "sustainable investment" sections above) while contributing positively to climate, environmental and social topics;
 3. objectives for specific mandatory adverse impact indicators:
 - a. PAI 4 (fossil fuels exposure): the adverse impact is mitigated through the limitation of the exposure to the fossil fuels sector, due to the exclusion of issuers with more than 30% of revenues from thermal coal mining.
 - b. PAI 14 (controversial weapons): the adverse impact is eliminated through the exclusion of issuers involved in controversial weapons.
 - c. PAI 16 (human rights violations): the adverse impact is mitigated through the exclusion of issuers sanctioned by the UN for human rights violations (see the "Strategy" sections below).
-

What were the top investments of this financial product?
