Objectives and Investment Policy

Investment Objective: The objective of the Fund is to provide an attractive rate of return over the period up to the Maturity Date. From the Maturity Date, the objective of the Fund will be to provide liquidity and current income, to the extent consistent with preservation of capital.

Main categories of financial instruments that are the object of investment:

Until the Maturity Date: the Fund will invest on a global basis mainly in a diversified portfolio consisting of Euro Money Market Instruments, Euro Debt Instruments and Non-Euro Debt Instruments in each case listed or traded on a Recognised Exchange with particular focus on investment in a diversified portfolio of corporate debt securities. The Fund may invest up to 100% of net assets in Euro Money Market Instruments and/or Euro Debt Instruments and/or Non-Euro Debt Instruments. The Fund may invest up to 100% of its net assets in securities/instruments of below investment grade, with a minimum Standard & Poor’s or Fitch ratings of B- or Moody’s rating of B3 at the time of purchase or which are un-rated at the time of purchase but, in the opinion of the Manager, of comparable quality. It is intended that the Euro Debt Instruments and Non-Euro Debt Instruments to be held by the Fund will have a maximum maturity consistent with the Maturity Date and the Maturity Period, decreasing to near zero as the Maturity Date and the Maturity Period approach. The Fund may invest up to 30% of its net assets in emerging markets, of which up to 10% of net assets could be concentrated in Russia. The Fund will maintain a low exposure to non-Euro denominated currencies.

After the Maturity Date and during the Maturity Period: the Fund will invest primarily in Euro Money Market Instruments, Euro Debt Instruments and/or Non-Euro Debt Instruments. Euro Money Market Instruments, Euro Debt Instruments and/or Non-Euro Debt Instruments will mainly be of investment grade or better at the time of investment or, if un-rated, will be, in the opinion of the Manager, of comparable quality. The Fund will not invest in equity or equity related securities.

The Fund may use Financial Derivative Instruments for (i) hedging and/or (ii) risk reduction; and/or (iii) investment purposes.

Redemption of Shares: You can ask the Fund to buy back your Shares on any business day, provided instructions are received before 1 p.m. (Irish time). Investors can ask for full or partial repayment of the Shares held. Please refer to the Prospectus for further dealing information.

Benchmark: The Fund does not aim to track the performance of a benchmark. Portfolio composition is determined based on active and discretionary investment decisions and choices driven by market conditions, within its investment objective.

Recommendation: This Fund is suitable for investors who can afford to set aside capital at least until the Maturity Date (30 December 2022).

Risk reward and Profile

The historical data used to calculate the synthetic risk indicator cannot provide a reliable indication about the future risk profile of the Fund.

The Fund has been classified in risk/reward class 2, because the annualized volatility of the weekly returns of the pro-forma asset mix over the last five years is equal to or greater than 0.5% and less than 2%.

The risk/reward category shown is not guaranteed to remain unchanged and the categorization of the Fund may shift over time. Please note, the lowest category on the indicator does not mean risk free.

Risks that are materially relevant to the Fund and which are not adequately captured in the risk-reward indicator:

Liquidity Risk: Where a significant level of investment is made in financial instruments which are by their nature sufficiently liquid, yet which may under certain circumstances have a relatively low level of liquidity, so as to have an impact on the level of liquidity risk of the Fund as a whole.

Credit Risk: The risk that the issuer of a debt instrument may default, in whole or in part, on its obligation to repay the full capital amount invested and/or the interest thereon.

Dividends may be paid out of the capital of the Fund. As a result capital will be eroded and distributions will be achieved by foregoing the potential for future capital growth and this cycle may continue until all capital is depleted.

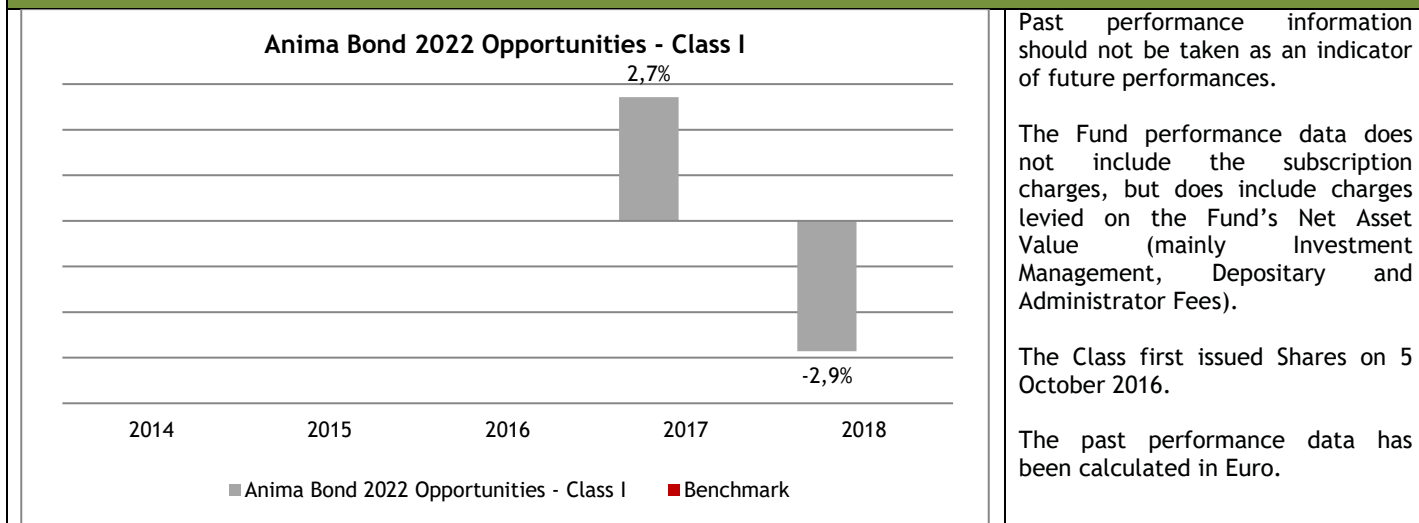

For further information on the risks related to the Fund please refer to its Fund Information Card and to the section of the Prospectus entitled “Risk Factors”.
