

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of this fund. You are advised to read it so you can make an informed decision about whether to invest.

ANIMA EDP Europe (the “Fund”), a sub-fund of ANIMA Funds plc
Class I Shares ISIN: IE00BDFDBR83 (the “Shares”). This Fund is managed by ANIMA SGR SpA, part of the ANIMA Holding S.p.A. group of companies.

Objectives and Investment Policy

This KIID should be read in conjunction with the sections entitled “Definitions” in the Prospectus and in the Fund Information Card.

Investment Objective: The objective of the Fund is to seek to provide capital appreciation and income.

Main categories of financial instruments that are the object of investment: The Fund, in order to achieve its Investment Objective, will implement the following “Strategies”:

1. Get exposure of up to 100% of its entire portfolio to a basket of European equity instruments (the “Strategy Portfolio”); and
2. Implement a “Systematic Options Strategy” in the following way:
 - o by selling short-term call options on an index representative of the European market (the “Index”) in order to generate additional income. A call option is a financial derivative contract giving the owner the right, but not the obligation, to buy a specified amount of an underlying security at a specified price within a specified time period; and
 - o by purchasing medium-term put options on the Index in order to limit the volatility of the Fund. A put option is a financial derivative contract giving the owner the right, but not the obligation, to sell a specified amount of an underlying security at a specified price within a specified time.

The Fund can implement the Strategies either directly or indirectly, through the conclusion of over-the-counter (“OTC”) Financial Derivative Instruments.

The Fund may hold up to 30% of its assets in deposits with credit institutions and hold cash for ancillary purposes.

The Fund is authorized to invest up to 100% of its net assets in transferable securities.

The Fund may enter into stock lending arrangements for efficient portfolio management purposes, and/or may use Financial Derivative Instruments for (i) hedging, (ii) risk reduction and/or (iii) investment purposes. The Fund may use financial leverage to increase the amount invested in financial instruments to twice the value of the Fund’s net asset value. This means that if there are changes in the prices of those financial instruments, the Fund could either gain or lose twice as much as it would gain or lose without using financial leverage.

Redemption of Shares: You can ask the Fund to buy back your Shares on any business day whether full or partial repayment of the Shares held is required. Please refer to the Prospectus for further dealing information.

Benchmark: The Fund does not aim to track the performance of a benchmark. Portfolio composition is determined based on active and discretionary investment decisions and choices.

Portfolio Transaction Costs: The Fund’s portfolio transaction costs are paid out of the assets of the Fund. These costs are in addition to the charges set out in the Charges section below and may have a material impact on the Fund’s performance.

Income: It is intended to distribute dividends to Shareholders of this Fund. Dividends may be paid out of the capital of the Fund. Please refer to the risks outlined below. Dividends, if declared, will be distributed on an annual basis.

Recommendation: This Fund is suitable for investors who are willing to set aside capital for more than 5 years.

Risk reward and Profile

The historical data used to calculate the synthetic risk indicator cannot provide a reliable indication about the future risk profile of the Fund.

The Fund has been classified in risk/reward class 5, because the internal annualized volatility limit is equal to or greater than 10% and less than 15%.

The risk/reward category shown is not guaranteed to remain unchanged and the categorization of the Fund may shift over time. Please note, the lowest category on the indicator does not mean risk free.

Risks that are materially relevant to the Fund and which are not adequately captured in the risk-reward indicator:

Risk associated with investing in derivatives: The impact of financial techniques such as derivatives contracts on the

Fund’s risk profile where such techniques are used to a material degree to obtain, increase or reduce exposure to underlying assets. Derivative contracts can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund.

Counterparty Risk: The risk that counterparty will not live up to its contractual obligations, where the Fund is backed by a guarantee from a third party, or where its investment exposure is obtained to a material degree through one or more contracts with a counterparty.

Credit Risk: The risk that the issuer of a debt instrument may default, in whole or in part, on its obligation to repay the full capital amount invested and/or the interest thereon.

Dividends may be paid out of the capital of the Fund. As a result capital will be eroded and distributions will be achieved by foregoing the potential for future capital growth and this cycle may continue until all capital is depleted.

For further information on the risks related to the Fund please refer to its Fund Information Card and to the section of the Prospectus entitled “Risk Factors”.
