

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of this fund. You are advised to read it so you can make an informed decision about whether to invest.

ANIMA Hybrid Bond (the “Fund”), a sub-fund of ANIMA Funds plc
I Class Shares ISIN: IE00BVRZB019 (the “Shares”). The Fund has appointed ANIMA SGR SpA, as its UCITS management company (the “Manager”), part of the ANIMA Holding S.p.A. group of companies.

Objectives and Investment Policy

Investment Objective: The objective of the Fund is to seek to provide an attractive rate of return. The Fund is “actively managed”, it means that the Manager has discretion over the composition of its portfolio.

Main categories of financial instruments that are the object of investment: The Fund will invest globally (including in emerging markets) in fixed and/or floating rate transferable debt securities of all types including, but not limited to, corporate debt securities (including hybrid bonds, convertible bonds and exchangeable bonds), bonds and notes issued by sovereign, government agencies and/or supranational entities, and commercial paper. It is expected that a majority of the Fund’s net assets (and up to 100% of its entire portfolio) will be invested in a diversified portfolio of hybrid bonds. The Fund may invest in money market instruments. The debt securities and money market instruments in which the Fund invests will mainly be listed or traded on any Recognised Exchange and the majority will be of investment grade at the time of purchase or, if unrated, which are in the opinion of the Manager, of comparable quality, and may be denominated in any currency. The Fund’s exposure to non-Euro currencies will generally be hedged, to maintain a low exposure to non-Euro currencies. The Fund may use Financial Derivative Instruments for (i) hedging, (ii) risk reduction and/or (iii) investment purposes. The Fund may use financial leverage to increase the amount invested in financial instruments to twice the value of the Fund’s net asset value. This means that if there are changes in the prices of the financial instruments the Fund could either

gain or lose twice as much as it would gain or lose without using financial leverage.

Redemption of Shares: You can ask the Fund to buy back your Shares on any business day whether full or partial repayment of the Shares held is required. Please refer to the Prospectus for further dealing information.

Benchmark: means 75% ICE BofAML Global Hybrid Non-Financial Corporate Index (euro hedged); 15% ICE BofAML Global Hybrid Non-Financial High Yield Index (euro hedged); 10% Bloomberg Barclays Euro Treasury Bills in EUR. The Fund does not aim to replicate the composition of the Benchmark. The Fund also invests in securities which are not included in the indices or present in different proportions.

Degree of discretion with respect to the benchmark: Significant.

Income: No dividend is payable on the Shares. Income earned by the Fund will be retained by the Fund and will be reflected in the value of your Shares.

Recommendation: This Fund is suitable for investors who are willing to set aside capital for up to 5 years.

Risk reward and Profile

The historical data used to calculate the synthetic risk indicator cannot provide a reliable indication about the future risk profile of the Fund.

The fund has been classified in risk/reward class 3 because the annualized volatility of the weekly returns of the Class over the last five years (estimated using the returns of the benchmark until the date of availability of the Fund’s returns) is equal to or greater than 2% and less than 5%.

The risk/reward category shown is not guaranteed to remain unchanged and the categorization of the Fund may shift over time. Please note, the lowest category on the indicator does not mean risk free.

Risks that are materially relevant to the Fund and which are not adequately captured in the risk-reward indicator:

Credit Risk: The risk that the issuer of a debt instrument may default, in whole or in part, on its obligation to repay the full capital amount invested and/or the interest thereon.

Liquidity Risk: Where a significant level of investment is made in financial instruments which are by their nature sufficiently liquid, yet which may under certain circumstances have a relatively low level of liquidity, so as to have an impact on the level of liquidity risk of the Fund as a whole.

Dividends may be paid out of the capital of the Fund. As a result capital will be eroded and distributions will be achieved by foregoing the potential for future capital growth and this cycle may continue until all capital is depleted.

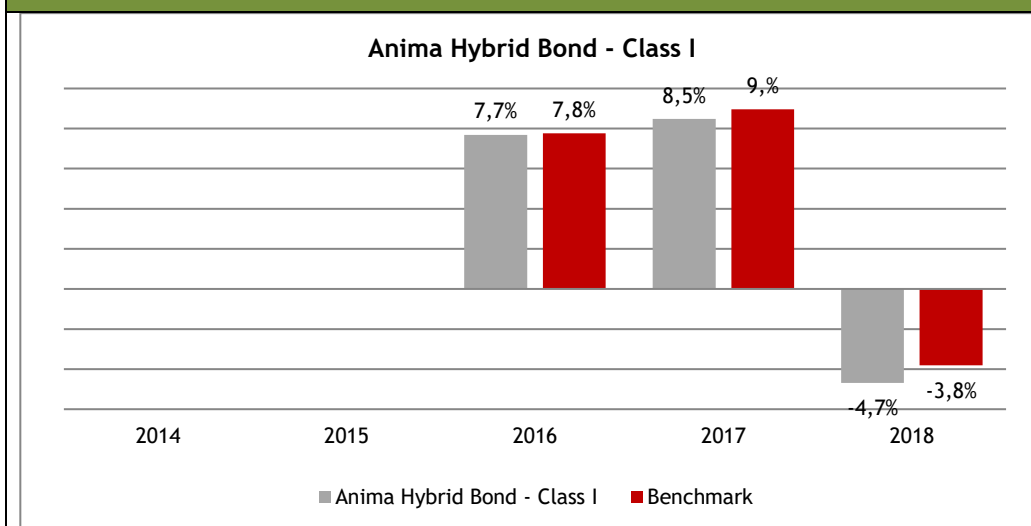

For further information on the risks related to the Fund please refer to its Fund Information Card and to the section of the Prospectus entitled “Risk Factors”.
