

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of this fund. You are advised to read it so you can make an informed decision about whether to invest.

ANIMA Solution 2022-III (the “Fund”), a sub-fund of ANIMA Funds plc
I Class Shares ISIN: IE00BD0FK499 (the “Shares”). The Fund has appointed ANIMA SGR SpA, as its UCITS
management company (the “Manager”), part of the ANIMA Holding S.p.A. group of companies.

Objectives and Investment Policy

Investment Objective: Until the Maturity Date, the objective of the Fund is (i) to seek to provide investors with distributions at such time as ANIMA Funds plc may determine; and (ii) to seek to provide investors with capital appreciation. From the Maturity Date, the objective of the Fund will be to provide liquidity and current income, to the extent consistent with preservation of capital.

The Fund is actively managed without reference to any benchmark.

Main categories of financial instruments that are the object of investment:

Until the Maturity Date: the Fund will invest on a global basis mainly in a diversified portfolio consisting of Money Market Instruments, Debt Instruments and Equity Instruments in each case listed or traded on a Recognised Exchange with particular focus on investment in a diversified portfolio of government and corporate debt securities of both investment grade and high yield, and in a diversified portfolio of Collective Investment Schemes. The Fund may invest up to 100% of net assets in Money Market Instruments and/or Debt Instruments and/or Equity Instruments and/or Collective Investment Schemes. The Fund may invest up to 45% of its net assets in securities/instruments of below investment grade or which are un-rated at the time of purchase. Where an instrument ceases to be rated or its rating is reduced to below investment grade, the Investment Manager will consider such event in determining whether the Fund should continue to hold the security. The Manager will use a proprietary allocation model to allocate investments in two separate risk-rated groups of Collective Investment Schemes, one group having what the Investment Manager considers to be a higher risk/return profile (“Satellite”) and the other having a low risk/return profile (“Core”).

After the Maturity Date and during the Maturity Period: the Fund will invest primarily in Money Market Instruments and Debt Instruments. Money Market Instruments and Debt Instruments will mainly be of investment grade or better at the time of investment or, if un-rated, will be, in the opinion of the Investment Manager, of comparable quality. The Fund will not invest in Equity Instruments (directly or indirectly through Collective Investment Schemes) or in Financial Derivative Instruments.

The Fund may use Financial Derivative Instruments for (i) hedging and/or (ii) risk reduction.

Redemption of Shares: You can ask the Fund to buy back your Shares on any Thursday (or if Thursday is not a business day, on the next following business day), provided instructions are received before 5 p.m. (Irish time) two business days before. Investors can ask for full or partial repayment of the Shares held. Please refer to the Prospectus for further dealing information.

Benchmark: The Fund does not aim to track the performance of a benchmark. Portfolio composition is determined based on active and discretionary investment decisions and choices driven by market conditions, within the Fund’s investment objective.

Income: The Directors of ANIMA Funds plc may decide to declare distributions which may be paid out of the capital of the Fund. Please refer to the risks outlined below. Distributions, if declared, will be distributed on an annual basis.

Recommendation: This Fund is suitable for investors who can afford to set aside capital at least until the Maturity Date (22 November 2022).

Risk reward and Profile

The historical data used to calculate the synthetic risk indicator cannot provide a reliable indication about the future risk profile of the Fund.

The Fund has been classified in risk/reward class 4, because the annualized volatility of the weekly returns of its pro-forma asset mix over the last five years is equal to or greater than 5% and less than 10%.

The risk/reward category shown is not guaranteed to remain unchanged and the categorization of the Fund may shift over

time. Please note, the lowest category on the indicator does not mean risk free.

Risks that are materially relevant to the Fund and which are not adequately captured in the risk-reward indicator:

Credit Risk: The risk that the issuer of a debt instrument may default, in whole or in part, on its obligation to repay the full capital amount invested and/or the interest thereon.

Dividends may be paid out of the capital of the Fund. As a result capital will be eroded and distributions will be achieved by foregoing the potential for future capital growth and this cycle may continue until all capital is depleted.

For further information on the risks related to the Fund please refer to its Fund Information Card and to the section of the Prospectus entitled “Risk Factors”.
