Investment Objective

The objective of the Fund is to seek medium-term capital appreciation, with low to medium volatility.

Investment Policy

The Fund seeks to achieve its objective by investing through Multi-Manager, Multi-Strategy and Multi-Asset Class approaches.

The Fund is actively managed without reference to any benchmark meaning that the Manager has full discretion over the composition of the Fund's portfolio, subject to the stated investment objective and policy.

The Fund will invest in a diversified portfolio of Collective Investment Schemes which invest on a global and/or regional basis across market neutral (strategy that seeks to profit from both increasing and decreasing prices in one or more markets, while attempting to avoid some specific form of market risk), event driven (strategy that attempts to take advantage of events such as mergers and restructurings that can result in the short-term mispricing of a company's stock), global macro (strategy that bases a fund's holdings, such as long and short positions in various equity, fixed income, currency, commodities and futures markets, primarily on the overall economic and political views of various countries, or their macroeconomic principles) and flexible/absolute return (strategy that seeks to make positive returns in any market condition) strategies.

The Fund may also invest in Collective Investment Schemes which invest in money markets instruments and/or short term bonds.

Any investment in an underlying Collective Investment Scheme in accordance with the rules outlined below may give rise to an indirect exposure to a wide range of instruments and markets (which may be emerging markets) including, but not limited to, global equities, both public (listed on securities markets and exchanges around the world) and equity-related instruments, such as preferred stocks, warrants and convertible securities; fixed and/or floating rate income and other debt-related instruments, whether or not investment grade, including debt securities and bonds of governments, their agents and instrumentalities, commercial paper issued by international companies and banker's acceptances and certificates of deposit issued by banks and credit institutions; currencies; real estate; infrastructure; commodities; and derivative instruments. In addition, underlying Collective Investments Schemes may utilise both over the counter and exchange traded instruments (including derivative instruments such as swaps, futures, options and forward agreements), trade on margin and engage in synthetic short sales. Any such exposure will not be taken into account for the purposes of calculating compliance with the regulatory limits applicable to direct exposure of this nature.

The Fund's entire portfolio may consist of Collective Investment Schemes. The Fund may invest its entire portfolio in Collective Investments Schemes managed by any company that is part of the ANIMA Holding S.p.A. group of companies. The Collective Investment Schemes in which the Fund will invest will be regulated, open-ended (or closed-ended if listed on a Recognised Exchange) and may be leveraged and / or unleveraged. Collective Investment Schemes in which the Fund may invest will be domiciled in Ireland, in a Member State of the EEA, in the United States of America, in the United Kingdom, in Jersey, in Guernsey or in the Isle of Man and, subject to the prior approval of the Central Bank and disclosure in an updated Fund Information Card, in certain other jurisdictions. **The Fund cannot invest in another Fund of the Company which is invested in another Fund of the Company. More detail in relation to such investments can be found under the heading "Investment in Collective Investment Schemes" in the main Prospectus.**

The underlying Collective Investment Schemes will be selected on the basis of quantitative and qualitative analysis:

- a) the quantitative analysis will be implemented using investment analysis tools provided by third party data providers. Such tools provide for the collection and collation of risk and past performance data on the underlying Collective Investment Schemes thus aiming to reduce the investable universe, and: (i) for long only strategies, the quantitative analysis will be carried out by review of similar asset class type Collective Investment Schemes, analysing the asset classes with a view to selecting those, which in the opinion of the Manager, present an investment opportunity on the basis of risk adjusted return analysis and other evaluation techniques such as, for example, tracking errors compared to the relevant underlying Collective Investment Schemes benchmark; (ii) for flexible strategies and/or absolute return strategies, the quantitative analysis will review the absolute performance (evaluating the ability to generate positive performance in any market condition) and risk (evaluating the volatility and the maximum drawdown) of the relevant Collective Investment Scheme. The selected Collective Investment Schemes are, as an example, Collective Investment Schemes able to reach their targets with persistency and consistency over time (1, 3 and 5 years analysis);

- b) the qualitative analysis will be aimed at identifying and analysing the relevant investment manager, its team, key people, the investment style, the investment process and philosophy, the credit rating of the transfer agent of the underlying Collective Investment Scheme and the risk management control function.

The due diligence process is an ongoing process, both for new Collective Investment Schemes to be selected or for Collective Investment Schemes already invested in the Fund's portfolio.

As a result of its investment in Collective Investment Schemes, the Fund may be liable to pay subscription, redemption, management, performance, distribution, administration and/or custody fees in respect of the Collective Investment Schemes in which it invests. Annual management fees will be up to 3.00% of the underlying Collective Investment Schemes average net asset value and performance fees will be up to 20.00% of the average NAV and will already have been accounted for in the published NAV of such underlying Collective Investment Schemes.

The Fund shall have the ability to invest in or hold ancillary liquid assets which are listed and/or traded on a Recognised Exchange and may be held in the form of money market instruments such as commercial paper, notes, bills, deposits, certificates of deposit and cash, and other liquid financial instruments issued by governments or by rated corporate issuers such as bonds, or Collective Investment Schemes which invest primarily in money market instruments.

The Fund may utilise future and forward currency contracts to attempt to hedge or reduce the overall risk of its investments and/or to manage exchange rate risk. The Fund may invest in listed futures contracts on bonds and/or equity securities. Forward currency contracts may be used to hedge the currency exposures of the Fund to instruments denominated in a currency other than the Base Currency. Further details are set out in the Prospectus under the section headed 'Efficient Portfolio Management' and 'Appendix V-Financial Derivative Instruments'. Leverage resulting from the use of derivatives will not exceed 100% of the net asset value of the Fund. The commitment approach is used to calculate the global exposure of the Fund.

Distributions

It is not planned to distribute income accruing to the Fund. All income is to be reinvested.

Application for Shares

The Directors in their absolute discretion, and at any time, may determine to restrict subscriptions into the Fund if they believe that the ability of the Fund to achieve its investment objective may be compromised. If the Directors determine that such a restriction is appropriate they will notify the Fund's Shareholders that no further subscriptions or conversions into the Fund will be accepted until such time as the Directors, in their absolute discretion, determine otherwise.

Class X Shares will be issued following receipt of an application for Class X Shares. Class X Shareholders may not convert their Class X Shares into Shares of any other Class of the Fund, or into any other Class of Shares of another Fund of the Company, apart from Class X Shares.

Class T Shares will be issued following receipt of an application for Class T Shares. Class T Shareholders may not convert their Class T Shares into Shares of any other Class of the Fund, or into any other Class of Shares of another Fund of the Company, apart from Class T Shares.

Distribution Fee – Class X

A distribution fee in respect of Class X Shares will accrue on each Dealing Day and is payable to the Distributor(s) quarterly in arrears out of the assets attributable to Class X Shares at a rate per annum of the Net Asset Value of Class X Shares, as detailed above. The distribution fee is levied for services rendered to Class X Shareholders in connection with advice regarding the suitability of an investment in the Fund in light of the Shareholder’s needs, processing Share dealing requests, and generally responding to Shareholder queries relating to such services. The services are provided directly by the Distributors to all Shareholders of Class X Shares and each Shareholder of Class X Shares may avail of such services.

Risk Factors

Investments in Other Collective Investment Schemes

The Fund may purchase shares or units of other Collective Investment Schemes to the extent that such purchases are consistent with such Fund’s investment objective and restrictions. As a shareholder of another Collective Investment Scheme, the Fund would bear, along with other shareholders, its pro rata portion of the other Collective Investment Schemes expenses, including management fees. These expenses would be in addition to the expenses that the Fund would bear in connection with its own operations.

The Fund, which invests in other Collective Investment Schemes, is indirectly exposed to all the risks applicable to an investment in the other Collective Investment Schemes. Although intended to protect capital and enhance returns in varying market conditions, certain trading and hedging techniques which may be employed by the other Collective Investment Schemes such as leverage, short selling and investments in options or commodity or financial futures could increase the adverse impact to which the other Collective Investment Schemes may be subject. Furthermore, the Collective Investment Schemes may take undesirable tax positions.

There can be no assurance that the Manager can successfully select suitable collective investment schemes or that the managers of the other Collective Investment Schemes selected will be successful in their investment strategies or will manage the Collective Investment Schemes in the manner expected by the Manager. The Manager will not typically have control over the activities of any Collective Investment Schemes invested in by the Fund."
